## Wartime Traffic Brings C.N.R. Promotions

W. U. APPLETON

THE heavy volume of two-way wartime traffic now being handled over the Eastern lines of the Canadian National Railway has made it necessary to enlarge the supervisory administration of this vital part of the system. W. U. Appleton, who formerly carried on the duties of vice-president and general manager, will now have a senior officer to relieve him of much of the direct work concerning the operation of the extensive freight and passenger services in the Atlantic Region which are so essential to the country's war effort. This was announced by N. B. Walton, recently appointed executive vice-president of the system. Announcement of the appointment of J. F. Pringle to be General Manager of the region was made by Vice-President Appleton.

NORMAN B. WALTON

Prior to his appointment to the executive vice-presidency Mr. Walton was vice-president in charge of Operation, Maintenance and Construction for the System. He will continue to exercise jurisdiction over this important department and perform such other duties as the president may delegate to him. Mr. Walton has had 42 years' experience in railroading during which he advanced from his first job as clerk and stenographer through the dispatcher's office to many supervisory positions which provided him

J. F. PRINGLE

with a wide knowledge of operating and traffic conditions. A native of Moncton, N.B., Mr. Appleton joined the Intercolonial Railway as a junior clerk in 1890 and served in the mechanical and operating departments, becoming superintendent of motive power in 1918. With the amalgamation of the Canadian Government Railways and the Canadian National System, he became successively general superintendent of rolling stock, general superintendent, and general manager of the region. In 1935 he was named vice-president and general manager.

Hitherto Mr. Pringle has been chief of transportation for the System with headquarters at Montreal. He will now establish his office at Moncton. Mr. Pringle began his service with the Canadian National Railway in 1919 as an assistant engineer at Montreal. After filling a number of important positions in that city and in Ontario he was appointed chief of transportation for the System in 1941. He was one of the Canadian National officers loaned to the National Railways of Mexico in 1930 to assist in modernizing and reorganizing traffic methods on the Mexican Railways.

# NEW Gasoline Rationing Plan Goes into Effect APRIL FIRST

ON MARCH 31 the present gasoline ration licenses and coupons will expire, and no gasoline will be sold except upon the presentation of a 1943-1944 ration book.

In his own interests, every vehicle owner is asked to apply at once for a new gasoline license and ration coupon book for each of his vehicles.

Under the new system, effective April 1, all commercial vehicles will be rationed. All non-commercial vehicles will be granted a basic "AA" gasoline license and ration coupon book, containing 40 coupons for a passenger car, or 16 for a motorcycle. Owners of non-commercial vehicles eligible for a special category, who can prove their need, will be granted an extra vocational allowance, fixed in advance for the year ending March 31, 1944.

The extra allowance for a special category car will be tailored to meet individual needs. In determining this allowance the previous category and mileage of the car will not be considered. Instead the vocational allowance will be based on two factors: (1) The gravity of the oil shortage with which Canada is faced, and (2) the importance of the vehicle to its owner in a country at war.

The extra vocational coupons will be issued in books labelled "Special", and each such book will contain not more than 60 coupons. Only one "Special" book, or portion of such book, will be issued at a time, and hence the case history of each special category applicant will be under constant review.

Under provisions of the rationing order, the Oil Controller will have the right to refuse any application for a special category, or to suspend any ration book for an infraction of the regulations.

Every motor vehicle, other than a motorcycle, must bear on its windshield a sticker indicating its category. After April 1, service station attendants will not be permitted to serve gasoline to a car which does not bear the sticker which corresponds to the ration book submitted at the time of the purchase.

To obtain a gasoline license and ration coupon book, secure an application form at your nearest Post Office. Study the form and follow the instructions contained therein.

When you receive your ration coupon book, guard it carefully. It may not be replaced if, because of your negligence, it is lost or stolen. Do not leave it in your car; keep it on your person at all times.

## THE DEPARTMENT OF MUNITIONS AND SUPPLY

HONOURABLE C. D. HOWE, Minister
