

"Yes, I'll make it. The truck runs smoothly and dependably because I use nothing but Imperial Polarine for lubrication and Imperial Premier Gasoline for fuel. That's the unbeatable combination which keeps the mail on time."

Accurate Thorough Lubrication

IMPERIAL Polarine gives thorough lubrication under every operating condition. Cars and trucks give longer, cheaper service when lubricated with Imperial Polarine.

Imperial Polarine will not break up or run thin under continued operation. It reduces friction to a minimum by maintaining a coating of oil on every wearing surface. It seals all the power behind the piston by establishing a perfect piston-to-cylinder seal.

Learn which of the three grades described below is best suited for your car from the Imperial Polarine Chart of Recommendations, which is on display wherever Imperial Polarine is sold.

Sold in one-gallon and four-gallon sealed cans, half-barrels and barrels, also in 12½-gallon steel kegs, by dealers everywhere.

TWENTY-ONE ENTRIES FOR THE CONTEST.

First Egg-Laying Contest in New Brunswick—Will be at Dom. Experimental Station.

Twenty-one entries for the new Brunswick Egg-Laying Contest have been received by A. C. McCulloch,

Superintendent, of the New Brunswick Department of Agriculture.

This contest will be held at the experimental station, Fredericton, Fredericton, and will begin November 1st. Each entry is to consist of ten birds. The contest will extend over a period of one year.

This is the first contest of its kind

which has been allotted to New Brunswick, previously poultry raisers of this province, entered their birds in the Maritime Provinces Egg-Laying Contest at Nappan, N. S. New Brunswick pens there made fine showing.

The entries which have been received so far have been well distributed. All sections of the province are represented.

VOCATIONAL EDUCATION REVIVAL OF INTEREST

Opportunities for Carleton County Residents.

Interest in rural education is steadily growing. The country life movement, which for many years has barely managed to keep alive and which has always been more or less confined to a discussion of theories growing out of the publication of statistics relative to our rural population, now seems to be gathering force. This revival of interest in rural affairs is widespread in Canada and in the United States, and is manifesting itself generally in improved methods of production, better business management, and a desire on the part of the farming population for greater participation in the affairs of the country at large. With this rural awakening there is bound to come a greater appreciation of the value of education. Aware of this, it was but appropriate that Carleton County, the leading agricultural section of the Province of New Brunswick, was the first county of the province to institute and put into operation a school whose aim it is to cater especially to the youth of the rural districts, giving instruction in Agriculture and Home making. The Carleton County Vocational School, in its work with young men and young women, keeps in mind to lay the foundation for their success in farming as an industry—an industry in which woman, trained as an efficient home maker, plays an important part—and at the same time to train them, in so far as possible to become worthy citizens of the community in which they may reside. In brief, the school's purpose is to improve farm and home practices by instructing the boys in correct agricultural methods and the girls in home making, to assist them in demonstrating these methods for the improvement of the farm and home; to aid in the development of co-operation in the family and in the community; to create a more favorable attitude towards the business of farming and home making by encouraging property ownership and the feeling of partnership; and to make rural life more attractive by providing organization which tends to diminish isolation and develop leadership.

The school offers, free to the residents of Carleton county, between the ages of 14 to 25, a two year course in Agriculture and a one year course in Home Making and Domestic Science. Are you as parents satisfied to sit back and remark "what was good enough for us is good enough for the children"? And you as young men and young women, are you going to allow this opportunity of securing a free, useful education in your chosen vocation to pass unchallenged? When we can keep our best on the land and have them properly trained, then agricultural and community advancement will be well abreast of the times, and farming will assume the attractiveness it should have.

A copy of the Carleton County Vocational School calendar will be mailed to any interested person addressing R. W. Maxwell, Director, Woodstock, N. B.

SIXTY PER CENT APPLE CROP FOR THIS SEASON.

Dry Weather Caused Heavy "Drop" of Fruit.

