

AS IN YOUTH Ayer's Hair Vigor CORDIALLY INDORSED.

RESTORES Natural Growth OF THE HAIR -WHEN- ALL OTHER Dressings FAIL.

"I can cordially indorse Ayer's Hair Vigor, as one of the best preparations for the hair. When I began using Ayer's Hair Vigor, all the front part of my head -about half of it- was bald. The use of only two bottles restored a natural growth, which still continues as in my youth. I tried several other dressings, but they all failed. Ayer's Hair Vigor is the best." -Mrs. J. C. PREUSSER, Converse, Texas.

AYER'S HAIR VIGOR PREPARED BY Dr. J. C. AYER & CO., LOWELL, MASS.

CORRESPONDENCE

To the Editor of The Review :

I always feel sorry to have to show to an intelligent public the foolishness of some Acadieville person who now and then sends out some nonsense to the papers to try and make believe that we are uncivilized.

His last writing was a kind of catechism of six questions, which I will try to answer so as to make him understand that we know what we are about in Acadieville.

His 1st question is relating to Richard Johnson, school trustee. I would like to ask that ratepayer this : If the accounts were correct, and Mr. Johnson's name was checked, how is it that he concluded that the tax was not paid? As long as the money was there to balance the accounts, and they were accepted at the meeting, what makes him commence so late to pass remarks?

2nd. Basile Daigle went as delegate to the Buctouche convention for District No. 4. I was not at the meeting but his qualification was correct, and I am sure nobody else went for the same district.

3rd. I did not hear that there was any radical change in the political party to which each person belonged in North Fork, but to begin with there were 4 delegates to choose from, and the president was chosen as a delegate, and as he could not sign his own qualification, another president was named, and the vote cast with two delegates only. The votes which before were given to the two others, were now given to the same, and that is how he came to be elected. Anyhow it does not make much difference as the district wished the delegate to vote for the one man, and after the votes were cast they were as 22 to 2. There was no question of Liberal or Conservative.

4th and 5th. How is it that if the assessors list is hidden in S. B. post-office as you say, that you found out that there were so many names wanted. It would have been your duty if you knew it, when you saw that there were names wanting to inform the assessors. I would congratulate those who named them, in having chosen three able men, and having located them in central places.

As to the lists being put out doors, as I suppose he wishes, there would be no names left at all in a few days, and he would have lots more to murmur about as the names would all be washed out. There were three notices placed in public places as he called them, to the effect that they would find that list in S. B. post office. I don't know if it is such as the law directs, but that is how it is managed in other parishes besides this.

6th. To answer as to the work of our local government, I would not undertake, but how is it that they forgot to speak to him about it? I think they know that he has undertaken appointments before now and could not succeed. I believe their appointment was as good as if he had been their adviser.

JUSTICE.

Acadieville, 1st April, 1895.

On Saturday, Police Marshal Frey received a telegram from the two detectives who were sent down to Denjon, in Carolina county, to ferret out the murderers of little Sallie Dean, announcing the arrest of U. Grant Cockran, a school teacher of the town, who is now supposed to be the principal in the crime. Cockran's arrest is the result of a sweating process to which Marshall E. Price, a young blacksmith of the town, was subjected by Marshall Frey, after he had been arrested by the detectives and brought to this city for safe keeping. The murder occurred one week ago last Tuesday, the young girl, who was 14 years old and the daughter of a prominent farmer, having been waylaid on her way to school, assaulted and then killed, it is believed, in order to prevent her testifying against her assailants. Young Cockran boarded a short distance from the house of the father of the murdered girl, and Miss Sallie was his pupil.

To Patrons of Cheese Factories.

BY T. B. MILLAR, INSTRUCTOR FOR THE DAIRYMEN'S ASSOCIATION OF WESTERN ONTARIO.

As the season approaches when the cheese factories throughout the country will again be in full operation, it would be profitable for dairymen to glance over the past, see where we have done well and where we have made mistakes, and from the knowledge of these be prepared to do better work this coming season. In this article I have endeavoured to point out some of the mistakes that have come under my notice.

