RICHIBUCTO, N. B., FEB. 8, 1894.

THE BEST BUTTER BREEDS.

Among the farm industries that have heretofore stood as auxiliaries to grain and root raising in the County of Kent, is the dairy business. The initial steps have however been taken to advance it to the front as a staple industry. The creamery established in St. Louis last year has proved a decided success, and there is every prospect that two or three more institutions of this kind will be established in the County during the next year. Farmers will naturally begin to show more interest in cattle breeding than they have shown in the past. They will awake to the conclusion that it costs no more to keep a good cow than to keep a scrub, and they will accordingly strive to get their farms stocked with the best butter making breeds. We find in a Western exchange a statement which will be of interest to our farmers. It gives the results of a ninety days test of the various breeds that are used for butter making purposes. The milk of 36 cows was tested for the time, but only two breeds were represented, namely:—the Gurnsey, and the Jersey. Pains was taken to select as they happened to come 18 Jerseys and the same number of Gurnseys for the purpose of ascertaining the number of pounds of milk and the net profit from each of these two herds, with the following result:—The 18 Jersey cows gave 52,629.6 pounds of milk upon which there was a net profit of \$1,024.75; the 18 Gurnseys gave 43,537.5 pounds of milk with a net profit of \$640.32. From this it appears that the 18 Jersey cows gave 3092 pounds more of milk than the 18 Gurnseys, upon which there was an excess of net profit over the Gurnseys of \$384.43. If this test can be accepted as correct, the Jerseys are away in advance as milk givers. The whole question of improving dairy stock depends largely on the farmer. If he has an extra good cow both for flow of milk and richness, keep her for breeding purposes. If he has a poor cow sell her as soon as she can be turned off and put a good one in her place, and in this way a herd of the best milkers will be obtained. Of course it will take good judgment, care and strict attention and will take some time to reach the highest point of perfection, but it will pay in the end and pay big.

The Charlotte county council by a vote of 18 to 9, passed a resolution similar to the Kent County resolution, protesting against legislation of the Blair government compelling municipalities to assess for services, the cost of which has heretofore been borne by the government. The county of Charlotte at the last general election returned four supporters of the Blair Government. The county of Restigouche has been billed for \$1105 the cost of maintaining seventeen pauper lunatics but the municipality has taken no action in the matter.

Portland, Me.

JAN 29th, 1894.—Last Tuesday evening was one of the most enjoyable spent by our N. B. friends for a long time. The occasion was a farewell party given by Miss Hickey, and Miss N. Monahan, to Mr. McGonigle, on the eve of his departure for a sojourn abroad. The genial hostess, our friend Norah, received and welcomed her guests in a handsome costume of green silk and cream lace, with a corsage bouquet of pink carnations. She was ably assisted by Miss Fannie White in a pretty and very effective gown of brown and white tulle, and lace. She also wore pink flowers. The ladies present were the Misses Flora Pope, Josie Monahan, Annie Dolan, Alice and Mary Rainsborough, Alice Hennessey, Annie O'Neil, Annie Gorman, Mary and Maggie Hackett, Teresa Burke, Annie Bride, Annie Rainsborough, Nellie Cowley, Jennie McDonald, Aggie Chambers, and E. Keeler.

The gentlemen were Mr. M. McGonigle, the guest of the evening, Messrs. C. Rainsborough, T. Gavin, E. Cavana, J. Walsh, J. McLean, H. Sterling, A. Gilmore, Messrs. Bogan, Williamson, Crowley, Dawson, Holland, Jones, Wheeler, and Farrel. There were numerous amusements and singing by several of the guests. Miss A. Bride, a beautiful soprano, favored the company with several songs which were very much enjoyed. A delicious lunch was served by Misses N. Hickey, Nellie Monahan, assisted by Fannie White, Annie O'Neil, J. McDonald, and Annie Dolan, who served coffee and cake. The evening passed all too swiftly for every one had a really good time in every sense of the word, and after thanking their kind hostess for a most enjoy-

able evening, they betook them each to their own homes, hoping that such an evening might come again ere long. Mr. McGonigle sailed on Thursday, carrying with him the best wishes of a multitude of friends, who hope that a very pleasant sojourn abroad will not tempt him to remain, but that he may speedily return to their midst.

The many friends of Mr. Clarence Blodgett regret that he has left the city for a while. They wish him every success in his present undertaking, and that the summer will bring him back to the old haunts.

We regret very much to hear that our friend Norah is confined to the house with a sore throat. We trust her illness will be of short duration.

Our long absent Joe has returned. If bright eyes and gladness looks tell of the inner feelings, then there is no doubt of pleasure afforded by seeing Joe once more in our midst.

We are having very pleasant weather just now. A slight fall of snow has made the sleighing good for another week or so.

TWIN SISTERS.

STORM ON THE B. & M. RAILROAD.

