RICHIBUCTO, N. B., NOV. 22, 1894.

THE BRIDGE INQUIRY.

The St. John Suspension Bridge inquiry was concluded Monday, and the public will be able to draw pretty correct inference from the evidence as adduced and published. Hon. Mr. Emmerson, before whom the inquiry took place, has shown a fairness in conducting the inquiry which is in marked contrast with the manner in which Mr. Blair and his associates have conducted inquiries of a similar nature, and the present inquiry has in consequence covered a wider field than was at first anticipated.

But this is not all. The serum, if applied, say, to a child suffering from quinsy not only puts that ailment to flight, but renders the subject impervious to croup and diphtheria; and even measles and scarlatina are found to be of very rare occurrence, and then only of slight character, when the system has been fortified by Dr. Roux's wonder cure.

THE NEW CURE FOR DIPHTHERIA, CROUP, ETC.

If the facts placed before the Hygienic Congress held at Budapest last month be not overstated, then the whole world owes a deep debt of gratitude to the young French savant, Dr. Roux, for the patient and heroic researches which have led to the discovery of an effectual cure for croup and diphtheria, and opened the way for further results not less startling.

The distinguished Mr. Marsau points out how the new method was established. Diphtheria is produced by microbes which themselves in the membrane of the throat, and multiply; but unlike the bacilli of other infectious diseases, they remain obstinately in the same position, neither penetrating the system nor the blood. But if the deadly animalcules

remain at the door, they are still able to secrete a poison of extreme virulence, called "toxin," which quickly penetrates the circulation and infects the whole body. This toxin, thanks to the achievements of science, can now be isolated, and in the form of a fine powder will cause almost immediate death when injected into animals. However, it has been found that if a very small dose be introduced into certain animals, especially the horse, only a feeble reaction is produced. By repeating the operation, with gradually increasing doses, the organism of the animal finally revolts, and becomes not only impervious to the toxin, but destroys it, and from this singular result is due the origin of the new substance with which Dr. Roux wages war against diphtheria.

If you go to the Institut Pasteur, you will find comfortably stalled in the garden some ten or dozen cab horses, in prime condition, aged from six to nine years, whose mission in life it is to furnish the precious fluid which every day snatches many a young life from an untimely grave. They are in their measure unconsciously solving the problem of how to stop the depopulation of France. They are well cared for, there is no cruelty in the process, no suffering entailed. The first process is to inject the deadly virus—the toxin—into the shoulder of the horse. This, of course at first causes a light indisposition, but after a while no ill effect is felt.

On February 1 of this year Dr. Roux began operations at the Hospital for Sick Children, Paris. He had a good supply of serum, and each day on making his visit to the hospital, he treated all the children he found there, in whatever state or condition of croup or diphtheria. There is no selection of subjects, a point to be borne in mind, nor the ordinary treatment in any way modified or set aside. Things went on exactly as they had before, except that a new element had been introduced—namely the serum. During 1890, 1891, 1892, 1893, before Dr. Roux began his system, 3,971 children suffering from croup and diphtheria were admitted into the Hospital for Sick Children. Of these 2,029 died of the disease, the mortality thus being 52 per cent. On the other hand, from February 1 of this year up to July 24, the date up to which Dr. Roux furnished statistics to the Congress, the serum was applied to all without exception and out of 448 children, there were only 109 deaths—that is, the mortality had decreased to 24 per cent.

But this is not all. The serum, if applied, say, to a child suffering from quinsy not only puts that ailment to flight, but renders the subject impervious to croup and diphtheria; and even measles and scarlatina are found to be of very rare occurrence, and then only of slight character, when the system has been fortified by Dr. Roux's wonder cure. The 24 per cent represents the saving of the lives of 120 children in six months in one institution. The gain would have been more considerable but for the deplorable hygienic conditions of the Hospital des Enfants Malades. Many of the deaths, too, were a result of further complications, such as heart disease and broncho-pneumonia, which made the work of the physician very difficult.

Beyond Dispute.

