

She Survives a Broken Neck.

(New York Herald.)

That a broken neck can be treated with comparative certainty and despatch has been illustrated by the surgical staff of the Post Graduate Hospital, at Second avenue and Twentieth street, in the case of Miss Abbie McCully, of No. 384 West Fifty-Sixth street.

Miss McCully is the seventeen year-old daughter of John V. McCully a piano manufacturer. She lives with her aunt, Mrs. Anna Smith, and attends a private school. Three weeks ago she paid a visit to another aunt, Mrs. Harris, of No. 241 Clark street, Jersey City Heights, where a few days later occurred the accident which led to one of the most remarkably successful operations on record.

With two children of Mrs. Harris the visitor was swinging in the veranda hammock a week after her arrival, when the swaying couch was overturned and its three occupants were thrown heavily to the floor. It was a fall of only two feet, but the unfortunate girl struck with crushing force on the back of her head and lay unconscious.

Physicians were hastily summoned, but nothing could be done for the sufferer, who was totally paralyzed, from neck to feet. All power of motion and sense of feeling were gone, and the attendant physicians pronounced the case hopeless. Examination showed the neck to be broken and splintered at the fifth vertebra. At all appearances the girl had but a few hours to live.

The distracted father consulted eminent specialists in this city, and as a last faint hope it was decided to attempt an operation. This necessitated the girl's removal to the Post Graduate Hospital, where she was taken in an ambulance in charge of a physician, who administered oxygen at frequent intervals during the trying journey.

There was no time for delay, and within an hour of her arrival at the hospital the patient was on the operating table. Dr. W. O. Plympton performed the operation in the presence of Professors Dana and Keeler. The shattered vertebra, which pressed against the spinal cord, was carefully removed, bit by bit, and with wonderful nicety.

Her neck was securely bandaged in position before the effects of the anæsthetic passed away, and with returning consciousness came the power of motion and the sense of feeling in the paralyzed limbs.

The operation was a complete success. The surgical forces of the Post Graduate Hospital are naturally proud, at least they declined yesterday to give the details of the case for publication.

Miss McCully is improving rapidly and will probably be able to leave the hospital in a month. Her physicians believe that no deformity will result from the operation, although she will probably carry a stiff neck through life as a memento of the injury.

Threatened With Pneumonia.

GENTLEMEN,—Last spring I had a very heavy cold and was threatened with pneumonia. I used two bottles of Norway Pine Syrup and it completely cured me. It is the best preparation for a cough ever used.

J. K. MacDonald

Whycomagh, Cape Breton.

GENERAL NEWS.

One man in Chester, England, has been before the police justices 130 times for drunkenness or assaults; his father was up 35 times, one sister 67, and another 29. The cost of prosecuting the family and keeping it in prison has been over \$10,000.

Building ground comes high in London. Late a plot of fifty-seven square yards, Lombard street sold at \$6,500 per square yard.

President Cleveland has declined to commute the sentence of Hans Hansen. He will be hanged at San Francisco on Friday next.

A ton and a quarter of bar silver was stolen in the London streets the other day while being transported in a van from the railway station to a bank. The men in charge stepped into a tavern for a few minutes for breakfast, when the van was driven off and was found in a street not far off soon after with the silver gone.

Mrs. John Rodgers of Monticouche, P. E. Island, aged 56 years, committed suicide by hanging last Thursday evening. She was of a rosy complexion and was dressed out through an upper window. She was apparently in her usual health an hour before, and no cause could be assigned for the act. She leaves a family.

While trying to drive off an intoxicated charity party on the night of the daughter's marriage last week, Charles Dunn of O'Leary, P. E. Island, got a bullet in his neck. The wound is not considered dangerous.

Thirty-two persons were killed by the escape of the running mill at Bingham, Westphalia, on Thursday.

Hood's Sarsaparilla, taken at this season, will make you feel strong and vigorous and keep you from sickness later on.

Hood's Sarsaparilla, taken at this season, will make you feel strong and vigorous and keep you from sickness later on.

MISSING LINKS.

Darwin asserted that there is insanity among animals just as there is among people.

Analysts say that butter is the most nutritious article of diet and that bacon comes next.

Some of the largest ocean steamers can be converted into armed cruisers in thirty hours.

It is said that while 150 feet is the limit at which diving work can be carried on safely under water, a depth of 201 feet has been attained by a "helmet diver"—a diver who descends by himself and not in a diving bell.

Solitary confinement, as calculated, doctors state, to produce melancholia, suicidal mania and loss of reason. Nine months of absolute solitary confinement are almost certain to result in the mental ruin of the convict.

