To Crush The Mahdists.

LONDON, Aug. 22.—Interest in the Anglo-Egyptian expedition to the Sudan which waned somewhat during the period the troops were awaiting the rise in the Nile, has been revived by the receipt of intelligence that the preparation for the resumption of the advance has been completed and that troops will go forward within a fortnight. The whole force is ready for the advance. The Nile on Thursday had risen to a point that would enable the steamers that are waiting below the Semneh gate to ascend the river. Once Semneh is passed the route will be clear. As a sign that action is imminent a general order was issued Wednesday forbidding the sending of further communications from the camps beyond Koshah. Henceforth the press despatches will be controlled by the military authorities, but it is not believed that the censorship will prevent the transmission of news of importance. Simultaneously with the news of the imminent advance of the Anglo-Egyptian forces come advices from the Congo free state that the expedition under Baron Dhanis has reached the white Nile and occupied Lado. When Baron Dhanis started it was officially denied that an Anglo-Belgian movement had been concerted against the Mahdists, although the British government allowed several hundred hussars to join Baron Dhanis' forces. The news now at hand confirms the statement originally made that the object of the Belgian expedition was to operate in conjunction with the Anglo-Egyptian forces. There is now no doubt that the British, Egyptian and Belgian governments are jointly interested in the plan to inflict a crushing blow upon the Mahdists and reconquer the Sudan. Lado, the place where Baron Dhanis has arrived, is north of the territory proper of the Congo Free State. It is situated on the White Nile, 25 miles north of Victoria Nyanza. The Belgians, it is believed, will go further north in the direction of Khartoum, while the Anglo-Egyptian expedition will proceed south from Semneh. Thus the Mahdists will be caught between two fires, and the result, it is hoped, will be the final extinction of Mahdism. The pretence that the advance southward is solely for the purpose of strengthening the Egyptian frontier and to prevent an incursion of the dervishes into Lower Egypt is now also abandoned, and it is generally conceded the object is to subdue the dervishes and again take possession of the country so long held by them. To hold the territory in question once it is reconquered will require a British force, and with the British soldiers employed in this service the question of the British evacuation of Egypt will be indefinitely postponed, and this, it is charged in some quarters, was the sole object of Lord Salisbury in embarking Great Britain in a scheme that, in the end, is bound to raise a protest from the British tax-payers.

CONQUESTS FOR MEDICAL SCIENCE.

A Bad Heart—Chronic Catarrh Vanish at the Touch of Dr. Agnew's Wonderful Cures

I tried Dr. Agnew's Cure for the Heart and obtained immediate relief. I have taken four bottles and now am entirely free from all symptoms of heart trouble, and I hope this statement may induce others troubled as I was to give this valuable remedy a fair trial, writes, Thomas Petry, of Alymer Que. You can readily verify any testimonial quoted in commending this wonderful discovery of modern medical science. Thousands have tested its curative qualities after having doctored for years, and were pronounced hopeless cases. If as a last resort it has proved such a boon, what suffering would be spared if, when the slightest uneasiness at the heart is experienced, Dr. Agnew's Cure were tried.

CATARRH — "I should not feel that I was doing my duty did I not recommend Dr. Agnew's Catarrhal Powder to every one, writes George Lewis, Shamokin this is to a lesser or greater degree affected by this insidious disease. There is only one safe, sure and harmless cure—Dr. Agnew's Catarrhal Powder. No case so slight that you can afford to neglect to use this remedy. No case so acute or deep seated that it will not relieve and absolutely cure; no catarrh remedy has worked such marvellous cures; no remedy has had so much good said of it, and no

remedy has the high endorsement of the medical profession it enjoys, and your case is not hopeless while Dr. Agnew's Catarrh Cure is at hand.

Main River.

The residence of Mr. Donald McKay was the scene of an interesting event on 19th inst., when their daughter Agnes was united in marriage to Mr. John Girvan, of Pine Ridge. Rev. F. W. Murray performed the ceremony. Since the death of her mother some years ago, she has proved an exemplary daughter and sister and she will be much missed in the social circle of Main River. A large number of invited guests, among whom were Rev. Wm. Hamilton and lady, of Kingston, partook of a bounteous repast served at 6.30 p. m. The following presents and many others testified to the esteem in which the young lady is held: Set dishes; set silver knives and forks, from Selkirk Murray; ice-cream set, Mrs. Allanach; set silver-tipped castors, Mrs. F. G. Graham; parlor lamp and set knives and forks, Miss Jardine; silver pickle-stand, Mrs. W. W. Graham; fruit salver, (beautiful design) C. Murray; fancy cake plates; set dishes, Mrs. Cameron; three o'clock tea set, Miss Bewser; two sets glassware; last tho' not least, twenty dollars in gold. The happy couple left by midnight express from Harcourt for a short trip to Amherst and vicinity.

AUGUST 18.—Farmers are about through haying. Hay is a fair crop.

The past week has been very warm.

Our schools have been opened by the same teachers.

Two boat loads of picnickers left here for Cocagne Island this morning, but one of them failed to reach its destination. It landed on the beach and as soon as the party reached the factory, the ladies busied themselves spreading the tables which groaned under the good things provided for the occasion. After the tables were lighted, groans were heard from other quarters. Some went picking shells others picking blueberries and a very pleasant day was spent. Those who went to the Island also spent a very pleasant day.

Miss Edith Dickey has gone to Dorchester to resume her school.

Mr. Len. Wood is visiting friends here.

Mrs. Wilson Terry, of Stillwater, N. Y. drowned her two-months-old child Friday morning and then committed suicide by drowning in Champlain canal. Illness had unbalanced her mind.

It is said the Western Union Telegraph Company controls at present the American Bell Telephone Company. The combination of the two concerns will mean an almost impregnable monopoly of both the telegraph and telephone business in the same hands.

The Rev. Mr. Stewart, pastor of the Methodist church at Cataraqui, Ont., was killed on Tuesday night at the railway crossing in that village.

Here is a rough sketch of the pipe which Li Hung Chang uses when he smokes—not opium, but tobacco. Ordinarily the tobacco pipes used in China are made of common white metal, but Li's is exquisitely chased in silver. Its most bulky part is a reservoir of water completely closed in, from the upper part of which rises a vertical silver tube with a horn mouthpiece. Let into the upper part of the water reservoir is the pipe proper, which is adjusted in such a way that its lower extremity touches the water. It is not unlike a cigarette holder. In another part of the covering is an indentation for the reserve of tobacco. The operation of smoking would be more irritating than soothing to a Western smoker, for the pipe has to be replenished every minute or so, and there is, moreover, the risk, if the tube gets ever so little awry, of sucking up not smoke but water.—*Birmingham Post.*

Murdered in Crete.

LONDON, Aug. 24.—The Daily News this morning says that Dr. Nicolaides, the official representative of the Cretan Reform Committee, who is now in Berlin, issued a report on the Cretan massacres. Dr. Nicolaides asserts that the statement in this report can be confirmed by the consuls at Canea, and that the diplomatic representatives there will verify the assertion that six thousand Christians have been murdered in Crete with revolting barbarity.
