Main Street, Moncton,

Next door to the K. Shoe Store
Meals served at all hours.
Oyster, Roast Fowl, etc. Highest cash prices paid for Buctouche Oysters.

Apples for the Complexion.

"The secret of a bad complexion," said a well-known physician recently, "is a bad digestion, and we generally trace that to a bad liver. One of the best remedies for a sluggish liver is cheap and pleasant. Dieting is the secret of the cure. The best liver regulator for persons of sedentary habits—and these are the ones whose complexions are muddy—is to be found in apples, eaten baked if they are not well digested when eaten raw. I attended the pupils at a well-known boarding-school, and among them was a country girl whose complexion was the envy of all her associates. I found that she was a very light eater at her meals, but she had a peculiar custom of taking a plate of apples to her room at night and eating them slowly as she studied her lessons. This was her regular practice. Some of the older girls in the institution took it up, and I know as a result of my personal investigation, that the apple-eating girls had the best complexions of any in the school."

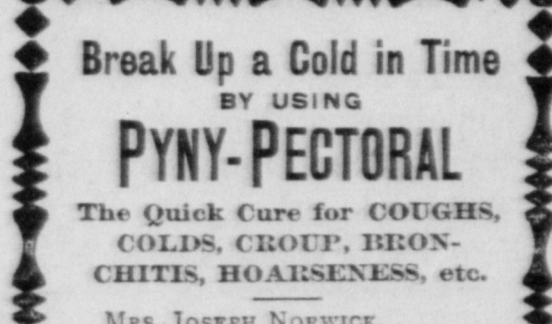

In CONSUMPTION and all LUNG DISEASES, SPITTING OF BLOOD, COUGH, LOSS OF APPETITE, DEBILITY, the benefits of this article are most manifest.

By the aid of the "D. L." Emulsion, I have got rid of a hacking cough which had troubled me for over a year, and have gained considerably in weight. I liked this Emulsion so well, I was glad when the time came around to take it.

DAVIS & LAWRENCE CO., LTD., MONTREAL.

A youth living near Indianapolis was recently presented by a friend with a large squash. When, however, his thrifty mother began to cut it up for pies, she noticed strange marks upon the seeds. Upon microscopic examination the marks proved to be letters of the English alphabet, which when properly placed spelled McKinley's name. To verify the truth of the story the seeds are now on exhibition at Republican headquarters in Louisville.

Break Up a Cold in Time
BY USING
PYN-PECTORAL
The Quick Cure for COUGHS, COLDS, CROUP, BRONCHITIS, HOARSENESS, etc.

Mrs. JOSEPH NORWICK, of 605 Sorauren Ave., Toronto, writes: "Pyn-Pectoral has never failed to cure my children of croup after a few doses. It cured myself of a long-standing cough after several other remedies had failed. It has also proved an excellent cough cure for my family. I prefer it to any other medicine for coughs, croup or hoarse voices."

H. O. BARBOUR, of Little Rock, N.B., writes: "As a cure for coughs Pyn-Pectoral is the best selling medicine I have; my customers will have no other."

Large Bottle, 25 Cts.
DAVIS & LAWRENCE CO., LTD., PROPRIETORS, MONTREAL.

An elderly spinster recently died near London leaving scarcely enough money to pay for her burial, and her miserable odds and ends of dilapidated furniture were speedily sent to the broker's where they sold for a song. Among these articles was an antique piano, a carved music stool and an old-fashioned "four post" bedstead, on which the old lady usually slept. The piano went to a dealer, the piano stool to a doctor, the bedstead to a carpenter and joiner. As the stool required repairs, the doctor sent it to the carpenter, who found ten sovereigns embedded in the horsehair, and on taking them to the doctor one was given him for his honesty. This discovery led the man to examine his newly acquired "four post" when, to his joy, after cutting off its legs, he found no less a sum than \$4,500 secreted in the cavities.

K. D. C. the household remedy for stomach troubles

Patents on Incubators.