A Snow Special Twenty Three Hours in Covering One Mile.

The snow-storm of last week, which to a certain extent has been general throughout the maritime provinces, was the most severe ever experienced on the Buctouche & Moncton Railway. The storm set in Monday and on Tuesday the daily train not arriving, traffic on the road was suspended. Manager Hall accordingly telegraphed instructions to Buctouche to despatch an engine, snow plough and passenger car with a number of men from that terminus to clear the road Tuesday night, and at precisely 11 o'clock the same night he with an engine, snow plough and five men left Moncton. Departing from the station, from the very start the road was heavy, but no serious difficulty in the way of drifts was met with until the vicinity of the reservoir, five miles from Moncton, was reached. Here monster drifts in some instances five or six feet high were to be found, and the engine became blocked twice. The men worked with a will and succeeded in shoveling her out. A comparatively good run was made to McDougall's settlement ten miles further on at which place they arrived at 7 o'clock Wednesday morning. At this point a stretch of track embedded to a distance of five feet was found. Several futile attempts were made to effect a passage with the plough but the snow, which was thoroughly packed proved an impenetrable barrier and the men again resorted to the shovels. They worked all day and at four o'clock in the afternoon had cleared the rails for several hundred yards. When they returned to the locomotive they found that the water in the boiler had completely exhausted necessitating work of another character. The nearest water tank was at Irishown station several miles back and under the circumstances, pails and tin cans had to be utilized to convey water from a spring located in a field about a hundred yards from the track. Sufficient steam power was eventually obtained and Notre Dame, a station four miles further on was reached with difficulty. This place is entirely unprotected and consequently the drifts were enormous. For a distance of three hundred yards the track was covered to the extent of ten or twelve feet. The prospect of shoveling this patch was very discouraging but the work had to be performed and for twenty-one hours the men worked almost incessantly. At intervals the engine would be backed up and run with full force against the snow but unavailingly and twice steam gave out and the boiler had to be bailed similarly as on the previous occasion. At 3 o'clock Thursday they left Notre Dame having covered only about a mile in twenty three hours. The run to St. Anthony was made without stopping. At this station they met the snow special from Buctouche which had been near three days coming from Buctouche, a distance of eight miles. A slight concept on can be formed of the quantity of snow and amount of work done by the latter crew when the distance is taken into consideration and the fact that this special conveyed twenty employees all of whom worked continually is contemplated.

The two trains after leaving St. Anthony returned to Buctouche. The road between the two points is lined on either side by snow banks from ten to fifteen feet high. Thursday night at 11 o'clock manager Hall with an engine, snow plough, flanger, passenger car and a car of oysters left Buctouche for Moncton. At Notre Dame the snow had again surmounted the track in high drifts and the train was blocked. All night and next day was passed shoveling the road bed clear and the train arrived at this station Friday night at 10 o'clock. The men engaged in the trip experienced veritable hard-ship. The work was laborious and so difficult was the snow to handle that in some instances it proved almost overwhelming. The fact that they were limited as to stock of food and raiment made the labor more arduous they working incessantly for twelve hours on the return trip without a morsel of food. From the gist of their conversation relative to the work they are not at all anxious for a repetition.—Transcript.

An Old Settler's Story.

A PERTH COUNTY PIONEER'S EXPERIENCE.

A Sufferer for Nearly Twenty Years—Had Not Done a Month's Work in Ten Years—He Regains Health and Strength—His Neighbors Discuss the Remarkable Cure.

Trowbridge is a pretty little village in the county of Perth. It is five miles from a railway, and gains in rural quietness a compensation for the loss of the bustle of larger towns. One of the best known residents of the village is Mr. Isaac Deleyea, who has lived there for upward of forty years, in fact ever since the "blazed" road through the woods led to the site of what was then laid out as the district metropolis. As far back as the writer's memory goes, Mr. Deleyea has been sick nearly all the time, and unable to work, and when it was reported last spring that he was cured and claimed to be cured by Dr. Williams' Pink Pills, the Banner kept an eye on the case, letting it run on until a few days ago to see whether the improvement would last, and then set out to investigate for ourselves. We found Mr. Deleyea looking both well and active to say the least. In reply to our inquiries as to his health, he said he felt young again, and felt that he was fully cured, and was quite willing to tell his story as he had no room to doubt the efficacy of the remedy in his case. "I have been sick," said he, "for twenty years and I have not done a month's work in ten years. I became all bloated out and my legs swollen very much. From this trouble I could get no relief. The medicines I got from the doctor helped me but did not cure me. Nothing would take the swelling away and I was beginning to feel that my condition was desperate. I could hardly be about and could do no work, not even of the lightest description. A year ago I read of the wonders done by Dr. Williams' Pink Pills and bought a couple of boxes. The first box and a half gave me the sensation of having my flesh prodded all over with pins, but I began to feel better and determined to keep on taking the pills. I have taken twenty-eight boxes in all, and although it seems a large number, I would willingly take twice that quantity rather than be in my old condition of almost helplessness and suffering. All the swelling has entirely disappeared and I feel a well man again, and better than I have been for a great many years." In reply to a question Mr. Deleyea said he was sixty-six years of age and had been ill for fully twenty years, and he added earnestly "nothing else in the world but Pink Pills cured me, and I believe they will cure any one who gives them a fair chance. Ask any of my old neighbors how sick I was, and how I have been cured. Why, I not only feel like a new man but look like one. I can do all my work that I formerly had to have hired done, and I do not feel the least fatigue. With me it is no guess work, but a case of demonstration, and everybody who knows me, knows that I have been cured and by the use of Dr. Williams' Pink Pills, and I cannot speak too highly of them."