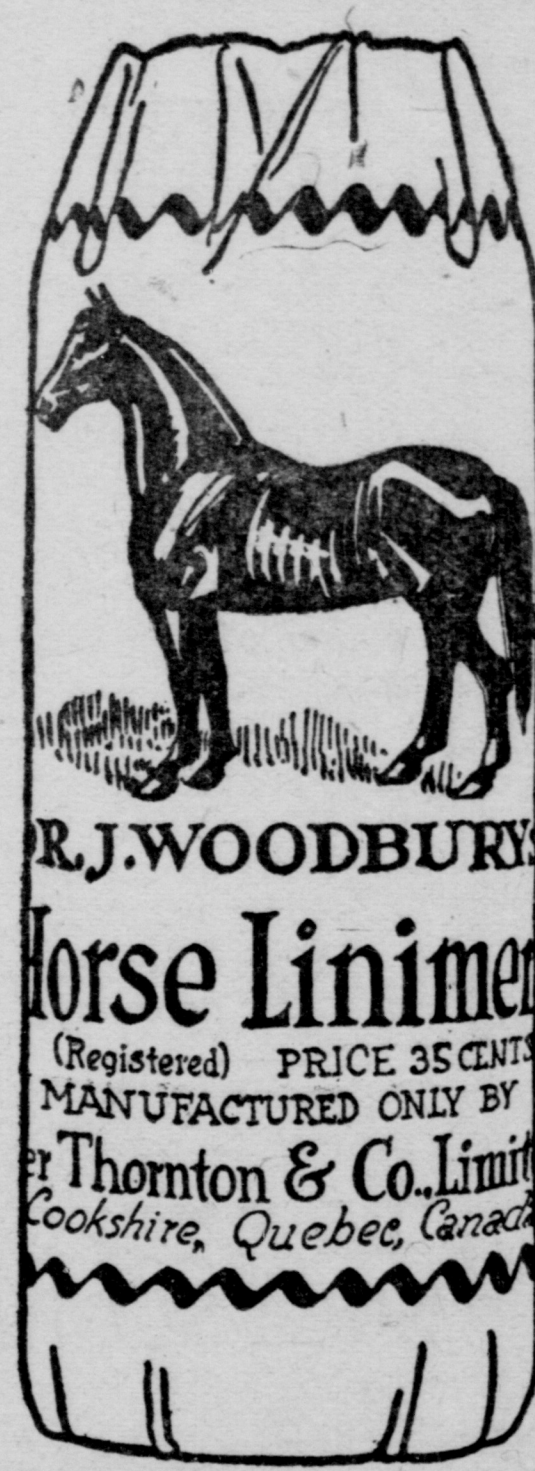

New Brunswick is not going to experience two big apple crops in succession. That was not expected last season when a first rate crop of almost all varieties was obtained, as two remarkable good years seldom follow one another, but the crop is now far enough advanced for a rough estimate to be made. A crop sixty per cent of that of last year is what is expected. At the first of the season it promised much better, but the protracted period of dry weather in the late spring and early summer caused an abnormally heavy "drop." Young fruit fell to the ground in huge quantities.

In 1919 the export of apples from the St. John Valley reached proportions which had not been reached before, Montreal taking the bulk of the fruit at prices superior to those obtained by any other apples. It is anticipated that Montreal again will take a large proportion of the crop. Prices are expected to be firm. Of the different varieties Alexanders and Fameuse will show the greatest reduction. Early apples will not show the reduction to the same degree as the later ones. Duchess and similar varieties form the bulk of the early apples.

Woodstock Provincial Exhibition, September 12-17.

PROVE THIS YOURSELF.

Cereals served with Sanitary Dairy milk are far more tempting than when common milk is used. The rich, creamy quality of our milk is what distinguishes it from other kinds. Order Sanitary Dairy Milk for tomorrow's cereal and understand why it is superior although no higher in price.

Every Farmer and Horseman Should Have This Liniment

It means many a dollar saved in time and work; because it quickly makes lame, crippled horses sound as a dollar. No matter what the trouble—whether it is an old Strain, or Sore—a Spavin, Cracked Hoof, Curb or Splint—a fresh Cut or Bruise—an Enlargement or Bunch—you can get rid of it right off by treating the animal with

Dr. J. Woodbury's HORSE LINIMENT AND CONDITION POWDERS

Used internally, the Liniment is a sure acting remedy for Colic, Kidney Trouble, Coughs, Colds and Heaves; while the Powders tone up the general system and help the horse to improve.

Hawshaw, N.B.

"You may put me on your list of users of Dr. J. Woodbury's Horse Liniment. I have found them to be the best on the market and am never without your Liniment and Condition Powders in my stable."

G. E. CRONKHITE, Horseman.

Your Druggist or General Store will have these reliable remedies. Get a package of each, so you will have the right thing in case of sickness or accident to your stock.

Pink Lingerie Persists.

Pink and blue in some sort of combination are increasingly used for lingerie. Efforts are made from time to time to introduce some other colors for lingerie. Indeed, we have other colors, but none others persist. Blue embroidery on pink is the usual method of putting the two tones together.

There is seldom pink embroidery on blue.

BROTHERS RELEASED.

United States Commissioner Read found that the brothers, Frank and Edon Lank, were not guilty of infringement of the Volstead Prohibition Act when they moored their motor boat,

containing a cargo of liquor, at the wharf of Eastport recently. The Lank brothers, who had been taken into custody, were accordingly released. Commissioner Read found that, since they were taking the liquor to their home in Canada and not attempting to pass it to the United States, they were innocent of any offence.

A Corn?

Why, a touch will end it!

A corn today is needless, and millions of people know it.

Years ago nearly every woman had them. Now women who know Blue-jay never suffer corns.

Ask your own friends.

Blue-jay comes in liquid form or plaster. One applies it in a jiffy—by a touch.

The pain stops. In a little time the whole corn loosens and comes out.

The proof is everywhere. Tens of millions of corns have been ended in this simple, easy way.

This is the scientific method—the modern way of dealing with a corn. It was created by this world-famed laboratory, which every physician respects.

One test will solve all your corn problems. Make it tonight. Buy Blue-jay from your druggist.
