

FAMILY BANKING

IN keeping with its practice of extending to its customers every proper banking accommodation, the Bank of Montreal directs attention to the fact that many husbands and wives maintain Joint Accounts with this institution—a convenient arrangement whereby either may deposit or withdraw as the occasion demands.

Chequing Accounts for the purpose of dealing with household accounts may also be opened.

It is the aim of the Bank to be helpful in matters financial.

MR. ACRES' REPORT ON GRAND FALLS

The Fredericton Gleaner makes a Telegraph Journal editorial on the employment of Mr. Acres to report on Grand Falls the subject of an editorial of which this is the concluding half:

The Telegraph of a quite recent period supported the policy of the Provincial Government to spend millions to develop Musquash under the guidance of a railway engineer who had, as a matter of record of days not long since, catered to the interests of Grit politicians and their associates in the construction of the Transcontinental Railway. The Journal, which was then the creature of the St. John Power Company, in its owners' interests opposed the legislation, opposed the Government which proceeded under the Act—threw every possible stumbling block in the way. In the struggle something happened over night through which the St. John morning newspapers, representing conflicting interests, were reorganized and combined in the interests of the St. John Power Company and other United States interests—it was thought at the time in the interests of the Provincial Government; but the friends and accessories of the Government were apparently and notably quite incapable of participating in a reasonably large-size deal. "If I am the dominant factor in a Government I will have my way; my views and my ambitions and my principles will not be ignored and defeated. On the other side, "We are the dominating influences in the St. John newspaper field; and we think—or we would not have invested—that through our reorganization we have influence sufficient to make you dance to our tune. The interests of the St. John Power Company must prevail; and particularly at this time, when your friends are strangely financially unequal to the occasion." There is the situation in this province at the present time. And if the St. John Power Company is to prevail there is to be no further hydro development in New Brunswick.

During the evening a delicious oyster stew was served in honor of Ross Woodman, one of our classmates, who is leaving Woodstock to return home, after a stay of several months with us. We will miss him as he was a great help to us by his regular attendance, strict attention and helpful suggestions on the lessons. After the inner man was satisfied, the glasses were filled and the following toasts were proposed and responded to:

PREPARING STOCK FOR WINTER PRODUCTION (Experimental Farms Note)

It is high time to think of preparations for the winter. The houses should be thoroughly disinfected and lime washed; leaky roofs, broken glass, torn cottons and cracks in the walls mended and everything put into Al shape before the pullets are brought in from the range.

This should be done sufficiently early so that the pullets will not receive a check. When they are brought in conditions should be made as much as possible as they were when on range; that is, the houses should be kept as open as possible so that the pullets will not suffer from the confinement—as no doubt many of them have been used to roosting in the trees.

Feed scratch grain sparingly so as to keep the birds active and give them all the green feed you can get them to eat. If a variety of green feed is used and it is given in various forms the birds can be induced to eat more of it than if only one kind is used. Sprouted oats, chopped clover, rape, cabbage or anything in the way of green feed that will prompt the birds should be given them. It may be used both separately and chopped up and mixed in a moist mash.

Unless care is taken when the birds are put in, to feed sparingly with grain and heavily with green feed they are liable to become sluggish; if any tendency to this is noticed Epsom salts should be freely used, about a pound to 100 birds.

The following methods of feeding have given good results:

A hopper of dry mash composed of equal parts bran, middlings, corn meal and oat chop and half part tank age is kept before the birds at all times, as is also water, grit, oyster shell and charcoal. When possible milk is also supplied. In the morning the birds are given a very light feed of scratch grain scattered in the litter, green feed is also supplied, at noon a moist mash is given in which is mixed a goodly proportion of chopped greens, at night a full feed of scratch is fed.

Where lights are used—and they add greatly to the early winter production—an extra feed may be worked in.