Care of Cows.—One of the first mistakes made by dairymen, and especially by patrons of cheese factories, that I wish to speak of, is the great mistake of not preparing summer food for their cows. Looking at it from a business standpoint, it is quite as essential that food be prepared for summer feeding as for winter, as it is during the summer months that the patrons expect to make the most profit from the cows, and the profits depend greatly (more than most people realize) on the feeding and care of the cows.

Cows should have free access to a plentiful supply of pure water. Milk, as we all know, contains about eighty-seven per cent. of water, and if the water supply be impure or tainted the milk will be of a like quality. True, the quality of milk may be improved by aeration immediately after milking, but here the warning of the old adage comes to us: "An ounce of prevention is better than a pound of cure," and in almost every section of Ontario good water may be procured at a small cost.

Milking.—A great many dairymen pay no attention to regularity of milking; some milk between five and six o'clock in the morning and any time from six to nine in the evening—a very good plan whereby to lessen the supply of milk. To ensure an even flow of milk, cows should be milked at a regular time; the time as nearly as is possible to be divided equally, leaving twelve hours between the times of milking.

Utensils.—Then the utensils used, such as pails, strainers, etc., should be made of tin, all seams of which should be properly soldered, so that all crevices are filled up, thereby removing every possible lodging place for bacteria or germs of any kind. These pails should be properly washed and thoroughly scalded with boiling water immediately after using, instead of, as I have often seen, trying to wash and scald half a dozen pails or so with less than one pail of water, and that not very warm to begin with.

Straining.—A number of patrons fail to see the necessity of straining the milk that is to be sent to the cheese factory and are not too careful to see that the cows' udders are brushed and cleaned before milking, so that any sediment or foreign matter that may get into the milk is allowed to remain in it until delivered at the factory. They think that because it is strained at the factory that that is all that is required. This is a mistake,—all milk should be strained immediately after milking. This milk is to be manufactured into food for human consumption and should be handled as carefully and cleanly as the milk used at the table. It is oftentimes disgusting to see the amount of dirt of every description that is collected in the strainer used at the factory, all due to the carelessness and untidy habits of those handling the milk.

Aeration.—After straining, milk should be aerated until the animal odor is allowed to escape; this is as essential for the morning milking as for the evening. A greater quantity of un-aerated milk is required to make a pound of cheese than of aerated milk, and it is those who never aerate the milk or assist in any way to improve the quality that at the annual meeting find fault with the high average. Aeration should be done where the surrounding atmosphere is pure, and the milk which stands overnight should be kept as far as possible from all bad odors. At times we find the milk standing overnight in the barnyard, and much surprise is expressed by the owner when informed that the milk supplied by him is not perfect in flavor. He exclaims, "I cool the milk every night," but on inquiring we learn that this has been done by placing the milk can in a water-trough in the same yard. If properly aerated and not more than one hundred pounds in a can, it is not necessary to cool milk by the use of water in order to keep it sweet overnight, even during the hottest weather.

Cure of Cans.—In most sections it is customary to return the whey to the patrons in the milk cans. This should never be done, not only because it is injurious to the can by destroying the tinning, but what is more important, a large percentage of the bad flavors complained of in cheese can be traced to this practice of returning whey in the milk cans. While I admit that with proper care the cans may be cleaned, yet the fact remains that a percentage are not cleaned, and where fifty are careful and clean, one careless and untidy patron will undo the good work of the fifty.

At sunset cans may be seen on the milk stand with the sour whey still in them; when milking time comes they are hurriedly emptied, washed in lukewarm water and then new milk is poured in. Is it any wonder that at times cheesemakers have a batch of cheese that is declared off-flavor? If patrons were alive to their own interests they would not allow a pound of whey to be returned in the milk cans under any consideration, but would make provision to have it fed near the factory.

A common mistake is to leave the cans standing around unwashed for two or three hours after being returned from the factory. After what has already been said it is almost needless for me to say they ought to be washed as soon as possible after they are returned.

