The Wallace Hopper Co.

This excellent dramatic organization played a popular and successful engagement in the Town Hall Monday, Tuesday and Wednesday evening of this week to large and appreciative audiences, the plays being "Reclaimed," "Nugget Nell," and "Capitola." The company is a particularly strong one, in fact far and away the best that has ever appeared in Waterloo. Mr. Wallace Hopper is a capital all round actor, playing comedy or melodramatic parts with equal acceptance. His talent is of the versatile order and enables him to portray to the life a wide range of characters. His acting is both conscientious and natural and it would be impossible to praise his work too highly. He is also a singer of considerable merit and his repertoire of songs is good. Miss Nell Robinson, the leading lady, is not only pretty but an actress of no little power and ability. As "Nugget Nell" she made a distinct hit and captivated her audience completely. The support is first-rate, including such sterling actors as Fred A. Bigelow, Harry K. Fowler, Harry Hadfield, J. K. Mills, and J. N. Shaffer, the latter being also the hustling business manager of the company. The Wallace Hopper Company is unquestionably the best on the road and deserves the patronage of the lovers of the drama.—Waterloo Advertiser.

NUGGETS.

—The continuation of the story Eric Brighteyes will appear later.

—Mr. Frank Allen and Miss Jennie Allen went to Bathurst, Monday.

—A bear was seen in the woods between Kingston and town a few evenings ago.

—Miss McIntyre, of Blackville, is visiting Miss Thompson.

—Mrs. Geo. W. Robertson went to Donkton, Monday.

—A Norwegian bark, the Siga Jarl, 404 tons, Capt. Middleton, arrived at this port last week, and proceeded to Kingston to load a cargo of lumber for Mr. Edward Walker.

—Sunday was the hottest day experienced here for some time. At noon the thermometer stood at 95° in the shade. In the afternoon there was a very heavy shower.

—John Morrison & Co.'s saw mill, situated near Elm Tree river, about one and a half miles west of Petit Rocher station, was destroyed by fire last week. The loss will probably reach three thousand dollars.

—Daniel McNell, formerly of Miramichi was shot through the lung by Mr. H. C. Cross, at Presque Isle, Maine, on Saturday, last. Hopes are entertained of the wounded man's recovery. The man has been placed under arrest.

—The case of M. B. Edwards vs. Geo. H. Long was tried in the St. John County Court, Tuesday. Mr. A. W. Adams acting for the defendant, Captain Long effected marine insurance on the defendant's vessel, taking two policies. The defendant objected to the policies, saying they were not satisfactory and returned one, which was cancelled. The other was also objected to by him, but he did not return it. Mr. Edwards paid the premium to the company for which he was agent and this action was brought by Edwards to recover the money so paid. The defence is that the agent, not being an insurance broker, could not make a contract to bind both parties. A verdict was by consent entered for the plaintiff for the amount of \$146.87, with leave reserved for the defendant to move the full court for a nonsuit or to reduce the verdict. C. W. Weldon, Q. C., for the plaintiff and J. D. Phinney, Q. C., for the defendant.

TO CONSERVE MOISTURE.

WEEDS ROB THE SOIL OF A GREAT DEAL OF WATER.

Therefore, Uproot Them—Evaporation May Be Prevented, Also, by Blanketing the Surface With a Mulch—Some Paragraphs on Seasonable Topics.

Rain-making has not been a success, and all methods for regulating the rain fall have amounted to nothing. Droughts occur in some sections of this large country every year, and abundant rains fall on some portions, while others are parching and the crops drying out. There is no way to prevent droughts, and they are looked upon as standing evils to be met every season. In this section there are farms upon which no rain has fallen since the "wet spell," and during the recent warm days the effects of the absence of rain have been very injurious. There might be a time in the future when irrigation, or some other method, will enable farmers to escape the drawbacks of dry seasons, but until discoveries are made in that direction the tillers of the soil must bear the ills that they annually meet, and seek to avoid them as much as possible or at least to mitigate the evils which may occur at any time.

CONSERVING THE MOISTURE.

To maintain and preserve the moisture of the soil is within the province of the farmer to a certain extent. The first duty is to prevent its robbery. When two plants are side by side there is a struggle for supremacy and existence, the weaker being forced to succumb. Every plant seeks water from below when it cannot be secured nearer the surface, and sends down long tap roots for that purpose. When weeds are permitted to grow they deprive the plants composing the crop of needed moisture, and thus cause them to succumb. Some weeds have enormous root capacity, and seem to thrive during the dry periods. This is due to the fact that they can penetrate to great depths in securing moisture, and they thus crowd all competitors out of the way. Every weed destroyed is so much moisture retained in the soil, as every plant has the power to bring up moisture from below and dissipate it in the atmosphere, and when the surface of the ground is exposed there is constant evaporation, which daily lessens the supply.

