The Return of the Pendulum.

In 1892 the prosperity of the commercial schools was at its flood. Desiring to find some expedient that would render them still more prosperous, the proprietors of many of these schools abandoned methods that had produced excellent results and adopted others which were wholly experimental. It may safely be said that in most cases the change was not made with the expectation that the schools would be strengthened educationally, but that the new ideas would have greater advertising value.

If All People Knew

What an advantage there is in sending to us for goods we couldn't keep up with the orders.

As it is, over 4000 families throughout these three provinces have purchased from us, most of them time after time.

We are continually harping away about our order system, knowing it to be far superior to all the others—that's one reason we get so much out-of-town trade. Another reason is the promptness and great care given to orders, whether for samples or goods.

We are getting better known every day, not only by the liberal use of the newspapers, but through people who have tried us recommending their friend to send here for their Dress Materials, Silks, &c.,

A most important fact to consider is that we prepay expressage on all purchases of \$5.00 and upwards, thus landing the goods at your station at same prices as we get for them at our counters.

It costs but a few cents postage to see the samples which are put up in such a way that its a pleasure to make selections from them.

If you decide not to buy after seeing them, all right; no harm done. We're anxious to have you see the way our mail system is run.

Write now for Samples.

DANIEL & ROBERTSON, CHARLOTTE ST., ST. JOHN.
