Lacking in Enterprise.  
The city editor of the Western Wind sat at his desk gloomily, and it was near midnight.

"Well," he exclaimed petulantly to the reporters in front of him, "haven't any of you got any copy?"  
Nobody had.

"Isn't there anything at all occurring in town?" he asked.  
"No, sir," replied the head reporter; "everything is dead dull."

"Of course it is, of course, of course," growled the city editor, "and no wonder. Every man of you has a loaded revolver in his desk that hasn't been fired at anybody for four weeks, and still you claim to be efficient newspaper men. You fellows from the east have got too much education and not enough enterprise, and unless something occurs in the next ten days I'll discharge every one of you and employ competent men, even if we do have to pay them salaries. Mind that now," and the city editor once more relapsed into gloom.

Not His Ideal.  
Patent Medicine Doctor.—"Take some of my preparation and you will be cured."  
Patient.—"And then will I look like those men whose pictures appear in the papers?"  
Doctor.—"Er—yes, I presume so."  
Patient.—"Then I don't want to be cured."

What It Sounded Like.  
Mrs. Windleigh.—"Gracious me! that stone crusher sounds like Pandemonium."  
Courtney.—"I think, Mama, that it sounds more like a dentist buzzing a hole in your tooth."

We would be pleased to receive any communication of a local or practical nature. Farmers are invited to give their views on any subject relating to their occupations.

**Health on The Farm.**

A farmer's life is proverbially a healthy one; but it is evident, in many cases, that the standard of health might easily be improved, were it not for the neglect of certain sanitary conditions. Fresh air and green fields do much to remedy what would in other surroundings, such as in a city, cause severe attacks of certain diseases; but even these aids to health fail occasionally, and the individual has to succumb at length to the insidious foe, disease.

Pure water is one of the most important essentials to good health. None but those who have wandered through other lands, where pure water was a scarce commodity, can realize the blessing enjoyed by the man who has at his door an unstinted supply of good, wholesome water. In this country, as a rule, there is usually no lack of excellent water, which, if preserved free from contamination from surface drainage, sewage, or stable liquids, presents a supply of first-class quality sufficient for all needs. In the care of our wells and springs, however, we oftentimes show a lamentable disregard of the interests of our health. Too often the well is located near to the stables, or in such a position that the drainage from the stables both surface and through the ground, finds its way, sooner or later, into the water, and contaminates it. In other instances, frogs, rats and mice find their way into the wells, and die there, poisoning the water with their putrid bodies. Many cases of sickness can be traced to causes such as these, and it is, therefore, of the highest importance that our wells should receive considerable attention every year.

**WORK OF A SINGLE DAY.**

**Some Startling Facts Concerning the Action of the Heart**

Do people recognize the immense work ransacted by the heart in a single day? It equals that of lifting one hundred and fifty pounds to a height of thirty-three hundred feet. And yet knowingly or through ignorance, nine out of ten people abuse this hardest worked organ of the body. There is nothing remarkable in the fact that heart failure and apoplexy are among the most prevalent diseases of the day. Happily a remedy is found in Dr. Agnew's Cure for the Heart, which gives relief instantly. This medicine should be kept in every house, so that on the slightest indication of heart trouble it may be taken. It has saved, by its prompt and efficient work, the lives of thousands of Canadians. Sold by W. W. Short.

**CARD**

To the Electors of the County of Kent: GENTLEMEN.—The Dissolution of Parliament again imposes upon you the duty of electing a representative at Ottawa, and the Electoral Writs summon you to the discharge of that duty on the 23rd of June next.

Permit me to thank you, heartily, for the confidence you reposed in me on the 6th of December, 1892.

The mandate you then so generously, confided to me, I return to you, unsullied. I have regarded it as a public trust, and have faithfully endeavored, within the measure of my ability, to discharge the obligations it laid upon me.

Believing that my experience of the last four years may be of some benefit to the Constituency in the future, I respectfully solicit a renewal of your confidence.

I submit for your approval that Policy—truly national—which has advanced the credit of Canada, fostered native industries, conserved the home market for our agriculturists and manufacturers, increased our Foreign Trade, and engendered that spirit of union without which national greatness is impossible.

I favor: Preferential Trade within the bounds of the Empire; A Fast Atlantic Service; The Development of Agriculture; An Efficient National Defence; The Encouragement of Immigration; The Admission of Newfoundland into this Confederation, and Justice to minorities whether in Quebec or Manitoba.

I support Remedial Legislation because with Sir Leonard Tilley, "I look at it as a solemn compact between the Parliament of Canada and the people of Manitoba."

It is the decision of the highest Court in the Empire.

It is a constitutional guarantee of the rights of Provincial minorities—Protestant as well as Catholic—and the highest patriotism inspires and compels respect for the letter and spirit of the Constitution.

I confidently, await your enlightened and unprejudiced approval of the moderate attitude I have taken on this question.

I will attempt, at public meetings to discuss the political issues of the day, and endeavor to see as many of you, personally, as possible.

Again soliciting your support, I am, Gentlemen, Your Obedient Servant,  
GEORGE V. McINERNEY,  
Richibucto, N. B., May 12th 1896.
