

RAILROADS.

INTERCOLONIAL RAILWAY.

On and after Monday, June 19th, 1899, trains will run daily (Sunday excepted) as follows:—

LEAVE KENT JUNCTION.

Accommodation for Montreal and St. John. Leaving Moncton at 11.33
Accommodation for Newcastle and Campbellton. Leaving Moncton at 13.15

Vestibule Sleeping and Dining Cars on the Maritime Express between Moncton and Halifax.

All trains are run by Eastern Standard Time. Twenty-four Hour Notation.

D. POTTINGER,

General Manager.

Railway Office, Moncton, N.B. 14th June 1899.

MONCTON AND BUCTOUCHE RAILWAY.

1899. SUMMER TIME TABLE. 1899.

On and after Saturday, July 1st, 1899, trains on this railway will run as follows:

No. 1. No. 3. No. 4. No. 5. No. 6. No. 7. No. 8. No. 9. No. 10. No. 11. No. 12. No. 13. No. 14. No. 15. No. 16. No. 17. No. 18. No. 19. No. 20. No. 21. No. 22. No. 23. No. 24. No. 25. No. 26. No. 27. No. 28. No. 29. No. 30. No. 31. No. 32. No. 33. No. 34. No. 35. No. 36. No. 37. No. 38. No. 39. No. 40. No. 41. No. 42. No. 43. No. 44. No. 45. No. 46. No. 47. No. 48. No. 49. No. 50. No. 51. No. 52. No. 53. No. 54. No. 55. No. 56. No. 57. No. 58. No. 59. No. 60. No. 61. No. 62. No. 63. No. 64. No. 65. No. 66. No. 67. No. 68. No. 69. No. 70. No. 71. No. 72. No. 73. No. 74. No. 75. No. 76. No. 77. No. 78. No. 79. No. 80. No. 81. No. 82. No. 83. No. 84. No. 85. No. 86. No. 87. No. 88. No. 89. No. 90. No. 91. No. 92. No. 93. No. 94. No. 95. No. 96. No. 97. No. 98. No. 99. No. 100.

EASTERN STANDARD TIME.

No. 1 Train connects at Humphrey's with I. C. R. train for Halifax, and at Moncton with C. P. R. train for St. John, Montreal and United States ports leaving at 14.05, and I. C. R. train for Campbellton leaving at 19.25.

No. 2 Train connects at Humphrey's with I. C. R. day ex. res. from Halifax, and with C. P. R. train leaving St. John at 11.50, and I. C. R. through express from Moncton and Campbellton leaving at Moncton 13.50.

No. 3 connects with I. C. R. accommodation train for St. John, leaving Moncton at 9.00.

No. 4 connects at Moncton with I. C. R. through express from Montreal, arriving at 15.40.

No. 5 and 4 will only run until September 11th, after which 4 to Nos. 1 and 2 will run daily (Sunday excepted).

During the months of JULY and AUGUST Excursion Return Tickets at one single first class fare will be issued from all stations on Saturdays, good for return on following Monday.

E. G. EVANS, SUPERINTENDENT.

Moncton, N.B., June 26th, 1899.

*Tues., Wed., Thurs., Fri. and Saturday.

*Monday's only.

*Mon., Tues., Wed., Thurs. and Friday.

*Saturdays only.

PERRY DAVIS'

FARMERS COLUMN.

NERVES AND FOOD.

It is the nervous cow that gives the greatest amount of good milk, says C. W. Jones in the Boston Cultivator. One inclined to go to fat makes an excellent beef cow, but a relatively poor milkier. As the nervous cow is apt to be smaller in proportion, than a large, fat beef making cow, the idea gains some headway that she requires less food. Indeed, there is a tendency in some quarters to reason that a cow needs food in proportion to her size—that is, a large cow requires more than a small one. This is an error of a most pronounced order. It is nervous energy that absorbs and uses up food, and it requires more feed, such a nature as it does one of a phlegmatic disposition. If anything the opposite to what is true is general practice should be observed. More rich and highly concentrated food should be given to the small milkier than to the large beef maker. The good milkier, if her digestion is good, can change more of her food into milk than another animal can convert into beef or fat. A good deal of this food that is given to the milkier is converted directly into milk and is thus more profitable than when fed to the beef cattle.

