The road is not built a seat on the platform outside in order to on rock foundation but is gravelly look. have a better view of the sights which ing, and made me shudder sometimes as I were so new to me. Notably was the looked down, down, down,-I couldn't Mount of the Holy Cross, two deep gulches tell how far; and sometimes I closed my -no one knows how deep-in the form eyes as the train crept slowly over long of a cross on the mountain side, and always tressles, from one height to another. filled with snow. The sun thro' this grand An Observation car was put on so that

we could better see the sights. We stoproad bed hewn from solid rock, on one side ped 10 minutes at Soda Springs and all a wall of the same hundreds of feet high, got off to drink. There are two springs on the other side the Grand river, dashing within five feet of the track, which by over boulders as large as houses, that have natural force, shot over 80 feet into the some time or other fallen from the dizzy air and falls in fine spray. The water is

A SEA OF FIRE. The Destruction of Hinckley Deseribed.

HINCKLEY, Minn, Sept 3 .- The first good description of the great fire that swept away this thriving village was secured on the arrival of the special to-day. It seems that the forest and peat fires had been raging within a short distance of Hinckley for some weeks, but no apprehension had been felt by the inhabitants and no preparations had been made for emergencies. On Saturday afternoon the fire approached, fanned by a strong wind, the smoke grew denser as the day advanced, and it soon became as dark as night. About four o'clock the wind changed and the residents of the doomed town saw the flames were bearing down upon them. As the alarm rang through the streets the people rushed from their homes, and when they caught sight of the red, on-rushing sea of fire they became panic stricken. The fire shot across the town and the people fled in all directions. They ran wherever they thought they could find refuge. A large number ran to a pond some three or four feet deep The largest number of people rushed to Grindstone river, a shallow stream, which it was thought would afford protection from the flames. But the water was too low and all miserably perished. There the relief parties found the bodies lying in the water and rudely trampled by the flying cattle. Just as the flames were raging fiercest a train arrived over the Eastern Minnesota and five hundred people clambored aboard. It was a god-send to the people, who offered up prayers of thankfulness as the engineer sent the train at a rapid speed away from the burning town and back in safety in Superior. Another party had rushed for the limited on the St. Paul and Duluth, bnt as the fire cut off their way in that direction, they ran to a shallow pond near by. There they perished. One hundred and five bodies were removed from the pond by the relief committee. East of the village there was a stagnant pool of rain water. Over a hundred people sought refuge here, and of these only one man is known to have perished. A GHASTLY SCENE. A United Press reporter boarded the train out of Pine City for Hiuckley at seven o'clock this morning. As the train neared Mission Creek, the first evidence of che great fire became apparent. The whole country was singed. The telegraph wires were down and the scene was one of desolation. At Mission Creek, a small shanty was the only house left standing. The train proceeded slowly to Hinckley The round house and coal sheds of the Eastern Minnesota road only remained standing at the station and the walls of the public school in the village itself. Alongside the railway track were two scores of boxes filled with the bloated and disfigured remains of victims of the fire. The reporter picked his way through the deserted avenues of the village to the cemetery. The rain was pouring down in sheets. At the cemetery, a mile and a half from the town, a half dozen men were digging a trench. A heap of bodies lay on a knoll in the middle of the cemetery. There were 96 naked bodies of men, women and children scorched, blackened, distorted, bowels and brains protruding, hands clutched in the final agonies, hair singed from heads of old, young and middle-aged, all in a promiscuous heap. In another corner of the cemetery were forty-five more bodies covered with quilts. All were interred late this afternoon. A local searching party this morning found the body of Thomas Dunn, aged twenty-two, late operator at the St. Paul and Duluth station. When the fire started he remained at his post, and it was only when station that he left his key. He hurried

w re found lying in the streets and in the immediate vicinity of this village. The total in the vicinity will reach fully fo r hundred dead when all the returns are in. Identification is an exceedingly difficult matter, and most of the so-called identifications of dead bodies are mere guesses. It will be fully ten days, perhaps longer, before all the missing are accounted for. The registration committee is busily ergaged in trying to find people and ascertain the condition and necessities of all applicants for relief, and this means nearly every survivor from the burned district.

father and mother, the latter grieved at The trains dash round sharp curves at my going so far alone, and the former grieved that he could not accompany me. May 31st, at 10 a. m., I left Nankin on a fast train, and in nine hours was in Chicago. After waiting there two hours, in the grand old Rockies, so well named, I was again westward bound, and after travelling two nights and one day thro' an uninteresting stretch of prairie country in Iowa and Nebraska, we pulled into Denver, Colorado. I have always been told that rain never falls in that city, but it rained all of the three hours I was there and I left it raining. All of the surrounding country was flooded-rivers of water everywhere, and when we reached Pueblo, the whole city seemed to be under water, and people were wading barefoot thro' the streets, while others were shovelling mud and water out of their houses. Ours was the first train in four days and passengers rushed on board as tho' they never expected to see another. The line we were to go over was washed out for miles, so we in stone walls, but can easily be reached had to be shipped on another line, near with the hand. The water is charged with 300 miles further. The situation was not iron, salt and sulphur, the latter very an interesting one to contemplate, but strong and boils up all the time. I tried "misery" you know, "loves company," and we were all resolved to make the best changed my mind. The country for miles of what could not be helped. around presents a most interesting appearance-a veritable "Garden of Eden."

