NOTICE TO RED CROSS KNITTERS

For the further purposes of saving wool it has become necessary to shorten the length of service socks. At present our instructions read, 14 to 16 inches. The new length is 11 inches from top of sock to under heel. The reduction should be in the leg, and not in the ribbing. Socks already made up should not be altered. This does not affect Seamen's socks or seamen's long stockings.

THE hands that compound your prescription in this pharmacy vie in skill with those of the necromancer. But there is no mystery, and no magic in our success. It is based firmly upon a foundation of Reliability. Through the years, the physicians of this community—and their patients—have come to know that they can depend upon us. They know that every prescription is compounded precisely as directed; that only fresh, potent drugs are employed; and finally, that our price is invariably a fair one—neither too high for the service rendered, nor too low to assure the safety of competence and care.