There is no better, safer or more pleasant cough remedy made than Hagar's pectoral Balm. It cures Hoarseness, Sore Throat, Coughs, Colds, Bronchitis, and all throat and lung troubles.

Mr. Edison's Kinetoscope in London.

The latest, and not the least remarkable of Mr. Edison's inventions in the kinetoscope, of which a private demonstration was given recently at 70 Oxford Street. The London Times says: This instrument is to the eye what Edison's phonograph is to the ear, in that it reproduces living movements of the most complex and rapid character. To clearly understand the effect it is necessary to explain the cause, but to appreciate the result the working of the invention must be witnessed. The moving and, apparently, living figures in the kinetoscope are produced in the following manner: Mr. Edison has a stage upon which the performances he reproduces are enacted. These performances are recorded by taking a series of 43 photographs in rapid succession, the time occupied in taking them being one second only. Thus every progressive phase of every single action is secured, and the photographs are successively reproduced on a film of celluloid of the length required for recording a given scene. When this film is passed before the eye at the same rate of speed as that at which the photographs were taken, the photographically disjointed parts of a given action are united in one complete whole.

The apparatus in which the reproduction takes place is a cabinet about 4 ft. high, 2 ft. wide, and 1 ft. 9 in. deep. It contains the celluloid film band, the apparatus for reconstructing the disjointed views, and a small electric motor for driving the apparatus. The chief detail of the mechanism is a flat metal ring having a slot in it, which makes about 2,000 revolutions per minute. The film passes rapidly over the ring, beneath which is a light. The spectator looks through a lens on to the film, and every action recorded on it passes under his view. Ten machines were shown, in which the most rapid and complex actions were faithfully reproduced. One scene represents a blacksmith's shop in full operation, with three men hammering iron on an anvil, and who stop in their work to take a drink. Each drinks in turn and passes the pot of beer to the other. The smoke from the forge is seen to rise most perfectly. In another view a Spanish dancer is shown going through her graceful evolutions, as is also Anna Belli in her serpentine dance. There is likewise a wrestling scene and a cock fight, in which feathers are seen to fly in all directions. All the features of an original stage production are given, of course on a small scale, but possibly only for the present on a small scale, for Mr. Edison promises to add the phonograph to the kinetoscope and to reproduce plays. Then by amplifying the phonograph and throwing the pictures on a screen, making them life size, he will give the world a startling reproduction of human life.

For Healthy Lungs.

Milburn's Cod Liver Oil Emulsion with Wild Cherry and Hypophosphites combines the curative power of the pectoral remedies mentioned in the most perfect and palatable form. Price 50c. and \$1.00 per bottle.

Kent Junction.

Nov. 19th.—Mr. and Mrs. J. W. Morton spent one evening in Harcourt last week.

Mr. G. Livingston, of Harcourt, spent Wednesday afternoon in town.

The marksmen of Kent Junction won an easy victory over those of Richibucto, who gathered here on Thursday last to carry off the rifle offered as prize, but they had to return home without it. Mr. Hiram LeGoof of our town being the successful one.

Mrs. Edward Sinclair, of Newcastle, passed through here Thursday, en route to Kingston, where she will visit her daughter, Mrs. W. A. Ferguson.

Mrs. M. Graham was here one day on her way to Chatham.

Rev. S. Smith preached here last Sabbath morning and evening.

Mr. L. P. McMichael went to his home in West Branch on Saturday last.

Mr. and Mrs. H. Atkinson, of Mortimore, spent part of last week visiting Mrs. T. McPherson.

Mr. John Murray made a short call at the Depot House one day last week.

Mr. J. M. Smith has taken his place as Night Agent here.

Mr. Smith Murray, of Lewiston, Maine, is home making his mother a short visit.

Miss Nellie McKinnon, of Richibucto, made her cousin a visit this week.

Mrs. John Clark, of Newcastle, was the guest of her daughter at the Depot House.

Kent Junction is to have a new store. It will be situated near the Depot House.

Miss Maude Lounsbury, of Newcastle, arrived by Monday's accommodation for a short visit here.

Miss Mamie and Maggie Murray, daughters of Conductor T. Murray, of the N. B., made Miss Lizzie Morton a short visit one day last week.

