LEGAL NEWSPAPER DECISIONS.

1. Any person who takes a paper regularly from the Post Office... 2. If any person orders his paper discontinued...

WILL BRYAN SUCCEED?

Goldwin Smith thinks that Bryan, "the Nebraska kid," as he is familiarly called, will succeed in the presidential contest of November next.

On the other hand powerful and numerous interests that stand to lose by a free silver law, will be arrayed against Bryan...

Workers in all mechanical industries (more than four millions of them of voting age)... Their wages are the highest in the world...

Labourers in agricultural and other outdoor pursuits... They number two and a half millions, with a common school education...

The four million men who have their lives insured for \$10,000,000,000 in gold... Men interested in building loan societies...

Employees of railroads and tramways... There are a million and a half of them on the pay-rolls...

The churchmen... The Roman Catholic is our largest single property owner, real and personal...

Without all these persons and interests have much at risk and probably stand to lose heavily should "free silver" come in...

THE CANADIAN PULP INDUSTRY.

There are three features of the wood pulp industry in Canada which will be of interest to students of the question interested in the development of manufacture in this line here...

The eastern question is very intense just now and if the great powers could only agree upon a division of the spoils the sultan's business would be speedily closed out...

Mr. Laurier has made a satisfactory reply to the St. John winter port delegation. After the expiry of the present contracts no further subsidies will be granted to Atlantic mail steamers...

Mr. Clarke Boyd of Elgin is visiting at his son's Mr. Wm. Boyd, congratulations are in order there too, it's a boy this time.

Miss Lottie Crossman of Moncton has charge of the Grangeville school. Mr. Mell Colpitts looks quite happy again in the possession of a wife...

We also missed our old friend Mrs. Peter McArthur. She died very suddenly some months ago.

RAMBLER.

St. Joseph's College.

SEPTEMBER 21st.—The faculty and students have organized a permanent athletic club, with a membership role of about one hundred, known as the St. Joseph's College Amateur Athletic Association...

eady advances in the export trade in pulp. It was only in 1890 that the exportation from Canadian pulp mill began, with a value of \$168,190. Exports of pulp increased to \$208,619 in 1891, \$355,303 in 1892, \$455,893 in 1893, \$547,217 in 1894 and \$590,374 in 1895.

While Canada has been somewhat of a laggard in the race—Maine alone having 40 large pulp mills and the dominion but a few—yet some advances have been made. In our census the pulp industry was first tabulated in 1881. It then showed an invested capital of \$92,000 paying annual wages of \$15,720 and producing a value of \$83,000.

In 1891 the invested capital was \$2,900,907 and the value of the product \$1,057,810. It is obvious from the export figures quoted above that there has been a large development in the Canadian manufacture of pulp since 1891, but the industry is only yet in its infancy in Canada; the market everywhere expanding, while right at our own doors is one of the finest opportunities for developing manufacture in this line, with abundant raw material and every facility for shipment by rail or water carriage.

The two parties are bidding for the temperance vote. Conservatives claim credit for the fact that it was men of their party who moved to abolish all liquor selling in the common bar, and the restaurants as well, which has now been effected, while it was the Liberal senator Power who made the evasive motion in the senate by which the bar of that house is kept open and in full blast.

A western exchange, the Montreal Journal of Commerce, which had warmly espoused the cause of Conservatism and protection down to the date of the election, now gives the new ministers its disinterested praise for their diligence and close attention to their departmental duties.

Mr. George McArthur and wife have returned home from Mass. In the breach. They who are called upon to fill the gaps of life may find the experience at first hard and trying.

There are a million and a half of them on the pay-rolls. They cannot possibly get more in silver than they do now in gold, as these railways cannot increase rates, and many will curtail their service and discharge their men owing to lack of business.

There are a million and a half of them on the pay-rolls. They cannot possibly get more in silver than they do now in gold, as these railways cannot increase rates, and many will curtail their service and discharge their men owing to lack of business.

There are a million and a half of them on the pay-rolls. They cannot possibly get more in silver than they do now in gold, as these railways cannot increase rates, and many will curtail their service and discharge their men owing to lack of business.