First rinse with cold water, then wash with hot water and scald with boiling water, and set them in a sunny, clean place to air. Never use soap or any utensil in the dairy; scour with salt, or soda, which is much better, as either of these leave no objectionable flavor, as soap is almost sure to do. After scalding never use a cloth for drying,—if the water is as hot as it ought to be they will dry of themselves in a minute or so.

In my work as inspector and instructor throughout Western Ontario I find much to commend, but it also gives me many opportunities of seeing where a little care and forethought would greatly benefit this industry. This article is not written in a fault-finding spirit, but with a view to incite some to do better.

Progress the Watchword.—Canada has an excellent reputation for the quality of her cheese, but the past reputation will not suffice; we must keep advancing, and to do this we ask the patrons to co-operate with and assist the cheesemakers to make a better article in the future than we have ever done in the past.—Farmer's Advocate.

Rheumatism Cured in a Day.

South American Rheumatic Cure for Rheumatism and Neuralgia radically cures in 1 to 3 days. Its action upon the system is remarkable and mysterious. It removes at once the cause and the disease immediately disappears. The first dose greatly benefits. 75 cents. For sale by W. W. Short, druggist, agent for Kent Co. *

Little River Notes.

APRIL 4.—Your last correspondent from this place was evidently not a visitor of the sick, or he would not have stated that Mr. Geo. Biggs, Sr., was sick, that esteemed gentleman having been quite smart for a year or more.

Mr. Joseph Gesner is recovering from an attack of rheumatism, as is also Mr. Geo. Biggs, Sr.

Miss S. A. Kay and Miss Marion Kay, are sick with acute rheumatism.

Mr. Robert Beers is here running a wood cutting machine.

Mr. W. McVaun and family have removed from Ford's Mills to this place to manage the farm of Mr. Anderson.

Mr. William McDonald has returned from Restigouche where he has been working all winter, he intends to go to Campbellton to work shortly.

Mrs. Lattie has returned home to Fredericton after a lengthy visit to her mother Mrs. Margot Hicks.

Mr. Frank Lawrence is going to leave us shortly for the neighboring republic.

The boys of this settlement are sorrowing over the departure of Miss Lottie Chapman, who has succeeded in making a great impression on them during her stay here.

Bythe has been very careful to inform us that he does not go after the girls. Can he give us an account of his actions last Thursday night? The B. & M. or I should say the M. & B., has reached Little River by the generous aid of Sun. Bye-the-bye talking of the M. & B., we used to hear terrible accounts of the days of the old crew, but they were at least civil, and did not when they passed through a settlement by order of the manager on Sunday, shout to annoy ladies on their way to church.

McNERNEY.—At Kingston, on the 4th inst., to the wife of Frank Mcnerney, a son.

MILLER-NICHOL.—On the 2nd of April, by the Rev. Thomas Nicholson, Mr. James A. Miller and Miss Minnie Nichol, both of Black Land, Restigouche.

PIERCE.—At St. John on the 7th inst., after a short illness, John Pierce, aged 41 years, leaving a wife and seven children to mourn their loss.

B.B.B. CURES DYSPEPSIA SCROFULA CONSTIPATION

THE SECRET Of the marvelous success of Burdock Blood Bitters lies in its specific curative power over every organ of the body. The Liver, the Blood, the Bowels, the Stomach, the Kidneys, the Skin, the Bladder, in fact, all parts of the human system are regulated, purified, and restored to perfect natural action by this medicine. Thus it CURES all diseases affecting these or other parts of the system, Dyspepsia, Constipation, Bad Blood, Biliousness, Headache, Kidney and Liver Complaint, Obstinate Humors, Old Sores, Scrofula, Rheumatism, Nervous or General Debility, and all irregularities of the system, caused by Bad Blood or disordered action of the Stomach, Bowels, Liver or Kidneys. Thousands of testimonials warrant the assertion that B.B.B. is the BEST SPRING MEDICINE FOR YOUNG OR OLD.

Alizerine Blue--- THE NEW COLOR FOR GENT'S LIGHT SUITS AND LADIES' DRESSES. AMERICAN DYE WORKS CO.'Y. OFFICE, SOUTH SIDE KING SQUARE. WORKS, ELM STREET, NORTH END. SAINT JOHN, NEW BRUNSWICK. Orders from a distance by Express or otherwise promptly attended to.