The nervous animal's mechanism is more easily deranged than that of the heavy beef making animal. A plow horse can stand more abuse than the high strung race horse. Many dairymen do not appreciate this thoroughly either in their feeding or caring for good milk cows. As the whole value of the animal's products depends very closely upon the condition of her digestion a study should be made constantly of the cow's health. In a normal condition she can take a great amount of food and convert it directly into milk. This food should be given with the best possible caution, so that it will not injure the health of the animal. Give all to a cow that she will eat up clean is a good rule to go by, but if her appetite declines there is something wrong with her digestion that needs instant attention. Very frequently, this case is so simple that one overlooks it. In a nervous cow a sudden fright, undue excitement or running in a field or anything that will upset the nerves may cause the flow of milk to stop temporarily and upset the digestion so that the full quantity of milk will not be given for weeks. It is to guard against such slight accidents that the dairyman must exercise his supervision and authority. His cows are high strung milking machines that easily given out under abuse or misuse.

SUNFLOWER SEED FOR CATTLE FEED.

Sunflowers are no longer to be regarded as a mere garden ornament with a faculty for turning their heads so that their large plant is a big oily, gold, producing article of commerce and has its own peculiar points of growth and management. It has just been learned in England that sunflower seed is the most fattening of all foods for cattle. Several farmers are coining money by raising the plant wholesale for market. Within a mile of the principal farm in the southern countries there are more sunflowers probably than in all other parts of the world. The farms look like great yellow mists when viewed from Edgeton Hill 20 miles away. There are 500 acres of sunflowers altogether and when the ripe heads are cut in the fall the crop will yield about 300 wagon loads of seed. The market value of the seed is \$50 a load—a total income of \$15,000 for the crop. The seed is crushed and pressed into cattle cakes. To raise these great sunflower crops the field must be fertilized with calf bone dust. That is an expensive feature. Twenty men are employed in the bone grinding mill.

ALWAYS KEEP ON HAND

Pain-Killer.

THERE IS NO KIND OF PAIN OR ACHE, INTERNAL OR EXTERNAL, THAT PAIN-KILLER WILL NOT RELIEVE.

LOOK OUT FOR IMITATIONS AND SUBSTITUTES. THE GENUINE BOTTLE BEARS THE NAME,

PERRY DAVIS & SON.

MEN OF MARK.

John Y. Stone of Glenwood, Ia., has an apple orchard of 800 acres bearing 133,000 trees.

Sir Henry Hawkins, the great English criminal judge, has taken the title of Lord Brampton.

Dr. Nansen is building himself a handsome house, and it is believed that he has decided not to go on any more expeditions.

Joseph H. Choate says he owes his success as a lawyer to the fact that he never neglected a case, no matter how unimportant it was.

Rev. Newell Dwight Hillis, who at 29 is the successor of Lyman Abbott in Beecher's pulpit, was at one time a church janitor at the salary of \$1.50 a week.

Padewski daily goes through a regular set of gymnastics for the purpose of strengthening his arms and hands. He employs for this an apparatus which he designed himself and of which he carefully guards the secret.

James Bryant, a sea captain who died in New York a few days ago, was the man who commanded the vessel in which "Boss" Tweed escaped to Cuba from New York. He was handsomely rewarded for the risk he took and kept the secret for many years.

Dr. Christomanos, who taught the late Empress Elizabeth of Austria Greek and lately published a book purporting to be her diary and sayings, has resigned his position as lecturer on modern Greek at the Vienna university. It is believed through pressure from the court.

Thomas J. Lee of Missouri, whom President McKinley has inducted to be professor of mathematics in the navy, first came into prominence through his discoveries regarding celestial heat, which have practically changed the whole nebular hypothesis of Herschel and Laplace.