The facility with which the new government has adopted the Tupper governments' estimates with a few reductions and a number of additions clearly shows that any considerable reduction of our federal taxation is not in sight. This fact will be more reassuring to the protected manufacturers than to the mass of taxpayers. The revenue must be kept up to the expenditure, and if so must afford "incidental protection" enough to satisfy all the really important Canadian industries.

It was my privilege to visit this pleasant little locality quite recently, and as I have not seen any notes in your esteemed paper, from there, for some time, concluded to send you a few.

Many changes have taken place in the short time since my last visit. I missed the kindly genial face of the late Rev. Mr. Smith, he had many friends and his place is one that is hard to fill. At his late home I met his brother Mr. A. J. Smith, of Petitcodiac, who has been here spending a few weeks with his daughter Mrs. Wm. McPherson. He tells me that since his last visit 14 years ago, the place has taken great strides. At that time there was but one house, and that one very incomplete; now there are a number of neat and pretty dwellings and others in the course of construction.

The crops all look well and promise excellent returns. The frost has been very lenient touching them but lightly. Mr. O. S. Jones who has been working in Moncton part of the summer, is at home again. He and Havelock Smith are making meadow hay, a mile or so distant.

Mr. O. S. Jones who has been working in Moncton part of the summer, is at home again. He and Havelock Smith are making meadow hay, a mile or so distant.

Mrs. Wm. McPherson who has had very poor health for the past year or so, is we are pleased to know much improved.

Mr. Clarke Boyd of Elgin is visiting at his son's Mr. Wm. Boyd, congratulations are in order there too, it's a boy this time.

Miss Lottie Crossman of Moncton has charge of the Grangeville school. Mr. Mell Colpitts looks quite happy again in the possession of a wife.

We also missed our old friend Mrs. Peter McArthur. She died very suddenly some months ago.

HIS FUNNY INTRODUCTION.

Bright and breezy, with sails all spread, and our colors nailed to the mast, we bear down on you this morning.

It is chuck full of readable matter, and he must be an unappreciative ouss who fails to be amused and entertained, instructed and interested by perusing the columns of the dandiest weekly in the cracklingest town in Georgia.

Along next spring, when you get bilious and wake up in the morning feeling swell-eyed and hateful, this paper will come to you with its sides bulging out with laugh and song, and you will grin so loud and so wide that you will have to carry an umbrella to keep the sun from shining down your throat and warming your ribs.

We don't mean to claim that this is a humorous paper, still it is a humorous paper, after all, but there is a heap of solemn features connected with it. (We put this in to catch the hypochondriacs who don't know any better.) There's many a laugh that sounds wildly hilarious, that if you but knew it, has a discordant ring as where some unseen hand strikes a cold iron railing around a tomb.

We will take almost anything, except contumely or cussing, in payment for subscriptions—corn, cotton, potatoes, syrup, cattle, hogs, horses, farm lands, city lots or general merchandise. Come in and see us, whether you want the paper or not, for we are worth looking at. Then you might give us some valuable hints and suggestions as to the best way to run a paper.

Now, we hope you feel better. We are done, and you can go ahead with your rat killing, but don't forget that the Guardian is your friend, and will love you when you are old and ugly, and everybody else hates you.

Adieu, ta-ta, nix cum a rouse.—Cedar-town Guardian.

"Noblesse Oblige" in Athletics. To those who believe in the physical and disciplinary value of outdoor sports, it is not more gratifying to see their extraordinary popularity than to note the better standards which the most far-seeing, enthusiastic, and gentlemanly devotees have succeeded in establishing almost everywhere in the conduct of competitive athletics.

Helping the Fallen. We ought to pray for and help all that we possibly can those fallen away from right living; and charity to those cast away is our bounden duty and the prompting of every merciful heart.

There is one thing which users of the new high velocity of .30 caliber have to consider, and that is the effect of the copper or nickel jacket on the grooves of the rifle, says the New York Sun. A bullet that leaves the muzzle of a rifle at a velocity of 2,000 feet a second is so wearing on the rifling, especially near the muzzle, that the accuracy of even the hardest-bored rifles is seriously impaired inside of 12,000 shots at the most. The lead bullets, or those but slightly hardened with a mixture of tin, do not wear the barrels to the same extent, and the barrels last far longer.

Helping the Fallen. We ought to pray for and help all that we possibly can those fallen away from right living; and charity to those cast away is our bounden duty and the prompting of every merciful heart.