BACK ACHED TERRIBLY

Mrs. McMahon Tells How She Found Relief by Taking Lydia E. Pinkham's Vegetable Compound

Chatham, Ont.—"I took Lydia E. Pinkham's Vegetable Compound for a run-down condition after the birth of my baby boy. I had terrible pains and backache, and was tired and weak, not fit to do my work and care for my three little children. One day I received your little book and read it, and gave up taking the medicine I had and began taking the Vegetable Compound. I feel much better now and am not ashamed to tell what it has done for me. I recommend it to any woman I think feels as I do."

—Mrs. J. R. McMAHON, 153 Harvey St., Chatham, Ont.

Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has for nearly fifty years been restoring sick, ailing women to health and strength. It relieves the troubles which cause such symptoms as backache, painful periods, irregularities, tired, worn-out feelings and nervousness. This is shown again and again by such letters as Mrs. McMahon writes, as well as by one woman telling another. These women know, and are willing to tell others, what it did for them; therefore, it is surely worth your trial.

Women who suffer should write to the Lydia E. Pinkham Medicine Co., Cobourg, Ontario, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women." c

A PLEASANT EVENING

On Thursday evening, Nov. 1st, the Men's class of the United Baptist church met together, forty strong, in the vestry of the church where a very pleasant and profitable evening was spent with their teacher, E. B. McLatchy, B. A. B. D.

During the evening a delicious oyster stew was served in honor of Ross Woodman, one of our classmates, who is leaving Woodstock to return home, after a stay of several months with us. We will miss him as he was a great help to us by his regular attendance, strict attention and helpful suggestions on the lessons.

After the inner man was satisfied, the glasses were filled and the following toasts were proposed and responded to:

The King—The National Anthem.

Our Church—Proposed by Deacon Burt responded to by E. B. McLatchy.

Our guest—Proposed by Perley Marsten, responded to by Ross Woodman.

Our town—Proposed by Ralph Brooks, responded to by Frank Hillman.

Our craftsman—Proposed by Fred Hillman, responded to by Frank Olmstead.

Our merchants—Proposed by Harold Hall, responded to by Clyde Watson.

Our auto dealers—Proposed by Brown Cronkite, responded to by B. Theo Marsten.

Our farmers—Proposed by Whitfield Shaw, responded to by Ellsmore Robinson.

Our railroads—Proposed by Douglas Faulkner, responded to by Bertram Johnston.

Our ladies—Proposed by Lee Clark, responded to by Percy Fillmore.

Our class—Proposed by B. B. Dykeman, responded to by Fred Sanborn.

The toastmaster also called on Fred Mooers, Harley Johnston, Maurice Craig, Duncan Simmons, Harry Bel-yea, George Little and others.

The eloquent speeches, and the earnestness of the speakers of the evening show that we have wonderful talents in the men of our class, all that they need is a chance for development, and we will soon have a large body of real live intelligent men to carry on our great work.

A very live committee of the class made the evening a very pleasant one for all, and all expressed themselves of having a wonderful and wholesome evening together.

A thought for today

Woodstock Amateurs Hold Meeting

The Woodstock Amateur Athletic Association held its election meeting last Wednesday night.

A large number of last year's members and many prospects were present. The absence of President and speed artist Smith was commented upon and all felt that he would be greatly missed by the association.

The meeting was called to order by Vice President Hayden and the annual election at once took place.

C. J. Jones, President; S. C. Heckbert, Vice President and G. Y. Jones, Secretary and Treasurer.

Two committees only were appointed:

Harry Estabrooks, D. W. Wallace, A. Sprague, R. R. Brown, Walter Hayden and G. (Tubby) McKinley, basketball committee. Frank (Sib) Balmain, Ross Smith, Russell McCloskey, Harold Hood, and Harry King the membership committee.

D. W. Wallace was again unanimously elected captain of the first team. The very competent (Fitz) Sprague was thrust into the management while Mr. Estabrooks was made Chief Referee and Coach.

The meeting then went into a general committee to discuss past mistakes and future prospects.

The financial showing was by no means a comparison to the year before when the season commenced with a balance of \$90.22.