Since his arrival in Washington Ali Ferrough Bey, the Turkish minister, has adopted as his workaday costume a bicy cle suit of dark gray cloth. This he wears almost constantly. He is young, good looking and athletic, and his favorite attire sets off his figure to great advantage.

General Sylvanus C. Boynton, a well known lawyer of New York city, who is over 70 years old, has just finished a term of six months' imprisonment for refusing to pay a \$10,000 judgment in favor of a relative which he considered unjust. By his staying in jail the judgment was vacated.

Magistrate Wentworth of New York city recently declared from the bench that suicide is not a crime. The statement was made when he discharged a 16-year-old boy who had attempted self destruction. "When a man is through with life," said the magistrate, "let him shuffle it off. That's what I intend to do."

A Zurich publisher of revolutionary German books, J. Schabellitz, is dead. He brought out Count Armin's famous pamphlet, "Pro Nihil," and likewise the works of Herwegh, Gog, Scherr, Voss, Bahr, Holz, Schaf and Pfau. He was noted for the rudeness of the postal cards he wrote in rejecting manuscripts.

The foreigners to whom congress will this year extend the privilege of admission to the West Point Military academy are Luis Yglesias of Costa Rica and Andres Ponte-Ruogo of Venezuela. Ricardo Yglesias, brother of Luis, and Albert Valencia Montoya of Colombia, will be admitted to the naval academy at Annapolis.

ORCHARD AND GARDEN.

Black knot is the worst enemy of plum trees.

Stone fruits usually require very little pruning.

A low headed tree gives less purchase to the wind.

An open headed tree grows the fairest and finest fruit.

By staking newly set trees a straighter growth is secured.

The quince is greatly benefited by heavy manuring, especially if applied early.

It is never advisable to set young peach trees in the same spot where the old ones have died.

Salt will kill weeds to a certain extent, but it will kill other plants. Do not use too much of it.

When setting out trees, never put manure of any kind in the hole made to receive the roots of the tree.

Peach trees should never stand in grass unless the growth is naturally rich and they are heavily manured.

As soon as the condition of the ground will admit, fill all vacancies in the raspberry and blackberry rows.

All fruit trees should be trained low. The lower limbs should not be higher than is necessary to cultivate under them.

HOOSIER SUPERSTITIONS.

If the cat washes her face, it will soon rain.

If a hen crows, had luck is coming. Sell the hen to a peddler.

If you find a pipe of tobacco, don't bring it home, or some one will die.

If you sweep dirt out of the house, you sweep out your luck. Burn the dirt.

Don't turn back when once started on a journey, or bad luck will follow you.

If you give away a cat or one goes away, don't let it come back, or a cow or horse will die.

If you turn a chair around on one leg or if you turn a loaf upside down, there will be a quarrel in the house.

If you don't put a horseshoe—one that has been worn by a 2-year-old filly—in the churn, the witches will take the butter.

Don't put your left stocking or shoe on first when dressing in the morning, or you will put your foot in it some way during the day.

If a chair falls as you rise from it, you will not marry within a year. If the housewife sweeps under your feet, you will not marry within seven years.—Indianapolis News

HOUSEHOLD HINTS.

Eggs may be preserved for a month by boiling them one minute or steeping them for a time in sweet oil.

A doctor has said, "Mold and decaying vegetables in the cellar weave shrouds for the upper rooms." That is a good thing to remember and act upon as spring advances.

Paint and putty can be taken off glass by wetting the glass several times with a strong solution of soda. Wet the glass often with it till the spots soften and can be washed off and then polish with alcohol.

A bottle of gilding, cost 10 cents, is a handy thing to have in the house. The chains of the hanging lamp, the slightly defaced picture frames or any article that is gilded may be refurbished at slight cost and trouble.

GOOD THING THEY'RE SMALL.

If Ants Were Much Larger, They Would Own the Earth.

