RICHIBUCTO, N. B., JULY 5, 1894.

BUTTER AND CHEESE FACTORIES.

Kent County farmers will have an opportunity of fairly testing the experiment of butter and cheese making, by which very this summer. In addition to the St. Louis factory, which was in operation last season and the product of which captured first prize at the Chicago World's Fair, and which is again in successful operation this season with an increased output, there are now running three other factories—the B. & C. Co., the Weldford, and St. Mary's. The latter are manufacturing cheese, the former, butter. Report from all are highly satisfactory, and we have every reason to believe that the result of the experiments will prove highly satisfactory both directly and indirectly to the farming population. We will endeavor to keep our readers informed from time to time as to the progress and results of these new enterprises. Meantime for the benefit of those who are not familiar with the process of butter making by machinery which is an interesting one, we may briefly describe it. The principal fittings are, milk vat, cream vat, separator, churn, worker, and "wheeler," used in connection with the testing. In addition there is, of course, the requisite shafting for conveying the power from the engine, which, with the boiler, occupies a separate room from the butter factory proper. The new milk is either delivered at the factory by the patrons themselves, or at stated times the collecting wagon makes its rounds and carries the milk to the factory. Here, instead of being set out in pans for the cream to rise, it is run through the centrifugal separator. The milk as it passes through the separator, is whirled around at a high velocity, which causes the heavy properties to fly to the outer bounds of the vessel which contains it, while the lighter portions (the cream and fat) are gathered in toward the centre. Two pipes are so connected with the machinery that one delivers the cream while from the other is received the skim milk. It is said this process saves one fifth more cream than the slow rising method. The cream is put into the vat. Here it goes through the process of ripening or acquiring the proper acidity for making fine flavored butter. This occupies some hours. The next operation is churning, which is never begun until the cream is at the proper temperature. The churn is of the revolving pattern and of course is worked by steam power. When the butter reaches the granular state, or has the appearance of boiled rice, the butter milk is drawn off, and clear cold water is run through the butter to remove every trace of the butter-milk. The butter is then salted and carefully worked at the working table, and put into tubs or made into brick shaped forms of one pound each. The skim milk and butter milk are returned to the farmers. The division of the profit is based on the results of tests for butter fat made with samples of each patron's milk by an ingenious process which we need not describe, but to a patron who gets the best returns is he who sends the richest milk.

SOUNDS LIKE OLD TIMES.

At the meeting of the Diocesan church society held in Woodstock last week, a sharp and somewhat acrimonious discussion arose upon a motion offered in reference to the church school for girls at Windsor by Judge Hanington who in his remarks reflected very pointedly upon Rev. Messrs. deSoyres and Lloyd because of their efforts to establish a rival institution at Rothesay. The Judge's speech was not very well received by these gentlemen, and although several clergymen hastened to throw oil on the troubled waters, Mr deSoyres took occasion to strongly resent the attack made upon the Rothesay school and himself by the Judge, whose remarks he characterized as "very copious, decidedly loud and it seemed to him somewhat violent," and he added "if the friends of the Nova Scotia institution knew of the sort of support they are receiving they would be inclined to say save us from our friends." The report of the discussion recalls to mind some of the debates in the House of Assembly in which the then honorable leader of the Opposition was accustomed to pay his respects to his honorable friends on the other side of the House, and would indicate that when in the opinion of the now Judge, occasion required it, some of the strong declarations which were not infrequently heard in the Halls of the Assembly may be looked for in the Diocesan society gatherings.

KENT COUNTY BRIDGES.

During the past few weeks frequent complaints have reached us that many of the bridges both on the great roads and the bye roads in this county are in a dangerous condition and that in some instances the commissioners have considered it necessary to close them against travel. A few of the commissioners have reported the facts to M. J. Emmerson, the chief commissioner of public works, under whose supervision all the road service of the province now is, and he has replied that the demands from Kent County have of late been so great that he fears he cannot give the assistance asked for and that, pending the repairs on the big Buctouche and Cocagne bridges, other bridges cannot receive attention. What should be done under the circumstances it is difficult to say. It is a most extraordinary thing, unheard of in the history of this county that the great road bridges, at any rate, should be allowed to go without repairs until people are afraid to cross them. The little North West and Mooney bridges for instance are in such a dangerous condition that to avoid them many persons now travel the "Back road" into Richibucto, and competent parties who have examined them say that they may break down any day. The Main River bridge at Graham's Point is quite unsafe, and the Chief Commissioner has apparently determined not to make any further expenditure on it. Commissioner Murray, of Weldford reports that in his district several small bridges are in a dangerous condition. It looks now as if the province had actually reached the period when, through lack of money in the treasury, the maintenance of the roads and bridges will be thrown on the municipalities. It may become necessary to call a special session of the County Council to consider the situation.

