Why Ford Predominates

## Ford Resources

The Ford is the product of a self-made institution which, over a period of years, has provided dependable transportation for all peoples.

Recognizing the value of Ford transportation, these peoples have purchased Ford products in such volume that the sale of Ford cars and trucks equals the sales of all other makes combined.

As a result, the resources of Ford of Canada are now over \$20,000,000. These resources mean

ability to buy the best material at a minimum price.

They mean the ability to organize each process of production, from the purchase of materials to the completion of the finished car, on such a basis that every non-essential operation is eliminated. The economies thus accomplished are reflected in Ford prices which, always consistently low, are now the lowest in history. This is what Ford resources mean to you.