Dr. Williams' Pink Pills contain in a condensed form all the element-necessary to give new life and richness to the blood and restore shattered nerves. They are an unfailing specific for such diseases as locomotor ataxia, partial paralysis, St. Vitus dance, sciatica, neuralgia, rheumatism, nervous headache, the after effects of ja grappe, palpitation of the heart, the tired feeling resulting from nervous prostration; all diseases depending upon vitiated humors in the blood, such as scrofula, chronic erysipelas, etc. They are also a specific for troubles peculiar to females, such as suppressions, irregularities and all forms of weakness. They build up the blood and restore the glow of health to pale and sallow cheeks. In the case of men they effect a radical cure in all cases arising from mental worry, overwork or excesses of any nature. These pills are manufactured by the Dr. Williams' Medicine Company, Brockville, Ontario, and Schenectady N. Y., and are sold in boxes (never in loose form by the dozen or hundred and the public are cautioned against numerous imitations sold in this shape) at 50 cents a box or six boxes for \$2.50, and may be had of all druggists or direct by mail from Dr. Williams' Medicine Company from either address. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

Moins River.

I feel somewhat backward in writing at present as you have a regular correspondent from this place under the name of Pansy, Dancer, and Silver-top, but I would like to contradict a few of her ramblings.

She says in one of her rambling sketches that running away is quite common around here. We do not know of anyone running away. There were a couple of young people who shifted their place of abode, but none of them made a B line for the K. N. R., as a certain young man did some time ago. She also says that she is sorry that the wrong parties were blamed for the last notes. Well, we don't have to blame the wrong parties, and we are very happy to have a poetess in our midst, if they do copy from Cowper or Burns.

D. D. has swapped horses, not a goer this time, only a roadster. He says that he does not want to go through the world so fast now.

Who saw the young man that went to see his best girl and lost his horse collar? O where is Pansy No. 1? Has she gone out to Alberta, that great country boomed by C. C. C., or has she got the grip.

There is nearly enough snow here for two sleds. Feed is very scarce around here now, and the cattle are getting thin.

J. A. has taken a trip over to Boston. He will be missed among the school marms.

PONY MORE.

FEB. 1st, 1894.—We are having genuine winter weather just now, snow storms and cold enough to appall an Arctic explorer. The storm that originated with Monday morning's howling north-easter, and finished up Wednesday morning, was a typical one in the most fitting sense of the word. Nearly two feet of snow fell on the level and drifts varying from ten to twenty feet in height loom up in every direction. Notwithstanding the severe storm the Kent Northern reached Molus River today.

Miss Emmie Ward is visiting at Mrs. Henry Ward's. Jim intends leaving us soon for Uncle Sam's territory. He will be very much missed by some of our young ladies.

Mr. D. D. Warman, and J. Johnson, of Weldford, trotted their flyers on the ice one day last week. After three or four heats the coat came off victorious. Where is the Black Pilot's two-fifty clip now D.?

Where is Silver-top this week. Is she frozen, or is she snowed under, or has she started for Uncle Sam's dominion?

What has become of Jim and Herb? Have they taken wings or the grip. We have not seen them around so late in the evenings of late. Perhaps it is the big drifts between Bass and Molus Rivers.

Horse trotting is the talk of the day around here now. Have says he will trot anything on Molus River for twenty dollars a side. Good boy H., make them shut up or put up.

HAWKER'S LIVER PILLS cure all stomach ills. They assist digestion, regulate the bowels and liver, tone the stomach and purify the blood.

HAWKER'S BALSAM of Tolu and Wild Cherry. A POPULAR AND NEVER FAILING REMEDY FOR THE CURE OF COUGHS, COLDS, CROUP, HOARSENESS, INFLUENZA, BRONCHITIS. AND ALL THROAT AND LUNG TROUBLES. SAFE AND PLEASANT TO TAKE. SURE TO CURE. PRICE 25 AND 50 CENTS. MANUFACTURED BY THE HAWKER MEDICINE CO., LTD., ST. JOHN, N. B.

KENT NORTHERN RAILWAY.

TIME TABLE.
