

Sweeten it with BEMA Molasses

The fact that it is the pure juice of the famous Barbados sugar cane makes BEMA Molasses an ideal sweetener. It may be used to advantage even in tea or coffee. It is really delicious on cereals, and imparts zesty flavor to cakes, cookies, pies or puddings.

Serve BEMA often at the table. Use it in baking. It is not only flavorful and appetizing but it is rich in iron and other nourishing elements.

EDUCATION BOARD PASSES ORDERS

Among the orders passed by the Board of Education on May 27, 1942 the following are of particular interest:

REGIONAL CONFERENCES. Regional conferences will be held in each of the twelve Inspectorial Districts from Monday, August 31, 1942 to Friday, September 4, 1942 inclusive; these five days will be added to the number of teaching days in the year, for the purpose of computing the teacher's salary from the trustees and the teacher's Government Grant; the public schools of New Brunswick will not open this year until Tuesday, September 8.

PROGRAMME OF STUDIES. The Programme of Studies for Grades I—VI will be revised and reprinted. The Programme for Grade VII will remain as it is. The Programme for Grade VIII will not be introduced in the school year 1942-43.

BASIC TEXTS. Basic texts will be used in all subjects if possible.

Arithmetic. The Junior Arithmetic, Book 3, will be placed in the hands of the pupils in Grade III as soon as finances permit. Junior Mathematics will be used as a text in Grade VIII.

Science. The new science text, being prepared will be used in Grade VIII.

Geography. Nelson's Geography, if it can be obtained, or a similar Geography, will be used in Grades VI, VII, and VIII.

History. As soon as possible, a good text, relating to the history and development of the Province of New Brunswick, should be adopted for Grades V and VI.

ACTIVITY PROGRAMME. Less attention should be given to the activity programme and more emphasis placed on the use of texts and drill in fundamentals.

NOTICE

NESTLÉ'S PREMIUM PLAN WILL CLOSE AUGUST 1st, 1942

To Nestlé's Milk Customers:

During the past three years, you have received an "extra dividend" with Nestlé's Evaporated and Condensed Milk. Not only have you been able to enjoy the fine quality of these two superior products, but in addition you have been able to "Save Nestlé's Labels" and exchange them for many attractive and valuable premiums.

We have been pleased to offer this "extra dividend" as an appreciation of your patronage, and it is therefore with genuine regret that we announce we must discontinue our premium offer Aug. 1st, 1942, and Nestlé's Milk Labels will not be redeemable after that date.

Many of our premium items were made by manufacturers who have now converted their factories to the manufacture of war materials. It is therefore impossible for us to continue the operation of our premium plan. We urge you to redeem your labels immediately.