TO OUR SUBSCRIBERS.

A collector from this office will call upon our friends in this County at an early date for payment of arrearage and renewal of their subscriptions, and we have endeavored to make THE REVIEW a credit to the community and a good local newspaper, and have the satisfaction of knowing that our efforts have been fairly successful. It takes money, however, to run a newspaper, and we cannot continue to send out the paper to those who do not pay. We are compelled in justice to ourselves and those who promptly pay their subscriptions, to say that unless subscribers who are now in arrears settle their indebtedness at once their names will be struck from our mailing list and legal steps taken forthwith to collect the amount due. Subscribers and advertisers to whom bills are forwarded will also oblige by a prompt remittance.

HAWKER'S LIVER PILLS.

contain no mercury, are purely vegetable, safe, sure and effective. Do not gripe, small, easy to take. Sold everywhere.

DIED.

MILLER.—At Molus River, on the 5th inst., after a short illness of heart failure, Mr. John Miller, elder, aged 64 years.

CLARK.—At Kouchibouguac, 5th June, 1894, Janie Clark, aged 19 years, 11 months and 4 days.

Dear Janie! you have left us, In this dreary world alone, Till God will please to call us Up to a better Home.

PILES! PILES! Itching Piles.

Symptoms—Moisture; intense itching and stinging; most at night; worse by scratching. It allowed to continue tumors form, which often bleed and are sore, becoming very sore. SWAYNE'S Ointment stops the itching and bleeding, heals ulceration, and in most cases removes the tumors. At druggists, or by mail, for 50 cents. Dr. Swayne & Son, Philadelphia, Lyman Sons & Co., Montreal, wholesale agents.

Buctouche.

Dear Editor: JULY 11th, 1894.—By your leave I shall write a few lines. Everybody is having a sad and I want mine and I'm just the lad to shout for it. Talk about your talk-about, who would not be a lad, a free independent lad, one who lives, does as he pleases, does nothing very wrong and don't give a darn, that is my picture if you please. Great fun at the picnic last week, we are the boys, the men played the boys a game of base ball for the ice cream. The boys did not pay for it but we had it, hurrah for the lads, the men are no good, I wonder if we will be N. G. when we become men. One inning the boys scored until almost tired of the work. About \$100 were cleared at the picnic. The Moncton firemen picnic here tomorrow on the Ryan picnic grounds, they are A. I. grounds, and no mistake. Capt. Boonel expects to take the cars across the river tomorrow. Contractor Kitchen has commenced work on the road bridge and a ferry will be running this week. J. A. Bourque and sister expect to go out on the train to-night en route to Boston. A pleasant time, Joe. A lot of Buctouchers spent most of last week in Richibucto attending court. Messrs. James and Foley intend driving to Moncton to-night. Andy Gorman spent Sunday in Buctouche, he drove back to Moncton, in the evening, he was warmly welcomed by his many friends. I enjoy a game of football, we get at it every night, it is a pity the girls can't kick too, but they are not built that way. Some people think boys can't write but I guess we can, and I could put a lot of other stuff in but I won't be such a blatherskite, I don't think it is right for A Boy.

A Remarkable Case

THE STRANGE EXPERIENCE OF WM. R. HALL, OF ALDERSHOT.

He Was Thought to be at Death's Door and the Medicines of a Continent Had Failed—A Final Effort to Regain Health was made, and he is today Alive, Strong and in Good Health.

