PRICE 50 CENTS.

Mr. Allison Notes.

Charles Woodworth Landon now dean of the Conservatory of Music at Michigan College has been chosen as head of the musical faculty at Mt. Allison in place of Mr. A. A. Mack, resigned. Mr. Landon comes to Sackville with recommendations of the highest order not only as a teacher of great success but as a thorough scholar in the literature of music. He has been editor of The Etude, one of the leading musical journals of the Republic and a contributor to some of the best professional papers. He is vice-president of the Musical Department of the World's Fair and was the organizer of the New York State Music Teachers' Association and now one of its Directors. As a composer he takes high rank and one of his best works, Landon's Piano Method, is in extensive use in the music schools of the country. He has always been an active student of music and has made extensive investigations into the mechanism and essential nature of piano forte teaching. The conservatory is to be congratulated upon their success in securing the services of so able and distinguished an artist to continue the work of this department of Mount Allison, which has already attained more than local reputation. Prof. Landon comes to Sackville about September 1st.

Fraulien Lachs, of Sweden has been engaged as teacher of vocal culture vice Miss Annie Mack, resigned. She is a graduate of the Conservatory of Munich and a pupil of Hans Hasselback, who speaks of her as "a vocalist of remarkable technical ability and highly suggestive rendering" she has been teacher of vocal culture in New York for two years and the principal, Madam Sewell compliments her as being a superior teacher, having marked success in developing and cultivating the singing voice.

Mrs. Archibald and Miss Laura Lathern are in Boston attending the Harvard Summer School and taking special studies.

Miss Bessie Alcorn of the Fine Arts department is in New York studying special features in art work.

Madam Dalpe who was so successful in the French classes in the ladies' college last year has been re-engaged.

R. K. Duncan, B. A., of Toronto, has been engaged to teach natural science and mathematics at the ladies' college for the coming year. He graduated at Toronto university in 1892, having taken first class honors in science through his entire course. In recognition of his exceptional ability as leader of his class he was offered a fellowship in both Clarke and Chicago universities. He selected Clarke on account of the greater facilities for original research thus offered, and during the past year has been conducting his studies in that institution.

Miss Alice Haggarty of Roxbury, Conn. formerly of Sussex, has also accepted a position upon the staff of the Ladies' college as one of the assistants of Prof. Hammond in the fine arts department. The removal of the Owen's Art institution to Sackville opens up excellent opportunities to lovers of art in the maritime provinces for advanced work in that direction. Students can now take advantage of the literary and musical departments of the college to secure an all round education, while making the fine arts their specialty. The advantages thus offered, together with the opportunity of enjoying the refining influences and social safeguards of a home at the Ladies' college, will doubtless attract a number of art students to the institution.

The school is to be conducted for the coming year in the building now known as Victoria hall. The benches will be removed, and as much of the art collection as can be used to advantage will be placed in the hall for school purposes. Three teachers have been engaged for the work of the school. Thus it is hoped the Owen's Art institution under the presidency of

NERVE BEANS are a new discovery that cure the worst cases of Nervous Debility, Loss of Vigor and Painful Migrations, restores the weakness of body or mind caused by over-work or the strain of excess of youth. This Remedy absolutely cures the most obstinate cases when all other treatments have failed even to relieve. Sold by druggists at 25c per package, or six for \$1.50, sent by mail on receipt of price by addressing THE JAMES MEDICINE CO., Toronto, Ont. Write for samples. Sold in Kingston by T. F. CURRIAN, in Montreal by W. G. KING.

Robert Reed and the direction of Prof. Hammond, R. C. A., will enter upon a new career of enlarged usefulness. Prof. Hammond, R. C. A., needs no introduction to the art loving people of Canada but the following from the pen of a correspondent at the World's Fair is interesting:

In the art exhibit, however, every St. John man could take a just pride. In the very centre of two of the most conspicuous walls of the Canadian exhibit the visitor would readily recognize two splendid representatives of Rocky Mountain scenery, by Prof. Hammond, R. C. A. of the Owen's Art institution. He is seen at even still better advantage in the fine collection of his pictures displayed in the transportation building in connection with the C. P. R. exhibit. The tribute thus paid Prof. Hammond in thus according him the place of honor at the World's Fair must be highly gratifying to his friends in St. John, who have so long recognized his exceptional ability. The Sackville institution are to be envied the acquisition of an artist of such eminence.

Grangeville.