BALANCE SHEET

Balance forward	\$90.22
37 Members	74.00
Gate Receipts	528.40
Incidentals	6.45
	699.07

Balls	\$27.79
Guarantees	415.00
Printing	22.35
Telephone & Telegrams	16.34
Electric Lights	28.40
Outside game losses	55.35
Suits	42.50
Refereeing two games	22.60
Incidental Expenses	24.10
Balance	44.64
	\$699.07

Twenty five dollars was, during the summer months donated for sports, which leaves a balance to start the winter of \$19.64 of which some has already been spent.

Two balls were purchased this year against three last year.

Printing, telegrams and telephoning amount to considerable, but are both necessary and worth it.

Our light bill was very light and a much larger one is to be looked for this season.

The item "Losses on outside games" represent times when our various teams played out of town and the guarantees were not sufficient to cover expenses.

The suits cost but were absolutely necessary for the self respect both of the teams and the club.

Hiring referees was an unexpected pleasure and it is unlikely that it will be necessary to do so this year.

Incidental expenses included lemons, gum, small repairs to the Armoury, sanctions and amateur cards, etc. A detailed account can be had by any member from the Secretary Treasurer.

It is plain that the association has stood on its own feet and can continue to do so if it receives the wholehearted support from the town people that it did last year.

Already plans are under way for games with our old friends, The Trojans, St. Stephen and U. N. B., while it is believed that some interesting local games could be arranged that would be worth watching.

The girls are to be admitted on same footing as the gentlemen so long as they adhere to the rules of the association.

No games can be arranged without the consent of the Basketball committee thus avoiding the confusion there was last year.

The Membership committee will not confine their attentions to the players alone, as was done last year, but will seek among the people in an effort to raise the necessary wherewithal to carry on.

The four teams will probably be the number this year. A first and intermediate boys team and a first and intermediate girls team.

New Mining Company

W. Ludlow Wise (formerly of Woodstock) Elery D. Howard and Charles D. Carpenter, Houlton Maine, Mrs. Eva Pike and Albert D. Wort of Woodstock, have been incorporated as the Fall Brook Mining and Development Company, Ltd., with capital stock of \$5000 and head office at Woodstock.

The president of this company is Manly Craig and the solicitor is F. C. Squires. The land is near the Mose McDonald farm, Rockwell Brook, Grafton, a short distance from Woodstock. The company has held the claim for 10 years. Copper lead and gold have been found on the claim. It is said that the assay showed two ounces of gold to the ton. They have 100 acres, and as the assay has been very encouraging, Mr. Craig will arrive here from Houlton this week to proceed with the development of the mine.

OYSTERS

REGAL FLOUR

NECESSITY HELPS INVENTION

Mr. Wye—I don't know where women acquire their extravagance in dress. Eve wasn't like that, you know.

Mrs. Wye—Of course not; there was only one man in the world, and she had him.

You Don't Begrudge the Fuel

The Kootenay is a range in which you may put your trust for years of economical service. The saving in coal bills is an evidence of its gratifying efficiency.

And every pound of fuel gives value in cooking and baking service. The Oven is so constructed that the heat completely surrounds it, and it is constructed of heat-retaining, rust-resisting Armco Iron, protected with tough porcelain enamel.

McClary's dealer will clearly show the economy and baking perfection of the Kootenay.

McClary's Kootenay

No Investment Looked Upon With Greater Favor

In England there is no investment looked upon with greater favor than those of life insurance company's stocks, and they are held as firmly in England, if not more so, than they are in Canada or the United States, and while the returns upon the stock in Great Britain are not usually as great as some of our Canadian companies are paying, the investors are thoroughly satisfied with the security.

Holders of Life Insurance Stock Should Feel Well Satisfied

There have been bank failures in Canada. Mortgage and Loan Corporations have failed. Fire Insurance Companies have not reaped great advantages.

Not One Dollar Loss Has There Been to Any Policy Holder Through the Failure of a Life Company in Canada

The offering to partake in this profitable opportunity will soon be withdrawn. Very seldom does one have the chance to buy shares in a "Life" company, and once sold, they are generally sold for all time, so profitable are they to the holders.

Write for descriptive booklet, giving full particulars of The Maritime Life Assurance Company shares as an investment, and other booklets giving information on the value of Life Insurance Companies Stocks.