(From the Hamilton Herald.) One of the most attractive places in the county of Wentworth is the little village of Aldershot, situated on what is known as the Plains road, about five miles from the city of Hamilton. One of the best known residents of the village and surrounding country is Captain Hall, who has represented the Township of East Flamboro in the Municipal Council for a number of years, and who, with his family, is held in the highest esteem by all who know them. Recently a reporter of the Herald visited the home of Captain Hall for the purpose of investigating a story to the effect that one of the captain's sons had been restored to health in a wonderful manner after having suffered since boyhood from apoplectic fits. On arriving at his destination, the reporter found the genial captain, his wife, daughter and three sons constituted the family. Of these stalwart young men it was impossible to pick out the one who had for so many years been such a sufferer, but the captain settled all doubts by referring me to "Will." William R. Hall, more familiarly known as Will, presented the appearance of a hearty young man about 30 years of age. His story is briefly related as follows: He had been a sufferer from fits from his sixth birthday, a childish freight being supposed to have been the original cause. For years he would fall down anywhere without being in the least able to help himself. The doctors from Hamilton and various distant points were in vain called in attendance. Medicines were procured from numerous sources in Canada, the United States and even from England, without avail. The boy became so utterly helpless that seven years ago he was compelled to keep his bed, and until a year ago was completely helpless. The fits sometimes came on him so severely that he would suffer from as many as fifteen in one day, and at such times it was so difficult for him to get his breath, that his nurses had to wash him with liquor. At this time he was so low that the neighbors who dropped in to see him expected to hear of his death almost any moment. This continued until about a year ago, when the newspaper articles relating the wonderful cures by the use of Dr. Williams' Pink Pills induced Mr. Hall to give them a trial, and to the great satisfaction of himself and his friends, he began to mend not long after beginning their use, and in three or four months was sufficiently recovered to be able to go out of doors. He continued taking the pills, and for the past six months has been as strong and about as well as either of his brothers, and has attended to the stock and done his share of the work on his father's farm and fruit garden. Before Mr. Hall began taking the Pink Pills he was so thin and light that one of his brothers could carry him upstairs without the least difficulty, but he has since gained fifty pounds in weight. He has not taken any other medicine since he began taking Dr. Williams' Pink Pills, and although a fit of a very mild nature occasionally comes on him now, he is so nearly cured that his father took great pleasure in giving the information here recorded. "It is over a month since I had a spell," said William as the reporter was leaving, "and even when I do have one now it is not nearly so hard as before I began to take the Pink Pills. The neighbors look surprised to see me drive over to Hamilton as I frequently do, for they all thought I would die long ago. I am pleased at the wonderful progress I have made, and an very glad my experience is to be published, as it may be of value to some one else."

Every statement in this article may be verified by a visit to the home of Captain Hall, ex-councillor of East Flamboro, who had resided on the Plains road for the past eighteen years, and whose word is as good as his bond among those who know him. The reporter also had a conversation with several of Captain Hall's neighbors, and the story of William Hall's recovery was verified to his full satisfaction. Such well verified cases as the above prove the wonderful efficacy of Dr. Williams' Pink Pills in the treatment of all diseases of the nervous system, and stamp the remedy as unique in the annals of medicine. St. Vitus' dance, locomotor ataxia, partial paralysis, rheumatism, sciatica, chronic erysipelas, nervous headache, the after effects of la grippe, and all diseases depending upon a depraved condition of the blood, speedily yield to a treatment with the great medicine. By restoring the blood to a healthy condition and rebuilding the nerves they speedily drive out disease and leave the patient in the enjoyment of vigorous health. They are also a specific for the troubles peculiar to women, and soon bring the rosy glow of health to pale and sallow cheeks. In the case of men they effect a radical cure in troubles arising from overwork, mental worry or excesses of any nature. The public are cautioned against imitations and substitutes said to be "just as good." These are only offered by some unscrupulous dealers because there is a larger profit for them in the imitation.

His Dyspepsia Cured.

MR. GEO. READ.

DEAR SIR,— I write you to say that for some time I had been suffering from acute indigestion or dyspepsia, and of course felt very great inconvenience from same in my general business. I thereupon decided to try Burdock Blood Bitters, and after taking two bottles I found I was quite another man, for

B. B. B. CURED ME.

I have also used it for my wife and family, and have found it the best thing they can take, and from past experience I have every pleasure in strongly recommending B. B. B. to all my friends.

I write you because I think that it should be generally known what B. B. B. can accomplish in cases of indigestion.

GEORGE READ, Sherbrooke, Que.

There is no other remedy that can successfully take the place of Dr. Williams' Pink Pills and those who are in need of a medicine should insist upon getting the genuine which are always put up in boxes bearing the words "Dr. Williams' Pink Pills for Pale People." If you cannot obtain them from your dealer, they will be sent post-paid on receipt of 50 cents a box, or \$2.50 for six boxes, by addressing the Dr. Williams' Medicine Co., Brockville, Ont., or Schenectady, N. Y.

