SUSTAINING THE AUTUMN FLOW

At this season of the year it is too cool for cows to lie out in open pasture at night, and not cold enough, perhaps, to warrant housing them in the winter stable. An intermediary place should be provided, that will afford sufficient shelter to keep the milch cows from getting chilled through the prevalent cold dews and frosts of September and October, writes Geo. E. Newell.

A shed tightly boarded and open on the least exposed side will answer this purpose admirably, and add many more pounds of milk to the fall yield of cows. It is best situated near the exit gate of the pasture, so that the cattle may be readily found and driven up in the morn-

Such a shed need not be erected for the purpose alone of protecting cows on cool autumn nights, for it will serve as a shelter against cold rains and hot sun alike. In my opinion no pasture should be without one.

comfortable bedding.

"freezing-up time," this will keep them lacteal decadence.

shelter drive them into it at dusk a few times, and they will find it themselves thereafter. A few salt boxes attached to the wall will also bait them to the place more surely.

One has got to be but half way observant to notice how rapidly cows that are not sheltered shrink in milk yield follow ing cold nights. It has seemed strange to the writer many times that this fact was not more generally appreciated and remedied by dairymen at large.

I can only explain it by the hypothesis that most dairymen consider the fall shrinkage of milk inevitable, which I contend is a mistake, at least to the extent now prevailing.

Besides attending to the bodily comfort of cows as cool weather advances, their food supply should be kept at its maximum insteady of allowing the vagaries of of the season to regulate it.

At no season of the year is milk more profitable for butter and cheese making than during the autumn months, but a limited vield means only a limited amount

Corn fodder cut early, before it has been touched by the frost, and then well stocked to preserve it bright and green loses little of its succulent value fed after frost has come. It should be cut up and fed from the manger, where the cattle cannot trample half of it under foot, as would follow where spread on the fields.

Pumpkins, if taken from the field before hard frosts, and then judiciously fed to cowe from the manger, form valuable supplemental fall feed. When root crops as mangles, turnips and carrots, are pulled, the tops should be saved and fed fresh to cows, for there is much milk in them

DRILLING GRAIN.

Many old farmers believe that with modern improvement in cultivating implements, the grain drill for seeding grain is not much if any improvement over the old-fashioned practice of broadcasting the seed and harrowing it in. The drill distributes the seed more evenly than can be done by hand so wing, but the grains are left in lines closely crowding each other, and between two ridges which when beaten down by rains or melting snows cover the seed and plant too deeply. When the drill was first introduced it was reckoned an advantage that its tubes made some impression on the clods which the cultivation at that period usually left on the surface. But the clods prevented the wheels of the drill from sinking so deeply in the soil, and thus keep the points of the distributing tubes near the surface. When the grain field is prepared with the disc harrow or the spring tooth cultivating harrow the soil is mellowed much deeper than it should be. To sow the bed, and then merely run a smoothing harrow over it to press it into the suil, leaves the grain in better condition for growing than to cover it as deeply as the drill is sure to do.

Winter grain is to some extent protected from heaving out by the ridges which the drill leaves on each side of the rows of grain. But if the land is heavy and the soil is frezen under the grain rows, these hollows often fill with water in winter, and this entirely destroys the plant, for its root, being beld tight by the frost, the expansion of the water in freezing snaps the leaf growth just at the surface of the ground, making it impossible for it to sprout again. Spring grain is not subject to this injury, and therefore for spring grain drill seeding has advantages over broadcasting, especially if there is a fertilizer attachment whereby fertilizers may be distributed in close contact with the seed. This has proved so great a benefit to grain crops on loamy land that most farmers now scarcely attempt to grow grain without putting some mineral fertilizer with the seed.

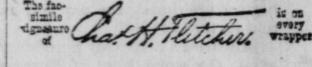

HOG FEEDING.

The hog is generally termed the money maker for the farm. He enables the farmer to convert his grass and coarse grains into cash and to do so at the least expense to the productive capacity of his farm, says a writer. The man who sells grain produced upon this farm year after year will soon exhaust his farm, while the farmer who feeds the productions of his farm will not only maintain but may improve the fertility of his soil. Farmers as a rule do not give sufficient thought to the food question, as to the best method of feeding for securing the largest amount of grain from the feed. It is not always a question of what will produce the greatest amount of pork, but how can I get the largest amount of pork, from the fo d grown on my farm, being those for which it is best adapted The chief expense in growing hogs is the feed. Therefore it is a matter that is entitled to the greatest study of the farmer. It is apparent to everyone that the more gain By leaving it open on one side, and of that can be got out of pastures the cheapsufficient capacity to comfortably house er is the production of pork, and experiall of the milch stock, no floor or stalls ence will teach that some grain with the and at Moneton with C. P. R train leaving St. need be provided. The ground under it pasture is more profitable than an exshould be elevated and well drained; how- clusive grass feed. There are a great ever, and kept covered with dry little for many root feeds and vegetables that have but little feeding qualities, except that Where, on the majority of dairy farms, they enable the animal to get more out cows receive no shelter at all in autumn, of his grain. The hog that doesn't eat, until they go into the winter stable at doesn't grow and doesn't gain and is no profit to the owner, therefore it is necessfrom suffering and from physical and ary to see that the hog is kept in a condition that will give him a natural and To get them accustomed to the new strong appetite to insure the best growth and profit. It is not a good plan to overfeed. It is also important that feeding should be done regularly at stated times. There is nothing that will throw an animal out of feed and out of condition and in an unprofitable state so quick as constipation, and this should be provided against. It is the forerunner of various