The reason given why birds do not fall off their perch is because they cannot open the foot when the leg is bent. Look at a hen walking and you will see it close its toes as it raises the foot and open them as it touches the ground.

A patent has just been taken out for glasses and mugs with a quicksilver thermometer, in order to enable the drinker to determine which temperature of the liquid will be most agreeable to his taste and most beneficial for his health.

It is not generally known that when a person falls into the water a common felt hat can be made use of as a life preserver. By placing the hat upon the water, rim down, with the arm around it, pressing it slightly to the breast, it will bear a man up for hours.

As part of the defense of the lower Thames, a boom is soon to be stretched across the Medway at Sheerness. Four obsolete gunboats will be used in the construction, which will cost many thousands of pounds, the shore anchorage alone requiring \$30,000.

A writer in Harper's Weekly says that the upper great lakes were once drained by way of the Illinois River, and that the bed of the Illinois is now but thirty feet higher than the Niagara River. To cut the Illinois fifty feet deeper would therefore turn the flow of the lakes into the Mississippi and leave Niagara dry.

It is worth noting that the Bank of England has fewer notes in circulation than it had fifteen years ago, and the total active note circulation of England is hardly greater than when the act of 1844 was passed. Bank notes are used much less in business than formerly, other means of exchange having taken their place.

The longest plants in the world are sea weeds. One tropical and sub-tropical variety is known which measures in length, when it reached its full development, at least 600 feet. Sea weeds do not receive any nourishment from the sediment at the bottom or borders of the sea, but only from air and mineral matters held in solution in the sea water.

A custom that has existed for several centuries is still maintained in some towns on the lower Rhine. On Easter Monday—auction day—the town crier or clerk calls all the young people together and to the highest bidder sells the privilege of dancing with the chosen girl, and her only, during the entire year. The fees flow into the public poor box.

Cottonseed oil, now so important commercially, has been known to commerce for a long time. New Orleans once attempted to use it for street lighting. It was an old charge of abolition days that slaves were fed on cottonseed, a charge indignantly denied by the slaveholders, though cottonseed was then used as food by the peasants of southern Europe.

To reach the north pole an architect, M. Hauin, has proposed to the Geographical Society of Paris the construction of wooden huts one or two days' journey apart. He considers Greenland the most favorable locality for an experiment of this kind. Each of the huts would become in its turn a base of supplies for the construction of the next. As the distance to be covered is about 900 miles, a score of huts would be necessary to establish a route to the pole.

At a late meeting of the Royal Society of England an appliance called a thermogen was exhibited. It was a quilted cushion, with fine wires arranged inside by which it could be heated to any desired temperature by electricity. It seems to have been used with success in the hospitals, where it makes it possible to keep up the temperature of patients during prolonged operations with hemorrhage without such cumbersome appliances as blankets and vessels of hot water.

It is the pretty Christian legend that the aspen quivers with shame because from its wood the cross was made. Observers of nature have discovered, however, that the quivering of the aspen leaves is due to the fact that the leaf stalk is flat on the sides and so thin about the middle that the slightest breath of wind sets all the leaves wagging horizontally. A single leaf plucked off and taken by the end of the leaf stalk between the thumb and the forefinger admirably illustrates the peculiarity of the aspen.

Charles Schartow, of Omaha, has received an official letter from Emperor William asking him to visit Germany at the Emperor's expense. On August 16, 1870, the Prussian army was battling with the French army at Mars la Tour, and a mitrailleuse, stationed on a hill, was pouring shot into the Prussian ranks. Nearly 150 men had fallen under its fire, and it was necessary that the invaders should silence the gun or fall back. No officer would order his command to capture it, for that meant all but certain death. Volunteers were called for, and fifteen men responded. Schartow was one of these, and was one of the three who returned alive after the gun was captured. Schartow will accept the invitation.

Plato believed that diamonds were formed by a vitrifying quality imparted to certain portions of pure water by "star-shine." Pliny says that the diamond is the hardest as well as the most valuable of the precious stones, and that it can only be softened by immersing it seven days and seven nights in goat's blood. Boettius declares that the "ruby is a sovereign remedy against the plague and all poisons; it also drives away evil spirits and bad dreams." Serapion ascribes to the diamond the power of healing various eruptive diseases, and also says that it insures the safety of the wearer in time of great tempests. Babinet says: "For all maladies of a nervous character the amethyst is the cure and sovereign cure."

WOMAN AND HER DISEASES.

Paine's Celery Compound
Peculiarly adapted to
Regulate the System
and give Her
Strength.

A PARAGRAPH OF TRUTH FROM A MEDICAL JOURNAL.

