Commercial Hotel, Moncton, N. B. WM. BROWN, PROPRIETOR.

Cotesville Correspondence. As it is so seldom that anything in the way of news appears from here perhaps a few lines will interest some of your numerous readers.

I have nothing very cheering to write at present. A great deal of sickness prevails and Doctors King and Leger, of Buctouche are quite frequently seen visiting their patients here. I am glad to note that Mrs Tyle Coates, who has been quite ill, is improving under the skillful treatment of Dr. King. Mr. M. Budd, who has been laid up with slow fever, is progressing favorably under the treatment of Dr. Leger.

Mr. John E. Coates is doing a thriving lumber business this winter, but owing to the low figures offered for spruce deals he is not operating quite so largely in that line as last year, he is paying the farmers here fifty cents per bushel for their oats and \$12 for hay. What do we want of commercial union when we have such a market at home for our produce?

Mr. McLean has finished his contract on the church here, it is now ready for the seats, for which Mr. E. R. Leger has the contract. The trustees intend to have this church opened in March, or sooner if possible.

Several of the young people have left the community lately. Mr. F. A. Steeves has left for the lumber woods in Mill Creek. Miss Emma Coates has left for Buctouche, where she intends taking a course in music. Miss Steeves has gone on a visit to relatives in Petitediac. May they have a good time and soon return.

Hoping that you may find room for these few lines and wishing great success to THE REVIEW, I am, yours truly, NICHOLAS.

Cries of murder brought help to Mrs. Donald McKinnon, at Godwich, Ont., Thursday, as she lay in her husband's barn with a bullet in her body, immediately below the heart, and she was removed into the house. There McKinnon was found, he also having been shot, his wound being in the abdomen. McKinnon said that his wife had become insanely jealous of him and had attempted suicide, and that when he discovered what she had done he also resolved to end his life. Mrs. McKinnon said that her husband had a fit of jealousy threaten to murder her, and she was pursued by him to the barn, where he fired at her. Donald McKinnon is 65 years of age and a fisherman. His wife is 50 years of age. The possibility of recovery is slight in either case.

FOR THE TOILET

No better preparation can be had than Ayer's Hair Vigor. All who use it speak of its merits in the highest terms and place it, as a dressing, far beyond anything else of the kind. It imparts to the hair a beautiful silken lustre and a fine fragrance, prevents baldness, and restores gray hair to its original color and texture. "For five years I was troubled with a disease of the scalp, which caused the hair to become harsh and dry and to fall out in such large quantities as to threaten complete baldness. Ayer's Hair Vigor being strongly recommended to me, I began to apply this preparation, and before the first bottle was used the hair ceased falling out and the scalp was restored to its former healthy condition."—Francisco Acevedo, Sillao, Mexico. "I have used Ayer's Hair Vigor and have received more satisfaction from it than from any other hair dressing I ever tried."—C. E. Wooster, Westover, Md. "I use Ayer's Hair Vigor constantly, and find it excellent."—T. C. O'Brien, Fort Keogh, Montana.

Ayer's Hair Vigor PREPARED BY DR. J. C. AYER & CO., Lowell, Mass. Sold by Druggists and Perfumers.

HERRING

THE GLOBE'S CHANCES. DANGERS WHICH THREATEN TERRESTRIAL LIFE.

The Earth's Geological History Traced—The Gigantic Eruption of Krakatoa—The World's Kernel—The Destiny of the Earth Still a Remote Thing.

Before reaching the present period of its history, the earth passed in succession through great geological phases, during which its continents and seas were several times deranged by the internal forces that its nucleus of matter in fusion developed. None of these revolutions has been able to destroy the powerful germs of life, and it is to-day more impossible than ever for a geological cataclysm to cause such a result. The most important of the historic catastrophes of this kind is contemporaneous. We refer to the gigantic eruption of Krakatoa, in 1883, which claimed fifty thousand victims, and totally transformed the configuration of the Strait of Sunda. Despite their great violence, such phenomena are always local, and, consequently, without untoward influence upon animate beings collectively. The internal activity of our planet is now greatly reduced. So the earth has entered upon the calm period of its existence. A rapid examination of this progressive diminution of internal energy is to lead us to a particularly rational solution of the problem of the world's end.

