EXPERTS SUGGEST

(Continued from Page 7.)

bread for sandwiches this should be done before buttering. In making a large number of sandwiches it is a good idea to whip 1-4 cup of milk or 1-4 cup of water into one pound of butter. Butter one slice of the bread with the butter, and the other slice with filling.

For breakfast time less butter can be used if butter and honey are mixed before spreading on toast.

The Value of Your Local Newspaper in Local Business

THE CARLETON SENTINEL plays an important part in all local affairs. It employs wage-earners whose homes are in the county from which it secures business. The wage-earners pay taxes, support various churches, make their contributions to local appeals, take part in community organizations, and spend most of their wages with local merchants. It is no idle boast that the SENTINEL has been the means of giving well-directed publicity to this town and district.

THERE is no business institution which gives so much free service as a local newspaper. We a merchant asked to give the equivalent in goods that the newspaper gives in free service to all local organizations, he would find it impossible to meet the demands.

WHEN money is spent for printing or advertising with your local printing office, you are helping local printers to help you. You make it possible for them to serve you better. Out-of-town printing salesmen take money out of the community - paying no taxes, buying nothing from local stores, getting all they can and not caring whether you sink or swim.

As merchants expect customers to be loyal to their own community in buying goods from them, so might merchants remember they, too should follow the same ideals in regard to their local printing office.
