SECOND of the series dealing with the establishment of the BANK OF MONTREAL at representative points in CANADA and elsewhere

WHEN the Bank of Montreal opened its first office in Quebec 106 years ago, travel between Montreal and Quebec was mainly by stage coach, occupying three days in the journey. The difficulties and exigencies attending travel were such that funds were only conveyed between the two cities "at the first safe opportunity."

With the opening of this Quebec office, the Bank of Montreal introduced into Canada branch banking, one of the elements that has contributed to the remarkable elasticity of the Canadian banking system, winning for Dominion finance an enviable reputation in all parts of the world.

Of the Bank's 567 Branches, 83 are situated in the Province of Quebec.

The New Paige

Try to Match Its Performance or Its New Price

HERE'S the New Paige—unmatchable in performance and value. You cannot buy more sure ability on the road or delightful docility in traffic. So flexible is the big 70 h. p. Paige motor.

You cannot buy a more comfortable car, for Paige has the 131-inch wheelbase, the 5-foot spring suspension, the balance, that give utmost comfort.

Never Before So Fine a Paige

The big 70 h. p. Paige motor—with its silent, automatically adjusted timing chain—is the motor of the New Paige. Refined for even greater service. The clutch and transmission which made Paige so famously easy to handle are also retained with additional smoothness and efficiency in the New Paige.

Paige-Timken axles; ball-bearing steering spindles; the tremendous, unyielding frame—all of which added to Paige reputation for ruggedness—are found improved.

Here's What the New Paige Will Do

Think of what it means to have a car that will do 70 miles an hour. You can climb hills in high while others shift and stall—dash ahead of the crowd.

Think of what it means to have a car that takes you in unjolted comfort at good speed over roads which other cars hesitate to travel.

Think of having a motor so silent that you sometimes wonder whether it is running until the pressure of your foot brings instant response. So smooth that a pencil may be balanced on the radiator cap—so flexible that you can drive from 2 to 70 miles an hour in high gear.

New Low Prices Create New Value

Last year the Paige Phaeton cost \$3825 Windsor. Today, the New Paige—still the same big, powerful

quality car, refined in many ways, improved in style, bettered in performance—costs many hundreds of dollars less. You will be astonished when you inspect the New Paige and learn its low price to find you may now possess so fine a car so economically.

How Can We Do It?

How can we offer so much at such a price? The answer is simple! Three years ago our business was 15,000 cars a year. Now, with the Page-built Jewett, our capacity is 500 cars a day. The saving in overhead is important, as you can see. This saving is applied to bettering the Paige—and reducing the price.

An Exclusive Car

There are no smaller, cheaper Paige models. You need never explain which Paige you own.

Drive the New Paige. We'll be glad to have you. Telephone or call today for a demonstration. There's no obligation, of course.