CASTORIA

diseases and complication.

For Infants and Children

WILL BE USED NEXT SUMMER.

OTTAWA, Nov. 10 .- In view of the fact that the Imperial government has declined the offer of a second Canadian contingent, it has now been decided to serve out to the rural corps for next summer's militia camps the uniforms and equipments which had been ordered in anticipation of the acceptance of the offer of the second con-

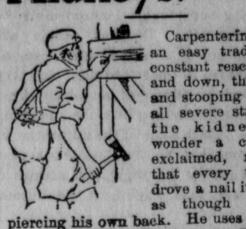

"Adversity flattereth no man," but the pains of dyspepsia turn his attention to Hood's Sarsaparilla and in its use he finds a cure.

About fifty tons of manganese ore has recontly been hauled from the Stockton mines to Susser station for shipment. The new owners are feeling in high spirits at the prospect of a great output, the ore in sight being in large quantities.

is Rheumatism of the back.

The cause is Uric Acid in the blood. If the kidneys did their work there would be no Uric Acid and no Lumbago. Make the kidneys do their work. The sure, positive and only cure for Lumbago is

Dodd's Kidney

Carpentering is not an easy trade. The constant reaching up and down, the lifting and stooping over are all severe strains on the kidneys. No wonder a carpenter exclaimed, recently, that every time he drove a nail it seemed as though he was

DOAN'S Kidney Pills now on the first sign of Backache and is able to follow his trade with comfort and

"I have had kidney and urinary troubles for more than three years with severe pain in the small of my back and in both sides. I could not stoop without great difficulty, and I had severe neuralgic pain in both temples. Seeing the advertisement of Doan's Kidney Pills, I got a box. They have given me quick relief, removing the pain from the back and sides, and banishing the neuralgic pains from my head. The urinary difficulty is now entirely gone, I feel fresh and vigorous in the mornings, and am much stronger in every way since taking these pills." Clarence E. Seeds, Carpenter and Builder, Trenton, Out. Builder, Trenton, Ont.

TOO MUCH OF A GOOD THING.

Don't be too clean! Be temperate in all things. Mind that your zeal for keeping things tidy-exemplary enough in moderation-doesn't develop into fanaticism, is the advice given by Margaret Remington in the Puritan:

The microbe of over orderliness, not properly watched, tends to produce s hysteria or cleanliness. The victim in such a case, generally a woman, makes life a martyrdom to her household, whose lapses give her keen enjoyment by em phasizing her own superiority. She wonders compassionately, for instance, how a girl so nice as you can be so heed less about the shades. If there's any one thing she does stickle for, it is shades all on a level! And she'll proceed conscientiously to exclude your pet patch of sunshine or the expanse of view you love better than all the level shades in the world, by drawing the blind down gently on a mathematical line with all its fellows.

She'll put your rooms to rights for you with exasperating insistence, making an unsympathetic heap of the papers and magazines you've left in such a congenial litter, and arranging your toilet articles with such unfamiliar propriety that you never know where to find anything.

She will air your bedding with humiliating frequency, and even abstract your garments sometimes with the same sinister design, believing it to be her duty, and thanking her stars that there's one systematic person in the house at least.

It is the secret of self-righteousness of such as these that is as hard to bear as their inexorable practices. "Whatever else my short comings may be," such a one will say with a virtuous sigh, "I hope at least, at the last day, I'll be credited with the effort to keep clean."

"Clean? Yes, abominably clean."

For her there's nothing too sacred to be interrupted by a sudden onslaught upon an accidental fly. Excuse her, please, for breaking in, but flies are one thing impossible to tolerate. Pardon her, as she darts towards an invisible smudge or film of dust somewhere; some people never seem to see such things, but for herself, wellthen the same complacent sigh.

In bad weather boys may not bring their visitors indoors. Aren't there the playground and the barn? And isn't it her duty to teach them neatness?