Poor George.

Helen—Poor, dear George must be devoting himself to business strictly. Florence—What makes you think so, dear?

Helen—Why, he writes to me only twice a day now.

When the system is all run down, and no hope of obtaining nourishment by the ordinary food supply, then take "Miller's Emulsion," the great flesh and blood maker, "the kind that cures" colds, coughs, bronchitis and all diseases of throat and lungs. Every bottle warranted. No oily taste like others. In big bottles, 50c. and \$1.00, at druggists.

The severest cases of rheumatism, are cured by Hood's Sarsaparilla, the great blood purifier. Now is the time to take it. Hood's Cures.

Murderer Prendergast thanks the latest jury in his case for having pronounced him sane. He can shortly acknowledge himself under as deep obligations to the Chicago hangman.

HAWKER'S BALSAM OF TOLU AND WILD CHERRY is the safest, surest and best known remedy for the cure of Coughs, Colds, Bronchitis and all Throat and Lung Troubles. The Children's Favorite. Sold by all Druggists and Dealers.

ASTHMA,

Distressing Cough,

SOFT JOINTS,

—AND—

MUSCLES.

Despaired OF RELIEF.

CURED BY

Ayer's Cherry Pectoral

"Some time since, I had a severe attack of asthma, accompanied with a distressing cough and a general soreness of the joints and muscles. I consulted physicians and tried various remedies, but without getting any relief, until I despaired of ever being well again. Finally, I took Ayer's Cherry Pectoral, and in a very short time, was entirely cured. I can, therefore, cordially and confidently commend this medicine to all."—J. ROSELLS, Victoria, Texas.

"My wife had a very troublesome cough. She used Ayer's Cherry Pectoral and procured immediate relief."—G. H. FODRICK, Humphreys, Ga.

Ayer's Cherry Pectoral Received Highest Awards AT THE WORLD'S FAIR

GREAT SALE OF Grey and White Cottons.

WE will inaugurate this week and the coming weeks the Greatest Sale of COTTONS ever held in Moncton. Grey and White Cottons are lower now than at any time for 15 years. Somebody is losing money, but we are not.

Read what "The Daily Telegraph" of May 18th says about the Cotton Combine:—

"The Cotton Combine and the St. John Mills." "The movements of the cotton combine men at the present time are somewhat mysterious. For the past three years all their mills have been working up to their full capacity, and stock has been piled up so that there is a surplus of cotton goods far beyond the needs of the country. Prices were, however, fairly well maintained up to the 6th of April, when a cut of 10 per cent. was made. This did not appear to have the effect intended, and on Saturday last the combine announced another cut of 5 per cent. This brings the price of cotton cloth down to from 13 to 15 cents per pound, according to quality, an unprecedentedly low figure. The significance of these two cuts will be better understood by the reader if he places the matter in the form of a little arithmetical calculation. Let us suppose that the combine had on hand prior to the 6th of April last, a stock of cottons worth \$1,000,000, and this we understand is very much below the true figure, these goods would now be worth only \$750,000. Thus the combine would have lost, in the brief space of six weeks, \$250,000 as a result of their own action in cutting the price. Now, why have these two cuts been made? If the object was to sell off their stock more rapidly it has not been accomplished, because the sales have not increased to any appreciable extent. If the object was to permanently close the two cotton mills in this city, which are not in the combine, that does not seem likely to be accomplished either. It is true that the St. John mills cannot make cotton with profit at present prices, but neither can the below cost, and as the combine mills make 20 times as much cotton as the St. John mills, their loss in selling cotton at such a low rate will be 20 times as great. As a matter of fact the St. John mills have no surplus stock, and are therefore not suffering any loss except such as arises from the being temporarily closed down. In the meantime people are wondering whether some person is not squeezing the combine and compelling them to unload their goods at an enormous sacrifice."

Prices we will guarantee are the lowest ever quoted in Moncton. Sale commences at 8 o'clock in the morning and ends at 6 o'clock standard.

PETER MCSWEENEY, MONCTON, N. B.

SEEDS! SEEDS! SEEDS!

We have now in store and for sale our usual stock of Field and Garden Seeds, comprising fine, bright Quebec Timothy, Northern Red Clover, Long Late Red Clover, Alsike Clover, Field Peas, White Russian Wheat, Beans, Turnips, Carrot Beet, and a large variety of Garden and Flower Seeds.
