The End of the Long Journey.

John Sanderson was dying,
In summer, on Mendip-side,
In the cottage where his father,
And his father's father died.

And dying has grown so common,
And old men are so cheap;
There was only the parish doctor
To see him off to sleep.

And he thought he would last till morning,
And he left him in his neighbors' care;
The tavern was terribly handy—
Death came when none was there.

And he welcomed the awful stranger.
With a smile of wrinkled joy,
And only patiently sighing,
"I'd like to see my boy."

"The lad as runned from the village
A mort of years ago,
And went to Bristow and 'listed,
And left me the weeds to hoe.

"Couldn't un-vight and wrussle;
Couldn't un-whistle and zing;
The maids a could swarm and wiggle;
The lads a could hold and fling.

Sweet scent of the sad sweet brier
Came in from the garden bed;
And he heard the wicket rattle,
And he heard the sound of a tread.

That rang on the stony threshold,
And woke the sleeping cat;
And the gleam of a scarlet tunic—
The dying eyes saw that.

He saw a form in the doorway,
Against the sunset black;
And far too old to be fearful,
He said: "My boy's come back;"

And groping with feeble fingers,
My eye be cruel aim,
I want to see thy face, lad,
Come here to thy vather, Jim;

"Th't a ribbin in button hole, Jimmy,
Wi' a star as shines so vine,
And summat o' iron. 'For Valor,'—
Be all they whimsies thine!"

A strong arm lifted his shoulders:
A brown hand lifted his head;
"We'm quality now for sartin',"
He titteringly weakly said.

And so on the breast of scarlet,
Between the cross and the star,
The old man lay, as he waited,
To pass the utmost bar.

But while his fleet soul fluttered,
And strove to die and live;
The lips behind him whispered
The hoarse words, "Father, forgive."

And out of the thronging shadows,
The answer faltered, "No,
Not now, dear lad; I done it
A mort o' years ago."

The Wonderful Success.

Of Hood's Sarsaparilla as a blood purifier
entitles it to your confidence. No other
preparation has such a record of cures of
Scrofula, Salt Rheum, Blood Poisoning or
other blood diseases. To try it is to know
its merit. Be sure to get Hood's Sarsapa-
rilla.

For a general family cathartic we confidently
recommend Hood's Pills. They
should be in every home medicine chest.

A person is prematurely old when bald-
ness occurs before the forty-fifth year.
Use Hall's Hair Renewer to keep the scalp
healthy and prevent baldness.

"Gentle Spring" loses many of its ter-
rors when the system is fortified by the
use of Ayer's Sarsaparilla. With multi-
tudes, this wonderful tonic-alterative has
long superseded all other spring medicines
being everywhere recommended by phy-
sicians.

A bad smashup occurred at Hull station
C. P. R., on Wednesday. The Soo train,
with several members of Parliament on
board, ran into an open switch and four
cars jumped the track. The fireman was
instantly killed, and the engineer and bag-
gagemen are probably fatally injured. Singular
to say, all the passengers escaped only one or two bearing slight scratches.

It is now pretty well understood to be
a dangerous practice to attempt to palm
off worthless imitations of the "Myrtle
Navy" tobacco for the genuine article. In
former years the practice was the cause
of much annoyance, and Messrs. Tuckett
& Son were compelled to resort to the law
courts to put a stop to it. Though they
have not met with any case of the kind
lately, it is always a safe precaution for
the purchaser to see that the trade mark
T. & S. in bronze letters is stamped up-
on each plug; no plug ever leaves the
factory without it, and to appropriate the
mark is a punishable offense.

DEER ISLAND, ME.

Dear Sir,—This is to certify that I have
had the Rheumatism so, by times, I could
not walk. By chance I received a bottle
of Scott's Cure for Rheumatism. I have not
been so free from pain in five years, and
wish you every success with Scott's Cure.

Yours respectfully,

ELMER E. WARREN.

C. C. RICHARDS & Co.

Gents.—My daughter was apparently at
the point of death with that terrible dis-
ease diphtheria. All remedies had failed,
but MINARD'S LINIMENT cured her;
and I would earnestly recommend it to
all who may be in need of a good family
medicine.

JOHN D. BOUTILLIER.

French Village.

VOIDING RISK IN
the cultivation of
any main crop is a
mark of wise farm-
ing. If early pota-
toes are to be such a
one it will be well to
look over some of the
results of last
year and endeavor
to ward off disease,
especially the rot.
Both the vines and
the tubers were at-
tacked in some quarters last year, and the
more favorable, owing to a greater distri-
bution of the spores, some of which re-
main in the ground from last year's crop,
while the accumulated rubbish added to
the manure heap and diseased tubers in the
bins are also sources from which the disease
may be spread.

PREVENTIVE MEASURES.

It is important that the seed be carefully
inspected now, before the weather becomes
warmer, and every potato that is in the
least degree unsound should be burnt,
only the most perfect and best specimens
being retained. After cutting the seed the
pieces should be immersed in a solution
made by dissolving a pound of coppers and
a pound of sulphate of copper in ten gal-
lons of boiling water, allowing the pieces
to remain in the solution for an hour,
then draining them for another hour, and
then finally to roll them in dry land
plaster. When cutting the pieces the
cutting knife should be dipped in the so-
lution after cutting each potato, in order to
avoid infecting any of the sound pieces
should the knife cut into a diseased tuber.
It is important to use these precautions
even if the seed is apparently free from dis-
ease, as it entails but little labor, and may
prevent loss after the seed is planted. The
crop should not be grown on land that was
planted to potatoes last season, but on a
new location. Get the seed in early, so as
to push the crop forward rapidly, in order
to avoid weak plants later on, when the
vines and tubers may be attacked.