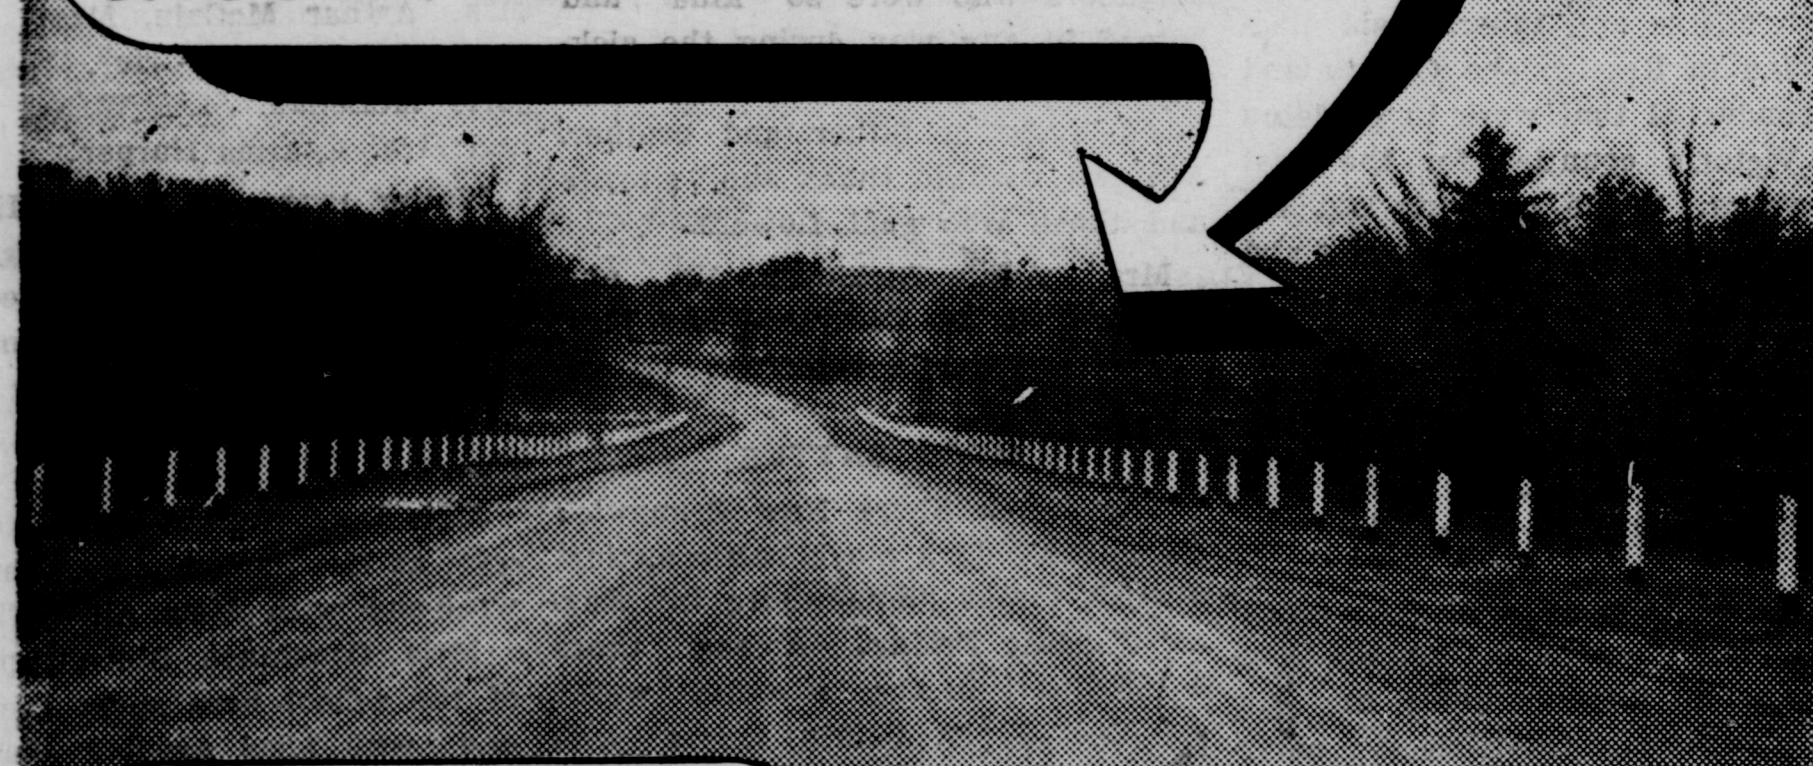

We hope we may continue to enjoy your patronage of Nestlé's Evaporated and Condensed milk. Even though the labels will not be redeemable after Aug. 1, 1942, Nestlé's Evaporated and Condensed Milk, as usual, will pay dividends in quality.

REMEMBER—The last day for redeeming Nestlé's Labels is August 1st, 1942.

CALCIUM CHLORIDE TREATMENT MAKES GRAVEL ROADS SMOOTH, DUSTLESS, LIKE THIS...

BUT COSTS NO MORE THAN MAINTENANCE OF A SURFACE, LIKE THIS

Tires Last Longer on Smooth Surfaces

The abrasive action of loose gravel on rubber tires causes as much as 47 percent greater wear than on paved or stabilized surfaces. Sidewalls take almost as much punishment as the roads. Smooth, tightly-bound consolidated surfaces are easy on tires. Sidewalls are not exposed to abrasion.

IN THESE times, when every available dollar is needed for a national war effort, highway officials are turning more to Calcium Chloride for maintenance of gravel roads.

Labour is limited and materials are costly. Both must be conserved. Calcium Chloride saves both and so pays for itself while it actually consolidates and improves gravel road surfaces—keeps them smooth and dustless.

So, wherever Calcium Chloride is used for maintenance, costly dust damage to roadside crops is ended, driving on farm-to-market roads becomes safer, easier, more comfortable; and housework in nearby homes is lightened.

That's the contribution Calcium Chloride maintenance makes to the welfare of rural communities : : without extra cost.

Calcium Chloride is made entirely in Canada.

Support War Effort With Work, Money and Blood

AMONG the several Red Cross Blood Donor Clinics established in Canada the one pictured above is unique. The usual clinic is located in a city with volunteer donors. This one is in the heart of the great Ford plant at Windsor and the donors have all been company employees to date. With a regular staff of doctors and nurses, supplemented by 13,722 employees gave more than \$67,000 for an average of \$4.89. The Ford plant is operating at 200 donors each week.
