A Mine on Fire Over Forty Years. The commissioners appointed by the local government to inquire into the "history, causes and effect" of the coal mine fires of Pictou County have just finished taking evidence. The commission is composed of Inspector Gilpin, Deputy Inspector W. Madden, Henry Mitchelland A. Dick. The work of the commission was directed mainly to an investigation of the condition of the Foord pit. This mine has been on fire in one place or another since the fifties, and it is burning vet. Explosion after explosion has occurred, and many lives have been lost. When fire broke out in one place the miners resorted to another, sinking a new shaft. To avoid the fire on an upper level a shaft was sunk and coal taken out on the level immediately below the fire. Soon the fire came through, and again the miners were driven out. Nothing that the owners could do availed to drive out the fire, and the splendid mine has been practically abandoned, though a little coal is now being taken out on a level below a part that is on fire. The object of the commission is to learn whether something