Giving universal satisfaction "S. R. BLEND TEA" Quality unsurpassed for the price. Try a pound. For sale by W. W. Short, Richibucto.

AN EMINENT SURGEON Prescribes and Recommends Paine's Celery Compound. HE DECLARES IT TO BE THE BEST SPRING MEDICINE. IT BUILDS UP RUN-DOWN MEN AND WOMAN. The Only Remedy That Makes Pure, Bright and Red Blood.

HAVE YOU TROUBLE With your Boiler Feeder? If so, try the NIAGARA INJECTOR! It will lift water through 26 feet of Hot Suction Pipe. It uses less steam than any other injector. Every Machine guaranteed. 30 DAYS TRIAL FREE. Write for catalogue and prices. W. H. STIRLING, Corner Walker's Wharf and Water St., St. John, N. B. N. B. I make a specialty of ALL KINDS BRASS WORK for mill and steamboat. HOLMAN & DUFFELL, -IMPORTERS OF- Fine Wall Papers, &c., Window Shades. 48 KING STREET, ST. JOHN, N. B.

A rather ingenious theft, of which a Parisian watchmaker has been the victim may serve to put the trade on their guard against similar attempts. The watchmaker in question has a shop in the Rue de la Rochefoucauld, near the Eglise de la Trinite. While he was out on business a stranger came in. The watchmaker's wife was behind the counter. The stranger pretended to be very angry, and told her that her husband had promised to repair his watch and let him have it back by a certain date, but had failed to do so. "There it is," said the man, pointing to a handsome gold chronometer; "I shall not leave it here any longer, but shall take it somewhere else." With this, he took the watch and hurried out of the shop. When the watchmaker returned, his wife upbraided him for having kept the gentleman's watch so long. An explanation followed, however, and it became clear that the irate customer was simply a clever thief.

Itch Mange and Scratches of every kind, by human or animals, cured in 30 minutes on Woolford's Sanitary Lotion. This never fails. For sale by W. W. Short, agent for Kent County.

Woodstock Dispatch: Dr. Atkinson, M. P. P., left on Monday evening by the express for California. He will go over one of the American lines and locate in the vicinity of Los Angeles. In conversation with a member of the Dispatch staff the doctor spoke in very warm terms of the kindness and generosity he had met on every hand and from all classes and conditions of men. The members of the local Legislature had used every effort to procure him a pass on the C. P. R., and failing in that had irrespective of party made him up a purse of \$150. The money was contributed by nine members of the opposition and seven of the government party. He said almost all his patients had paid promptly and cheerfully and he went away feeling well towards everyone. He sold out his good-will at Bristol to Dr. Somerville and if he returns will practice in Woodstock.

Patch Grief with Proverbs but don't try to patch up a lingering cough or cold by trying experimental remedies. Take PNYN-PECTORAL and relief is certain to follow. Cures the most obstinate coughs, colds, sore throats, in fact every form of throat, lung or bronchial inflammation induced by cold. Large Bottle, 25 Cents.

KENDALL'S SPAVIN CURE THE MOST SUCCESSFUL REMEDY FOR MAN OR BEAST. Obtain its effects and never blisters. Sold everywhere. KENDALL'S SPAVIN CURE. Sold by Dr. J. Kendall, Henderson Co., Ill., Feb. 26, '94. Dear Sir:—I have used several bottles of your "Kendall's Spavin Cure" with much success. I think it the best I have ever used. Here we moved one Curb, one Blood Spavin and killed two Bone Spavins, have recommended it to several of my friends who have much pleased with and keep it. Yours truly, CHAS. POWERS, S. R. NEX, P. O. Box, 105. For Sale by all Druggists, or address Dr. J. KENDALL, CO., ENOXBURG FALLS, VT.

When Baby was sick, we gave her Castoria. When she was a Child, she cried for Castoria. When she became Miss, she clung to Castoria. When she had Children, she gave them Castoria.
