

**HORN-FLY VS. POTATO BUG.**

The horn-fly like the potato bug has come to stay. Intelligent farmers do not smear the potato leaves with filthy greasy mixtures to keep off the bugs, no, they use something to kill them, so with the horn-fly, the sensible up-to-date farmer does not cover his cattle with kerosene or axle grease, because he knows these things will not kill a single fly while they taint the milk and injure the health of the animal, but they do use **Shives' Insect Powder** which kills the flies and is harmless to the animals. Be sure you get from your merchant or druggist genuine Shives' Powder, it is cheap and sure. It kills the flies every time. Sold only in cans with dredger attached. Look for the name on the label. Sample can 25c. 5 cans \$1.00. Post Paid.

**The Girls' Best Fellows Worst of The Old Man.**

When the rich but crotchety old man Humpley assembled his five daughters in a room the other day he didn't do a thing but pound the table, swing his arms frantically and roar out this kind of a campaign speech, says the New York World:

"You're about as sleepy and frowny an aggregation as ever threw domestic regularity off the trolley by coming down late to breakfast. Just take a look at each other and keep right on giggling. You would disappoint my judgment of you if you didn't giggle."

"I am here to call a halt. Understand? I'm not running a matrimonial bureau. This is no summer resort. I'm not going to enlarge this house, cut it up into smaller rooms or build a new one. You've got to size up to that, ladies. I'm going to keep right on living here and have some of the comforts of home."

"When I tiptoed in last night there was one girl and some dude on the first stair landing. I dodged into the parlor and there were two more looking as though they had met to discuss theosophy. In the sitting-room Mame let out a screech and some peaked shouldered fellow fell over the piano stool trying to sit down. Out in the kitchen I found the cook and a policeman. The coachman was swinging the second girl in a hammock in the back yard, and as I came back looking for a place to sit down and smoke there was a brace of noodles in the sitting-room."

"I hurried to the library, where I felt sure of a haven, and there were two couples huddled up in opposite corners. I went to bed hungry, disgusted and without a smoke. I came within an act of cutting loose and having the house cleared. You can't come any Kinz Lear business on me. Understand? I'm going to have reform or there'll be rough-and-tumble trouble 'round here. Have some system. Arrange a schedule. Leave one or two rooms available for the rest of the family. Have your beaux come in relays instead of being so infernally unanimous. Understand?"

**A Woman's Heart.**  
 Derangement of the heart and nerves in women is followed by various nervous disorders, such as Hysteria, Melancholia, neuralgia, sleeplessness, palpitation and pains and aches in various parts of the body. In such cases strengthen the heart and build up the nervous system by the use of Milburn's Heart and nerve Pills.

**A New Salt for Curing Fish.**  
 An Inverness paper has the following item from its Stornoway correspondent with regard to a fish salt which will, it is expected, revolutionize the fish-curing trade: "No little interest was occasioned at the fish mart by the appearance of Herr M. Stare, of Charlebourg, Germany, who came to Stornoway to introduce a fish salt which, in his estimation, is to revolutionize the fish-curing business. He claims that fish treated with this salt can be kept for an indefinite period—say for months—in a perfectly fresh condition. He also maintains that this salt is capable of curing the fish with the addition of a little ordinary salt. During his stay he purchased some herrings and put them up in small barrels and treated them with his preparation. Mr. Stare returned to Germany a few weeks ago, but left these barrels to be examined in the course of a month or two, with a view of proving the efficacy of his preparation. He also left samples of the salt in the hands of various curers in town." The opening of the barrels will be waited for with interest, as if the salt comes up to expectations, it will mean the beginning of a new era in the fish-curing trades.

**Kind Words come From Public Institutions**  
**AS WELL AS FROM PRIVATE INDIVIDUALS.**  
**All Classes and Creeds Praise Paine's Celery Compound.**

Public institutions throughout Canada are as ready to acknowledge the marvelous virtues of Paine's Celery Compound as are private individuals.

