A NEW RECTORY.—St. Mary's Episcopal Church was opened last Sunday by the Rev. J. C. Cox, of Windsor, N. S. who has been appointed Rector of the parish by his Lordship the Bishop of Fredericton. He was greeted by a large congregation. It is now nearly fifteen months since the parish became vacant by the resignation of the late incumbent the Rev. H. Hackenley, during which time a great many changes and improvements have been made in the church. The gallery and old pews have been taken out, the rental system abolished and the seating made free. The interior has been generally remodeled and the exterior nicely painted and it is now a credit to the community. The parishoners are indebted to the late John Cochrane who before his death gave the sum of \$100 for the carrying on of this work and Mrs. Cochrane, his wife, who gave \$125 for the same purpose, to which Mr. Robert Cochrane added \$25.00 making in all \$250, which sum has been expended in the above named way. Under the supervision of Mr. Robert Cochrane who has devoted a great deal of time to the work, the church is now in a splendid condition. It might also be said that the late Mr. Cochrane willed \$200 for the repair of the Rectory which work it is expected will soon be undertaken.

Horrible Butchery.

HALIFAX, July 21.—[Special.]—The barquentine Herbert Fuller, Captain Nash from Boston, July 8, for Rosario, put into Halifax this morning. There had been a mutiny on board in which the Captain, his wife and second mate were killed in their births at night. The first officer was on watch and knew nothing about the affair. The murderer or murderers crawled aft to the cabin and descended, and with axes chopped the victims to death. All the crew were taken off the vessel and locked up in the police station.

Some commotion was caused this morning by the appearance off the harbor of an American barquentine flying the Stars and Stripes at half mast, with a black flag immediately underneath. This indicated a mutiny, but it was learned that it was far worse than mutiny—it was horrible butchery. The vessel was the Herbert Fuller, and left Boston on July 8th for Rosario, with a cargo of lumber. So far as known things went well till the night of the 13th, when Captain Nash, his wife Laura, and Second Mate, Banberry, a Highlander, but a naturalized American citizen, were murdered. The crime was committed with an axe at 2 o'clock. Captain Nash was in his room and his wife was murdered in her sleeping apartments. The rooms were covered with blood and showed evidence of an awful fight. Mate Thomas Brown, a Nova Scotian, but naturalized American, was suspected and placed in irons by the cook. A colored man named Jonathan Shere, of Rosario, who was also placed in irons, was at the wheel when the murder was committed. The ship was then headed for land and made for Halifax. There was one passenger on board, Frank Monch, of Boston, who is a Harvard man going for a sea voyage for his health. His room was between that of Captain and wife's. He is supposed to know more about the crime than any one except the man who did the butchery. He and the entire crew were placed under arrest on the ship's arrival here and instructions given them not to say a word to anyone. The United States consul telegraphed Washington for instructions and in the meantime refuses to say anything. The bodies which were horribly mutilated, were all placed in a boat which was covered with canvas and towed behind the vessel. The coroner has taken charge of them and will hold an inquest. Police officers have been placed in charge of the "Fuller" under direction of the consul and nobody is allowed on board.

What led up to the crime is a matter of the merest conjecture, but the belief is that the mate did all the killing. The vessel hails from Harrington, Me., and her managing owner is Swan, of 66th street, New York. The murdered captain is 44, his wife 37.

The crew numbered 10 and the captain's wife and Passenger Monch made a total of 12 on board. The dispositions of all concerned will be taken here and sent with the witnesses to the United States, the commitment of the crime being on the high seas.

HORN-FLY VS. POTATO BUG.

The horn-fly like the potato bug has come to stay. Intelligent farmers do not smear the potato leaves with filthy greasy mixtures to keep off the bugs, no, they use something to kill them, so with the horn-fly, the sensible up-to-date farmer does not cover his cattle with kerosene or axle grease, because he knows these things will not kill a single fly while they taint the milk and injure the health of the animal, but they do use **Shives' Insect Powder** which kills the flies and is harmless to the animals. Be sure you get from your merchant or druggist genuine Shives' Powder, it is cheap and sure. It kills the flies every time. Sold only in cans with dredger attached. Look for the name on the label. Sample can 25c. 5 cans \$1.00. Post Paid.