Messrs. Marion & Laberge, Engineers and Experts in patents, 185 St. James Street, Montreal, furnish us the following information:

The art of hatching chickens by artificial means was practised in Egypt for thousands of years with considerable success. Machines with this end in view were patented in this country prior to 1871, but very rarely with any positive degree of success. The reason for their failure arose from the operator's ignorance of the degree of heat and amount of moisture requisite. The British patent to Cantelo, No. 11, 102, February 25th, 1846, and the United States patents to Hoffman, No. 4, 978, February 20th 1847, and Guerin, No. 3, 019, March 30th, 1843 are among the earliest types of incubator employed in this country and England. Following these tentative constructions, the most important innovation was made by Rosebrook, No. 271, 991, February 6th, 1883, who successfully regulated the temperature by a thermostat and electric circuit, and Zalstead, No. 267,422, November 14th, 1882, who devised an egg-turner and moisture system. Campbell No. 372,115, October 25th, 1887, provided for the independent regulation of water and air temperatures, thereby greatly enhancing the effectiveness of the incubator. In this class 129 patents have been issued.

The following patents have been granted this week to Canadian inventors:—569,994, William R. Boisvert, Lewis-Spring-bed; 570,380, Alexander M. Chalmers, Nanaimo—Envelope; 570,164, Francis J. Freeze, Montreal—Sole splitting machine; 570,404, John A. Jackson and J. S. White, Toronto—Mangle; 570,132, Paul R. Krasel, Montreal—Ash-sifter.

A Caution! A Warning!

If, on blowing the nose in the morning, lumps and flakes are discharged colored with blood, especially on one side, lose no time in applying a remedy. Catarrh of the very worst kind as become seated, the walls are sore and full of small ulcers, and if not soon cured will be hard to cure and eradicate. "A stitch in time saves nine." Use Chase's Catarrh Cure.

Lord Notsent (moodily)—"I dreamt last night, James, that I had plenty of money. The Valet (eagerly)—"An 'oo was th' 'appy H'american girl, me lud?" —Puck.

"The Cuban insurgents stole another march on Weyler yesterday." "What was that?" "They spilled six barrels of ink out of his ammunition wagon."—Philadelphia American.

"I guess we'd better tell that errand boy he'll have to give up his habit of whistling," said the business man. "I shouldn't do that," his partner replied. "The only time he hurries is when he is keeping time to a march."—Washington Star.

The Force of Habit in Germany.—Reporter (writing)—"Yesterday at 10 o'clock his Majesty, after inspecting the other sights of our city, was pleased to examine the eclipse of the sun, and to express his satisfaction therewith."—Fliegende Blätter.

Drunkenness, Morphine and Tobacco habit may easily be cured by the use of Hill's Double Chloride of Gold Tablets. No effort is required of the patient and stimulants may be taken as usual until voluntarily given up. Tablets may be given in tea or coffee without the patient's knowledge. A cure guaranteed in every case. For sale by all first-class druggists, or will be sent on receipt of \$1.00. For full particulars address The Ohio Chemist.

"Hear about his reverence?" "No." "Oh, he's in a terrible stew." "No?" "Yes. Terrible. The worst I ever tested." Naturally enough, the naked savages fell to wondering if they would have any better luck with the next missionary.—Detroit Tribune.

All Through One Gate.

Let us fancy a state of affairs like this: Suppose that nothing to eat could be raised or produced in England; suppose a war, in which all the ports of England were so effectively and continuously blockaded that no food whatever could be imported for a year. What would become of the people? At best only a few could leave the country; the vast majority must remain. The question answers itself. Such a situation is not likely to occur, God forbid that it ever should, but the grim fancy may teach some of us a lesson that we can use to advantage.

For example, a lady is speaking of an occasion when she was very ill. What her ailment was she did not know. It first appeared in November, 1890. Up to that time she says she had been healthy and strong; never needed a doctor. At that time she felt, not so much that she had been attacked by illness as that she had *lapsed* into it. She was languid, tired, and weak, without perceiving any reason why she should be so. "At first," she says, "my appetite failed me, and I had no desire for food. I could partake only of liquids, and after the simplest diet I had great pain at the chest. Sometimes I was seized with giddiness, and had pain across the forehead and temples."