A. D. F.

CONCERT AT BUTOUICHE.

By C. M. B. A. Branch, No. 237.

Nov. 17.—Last night, Barnes' Hall was filled to listen to the best concert of the year. The following programme was successfully carried out:—

Quartette, "The Hunter's Call," Misses C. Bourque, J. Sutton, F. X. LeBlanc, Dr. LeBlanc.

Piano duet, "Torpedo," Misses A. Michaud, L. Bourque.

Comedietta, "A quiet family," Mr. Benj. Bibbs, A. E. Pearson; Mr. Barnaby Bibbs, J. W. Hannagan; Mr. Peter Parker, N. J. Ross; Grumpy, Dr. Landry; Mrs. Benj. Bibbs, Miss C. Bourque; Mrs. Barnaby Bibbs, Mrs. Thompson; Miss Selina Summers, Miss J. Sutton; Snarley, Miss S. Hannagan.

Piano trio, "Bonnie Dundee," Misses A. Michaud, L. Bourque, V. LeBlanc.

Solo, "Tit for tat," Miss M. Bourque.

Farce, "La Maison Hantée," Lagassé, Dr. Landry; Alfred Moore, Dr. LeBlanc; Pit, F. X. LeBlanc; Joe, Fred Picard.

Solo, "The song that reached my heart," Mrs. James.

Interlude, "Diamond cut diamond," Mr. Hearty, Jude J. LeBlanc. Capt. Seymour, A. E. Pearson; Capt. Howard, Dr. Landry; Trap, servant to Seymour, J. W. Hannagan; Trick, servant to Howard, R. M. Sutton; Clay, brick-maker, F. Michaud; Charlotte Doubtful, heires, Miss S. McManus.

"God Save the Queen." During an intermission refreshments were sold, and about \$60 realized. Miss Annie Michaud furnished excellent music between acts. The concert was an exceptional evening's amusement.

Lizards in the Stomach.

A REPTILE SWALLOWED WHILE DRINKING IN THE DARK.

Excruciating Agony Suffered by Mrs. Westfall—Nerves Shattered, and Death Looked for as the Only Relief.

From the Trenton Courier

The editor of the Courier having heard of this strange case of Mrs. Simon Westfall, made enquiry and learned the following facts.—Mrs. Westfall said that one evening some three years ago she went to the well and pumping some water drank a portion. As she did so she felt something go down her throat kicking and told her mother so at the time. Little she thought of the agony in store for her through drinking water from a pump in the dark, for a female lizard found its way into her stomach and brought forth a brood. After a while the sight of milk would make her tremble and she had to give it up. The disorder increased so that the very sight of milk would produce effects bordering on convulsions. She lost her appetite but would feel so completely gone at the stomach that she had to eat a cracker and take some barley soup frequently to quiet the disturbance within. She took medicine for dyspepsia and every known stomach disease, but got no relief. She changed doctors and the new doctor having had an experience of this nature before, gave her medicine to kill and expel the lizards. For three years the poor woman suffered all kinds of physical and mental agony. Her whole system, kidneys, liver and stomach were all out of order. Her heart would flutter and palpitate so faintly as to be imperceptible, and a smothering feeling would come over her, that it was often thought she had given her last gasp. Her memory was almost gone, her nerves shattered so that the least sudden movement would bring on collapse through extreme weakness. Sitting or standing she would be dizzy and experience most depressed feelings and lowness of spirits. After the removal of the reptiles, the doctor sanctioned the use of Dr. Williams' Pink Pills and she took three boxes but found no apparent relief. She then gave up their use believing she was past the aid of medicine. At this time a Mrs. Haight who suffered twelve weeks with la grippe, and who was completely restored by taking Dr. Williams' Pink Pills for Pale People, urged Mrs. Westfall to begin the use of Pink Pills again. She did so and soon she perceived their beneficial effects. Her appetite began to improve and for two months she has steadily gained strength, health, and steadiness of nerve and memory. She can now do her household work and feels as well as ever. She says she cannot speak as strongly of Pink Pills as she would like to, and feels very grateful for the great good resulting from the use of this wonderful medicine.

