This wonderful Nervine Tonic has only recently been introduced "Well, surely, that's a bumper?" into this country by the proprietors and manufacturers of the Great "Nay, hold awhile, I've seen the just South American Nervine Tonic, and yet its great value as a curative agent has long been known by a few of the most learned physicians, who have not brought its merits and value to the knowledge of the general public.

This medicine has completely solved the problem of the cure of indigestion, dyspepsia, and diseases of the general nervous system. It is also of the greatest value in the cure of all forms of failing health from whatever cause. It performs this by the great nervine tonic qualities which it possesses, and by its great curative powers upon the digestive organs, the stomach, the liver and the bowels. No remedy compares with this wonderfully valuable Nervine Tonic as a builder and strengthener of the life forces of the human body, and as a great renewer of a broken-down constitution. It is also of more real permanent value in the treatment and cure of diseases of the lungs than any consumption remedy ever used on this continent. It is a marvelous cure for nervousness of females of all ages. Ladies who are approaching the critical period known as change in life, should not fail to use this great Nervine Tonic, almost constantly, for the space of two or three years. It will carry them safely over the danger. This great strengthener and curative is of inestimable value to the aged and infirm, because its great energizing properties will give them a new hold on life. It will add ten or fifteen years to the lives of many of those who will use a half dozen bottles of the remedy each year.

Nervine Tonic. NEEVOUS DESEASES.

As a cure for every class of Nervous Diseases, no remedy has been able to compare with the Nervine Tonic, which is very pleasant and harmless in all its effects upon the youngest child or the oldest and most delicate individual. Nine-tenths of all the ailments to which the human family is heir are dependent on nervous exhaustion and impaired digestion. When there is an insufficient supply of nerve food in the blood, a general state of debility of the brain, spinal marrow, and nerves is the result. Starved nerves, like starved muscles, become strong when the right kind of food is supplied; and a thousand weaknesses and ailments disappear as the nerves recover. As the nervous system must supply all the power by which the vital forces of the body are carried on, it is the first to suffer for want of perfect nutrition. Ordinary food does not contain a sufficient quantity of the kind of nutriment necessary to repair the wear our present mode of living and labor imposes upon the nerves. For this reason it becomes necessary that a nerve food be supplied. This South American Nervine has been found by analysis to contain the essential elements out of which nerve tissue is formed. This accounts for its universal adaptability to the cure of all forms of nervous de-

I sent for a box of Pink Pills, and by the time it was gone there was an improvement. I continued the use of the pills, found that I could now get a good night's sleep, and the cramps and pains which had formerly made my life miserable, had disappeared, and I felt better than I had in four years. I know that it was Pink Pills that brought about the change, because I was taking nothing else. I have taken in all seven boxes, and I feel as good as I did at forty years of age."

When I reached home I was completely used up and continued to get worse until I could hardly move about. At times my limbs would become numb with a tingling sensation as though a thousand needles were being stuck into me. Then my eyesight began to fail. It was difficult for me to distinguish persons at a distance. My face became swollen and drawn, and eyes almost closed. The doctors could do nothing for me. I suffered terribly, was only a burden to my friends and actually longed for death, which all thought was "Hast thou not seen the prosperous knave in store for me At this time the statement of a man down in Cape Breton came to my notice.
