

Mysteries of the HUMAN BRAIN!

The latest discovery in the scientific world is that nerve centres located in or near the base of the brain control all the organs of the body, and when these nerve centres are deranged the organs which they supply with nerve fluid, or nerve force, are also deranged. When it is remembered that a serious injury to the spinal cord will cause paralysis of the body below the injured point, because the nerve force is prevented by the injury from reaching the paralyzed portion, it will be understood how the derangement of the nerve centres will cause the derangement of the various organs which they supply with nerve forces; that is, when a nerve centre is deranged or in any way diseased it is impossible for it to supply the same quantity of nerve force as when in a healthful condition; hence the organs which depend upon it for nerve force suffer, and are unable to properly perform their work, and as a result disease makes its appearance.

At least two-thirds of our chronic diseases and ailments are due to the imperfect action of the nerve centres at the base of the brain, and not from a derangement primarily originating in the organ itself. The great mistake of physicians in treating these diseases is that they treat the organs

and not the nerve centres, which are the cause of the trouble.

The wonderful cures wrought by the Great South American Nervine Tonic are due alone to the fact that this remedy is based upon the foregoing principle. It cures by rebuilding and strengthening the nerve centres, and thereby increasing the supply of nerve force or nervous energy.

This remedy has been found of infinite value for the cure of Nervousness, Nervous Prostration, Nervous Paroxysms, Sleeplessness, Forgetfulness, Mental Despondency, Nervousness of Females, Hot Flashes, Sick Headache, Heart Disease. The first bottle will convince anyone that a cure is certain.

South American Nervine is without doubt the greatest remedy ever discovered for the cure of Indigestion, Dyspepsia, and all Chronic Stomach Troubles, because it acts through the nerves. It gives relief in one day, and absolutely effects a permanent cure in every instance. Do not allow your prejudices, or the prejudices of others, to keep you from using this health-giving remedy. It is based on the result of years of scientific research and study. A single bottle will convince the most incredulous.

About the only place along the East river where an echo is heard after the blowing of whistles on tugs and steamers is the neighborhood of the Brooklyn bridge. The towers of that structure reflect the note, but seldom clearly. On the North river the Palisades give back the sound more sharply, and when big blasts are fired the reverberation is like distant thunder.

A Boston druggist claims to have discovered a subtle compound that will deprive a cat of its voice without impairing the mental, moral or physical powers of the animal. The Last of the Buffaloes.

Hunters know that buffaloes will never unless forced cross the iron of a railroad track, and this fact figured largely in the unfortunate work of extermination which these animals have suffered since the Western plains have been spanned by railroads.

The greatest blow dealt the bison herds of the Northwest was the completion of the Northern Pacific track west from Bismarck to the Rocky Mountains. The road practically divided the herds, and those to the south were soon swallowed up in the general slaughter waged by Indians, pot, hide and tongue hunters, foreign sportsmen and others who were out to kill anything they saw on sight.

This was during the winter of 1882-83. The buffaloes to the north were in many scattered bands, but there was one great herd of not less than 75,000 head, which had found a temporary refuge in the triangle formed by the Musselshell, Missouri and Yellowstone rivers in Montana, and as yet they had not been "smelled out" by either red or white hunters. But they were as surely doomed as though already killed, for the railroad iron cut them off from the southern range and the Indians of the Canadian Northwest, as well as those of our country, barred their retreat into the far North, and so they were hemmed in between the two with no possibility of escape in either direction. This last herd was completely wiped out of existence in less than four months, and before the close of the year there were but a few singles and pairs left as fugitives in that vast country where but a year or two before they could have been counted almost by the hundreds of thousands. At the end of that season 800,000 buffalo hides were shipped east from Glendive, on the Yellowstone River.

The Apple as Medicine.

Dr. G. R. Searles, of Brooklyn, N. Y., thus discourses on the apple as medicine: "The apple is such common fruit that very few persons are familiar with its remarkably efficacious medicinal properties. Everybody ought to know that the very best thing they can do is to eat apples just before retiring for the night. Persons uninitiated in the mysteries of the fruit are liable to throw up their hands in horror at the visions of dyspepsia which such a suggestion may summon up, but no harm can come to even a delicate system by the eating of ripe and juicy apples just before going to bed. The apple is an excellent brain food, because it has more phosphoric acid in easily digestible shape than any other vegetable known. It excites the action of the liver, promotes sound and healthy sleep, and thoroughly disinfects the mouth. This is not all. The apple agglutinates the surplus acids of the stomach, helps the kidney secretions and prevents calculus growths, while it obviates indigestion and is one of the best preventives known of diseases of the throat. Everybody should be familiar with such knowledge, and I hope you will help disseminate it. In addition, next to the orange and the lemon, it is the best antidote for the thirst and craving of the person addicted to the alcohol or opium habit."

E. G. SCOVIL, AGENT PELEE ISLAND GRAPE JUICE.

MARCH 15th, 1893.

DEAR Sir.—My family have received great benefits from the use of the PELEE ISLAND GRAPE JUICE, during the past four years. It is the best tonic and sedative for debility, nervousness and weak lungs we have ever tried. It is much cheaper and pleasanter than medicines. I would not be without it in the house.
