

The Passing Years

"Grow old along with me,
The best is yet to be,
The last of life, for which
The first was made".

Twenty-five Years Ago. From the Sentinel Files August 31st, 1917:

In the election held Monday the citizens decided by a large majority that the town of Woodstock must have pure water and that it was only to be procured through a filtration system. Good water had been found in the vicinity of Woodstock but in no case were the indications favorable to a sufficient quantity. If the Saint John river supply must be used it will be absolutely necessary to make it pure.

A meeting was held in the town hall Wednesday evening to make plans for a field day in aid of the local patriotic societies. A. G. Bailey was in the chair and was named head of a committee to make arrangements. J. L. Ross and D. V. Storm were appointed to assist him. Raymond Jones had his arm broken while playing ball Monday evening. He is recovering as fast as can be expected.

Mrs. George Gibson, Miss Margaret Gibson, and Miss Irma Shaw have returned from a week's outing at Skiff Lake.

Miss Etta Alexander who has been waiting in Woodstock has gone to Fredericton where she will teach this term.

Forty-five years ago From the Sentinel Files August 28th, 1907:

A detachment of the 10th Woodstock Field Battery consisting of officers, 12 non-commissioned officers and men will leave here on September 4th to attend Field Artillery instruction and practice at Deseronto, Ontario. Six guns, 3 ammunition wagons etc., with horses and 35 men from "B" Battery will be available for this instruction.

The Methodist Church at Bloomfield was prettily decorated on Wednesday last when Miss Lily Idella, daughter of Mr. Charles Alterton, was married to Rev. R. H. Colpitts, Methodist minister of Robinson, Maine. The nuptial knot was tied by Rev. George A. Sellar, assisted by Revs. Leard and Dystant. The bride was attended by her cousin Miss Gertrude Tilley while the groom was supported by Mr. A. Delbert Alterton, brother of the bride. Mr. Frank Tilley and Mr. Judson Burr, Centerville were the ushers.

One of the finest young orchards of the county is that of William Currie of Richmond. It contains some 700 Wealthy trees. They have been set out only five years but have made a rapid growth. They are now bearing annually and have a healthy and thrifty appearance.

Mrs. B. H. Smith was painfully burned last Saturday afternoon on her cooking stove. In recovering from the fall she fell against the woodbox and was severely bruised. Fortunately neither burns nor bruises were serious.

Mrs. W. F. Smith and daughter, Miss Etta Smith returned from St. Andrews on Friday.

Mr. and Mrs. E. T. Mallory of Georgia left Friday for their home. They were accompanied by Mr. John Mallory of Jacksonville.

Could Reunion

The fifteenth re-union of the Gould family was held Saturday, August 15, at the Posterville Sand Beach, Posterville, N. B. A picnic dinner was enjoyed at noon by forty-one members of the family, and one guest. The president for the year, Mrs. Addie Graham, presided over the afternoon session, assisted by Mrs. Annie Gould, who was in charge of the program arrangements. Officers for the coming year are: George L. Gould, president; Charles H. Gould vice-president; and Grace Gould Farrell secretary. An interesting program of songs and readings followed. Bathing was enjoyed during the day, and a picnic supper served at 6 o'clock. The day closed with singing in chorus the hymn "God Be With You 'Till We Meet Again".

Those attending were:—Mr. and Mrs. George Gould, Mr. and Mrs. Charles Gould, Mrs. Jack Kimball and Geraldine, Mr. and Mrs. Grotte Gould and Lyndon, Mr. and Mrs. Alfred Howe, Gwen and Glenda, Mrs. Clarence Graham, Mr. Archie Gould, Glenna, Barbara, Byron, Wilfred, Christina and Waldina Gould, Archie and Charles Gould, Mr. and Mrs. Archie Cunningham, Mr. Eldon Gould, Mrs. Alton Farrell, Mrs. Annie Gould, Mr. and Mrs. John Higgs, Norman and Annie Higgs, Mr. and Mrs. Lester Wood, Norma Hanford, Keith, Leonard Wood, and Larry Malone, Mr. and Mrs. Charles Gould and Charlene, and Mr. Miller.

Summary Of Correspondence N.B. Game Laws Is Announced For N.B. Students

The summary of New Brunswick game laws for 1942, issued under authority of Hon. F. W. Pirie, minister of lands and mines, offers resident and non-resident hunters the opportunity to seek deer and certain game birds this fall.

Generally, an open season is provided for the hunting of deer in most of the province from Sept. 15 to Nov. 30; ruffed grouse (birch partridge) and spruce partridge, Oct. 1 to 31; ducks (other than eider) and geese, Sept. 15 to Dec. 15; eider ducks, Oct. 1 to Nov. 30, and woodcock and Wilson's or Jacksnipe, Oct. 1 to 31. Certain exceptions apply.

These exceptions are shown as follows:

Deer — On the islands of Grand Manan, Campobello and Deer Island, Charlotte County, bona fide residents are allowed to kill one deer during the open season, Oct. 15 to Nov. 15, whereas on the mainland two deer may be bagged.

Grouse and partridge—On Grand Manan, Campobello and Deer Island the season is from Oct. 15 to 31.

Ducks (other than eider) and geese — In Saint John County and that part of Charlotte County south of No. 1 Highway, including the islands of the Grand Manan group, the season is from Nov. 1 to Jan. 30.

Elder ducks—In Saint John County and that part of Charlotte County south of No. 1 Highway, the season is from Nov. 1 to Dec. 31.

Woodcock and Wilson's or Jacksnipe — In Victoria, Madawaska, Restigouche and Gloucester counties, the season is from Sept. 20 to Oct. 20.