For many years a large number of our public, benevolent and religious corporations have used Paine's Celery Compound for the benefit of old and young, and if it were possible to publish all the statements made by the inmates, scores of the letters would prove interesting and entertaining. In institutions like those referred to, where hundreds are cared for every year, all the common ills and diseases of every day life are found, and many hundreds have been made well and strong by Paine's Celery Compound, which shows the esteem and confidence in which the medicine is held.

One of these noted institutions that has given testimony for Paine's Celery Compound is the immense convalescent educational house on the St. Lawrence, near Montreal, and known as the "Convent of the Holy Names." The ladies of this house write as follows:

"We feel it a duty to add our testimony in favor of your 'sober-working' Paine's Celery Compound. Many Sisters, suffering from debility, dyspepsia, sleeplessness and indigestion, have been completely relieved after taking it."

"We shall strongly recommend its use in all our houses as the best medicine to restore health and give tone and vigor to the nervous system."

**Does Your Husband or Son Drink?**  
 If your Husband or Son is addicted to the use of Liquor, Morphine or Tobacco, purchase of your druggist a bottle of Hill's Chloride of Gold Tablets. They are guaranteed to cure or money will be refunded. Tablets may be given secretly in tea or coffee and the free use of stimulants allowed until voluntarily given up. Price \$1.00 per package. If your druggist does not keep them, send direct to The Ohio Chemical Works, Lima, Ohio. Book of particulars and testimonials free.

**Pitcher's Castoria.**

In the Interest of Science.—"Did Mudge make anything out of his incubator?" "Yes; he has just got out a new breed of cackless hens."—Chicago Record.

Farsyte—"I have already applied to Mr. Bryan for the position of show-card writer at the Mint." Wanterno—"What nonsense," Farsyte—"Not at all; they'll want signs there for their marked-down dollar bargain days."—Philadelphia Record.

Tuffold Knutt—"What does all this talk about 16 to 1 mean, anyhow?" Mesely Wraggs—"It means that when you get a gold dollar you kin take it to a bank an' get sixteen silver dollars for it. You're the dernedest ignoramus I ever seen!"—Chicago Tribune.

Acquisition—"And then," related the shade of Alexander, "I laid pipes to acquire the rest of the world." The shade of the plumber showed signs of intelligence. "Ah, I see," it exclaimed. "You took it for the bill. Well, I declare. And that was 2,300 years ago!"—Detroit Tribune.

The London World says: "The Grand Duke of Nassau and Luxemburg is entertaining his annual shooting parties at Hohenburg, his place in Bavaria, which has a large and beautiful park, while the jagd is one of the best in South Germany." Note.—This jag is spelled with a "d."—New York Post.

"I wonder why it is," remarked the man who has time for idle thoughts, "that people are not permitted to shoot reed birds earlier in the year?" "It is to prevent mistakes," replied his wife, who had suffered at a summer resort. "They have to wait until the mosquito season is entirely over."—Washington Star.

First Silverite (in towering rage)—"Them 'ere bloodsuckin' manufacturers of the East are stoppin' at nuthin' to hurt the cause of free silver with their workmen." Second Silverite—"What be they doin' now?" First Silverite (grinding his teeth)—"Why, they are payin' them their wages in nuthin' but silver dollars."—Puck.

**Kite Photographs of Boston.**  
 William A. Eddy, of Bayonne, N. J., has succeeded in making several distinct photographic views of Boston from a great height, by means of a camera supported from kites. The kites were of the tailless type used at the Blue Hill Observatory, where an altitude of 7,441 feet was obtained, and were six and seven feet in diameter. Four to eight of these kites were required to support the camera, depending upon the strength of the wind. Distinct views were obtained of the Common, Beacon Street, Commonwealth Avenue, Charles River, and the outlying suburbs, and Mr. Eddy estimates that in one of the views the camera was, at the moment of exposure, 1,500 feet above the pavement.