Mrs. Haight, before referred to, is enthusiastic over her own perfect recovery from the after effects of la grippe, feeling as well as ever she did in her life. She also corroborates the above statement regarding Mrs. Westfall's cure.

These pills are a positive cure for all troubles arising from a vitiated condition of the blood or a shattered nervous system. Sold by all dealers or by mail from Dr. Williams' Medicine Company, Brockville, Ont., or Schenectady, N. Y., at 50 cents a box, or six boxes for \$2.50. There are numerous imitations and substitutions against which the public is cautioned.

K. D. C. Pills tone and regulate the liver.

STRICTLY FOR FAMILY USE.

The Doctor's Signature and directions are on every bottle. If you can't get it send us. Price 35 cents; six \$2.00. Sold by Druggists. Pamphlet for I. S. JOHNSON & Co., 22 Custom House St., Boston, Mass., Sole Proprietors.

Invented in 1810 by the late Dr. A. Johnson, Family Physician. Its extraordinary worth, merit, excellence have satisfied everybody for nearly a century. It is marvelous how many different complaints and diseases it will cure.

Johnson's Anodyne Liniment

It is used and recommended by many physicians everywhere. It is the best, the oldest, the original. It is unlike any other. It is superior to all others. It is not merely a Liniment, it is the Universal Household Remedy. For Internal as much as External Use. It prevents and cures asthma, bronchitis, colds, coughs, croup, catarrh, colic, cramps, chills, dyspeptic pains, diphtheria, gout, hiccups, hoarseness, headache, hooping cough, influenza, neuralgia, rheumatism, sciatica, sore lips, sore throat or lungs, la grippe, chest pains, bowel pains and kidney pains. It is the sovereign cure for bites, burns, bruises, cuts, chaps, cracks, chilblains, lame back, lame side, mumps, ringworm, stings, scalds, strains, sprains, soreness, stiffness and swellings.

CLOTHING.

Important Announcement

The mild weather has made the sale of heavy goods slow, so we have decided to close out our whole stock of Mens' Youths' and Boys' clothing as rapidly as possible in order to make room for our big arrival of Holiday Goods. It would be a waste of time and effort to attempt in this advertisement to enumerate to any extent the great attractions to be offered in this great sale of clothing. The stock is entirely new; no old stock; every garment being made expressly for us. Our prices will be found (upon comparison) 20 or 30 per cent lower than any other house in the trade.

Notice a Few of Our Prices.

Table with 4 columns: Mens' Single Breasted Suits \$5.74, Mens' Heavy Ulsters \$ 8.50, Double " 6.00, Freize " 10.50, Nap Overcoats 4.00, Venetian Overcoats 7.50.

You will never have such an opportunity to buy suitable and desirable clothing, so do not miss it. We did a big trade in the month of October, largely in excess of last year and are determined to make the November turn over even larger. With this end in view we advise all buyers to look over our stock. All our departments are well assorted; if you require dress silks see our stock; if you require dress goods see our stock; if you require millinery see our stock; if you require velveteens see our stock; if you require lace see our stock; if you require mantle cloths see our stock; if you require ladies' jackets see our stock; new attractions prevents themselves every day; our buyers are constantly making lucky purchases; it is well to remember that we have no old goods, no last year's styles. Newness and novelty greet you on every side, a fact which enhances the value of the goods we offer. Our mail orders are increasing all the time. The more critical you are in buying the more certain we are to get your custom. We still continue to close at six o'clock, so please do your shopping early. We believe in early closing. So we have the courage of our convictions.

PETER McSWEENEY, MONCTON, N. B.

SEEDS! SEEDS! SEEDS!

We have now in store and for sale our usual stock of Field and Garden Seeds, comprising fine, bright Quebec Timothy, Northern Red Clover, Long Late Red Clover, Alsike Clover, Field Peas, White Russian Wheat, Beans, Turnips, Carrot Beet, and a large variety of Garden and Flower Seeds.

WALL PAPER.