To the Editor of The Review:

DEAR SIR.—In travelling over the County of Kent, a few days ago, your correspondent had the good fortune to stop over night in a prosperous little settlement known as Grangeville. Thinking that a short account of this place and its people might be of interest, the writer took down a few items, which he now gives the readers of THE REVIEW.

Grangeville is situated about five miles from Harcourt station, and three miles from Adamsville, on a road running west from the I. C. R., and a mile, or perhaps a mile and a half from the railroad. This road crosses a gentle elevation which is the true watershed for the head waters of the noble Richibucto on the East, and the Samon River, that flows into Washemoak Lake on the West.

A few years ago, societies known as Granges were established in different parts of the provinces. The object of these societies was to advance the interests of farming, and promote the social condition of the people. A Grange was started in that community quite early in its history, and the place took its name from the society.

About fourteen years ago, two young men from Albert County, began there in the dense forest, to hew out for themselves fortunes, and make homes. They were soon followed by others from the same locality, and to-day there are there ten quite prosperous, contented and happy families. Their capital consisted largely of industry, perseverance, energy and intelligence. This capital they invested in such a way, that large fields, cleared of stumps, ploughed and beautifully green, now take the place occupied by the primeval forest a few years ago.

The families settled there now are Solomon Smith, Joseph Smith, William Smith, Beecher Smith, William Atkinson, Melbourne Colpitts, William Boyd, Shepard Jones and two others, whose names the writer cannot recall.

Quiet, industrious, unassuming and intelligent they are the material to build up a new country.

Religiously, the majority of them are Baptists. Solomon Smith, one of their number, an ordained preacher, administers to them in sacred things in the absence of a regular minister. Their regular minister for this summer, is a theological student from the St. Martin's Seminary, whose name is Thorne.

They are loyal British subjects, and are politically, staunch Liberal Conservatives. They believe there is no better country in the world than Canada, and no part of Canada much better than Kent Co., and no part of Kent Co. superior to Grangeville, at least for agricultural purposes. They believe we have good laws well administered, and that if our people who leave this country would work as hard at home as they have to in foreign lands, they would secure a competency much earlier in life.

While the greater part of their time and attention is taken up with farming, yet they are not so wholly engrossed as to neglect the cultivation of their minds. Mr. Beecher Smith has a collection of minerals, plants, and curiosities of different kinds that would do no discredit to any of our educational institutions. He takes much pleasure in showing and explaining them to visitors.

Of the many specimens, the writer had time to take down only a few. He has in

his collection of plants the pink hawthorne used for hedges in the south of England; silver seaweed from Scarborough, England; boot lace seaweed from Wales; orange leaves and blossoms, magnolias, fig leaves and cedars from Florida; the brown heather from Scotland; the teasel, a burr used in making a nap on cloth.

In his collection of minerals he has copper ore and sand from Camas, Dakota; silver ore from New Ireland, Albert Co.; different samples of precious stones from Lynn, Salem, Nahant, Mass.; from Cape Tormentine, Dalhousie, Campbellton, Bathurst, Grand Manan, South Bay, Matepedia, N. B., and from the Acadia and Stellarton Mines and Blomidon, N. S. He has soap stone from Valparaiso, South America; salt from Salt Lake, Utah; asbestos from the megantic mines Quebec. He has what he calls a jubilee stone from Wales. This is a very rare stone, so called because it was picked up on the day of the Queen's jubilee. He has stones from the Grand Pré, the home of Evangeline; a piece from the foundation of the old chapel where the Acadians were taken to receive their last sentence. He has Fuller's earth from Oliver's Mount, England. This earth is often used as a cosmetic, giving the face a smooth surface and beautiful appearance. He has earth from the Garden of Gethsemane, purchased at the Jerusalem exhibition held in England last year, and sand from the great desert of Sahara. He has a great variety of Indian arrow heads from Kansas, Ohio and Indian Island, Kent Co. He has the most beautiful shells of all shapes and colors from the Bermudas. He has bones of the beaver, the rabbit, the bear, quills of the porcupine and a great variety of other things altogether too numerous to mention.

It would pay any one to visit Grangeville to see Beecher's cabinet. No description can do it justice. It must be seen to be appreciated, and the beauty and variety are only excelled by the hospitality of the people for which it has always been noted.

PERSONAL MENTION.

Ex Sheriff Gerouard, who has been for some time in the state of Maine, has returned to New Brunswick.