When the solid crust of our globe formed, it surrounded an incandescent fluid spheroid, which afterward condensed towards its centre under the action of cooling. In measure as it contracted this nucleus diminished in volume, and the external covering gave way in places, and cracked in order to follow the motion of shrinkage. It is in this way that were produced the large folds that formed the principal reliefs of the surface. Consequently, the terrestrial crust, having become thicker, will be covered with enormous crevasses through which the oceans and atmosphere will be gradually absorbed in the numerous internal spaces.

The surface of the moon, deprived of air and water, with the immense furrows that traverse its plains and mountains, presents the spectacle of this beginning of rupture, for our satellite is more advanced in development than the terrestrial globe. Having passed this stage, the dead star, cracked in all directions, will break in pieces and the fragments will be scattered along its orbit. This destiny of the earth is still a thing of a very remote future. Yet it seems as if the natural evolution of our globe will cause the disappearance of life long before the extinction of the sun. It is, moreover, easy to see that in the geological epochs lost in the night of ages the vital forces were more powerful than those of our day. We have a proof of this in the exuberance of life that then gave birth to animals and plants beside which the present gigantic beings are but dwarfs. The day on which, through such general weakening of vitality, man will have fallen into a physical decadence that his refined intelligence will not be able to supply the place of, will probably be also the day on which the last representatives of our race, and of the entire creation will have to live in the bowels of the earth in the pursuit of air and water, which will slowly descend toward the centre of the earth. Deprived of atmospheric fluid, the surface of the globe will thereafter have for temperature only that of interstellar space, say a hundred Centigrade degrees below zero! And while our human race will be reimmersed in the nihilism from which it had emerged for a few thousands of centuries, other humanities will succeed one another upon the innumerable stars that people infinite space.—Jacques Leotard in La Nature.

INDUSTRIAL CANADA.

The cotton factory at Dundas, is again in operation. The Burnum Wire and Iron Works, Walkerville, are establishing a branch of their works in West Toronto Junction. The Rathbun Company are putting in machinery in their mills at Naprawee, for the manufacture of Portland cement. The Halifax Shovel Company, Halifax, are putting in a lot of new machinery to enable them to increase their output.

Messrs. George Waring and Oscar White are erecting and will operate an iron foundry and nail factory at St. John, N. B. Mr. Peter Bertram, proprietor of the Dundas Axe Factory, has recently filled an order for axes to go to Scotland. The Jencks Machine Company, Sherbrooke, Que., are manufacturing \$70,000 worth of mining machinery for parties at Sudbury, Ont. Messrs. Gorson & Purser, St. Catharines, Ont., have been awarded a \$15,000 contract for putting in the waterworks at Gananoque.

Messrs. Wellington, Boulter & Son, recently, in six days, packed 135,000 pounds of pumpkin at their canning factory at Picton, Ont. The St. Lawrence Bridge company, Montreal, has been incorporated with a capital stock of \$25,000, to manufacture iron bridges, iron beams, etc.

It is said that Welsh hard coal is as good as Pennsylvania coal, and that it could be laid down in Ottawa for \$5 a ton, whereas coal is now selling there for \$7.

The Vancouver Sugar Refinery Company expect to have their new works ready for operation in December. The capacity will be 250 barrels per day.

John Inglis & Sons, Toronto, have been awarded the contract for the construction of the engines and boilers for the new electric light works at New Westminster, B. C.

1891. 1891.

Our Travellers are now on the road with a complete line of Samples for SPRING, 1891, —EM RACING—

Staple and Fancy Dry Goods and Millinery.