"Oh, Bobby, how I wish I had a nice dirty mother like yours," one little restricted chap was overheard to exclaim wistfully to a more fortunate companion. Bobby, proudly accepting the impeach-

ment, returned with superiority: "I guess you do, Jack; I wouldn't swap mothers for a farm. My mother's too busy being comfortable and good and jolly to think so much about clean like yours. My! Won't you be glad when you are big an' you can be all the dirty you want!" which carries a moral to "over particular" mam-

Cleanliness is a good thing, an estimable thing but it isn't the whole of life. Undue attention to it has a degenerating effect upon the mental and moral side of you. Excess narrows the vision and gives you an astigmatized view of your duty live! Remember me to-" toward your neighbor.

that the hygiene of minds and souls is quite as important as the hygiene of material things.

ITCHING PILES.

False modesty causes many people to endure in silence the greatest misery im-aginable from itching piles. One appli-cation of Dr. A. W. Chase's Ointment will soothe and ease the itching, one box will completely cure the worst cases of blind, itching, bleeding or protruding piles. You have no risk to run for Dr. A. W. Chase's Ointment is guaranteed to cure piles.

As a contribution toward helping Mr Otis Parker to rebuild his barn which was recently destroyed by fire, at Avanport, Mr. J. B. North ordered from Capta Marsters mill, a frame and lumber to be delivered at once. Capt. Marsters sent men in the woods for some logs, and the whole order amounting to some eighteen thousand feet was finished and delivered ast week .- Hansport Advance.

WAYS TO COOK CHICHEN.

Chicken Souffle-Mince and pound very fine two cups of cooked chicken, add yolks of three eggs, salt and pepper to taste. Melt two tablespoonfuls of butter, and stir into it one tablespoonful of flour, adding gradually, one cup sweet milk, pour on mixture, add whites of three eggs whipped, and bake one-half hour in dish set in hot water.

A Modern Fry-Parboil chicken fifteen minutes, sprinkle with salt and let cool. Make a batter by beating light the yolks of two eggs, with half a saltspoonful of salt, stirring in gradually one tablespoonful of oil, adding one cupful of flour, and. lastly one cupful of cold water. Set batter away an hour, and prepare the vegetables. Chop very fine one small onion. three sprigs of parsley, and two tomatoes, with seeds left out. Stir into batter, and add last whipped whites of two eggs. Dip each piece of chicken in batter and fry slowly in a spider in butter. A nice accompaniment for plain, fried chicken is supplied by hominy balls, and tiny slices of crisp bacon, alternating around the edge of the platter.

Chicken Escallop-Use remnants of cooked chicken, picked fine. Heat two cups of milk, in which you have thrown a bay leaf, a dash of celery sait and three drops of onion oil. Melt two tablespoonfuls of butter, and stir into it three tablespoonfuls of flour, when it thickens, but before it browns, add milk. When thick and smooth, take from fire. Butter baking dish, and put in thin layer of crumbs, then chicken, then white sauce, alternating until dish is filled. Sprinkle crumbs

on top and bake one-half hour. A Nice Breakfast Dish .- Take one cup of soft boiled rice, add one cup of finely minced chicken, sprig of parsley, minced season well with salt and pepper. Form into small round cakes, dip in beaten egg and crumbs. Brown in spider in butter. Arrange on hot platter and pour over the following sauce: Half a can of tomatoes, stewed with one teaspoonful salt, and lump sugar, one saltspoonful mixed spices, when preparing onions-will prevent one's strain. Add one tablespoon of butter, eves from smarting. The steel attracts mixed with one tablespoonful of flour, the volatile juice before it has time to cook five minutes and serve very hot.

The Claim is False One.

Crude Materials Can Never Produce Perfect Work.

The claim is made by the manufacturers of crudely prepared package dyes and dves composed of suap grease mixed with small amount of coloring matter that these dyes will color cotton and wool goods with the same dye. Such a claim false and deceptive.

Animal and vegetable fibres, such as wool and cotton, must each have a special coloring agent. In order to meet this difficulty the manufacturers of Diamond Dyes have prepared special dyes for all wool goods and special dyes for all cotton and wool or mixed materials. Each of these Diamond Dyes gives handsome and artistic colors suitable for the various

Diamond Dyes are the only dyes in the world that fully meet the demands of home dveing. They color all kinds of materials and give colors and shades equal to those produced by European professional dvers, and in the majority of cases the Diamond Dyes are faster and more lasting. Chemical experts who have made found. repeated tests are of opinion that one package of Diamond Dyes will equal in

coloring power three of any other make. Avoid imitation package dyes and soap grease mixtures; they ruin good materials and are dangerous to handle.

A RATHER NOVEL COMPLIMENT.

An English traveller once met a companion, sitting in a state of the most woeful despair, and apparently near the last agonies, by the side of one of the mountain lakes of Switzerland. He enquired the cause of his sufferings.