BLANKETING THE SOIL.

It is well known that if a covering could be afforded the soil there would be less evaporation. The soil is full of small tubes, through which the moisture from below finds its way to the surface and escapes. If these tubes, known as capillary tubes, can be closed, the water will not evaporate so readily. This is done by loosening the top soil, not by stirring it to such a depth as to injure the roots of the plants, but in a manner to break the tops of the tubes and throw a covering of loose soil over the ground, and at the same time destroy the robber weeds, which not only use the moisture, but take away plant food as well. The loose soil is a mulch, a blanket, which prevents loss of moisture and protects against the direct rays of the sun. If the rains do not replenish the soil, the soil mulch will at least assist in retaining the moisture already existing in the soil, and enable the plants to bear up during the drought until a further supply comes. Land that is clean and free from weeds, with the soil kept loose at the surface, will bear crops during some periods when hard and weedy soils contain crops that are badly injured.

MIDSUMMER FARM TALK.

Broad-Tired Wheels—Windmill Irrigation—Notes.

The use of broad tires on roads is a subject that should receive attention. Instead of cutting up the road a broad tire serves as roller, and packs and smooths the road. It is not necessary to have heavy wheels because they are broad. In this age of steel broad wheels may combine strength, lightness and efficiency, and their use would save the roads and also permit of drawing heavier loads.

A windmill will irrigate quite an area of land if arrangements are properly made for storing and distributing the water. A small patch of ground, for which the moisture can be controlled, will yield more than ten times the area that is subject to droughts and other drawbacks. With thorough tile drainage and proper facilities for irrigation the farmer will have a complete control of the moisture required.

When the farmer is compelled to pay high prices for the foods brought on the farm for his dairy cows he should aim to produce high priced articles to sell.

Mr. George A. McFourbridge, of Stroudsburg, Pa., raises 10,000 ducklings per year and finds a ready sale for them as "green ducks." He uses the Pekin breed and makes them weigh five pounds each when they are ten weeks old. He hatches them in incubators and raises them for market in brooders. The prices are highest in April, May and June. The Pekin is pure white in plumage and the feathers are therefore an important item also. They are sold dressed, and plucked daily.

Manure is more subject to loss in very dry weather than at any other time unless a large amount of absorbent material is provided and the heap turned over occasionally, as it may become overheated and "fire-fang." When this occurs the ammonia is given off as gas. As it is the most valuable portion of the manure its loss should be guarded against. Drenching the heap with cold water, first in the morning, and then in the evening, will help to retain the water to reach the center of the heap is an excellent method of preventing loss.

Whether green manure crops add fertility or not to the soil the fact remains that by green manuring and the use of lime there is an increase of "humus." Humus or shade of any kind promotes the formation of humus, and that the land is more capable of retaining more moisture and of hastening chemical processes. All kinds have been improved whenever green manuring has been resorted to.

It is remarkable that, while in the South the cow pea is used or green crops, to be plowed under, yet in the North it has been neglected. A few years ago experiments have demonstrated that the cow pea will thrive wherever corn will grow, and especially when required for green manure only, as the seed does not have to mature.

The Triumph of Love

IS HAPPY, FRUITFUL MARRIAGE

Every Man Who Would Know the Grand Truth, the Plain Facts, the New Discoveries of Medical Science as Applied to Married Life, Who Would Atone for Past Errors and Avoid Future Pitfalls, Should Secure the Wonderful Little Book Called "COMPLETE MANHOOD, and How to Attain It."

"Here at last is information from a high medical source that must work wonders with this generation of men."

The book fully describes a method by which to attain full vigor and manly power.

A method by which to end all unnatural drains on the system.

To cure nervousness, lack of self-control, despondency, etc.

To exchange a faded and worn nature for one of brightness, buoyancy and power.

To cure forever effects of excesses, overwork, worry, etc.

To give full strength, development and tone to every portion and organ of the body.

Age no barrier. Failure impossible.

2000 references.

The book is purely medical and scientific, useless to curiosity seekers, invaluable to men only who need it.

A despairing man, who had applied to us, soon after wrote:

"Well, I tell you the first day is one I'll never forget. I just bubbled with joy. I wanted to hug everybody and tell them my old self had died yesterday and my new self was born to-day. Why didn't you tell me when I first wrote that I would find it this way?"

And other thus:

"If you dumped a cartload of gold at my feet it would not bring such gladness into my life as your method has done."

Write to the ERIE MEDICAL COMPANY, Buffalo, N. Y., and ask for the little book called "COMPLETE MANHOOD." Refer to this paper, and the company promises to send the book, in sealed envelope, without any marks, and entirely free, until it is well introduced.

FOR SALE.

Notice of Sale.

