Poems For Your Scrap Book

WHEN YOUR GAS GETS LOW

When your gas gets sort of low,
Plant some seeds!
If your well-worn tires blow,
Plant some seeds!
Put your road-maps all away,
Take your garden spade and play
Learn to live the simple way,
Plant some seeds!

If your income tax is tough,
Plant some seeds!
If you find the going rough,
Plant some seeds!
If your radio won't go,
If you can't afford a show,
Grab your trusty garden-hoe
Watch your seeds!

There's escape from every woe
In your seeds!
Vegetables in every row,
Wondrous seeds!
If your wife is out of sorts,
Slip into your gardening shorts,
And escape her tart retorts
Tend your seeds!

GIVE TO THE RED CROSS

Only through the Red Cross is it possible to send food and comforts to prisoners of war; in 1942 more than 2,000,000 food parcels were dispatched to Canadians in prison camps. This is but one of the many outstanding services undertaken by the Canadian Red Cross which now needs \$10,000,000 to carry on its magnificent work. Everyone in New Brunswick can help — let's give our full support to the Red Cross Campaign.

MORE AND BETTER

seed, especially when good certified seed has been made available in quantity to the country for the express purpose of aiding the industry in that respect.

A survey has shown that in some provinces less than ten per cent of seed planted would qualify to certification standards, and that many fields are planted with a quantity of seed which could not possibly produce a good crop, no matter how much fertilizer was used. If every grower planted certified seed, either the crop could be doubled, or the present quantity produced annually could be harvested from about half the present average.

This gives food for thought, says Mr. Tucker, especially when it is realized that most of the certified seed produced in Canada has to be exported to find a market, and that another million bushels are sold annually as high grade table potatoes because of the lack of home demand for high quality seed. Countries, thousands of miles away are paying high transportation charges to obtain Canadian certified seed by the shipload every year. About two million bushels are exported annually, while only about half a million bushels are sold in Canada each year as seed. Much of the acreage at present is planted with inferior seed, the bulk of which might better be used for starch purposes or fed to stock.

Table stock growers are urged to insist on certified seed. It is readily obtainable through reliable potato dealers and established seed houses, or may be purchased from the seed growers direct. Lists of growers are obtainable from the Plant Protection Division, Dominion Department of Agriculture, Ottawa, or from the local District Seed Potato Inspectors located at Charlottetown, P.E.I., Kentville, N.S., Fredericton, N. B., Ste. Anne de la Pocatière, Que., Guelph, Ont., Winnipeg, Man., Edmonton, Alta., and Vancouver, B.C.

MUST UNDERTAKE

(Continued from Page 7.)
explained Mr. Hamer, "that it became necessary to view the food resources of the North American continent from the standpoint of joint, rather than separate needs, and to launch in Canada and in the United States a definite program to increase production of many agricultural foodstuffs. This program must now be undertaken in the face of handicaps imposed by man-power shortages in both countries, and by difficulties certain to be experienced in obtaining machinery and other equipment, and even in the repairing of existing farm machinery and equipment. All the food of certain kinds which can be produced is going to be needed to meet the military and civilian requirements of the two countries, to

supplement the supplies of other United Nations who up to the present have borne the brunt of the conflict, and to feed for a time the peoples of the countries which we now confidently expect to release from enemy control during the next two years."

WORDS IN RHYME

Here's to Rommel as cute as a fox. The Allies will soon have him in a box and they will bury him deep in a high little knoll and the British tanks will roll over his sole. And now we will turn to the sly little Jap. The United States gave them a nasty slap. They beat them one and they beat them all. They beat them big and they beat them small. They mean to make this their overthrow and drive them back to Tokio. Now I will turn to another little man whom you all know and understand. He marched his armies to Russia with a mighty force, but they soon got his ticket and changed his plan and now he is reclining in his easy chair, beaten to a finish, by the Russian bear.