"I became so low and weak that I was confined to my room for a fortnight, and could barely walk across the floor. I continued to grow worse, losing strength daily. In the early part of December, 1890, I thought I would try a medicine that had greatly benefited my two daughters, one of whom had suffered from weakness and indigestion and the other from poorness of the blood."

"The name of the medicine is Mother Seigel's Curative Syrup, and I procured it from Mr. Shirliff, the chemist, in Goldhawk Road. After I had taken the Syrup two days I found myself a little better. My appetite returned, and what I ate digested and gave me strength. By the time I had taken two bottles I was completely cured, and have since been in the best of health, not requiring medicine of any kind. I have recommended Mother Seigel's Syrup to many of my friends, and they have found benefit from its use. If by publishing this letter other sufferers may come to know of the curative powers of this medicine, you are at liberty to make it public. I will answer any inquiries. Yours truly, (Signed) Mrs. S. Buckingham, 23, Oaklands Grove, Shepherd's Bush, London, September 16th, 1892."

The reader will notice that Mrs. Buckingham speaks of her two daughters, one of whom had been cured of weakness and indigestion, and the other of poorness of the blood, by the Syrup. On this point we merely desire to suggest that both the young ladies were (as their mother knew) troubled with the same complaint—one perhaps in a stage a trifle more advanced than the other. Poverty of the blood means simply a lack in it of the vital elements, which food alone can supply; and food can't supply them unless it is perfectly digested. Thousands of women are thus afflicted, and are being constantly saved by the effect of Mother Seigel's Curative Syrup on the stomach and the other digestive organs.

Then, what do we make of the illustration which introduces this article? This. The human body is like the population of a great country—it must be fed. Every muscle, bone, and bit of flesh is merely food altered into that form by the digestion. Yes; even more than this. Our illustration goes deeper than we thought. While it is not supposable that England could fail of assistance from her own soil, the human body in no way helps itself. All its support must come from the outside, and all pass through one gate—the stomach.

We thus see the great work done by the Syrup in keeping this gate always open and available.

Has Lost His Own Identity

In a letter to members of the clergy in the East the Rev. George H. Davis, rector in St. John's Protestant Episcopal church in Mankota, Minn., tells of the strange case of a man who has completely lost all sense of his own identity as to make it wholly impossible for him to give his name, birthplace, or other facts concerning his personal history. Mr. Davis has written the letter in the hope that certain shadows of facts which appear to be in the unfortunate stranger's mind may lead some participants in events doubtfully narrated to unravel the mystery. Mr. Davis's account of the incidents is as follows:

On Oct. 16 a well-dressed, gentlemanly appearing man called upon the undersigned, announced himself as a churchman, and asked to be introduced to some physician with whom he might confer as to his mental condition. He claimed to have lost all knowledge as to his personal identity, of which fact he had become conscious within a few days.

The stranger was taken to one of the leading physicians, and after a careful examination, placed in the City Hospital where he still remains. He thinks he has gone from place to place for a considerable time, but cannot tell how long. Nothing about him gives any clue to his identity. Some of his linen is marked J. H. H., and he registered at a hotel as J. Harrison St. Paul, but he thinks this is neither his name nor home.

"He is an Englishman by birth, about 50 years of age, well educated, and thinks he has travelled extensively in this country and abroad. He recalls that on one Easter, probably within the past two or three years, seven young ladies belonging to his Sunday school class were confirmed. At the early celebration of the sacrament preceding the confirmation, he with his entire class, which, he thinks, numbered about twenty, went to the holy communion. He also thinks he has, at some time acted as a lay reader."

The Lowell Observatory at Flagstaff, Arizona, famed for its Mars researches, is to be moved to Mexico because the winter atmosphere at Flagstaff is not clear enough.

900 DROPS

CASTORIA

A Vegetable Preparation for Assimilating the Food and Regulating the Stomachs and Bowels of

INFANTS & CHILDREN

Promotes Digestion, Cheerfulness and Rest. Contains neither Opium, Morphine nor Mineral. NOT NARCOTIC.
