One Month More.
The publishers of the Dominion Illustrated announce the receipt of a very large number of answers in the unique and valuable prize competition inaugurated by them at the beginning of the present year, and which until the close of the present month will still be open to new subscribers. Now is the time for any who have a desire to compete to get the necessary information as to terms and conditions and take advantage of the next few weeks for an effort to obtain one of the 100 prizes, aggregating over \$3,000 in value, that are to be distributed. Send 12 cents in stamps to the Sabiston Litho. & Pub. Co., Montreal, the publishers, for a sample copy and full particulars.

To the Editor of The Review:
SIR:—This port has a harbor master and a man paid by the government for looking after the buoys and pickets on the river, and still they neglect their duty. May I ask the question, why is the north channel at the breaker water not buoyed, as the channel has from ten to fifteen feet of water? If this channel was properly buoyed a vessel could often come in when she could not come up the south channel. And there should be two pickets between Kingston and Jardine's Yard where there is none at all. I trust these two gentlemen will see to the placing of these important buoys and pickets.

Killed and Cooked Her Child.
They are telling a story down in Georgia about a colored woman, living near Delie, who murdered a small child and cooked the meat. She then gave what she called "a hot supper," serving up the child, calling it tender veal. The negroes asked what sort of meat it really was, and a little child said that it was her little sister that "mammy" had killed. One negro carried one of the bones of the child to a doctor and he said it was the bone of a human. Report says that the negroes ate every morsel of the child, in the belief that they were eating veal, and after supper they celebrated the feast by indulging in an old-fashioned hoe-down.

Bush Fires—Kent Junction in Ashes.
Kent Junction was visited by a disastrous conflagration, caused by bush fires on Monday afternoon about four o'clock. The station-building, freight shed and station master's residence, and the residences of John Power, Robt. Legoo, and Robt. J. Morton's hotel, two barns, one box car and one car of coal were devoured by the destroying element. The air was so thick with smoke and cinders from the forest fires that it was impossible to see fifty yards, the station house being burned to the ground before the people in the nearest house, but a few yards off, knew it was on fire. Nothing was saved, the inhabitants barely escaping with their lives to a bog near the station. The station master, Mr. J. W. Morton, was unable even to transfer the contents of the cash drawer to the safe. The fire shut off telegraph communication until 9.30 next morning.

Miller's bark privileges on Bass River have been all destroyed, also their camp and privilege at Acadieville.
Robert Bryant's house and barn on the Harley Road were destroyed by fire on Sunday, also a large quantity I. C. R. ties.
A Weldford correspondent says that Messrs. Miller have all the available men in the woods fighting fires.

The neighbors of Thomas Bushel, of Ward 6, Halifax, think that he keeps too many dogs. They have petitioned the City Council saying that he has seventy-five canines, that he feeds them on carcasses of animals, that there is a bad smell, a danger to children of a school nearby, and a nuisance generally. They want it stopped.

G. M. Grant of Canterbury, N. B., attempted suicide by drowning, Monday morning, at Bangor, Maine. He was rescued by Chief of Police Parker and Officer Davis. He had gone to Maine to get work, but had squandered his money in drink, and become despondent. He will be detained at the station house till he gets sober and has made up his mind not to take his own life, when he will probably go to look for employment or return home.

SUMMER DRESS MATERIALS.

PRINTS, SATEENS, WOOL DRESS STUFFS, PRINTED MUSLINS, COTTON CHALLIES, &C.

To do the sample business right requires the carrying of a large stock—this we do, and the way our samples are made up does away with the difficulty so often met with in selecting from samples. The old style of sending clippings of stuff does not do nowadays, as they fail to give a fair idea of what the goods look like in the piece.