To Catherine Marshman of the Parish of Wellington, in the County of Kent, and Province of New Brunswick, widow of Henry B. Marshman late of the same place formerly deceased, and Cassie Marshman now of Lewiston, in the State of Maine in the United States of America, Spinster, Maria Brown, of Boston, in the said United States of America, wife of Joseph Brown, and Charles Marshman of the City of Moncton, in the County of Westmorland and Province of aforesaid, Heirs of the said Henry B. Marshman, deceased, and the Executors, Administrators and Assigns of the said late Henry B. Marshman, deceased, and all others whom it doth, can or may concern.

Notice is hereby given that under and by virtue of a power of sale contained in a certain indenture of Mortgage bearing date the TWENTY-EIGHTH DAY OF NOVEMBER in the year of our Lord one thousand eight hundred and eighty-five, and made between the said late Henry B. Marshman and the said Catherine Marshman his wife of the one part and Bernard A. Foley, of the Parish of Wellington, in the County of Kent, Merchant, of the other part, and duly recorded in the Records of the said County of Kent in libro E. No. 2, folio 24, and numbered 16950, therein on the twenty-third day of December A. D. 1885.

There will for the purpose of satisfying the money secured thereby be sold at Public Auction on FRIDAY THE THIRTY FIRST DAY OF AUGUST, next, at twelve o'clock, noon, in front of the Post Office Building, in the Parish of Wellington, in the said County of Kent, the lands and premises mentioned and described in the said indenture of mortgage as follows:—

"All that certain piece or parcel of land situate, lying and being in the Parish of Wellington, in the County of Kent, and Province aforesaid, and fronting on the Back-bay of Beauséjour and being a piece of land formerly granted to one Phineas Ward Jr. and bounded on the East side by lands formerly owned by William Harrington, Sr., and on the West by lands formerly owned by James Long and containing forty acres more or less, and being the same piece or parcel of land conveyed to the said late Henry B. Marshman by John Wood and Olivera Wood his wife by deed bearing date the twenty-third day of April A. D. 1884 and recorded in the records of the County of Kent in book known as C. No. 371 and 372 and numbered therein in 307, on the first day of May A. D. 1884, and being the same lands and premises lately acquired by the said late Henry B. Marshman and Catherine his wife, together with all and singular the buildings and improvements thereon, and appurtenances to the said lands and premises belonging in any way manner appertaining."

Dated this twenty-first day of July A. D. 1894.

Forster's Almont Wilkes

This horse is standard bred under rule 6, foaled 1890, is a beautiful bay with black points, stands 15½ hands, weight 1000 lbs.

He traces to "George Wilkes," the founder of the Wilkes family, through his sire "Harry Wilkes," which is son of "George Wilkes" and sire of Forster's Harry Wilkes, who traces to "Almont" through "Gen Withers" 1157, through his dam "Isawood." "Gen Withers" is by "Almont" and sire of "Isawood."

"Almont" is by "Alexander's Abdallah" by "Rysdyk's Hambletonian."

"George Wilkes" is by "Rysdyk's Hambletonian."

A writer states that according to Clark's horse-review 628 trotters and pacers in the 2,20 list, trace to "Alexander's Abdallah" either through sire or dam, 214 of which are descendants of "Almont." Yet it is claimed the "Wilkes" family take the lead.

Conns Harry Wilkes is sire W. Rosalind Wilkes, 2 14½ and three others in the list.

"Isawood" also traces to the "Messengers," her dam "Jen," being by "Young Buchanan," 9598, 2,294, second dam by "Matchless," a thoroughbred with 2 in the list, third dam, by the sire of "Belle Strickland" by the "Witherell horse" by "Winthrop Messenger."

Season ten dollars.

A TRIP

With CHAMPLAIN and LASALLE up the St. Lawrence and down the Mississippi through ACADIA and the land of Franceline; on the PLAINS OF ABRAHAM and around the historic Ancient Capital: A glimpse of the GREEN ISLE OF CANADA.

THROUGH

The fertile fields and fertile towns of Ontario across the BOUNDLESS PRAIRIE over the MOUNTAINS and the sea of the OCEAN.

PICTURESQUE CANADA.

This is a prior historical and descriptive review of our own country, written by George Munroe Grant, Principal of Queen's University, Kingston, is now within the reach of all.

The author needs no introduction. He is known throughout the length of this grand country—and his fame extends into all other parts of the civilized world as a powerful and entertaining writer, and a truthful historian.

The illustrations are gems of art, the scene of perfection in wood engraving. They are the work of talented artists all under the supervision of L. R. O'Brien, President Royal Canadian Academy.

WE NEVER TIRE

of reading the same old story of our country. We never tire of reading the fascinating descriptions from the pen of one of Canada's greatest historical authors.