Mr. Henry O'Leary visited Halifax last week.

Mr. B. C. Reade, photographer of St. John, is registered at the Kent.

Mr. J. Roy Campbell, barrister of St. John, was in town, Friday.

Mr. E. A. Strang of Chatham, passed through Richibucto Thursday, en route to P. E. I.

Mr. Brennan, Editor of the Agriculturalist, Summerside, P. E. I., attended the races in Kingston, Thursday. He was one of the judges.

Mrs. H. Irving of Baucouche, is spending a few weeks with her daughter, Mrs. John Stevenson.

Mr. Roderick Forbes of Pictou, Nova Scotia, and Mr. Duncan Forbes of Colorado, are visiting their brother, Capt. Forbes and family of Chatham.

Rev. Fr. Bannon of Chatham, is very

AT DEATH'S DOOR.

NERVOUS PROSTRATION. EXTREME DEBILITY AFTER THE GRIP.

Mr. Peter Lingley, Councillor, Petersville, Queens Co., N. B., says:

"Oct. 31, 1892.—Last winter I had a very severe attack of the grip, which left me very feeble and reduced in flesh. I had no appetite, and was so nervous I could not sleep. I was under Doctors' treatment for months, but received no benefit. My friends thought I had consumption and I got so low that they were expecting my death at any day. As a last resort they decided to try

HAWKER'S NERVE AND STOMACH TONIC.

3 bottles of which Rapidly Restored Me To Health.

I slept well, my appetite was restored and I soon became stronger, stouter and more vigorous than I had been for years. I cannot speak too highly of this medicine, as I feel that

I Owe My Life to its Virtues.

Mr. Isaac G. Stevens, Gate Keeper I. C. R. Depot, St. John, N. B., says: I was with Mr. Lingley during his severe illness and was daily expecting to have to notify his relatives of his death.

Sold by all Druggists and Dealers for 50 cts. per bottle. 3 bottles \$1.25. Manufactured by the HAWKER MEDICINE CO., Limited. St. John, N. B.

HAWKER'S LIVER PILLS cure all Stomach Ills. FOR SALE AT SHORTS DRUG STORE.

ERIE MEDICAL CO., Buffalo, N. Y.

STALLION GOLDLEAF.

The Stallion Goldleaf will stand in Richibucto and Kingston during the first part of the season, viz:—In Richibucto on Friday and Saturday of each week, in St. Louis on Mondays and Tuesdays, and in Baucouche on Wednesdays and Thursdays, for the service of mares at the fee of \$5.00 for single service, and \$8.00 for the season.

Goldleaf is the son of Rysdyk, 653, Sire of Clingstone, 214, Victor, 2214, Geo. M. Rysdyk, 225, Maud A., 2264, Bertrac, 2271, Dam, Oakleaf, by Sunshine, (thoroughbred). He is bay in color, with two hind ankles white. He stands 16 hands high and weighs 1100 pounds. He is perfectly sound, and has an excellent set of feet and legs, with plenty of bone and substance, good back and loin, well muscled and springy ribbed, splendid head and neck, well put on, oblique shoulders, and deep chest, and a fine main and tail. His finish style and action are perfect, and though never handled for speed, he shows a natural and frictionless gait, and will go fast if developed. He can now show a 2.40 clip. He has good stifle action, and opens up wide when he moves.

Goldleaf is bred for speed, his veins being rich in the famous Hambletonian blood flanked by the very best strains of imported thoroughbred. He took first prize at the Sackville, N. B., Exhibition in 1886 and 1888. (He was not shown in 1887.) He is 12 years old on June 20th, 1892, and for so young a horse is a remarkably successful one.

Goldleaf's colts are claiming attention wherever shown, and carry off honors in the face of the weightiest competition. Mr. H. A. Whitney, Mechanical Superintendent of the Intercolonial Railway, Moncton, has two fillies sired by Goldleaf, aged four and five years respectively, full sisters and well matched, that were driven in double harness on the streets the past winter, and pronounced by all to be a very handsome team. Warden J. B. Foster, of the Dorchester Penitentiary, has a five-year old that took first prize at the Sackville Exhibition. Many more of his get might be mentioned, but suffice it to say that the best guarantee that his stock are appreciated is the fact that trotting and carriage horse breeders have patronized him three years consecutively. Breeders may rest assured that they can make no mistake by stinting their best mares to this handsome and finely bred young stallion.

The season will commence on May 1st, and end on July 31st.