I travelled all the way in Pullman cars. My section and the one opposite, were Why this beautiful piece of nature should filled (eight in all) with a nice looking, be given over to such a sect, is beyond my jolly crowd, and by comparing notes, ken, when it might be in the hands of found we were all from Obio ; and from Christian people. As I looked out over that time (2 p. m.) till bed time, we made the beautiful farms, gardens, and orchards, "Rome howl," so to speak all owned by Mormons, I asked myself,

On our right were the snow capped "Why are these things so?" Leaving Rockies, Pike's Peak having been in sight since early in the morning, when more than a hundred miles away. A feeling of awe creeps o'er one, when looking at those towering peaks, rock ribbed and snowbound.

At 6 p. m., Saturday, June 2nd, our train was divided; one engine carrying the two Pullman cars, and two following with the other twelve coaches (they carry long trains in this country.) We commenced the grade of Las Vega Pass, a grade of over 200 feet to the mile, and an elevation of over 10,000 ft. A terrible storm broke over us, and such flashes of lightening and terrific thunder I never before experienced, but it passed away as quickly as it came, and was succeeded by a snowstorm.

When about halfway up the mountain we came to a standstill, and were fnformed

My trip thro' this section was the most great speed, with no more than a foot interesting of all and I enjoyed it fully. At 6.30 p. m., June 9th, we halted at space between the track and deep gorges, Grant's Pass, where I found my brother which to look down would make your waiting for me, (I had written him from head swim. But I must not tarry too long San F'co.) and the next day we came on to his home in the mountains, where I for I can only give you a small idea anyhave been ever since, and where I shall way of their real magnitude. We sped continue to stay until the strike is ended. along towards Salt Lake City, and Utah, Six years ago he and two other men the home of the Mormons, which was bought a mining claim of 100 acres for reached early Monday morning. At 6 a. \$13.00 and now have a standing offer of m., we run into Ogden, Utah, and remain-\$25,000. This year over \$5,000 in dust ed until 4 p. m. I breakfasted, then and nuggets were taken out and was on with a party of tourists like myself, proexhibition for two or three weeks at the ceeded to take in the town. It is a lovely National Bank of Grant's Pass, and was little city of about 18,000 inhabitants : visited by hundreds of people. It was irrigating ditches with purest water runthen shipped to the mint at San Francisco. ning everywhere, flowers and trees flourish-Work was over before I came and will not ing as I never saw them before. We went over the town north, south, east, and begin again until Sept. We are surrounded here by high mountains and tall timber. west, then went out seven miles to the hot I am an excellent climber and have climbsprings and bath houses. Here is a sight worth seeing. The springs are enclosed ed to the top of several mountains.

There is running water everywhere, and so clear it looks blue,-I have read of "sweet waters" but never saw any till I came here. Yesterday we took a tramp holding my hand in it but immediately of over four miles, I enjoyed it immensely. The weather is exceedingly hot in the valleys, but here in the mountains it is delightfully cool. The roads remind me very much of some of the roads in New Brunswick only the elevations are higher. I go from here to Portland, (Oregon,) thence to Montana, where I shall visit friends, and shall probably stop in Chicago. Will write you of my trip from here, when I get home if you are not weary of this.

> A. B. Grant's Pass, Oregon, July 25th, 1894.

There is no virtue in patience when after a short run we ran into the ferry and pain and disease torment the body. It is the advancing flames drove him from the

on the batter." The carouse had been heavy and prolonged, says Our Ain Folk. At length, with credit exhausted, the unnerved and debilitated shaver had been compelled to betake himself again to the exercise of his calling Just then the minister, a kindly old man of the paternal school, heard that Tammas had "sworn off the drink," and he considered that the opportunity would now be favorable to do as my mother used to do-that is, "improve the occasion." Bent on this laudable professional mission he sallied forth. On entering the humble shaving shop of the remorseful Tammas, however, his kindly heart was smitten with compunction at the sight of the wretch before him. Poor Tammas, indeed, looked a melancholy spectacle. Trembling with unstrung nerves, shaking as if in a palsy, his bleared, bloodshot eyes looked up piteously at the minister, who, inly thinking that it was "no good pouring water on a drowned rat," swiftly determined to spare poor Tammas for the nonce and reserve his sacerdotal censure till the poor "disjaskit crateur" was in a better condition to profit by a straight talking to. He determined therefore, to make a kindly pretense that he had come in for a shave, and sat down, feeling assured that some opportunity would presently be afforded of saying his "word in season."

Now, Tammas was not aware of what was passing in the simple old minister's mind, and if the truth must be told, he was not so repentant as he looked. He was assuming a good deal of the brokendown and battered appearance which he presented. So, with a look of shamefaced penitence, with trembling fingers and in silent contrition (apparent,) he proceeded to envelope the minister's neck in the towel, and then began to lather his visitor in approved tonsorial fashion. The minister eved him with a mildly reproachful glance, which expressed volumes to Tammas' conscious sense of guilt.

Now he came to the critical part of the operation. He felt his nerves jumping, but by dint of a strong effort of will and holding one unsteady hand with the other. he managed to bring the razor pretty deftly down the ample expanse of both the clerical chops. But, alas ! when the wobling blade came to the more intricate manipulation of the double chin the refactory nerves gave a disconcerting jerk, and lo ! out gushed the crimson fluid over the snowy napkin. Now thought the good minister-now is my time. Here is d there with a the opportunity I have been waiting for ! ther was among So, addressing the abashed-looking Tammas, who expected a torrent of indignant agent at the wrath, the simple, kindly man just ventured on a very mild remonstrance. "Ah, e street with a Tammas," said he, " ye see what the effects o' strong drink are soo." Tammas' spirits at once rose. He knew the worst was past, and his ready humor, came to fire came down the rescue in a flash of inspiration, as very started for his demutely; but with a spice of lurking ear the house. drollery, he gravely replied : "Deed ay, artunately, got meetister!