FERTILIZERS FOR POTATOES.

It has been demonstrated that fresh un-
rotted manure is favorable to the diseases
of potatoes, and for that reason all manure
used should be thoroughly decomposed by
heating the heap. The best potatoes and
largest crops have been secured by the use
of special potato fertilizers, prizes having
been taken by some growers, who produced
potatoes at the rate of 1,000 bushels per
acre on prepared plots, but only the liberal
use of fertilizers will permit of such extra-
ordinary yields. Level cultivation has been
conceded superior to hilling, and the trench
system is also regarded by some growers as
superior to any other. After the crop is
harvested, all vines and imperfect tubers
should be burnt to ashes. The ground
should be plowed early and made very fine,
so as to admit of thorough tillage.

A Small Annoyance Vanquished.

Who has not been annoyed when grind-
ing by the wobbling of the grindstone on
its frame, especially when the treadle is
in use? I have never found anything
equal to the arrange-
ment shown in the
cut. Two heavy
posts are set in the
ground at least 3 ft.
deep. At the proper
height they are sawed
off level and the
grindstone bushings
secured in place on
top of them. An-
other advantage of-
fered by this frame is
that it does not inter-
fere with the grinder
or his tools. It
should be well braced,
if the ground be
soft, by placing stones or blocks of wood
against the posts at the top and bottom of
the hole and underground. If a third post
is set facing the grindstone and a bracket
or narrow shelf attached to it, the can to
supply the stone with water may drip from
it as shown.—H. S. Spaulding, in Farm
and Home.

It is a subject for discussion whether fer-
tilizers or manure should be used in the
garden. Commercial fertilizers are free
from weeds, and carry no impurities to the
soil. Manure on grain, or in orchards, is
serviceable with less injury than in the gar-
den, where the crops are roots, or grow a
short distance above ground. Fresh, un-
rotted manure is certainly very fitting ma-
terial for a garden, but it is, of course,
changed in composition before the plants
mature. The difficulty is that manure some-
times contains matter that has been thrown
on the heap from diseased persons or ani-
mals, and for that reason it is considered
best to haul it to the fields than apply it to
the garden crops.

The Winter Care of Cows.

Is it of any advantage to turn the cows
into the woods to pick up a portion of their
food, not only during the winter, but at
any season of the year? A calculation of
the value of the milk produced by a cow
that is given abundant pasturage and a
liberal supply of grain, compared with the
yield of a cow that is turned out on the
abandoned field to secure what she can,
will demonstrate with the well-fed cow
more than pays the difference in the food
received, and yields a much larger profit in
proportion to cost than any other. It is un-
profitable to keep any animal unless it is
carefully attended to.

Dead Animals Valuable.

Do not waste dead animals. Take the
carcass to some appropriate place, cover it
with unslaked lime, and then make a
mound of earth over the carcass. The earth
will absorb the escaping gases, and in a
short time the entire carcass will be re-
duced to compost, except the bones, which,
however, will be soft and may be soon dis-
integrated by placing them in wood ashes. It
is safer, cleaner and more profitable to
thus dispose of carcasses than to haul them
out for the use of dogs and buzzards, and to
pollute the atmosphere.

Grind the Bones.

When a bone is in the ground it gives off
its particles very slowly, and always from
the outside, upon which other substances
act. The smaller the surface the sooner
the bone is dissolved. An ordinary piece
of bone may remain in the soil for twenty
years before it entirely decays. When
using ground bone, therefore, have it in as
fine condition as possible. For immediate
results use the superphosphate (dissolved
bone), but for more permanent and lasting
results, especially on heavy soils, the bone
meal is better.

Rev. James P. Stone
of Lower Cabot, Vt., formerly of
Dalton, N. H.

A Faithful Pastor

Is held in high esteem by his people,
and his opinion upon temporal as well
as spiritual matters is valued greatly.
The following is from a clergyman long
influential in New England, now
spending well earned rest in Cabot, Vt.:
"C. I. Hood & Co., Lowell, Mass.:

"We have used Hood's Sarsaparilla in our
family for many years past, with great be-
nefit. We have, with confidence, recom-
mended it to others for their various ail-
ments, almost all of whom have been cer-
tified to great benefit by its use. We can

Honestly and Cheerfully
recommend it as the best blood purifier
we have ever tried. We have used others,
but none with the beneficial effects of Hood's.
Also, we deem Hood's Pills and Olive Oil
unmistakable. Mrs. Stone says she
cannot do without them." Rev. J. P. Stone.

Better than Gold

Mr. Geo. T. Clapp, of Eastondale, Mass.,
says: "I am 82 years of age, and for 30
years have suffered with running sores on one
of my legs. A few years ago I had two toes
amputated, physicians saying I was suffer-
ing from gangrene and had but

A Short Time to Live

Eight months ago as a neighbor urged me, I
began taking Hood's Sarsaparilla. The
whole lower part of my leg and foot was a
running sore, but it has almost completely
healed and I can truthfully say that I am in
better health than I have been for many
years. I have taken no other medicine and
consider that I owe all my improvement to

Hood's Sarsaparilla

It is better than gold." "I cheerfully
verify the above statement of Mr. Clapp,
whom I have known 30 years." J. M. How-
ard, Druggist, Eastondale, Mass.

HOOD'S PILLS are purely vegetable.
