

GREAT CROPS AT ROGERSVILLE.—Mr. A. Poirier, who returned from Rogersville this week, brought with him a sample of grain raised at that place. One stock of oats taken from a large field owned by Paul Richard, measured 6 feet 2 inches. The entire field is higher than a man's head, and Mr. Richard's crop is no exception as Mr. Ed. Young, directly opposite has a large field just as good. The crops all through the Rogersville district are good.—Times.

AN INTERESTING EVENT AT EEL RIVER.—Regwold cottage, Eel River station, the home of Mr. and Mrs. R. Miller, was the scene of an interesting event on Wednesday evening, the 4th inst, when their eldest daughter, Sadie, was united in marriage to Mr. W. McD. Metzler of Moncton. About 60 guests were present to witness the ceremony, which was performed by the Rev. Geo. Harrison. Miss Williams of Campbellton played the wedding march. The happy couple left by the midnight express for Halifax, where they will spend the honeymoon. On returning from that city, they will make their home in Moncton. The presents were numerous and costly.

A SEA YARN.—The San Francisco Bulletin tells of the tragic death at sea of Capt. George Robertson. He sailed from England for Australia in command of the ship Aberfoyle. Before sailing he lost his wife, which, it is believed, unbinged his mind. He took his three young children on the voyage. Soon his insanity developed. Three officers died and were buried and then the only man on board who could navigate the ship was the crazed captain, who grew so violent and wild that he had to be confined to his cabin. Finally he, too, died. The helpless crew and three children drifted around for 65 days. On June 16th last they spoke the ship Tragialfero and were rescued.

THEY NEED HELP.—The public has already heard of the great calamity which has happened to a large number of farmers of Kent County. On the 21st August last, a hail storm of extreme severity wholly destroyed the crop of over 125 farmers who are now in total want. Under the circumstances, and with a view to take the necessary steps to help those destitute people through the winter, the citizens of Buctouche have appointed a committee composed of the following gentlemen: H. Irving, President; D. V. Landry, M. D., secretary and treasurer; Rev. F. X. Michaud, Hon. O. J. LeBlanc, R. Hutchinson, J. P. Leger, Advising board. This relief committee met on Thursday at 2 o'clock p. m., and decided to make a general appeal to the charitable public. This hail storm has made greater damages than the deadly tornado of 1879. Many thousand dollars worth of food will have to be distributed to those suffering people during the coming winter. There are fully as many more farmers who had their crops partially destroyed, and who will be unable to aid their distressed neighbors. So, any outside assistance will be gladly received, and distributed among the more needy.

No Hope of Assistance.

NEW YORK, Sept. 5.—Heret M. Kiershjian, general secretary of the Armenian Relief Association, has given out the following to the press containing a direct communication from the valley of Moush, being an extract from a private letter, dated in August, not written for publication:—

"The remnant of the people from the Sassoun region have returned to their villages. They are rebuilding the ruins but the government is raising obstacles so that the building may be retarded. The government has let loose the Bakrantsi Kurds over the hills of Sassoun. Our people who have returned to their ruined villages are in terror and dismay. Kurds who are friendly with our village have sent us word saying:—

"For the love of God, arise and flee, that you may save your lives. The government has brought the Bakrantsi Koords for the purpose of utterly exterminating what is left of your people." This has thrown the people into great anguish. Last year they had some arms with which to defend themselves; this year they had not that means of protection, and are in utter extremity of misery. We see no hope of assistance from God or from men."

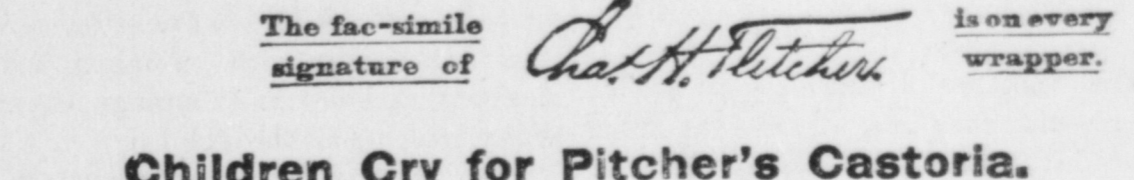

Mildew may be removed in the following manner: First by brushing off any loose mildew, then rubbing in common salt, afterward sprinkling liberally with powdered chalk and moistening with clean cold water. After this dry slowly in the open air, rinse, and if the marks are still there repeat the process. It may be necessary to repeat this several times, but in the end the spots will be removed.