All dates shown are inclusive. The daily bag limit for migratory game birds is 12 ducks (150 for season); five geese (40 for season); eight Wilson snipe (50 for season); eight woodcock (100 for season). A bag limit of 12 ruffed grouse may be retained by a person killing same not more than 15 days after the close of the open season.

There is no open season for Hungarian partridge, pheasants, wood duck and brant, Little Brown, sandhill and wading cranes, swans, curlew, greater and lesser yellow-legs, black-bellied and golden plover and all shore birds except Wilson's or Jacksnipe and woodcock, among birds, the bull moose and caribou. The regulations also point out, as usual, that the shooting of cow moose of any age and calf moose under the age of four years and with less than five points on one of its antlers, is prohibited at all times.

Bounties of \$3 are paid for wild cats and \$5 to residents for bears. The usual resident and non-resident licenses will be issued, with varying prices and limitations. Non-resident hunters may seek two deer and two bears under a special license costing \$10. The license to hunt game and migratory game birds will cost him \$15 as well.

A complimentary "free" license to hunt four bears in April, May and June is also provided for non-resident sportsmen, but they must be accompanied by a licensed guide.

Special regulations cover the attaching of a tin lock seal tag to the right foreleg of game animals to prove legal possession. The long list of general regulations and prohibitions also governs hunting and trapping in New Brunswick.

Conditions conducive to a successful season have been noted in the New Brunswick woods this year. Nesting has been good and large sized flocks have been the result. The count of singing of woodcock in territory where check is kept each year indicates that in some cases the figure is up 50 per cent and generally it is better, according to Lt. Col. H. H. Ritchie, chief game warden.

Britain is now producing twice as many tanks as in August 1941, three times as many as in February 1941, and five times as many as in August 1940.

MOUNT ALLISON UNIVERSITY

SACKVILLE, NEW BRUNSWICK

Dr. G. J. Trueman, President

Degree Courses in Arts, Science Home Economics, Music, Fine Arts.

Preparatory Courses to Law, Medicine, Theology, Dentistry.

Canadian Officers' Training Corps conducted during the school year.

Residence Opens Sept. 21

First Term Begins Sept. 23

For 1942-43 Calendar write to Dr. H. Tucker, Sackville, New Brunswick.

Fredericton, N. B., August 18, 1942 — High School Correspondence courses for ambitious boys and girls who are unable to attend a regular high school, but who are anxious to secure a high school education, are being offered by the New Brunswick Correspondence School, whose activities come under the direction of the provincial Department of Education.

In making the announcement today that there is still time to apply, Correspondence School officials stated that the Department of Education provides instruction by correspondence, at small expense, in the work of Grades 9, 10 and 11, leading up to the matriculation examinations. Those wishing full information and application forms are asked to write The New Brunswick Correspondence School, Normal School Building, Fredericton, N. B.

These home correspondence courses parallel the regular high school courses and are carried on by means of papers and instructions through competent staff is in charge of instruction and mailing.

These courses are for rural students; also for teachers who wish to gain superior license and who may prepare for examinations with Latin and Trigonometry courses; teachers of small high schools who wish a guide in their teaching; or over-age students for regular schools.

Reviewing results obtained by these courses, the provincial Department of Education, pointed out today that to date over 700 students have been enrolled. More than 100 certificates have been issued, many more before the beginning of the regular school year. Three out of five Grade XI students passed matriculations successfully this year, with two in first division. A St. Andrew's boy passed the St. Stephen's High School Grade X examinations. A Restigouche girl successfully passed Normal School Entrance papers. Many of the students from this Correspondence School are now teaching with local licenses.

It is pointed out also that the past summer one of the largest Summer school enrolments in the history of the province, with 150 students active during the summer months, completing the year's work or courses it is explained that students are enabled to work at their own rate. The smartest are not held back by the organization of the regular class room, while the slower students can match their speed to their ability.

"Such courses are helping our war effort in that it enables many boys to stay on the farm part time and still get an education, declared an educational official here today. "Most of our students attend a local school and are directed by the local teacher. Much credit should be given to these teachers for their unselfish work."

The latest British bombers, the Stirling, Halifax and Lancaster, carry heavier loads of bombs than any other bombers in service in the world. The Stirling can carry eight tons of bombs — much more than even the bomb load of the huge American Boeing Flying Fortress.

birds working.

The reason for hanging the lighting units six feet from the floor is partly to have them out of the way of the attendant and so that the light will strike the birds on the roosts. If the reflectors are deeper than four inches this latter object will be defeated. The under surface of the reflector must be bright and shiny so as to secure the sufficient light intensity at floor level, so lamp bulbs and reflectors should be kept free of dust. Whitewashing walls and ceilings will also be helpful.

The purpose of placing the lighting units ten feet apart is to secure a uniform and evenly lighted floor. If the units are spaced farther apart the result will be lighted islands in a sea of twilight with consequent crowding of the birds on the separate light islands. One light unit should be provided for every 200 feet of floor space.

JACKSONTOWN

(Continued from Page 7.)

Alexander, Mrs. E. Burr, Mrs. J. McLean and Mrs. G. Kitchen. Mrs. Alexander won the mystery box. One large quilt was quilted and a quilt was finished for the sewing

circle. Another was put on the frames. As it was Mrs. E. Barrett's birthday she was presented with a birthday cake.

Mrs. Clyde Shaw, Waterville visited Mrs. Albert Chambers on Tuesday afternoon.

Mr. and Mrs. Harry Good of Presque Isle visited Mr. and Mrs. Jasper Good on Tuesday.

Several men from Jacksonville attended the barn raising at Howard

Gibson's Jacksonville on Thursday and Friday.

In daylight sweeps over the Continent of Europe in the first half of 1942 the R. A. F. destroyed enough Axis planes to make up fifteen complete squadrons.