"Oh," said the latter, "I was very hot and thirsty and took a large draft of the clear water of the lake and then sat down on this stone to consult my guidebook. To my astonishment, I found that the water of this lake is very poisonous! Oh, I am a gone man-I feel it running all over me. I have only a few minutes to

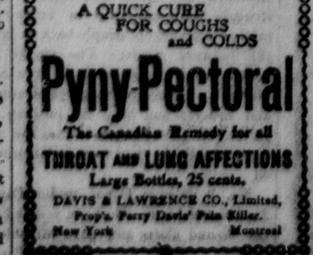

"Let me see the guidebook," said his Remember that "Life is more than friend. Turning to the passage he found meat, and the body than raiment," and "L'eau du lac est bleu poissoneuse" ("The rater of this lake abounds in fish.")

"Is that the meaning of it?"

"Certainly." The dying man looked up with a radiant countenance. "What would have become of you," said his friend, "if I had not met you?"

"I should have died of imperfect knowledge of the French language."

000000-----0000000

DREADED DISEASE IN NOVEMBER

SUFFERING

Paines Celery Compound Gives Prompt Belsef and Cures Permanently.

Thousands of people die in Movember of rheumatism. In the vast majority of cases carelessness, ignorance and a lack of medical shill send the sufferers to the

It can be honestly and fearlessly asserted that in nimety-nine cases out of every hundred Paine's Celery Compound would have banished the disease and saved life.

The original cause of rheumatism, as of e many other diseases, is a lack of nerve force. With this weakness of the nervous system there is a deraugement of the digestive organs; the food stays too long in the stomach, it turns sour, and the resulting acid enters the blood. The victim then takes sold, and the acid cannot be expelled from the systems by dinary means. Soon the joints swell, and then there is inflammation and great suffering.

Paine's Celery Compound used promptly and regularly quickly expels all the deadly acid from the body; the pains are bauished, muscles and joints that have become contracted and stiffened soon become imber and regain their power; and the patient walks-with comfort and ease.

No other medicine can do such marvellous work for those afflicted with rheumatism and sciatica. Paine's Celery Compound is truly your friend and life-renewer; it is the medicine recommended by the ablest physicians- for the banishment and cure of a disease that has such fatal results- in the variable- autumn months.

USEFUL TO KNOW.

A darning needle held between the teeth reach you.

Lampwicks must be changed often to ensure good light, as they will soon become clogged, and the oil does not pass through them freely. A clear flame will be certain if the wisks are seaked in vinegar twenty-four hours-before using.

It is now claimed that rubbing the face downward while washing is the cause of many of the wrinkles on women's faces to day, and the best remedy is to reverse the process, and always sub the face up-

When soouring the steel knives in use in every kitchen, if a little baking soda be mixed with the brick dust used, the spots will disappear with less rubbing, and theknives will stax bright much longer. Another thing of importance about scouring knives, is the substitution of a cut raw. potato for the cloth formerly used.

Another work for soda. Every housekeeper has experienced the annoyance of kerosene oil spilled on a clean kitchen floor, and knows the labor expended in eradicating the spot. If, before she attempts to scrub it off, she would sift over the spot, baking soda, completely covering it, and allow the soda to remain ten minutes or so, the grease will be drawn out, and when washed the spot will not be

Dip the stained parts of a handkerchief in spirits of turpentine, and let it remain for several hours; then rub thoroughly between the hands, and the ink spots will disappear without changing either the color or texture of the fabric.

To give windows, mirrors, etc., that beautiful lustre, so dear to the heart of every housekeeper, clean them by applying kerosene with a woollen cloth, then wipe dry with an old newspaper. This will ward off the flies to a great extent, as has been found by experience.

PHILPOTT'S RELEASE.

Sciatic Rhoumatism a Double Compound in the Realm of Pain Torture. but South American Rheumafic Cure Brives it Out and Never Misses!

A few weeks ago while on a business trip to North Bay I was seized with a severe attack of sciatic rheumatism. Hear-ing of the wooderful cures affected by South American Rheumatic Cure I procured a bottle, and inside of three days all the pain had left me, and when I had taken one bottle I was completely cured. I think it the greatest of remedies, and shall be pleased to communicate with any person wishing more particulars of my case."—EDW. PHILPOTT, Cannington, Ont. Sold at Est. W. W. Short.

A police inspector, being informed that a restaurateur was serving game out of season, visits the restaurant in plain clothes and orders dinner. "Waiter, par-

tridge for me." The inspector finishes his dinner leisurely and then says to the waiter, "Ask the boss to step this way a minute."

"What for?" "I wish to notify him to appear in court to-morrow and answer for selling partridge out of season. I am the police inspector and have secured the necessary

evidence against him." Waiter | It wasn't partridge you had. Police Inspector (uneasily)-What was

it then?

Waiter (cheerfully)-Crow. The inspector swooned.