The following paragraph from a medical journal published on this continent. It reads thus:—"It is safe to say that more than one-half the revenue of the physician of the world, derived from the treatment of females. Not once is the diagnosis correct; not once in fifty is the treatment successful to the patient."

Why is it that the editor makes such a statement in his editorial in regard to the sufferings of women? Because the spirit of the times affects them as much as it does the men, more, for their nervous systems are more delicate and sensitive. There is a cause for every evil, and in the school-room we can usually find the starting point of these headaches, backaches and womanly ills which are growing so alarmingly common. Where the great change from a childhood to womanhood is in progress, the girl is crowded, pushed, overworked, to keep up with her studies. Add to this the severe anxiety and worry which attend examinations, and when the school life is over her health is seriously deranged.

After school-days what comes? Are not the duties as wearing as those of men? Even more. Social, household, often business cares, must be assumed which all tend a hand to bring these delicate nerves into an irritated, weakened, unstrung condition. It is not to be wondered at that the sensitive organs, covered by a network of nerves, are deranged, and that life becomes one long, dreary road of suffering, without an escape or turn.

Paine's Celery Compound, that great medical discovery, should be used. Soon your nerves will be strong and vigorous, and the nutrition, digestion and specially womanly functions will be natural and regular. Rosy cheeks, sparkling eyes, a beautiful figure, all the freshness and beauty of youth will follow the health-giving influence of Paine's Celery Compound. When you are nervous, weak, tired, cannot sleep, have headaches, or any of the nameless ills which so many women suffer in silence, use Paine's Celery Compound, and it will restore you to the greatest blessing of life—health.

Not Merely Relief But Cure.

It is said of many remedies that they relieve for a time but the disease afterwards returns. Burdock Blood Bitters being a radical cure, not only relieves but permanently cures Dyspepsia, Constipation, Biliousness, Sick headache, Bad Blood etc. Hundreds of healthy witnesses tell gladly that B. B. B. cures to stay cured.

ORGANIZATION OF FARMERS.

A FEATURE OF THE DAY.

James Rogers speaks earnestly. The development of Farmers' Institutes and other means of education on successful practical farming has proven beyond a doubt that the present day farmer requires to be a student of his work. The most successful ones are not, as a rule, those who do the greatest amount of manual labor, but they are found ranking first as prize winners on all agricultural products. James Rogers, a resident of Tillsonburg, Oxford Co., Ont., for 45 years, has taken numerous first prizes during the year. A successful, reliable man, his statement will be of interest to many: "I have suffered for seven or eight years with Itching Piles; the torture and agony I cannot here find words to describe. Night after night was kept awake with the painful itching. I tried all the physicians and every known remedy all to no account, not even relief. In asking over my curious trouble with Mr. C. W. Thompson, our well known druggist, he recommended Chamberlain's Ointment. To my wonder and surprise, I got relief from the second application. I firmly believe one box sufficient to cure any case of Itching Piles no matter of how long duration. I would not be without it for ten times its cost. In volunteering this testimony and my consent for the manufacturers of Chamberlain's Ointment to use it as they wish, it is that like efforts may know they can be cured." Price 60 cents, sold by all dealers. Edmundson, Bates & Co., Toronto.

In the system, strains the lungs and prepares a way for pneumonia, often times consumption.

PYNY-PECTORAL

positively cures coughs and colds in a surprisingly short time. It is a scientific certainty, tried and true, soothing and healing in its effects.

LARGE BOTTLE, ONLY 25 CENTS.

An Original Doctor.

Professor Zakharin, one of the most celebrated doctors in Russia, who was in attendance on the Czar, is an original character, whose feats of eccentricity have added to his fame. When the state of the Emperor became alarming, the Governor of Moscow received from St. Peter-burg a telegram ordering him to send Dr. Zakharin without delay. The Governor dispatched his aide-de-camp to him. "In two hours," said the officer, "the express train will start." "The express! What do you mean?" exclaimed the professor. "The Emperor is ill, and you talk to me about a train leaving in two hours! Go to the railway manager, and command him to get a special train for me in twenty minutes." It was done.

When Baby was sick, we gave her Castoria.
When she was a Child, she cried for Castoria.
When she became Miss, she clung to Castoria.
When she had Children, she gave them Castoria.

LAND IN MOLUS RIVER FOR SALE!

I offer for sale a two-thirds interest in all that farm and premises on which the late Harrison T. Smith resided at the time of his death, situate at Molus River, Weldford Parish and purchased by him from William Chandler and Holderness and Chilton. The farm is conveniently situated on the Post Road and the road leading down the north side of the river and is a well known and desirable property. ALSO—100 acres near the Kent Northern Railway granted to Bushrod W. Smith.