If ants were large enough, they would rule the earth. As it is, they predominate the politics of their own sphere and have many human characteristics.

The longest time for which an ant sleeps is three and a half hours. On awakening they stretch their legs, yawn and then carefully clean themselves by applying their legs to their mouths and rubbing them over their bodies, very much in the style of a cat washing her face, after which they comb and brush their heads and bodies with the natural comb which nature gives them.

The most remarkable thing about ants is that almost every necessity for which we are obliged in our case to employ more or less complicated mechanical contrivances is provided for by the physical structure of the ants.

Ants clean themselves both before and after sleep, and also after eating. Frequently one ant will lick and brush another all over, limb by limb, the ant operated on sprawling on her back, relaxing her muscles and abandoning herself to the enjoyment of the operation.

They are great hunters, attacking snakes, lizards, rats, mice, centipeds and beetles.

They even kill the great African python. It is said that if a python has killed an animal he dare not gorge himself with it till he has made a wide circuit and satisfied himself that there are no driver ants in the neighborhood. If, however, he meets with any he abandons his prey to them and discreetly retires. A certain species actually keep cows—in other words, plant life. When the ants are hungry, they actually milk the aphides by tapping them briskly on the sides of the abdomen with their antennae till the fluid exudes, when it is at once sucked up by the ants. They shut them up in cow houses and use them for days.

Ants act as soldiers in a very real way, and it is no stretch of language to call them pitched battles between ants of the same species and raids of one species upon the nests of another, sometimes to carry off the larvae and pupae as food (a modified form of cannibalism) and sometimes to supply their own nests with slaves.

Certain ants are agriculturists and allow ant rice to grow up in a circle round their nests, while every other plant is carefully cut down as fast as it appears. They sow the crop regularly, tend it and harvest it. When the seeds fall, they are carried into the nest, and the stubble is cleared away. When the grain in the nest gets damped by rain, these ants carry it out into the open to dry.

Snakes Do Swallow Their Young.

I met with a curious incident some years ago while hunting snakes in the swamps at Melrose. I came across a male and female, striped, with numerous young ones. The parents were near each other, the family crawling over and around them. I was going for them, when on second thought I concluded to watch them. They did not appear frightened, but went on gambling about for some time. I went a little nearer, when both snakes turned toward me, making a faint noise, and placed their heads flat on the ground. It was a curious sight to see these young snakes, not long born, some of them a foot or two away, turn at the noise and instantly seek refuge in their parents' wide open mouths. I am certain it was a note of warning of danger. I caught both snakes and put them in separate bags. The female had ten young, and the male had swallowed five. This is the first instance of any notice of a male snake performing this affectionate duty for its young. I placed the whole family in a box, where they lived peacefully a long time.—Forest and Stream.

Too Cultured.

A writer in The Critic speaks somewhat scoldingly of the requirements of "Boston culture" as applied to all walks of life. Of course her tone is satirical, and she gives humorous illustrations, the best of which is this:

Learning, like religion, has in all ages its martyrs, its Galileis, its Giordano Brunos. Visiting in Nebraska a few years ago, I was told the following story: A brakeman from Boston was employed on the line of railroad running from Nebraska City to Beatrice. When it became his duty to call out the name of this last station, he pronounced it in the most approved Tuscan, "Bay-ah-tree-chay!"

The passengers, simple souls, were at a loss what to do. They rose from their seats and hesitated. Some sat down again, and so were carried past their destination. This sort of thing continued, the brakeman was complained of, and he lost his place.

Not Hiding Her Light.

Rosalie, kneeling beside her little bed, saying her prayers at evening, always murmured, after a devout little "amen," some soft word, whose meaning her aunt could not catch. One evening she questioned the child.

"Rosalie, what is it that you say every night after you have finished your prayer?"

"Aunt," said Rosalie solemnly, "I just say, 'Dear Lord, this is Rosalie Pittman praying now.' You see, so many little girls pray at just this same time, and I thought I'd best say which was me."

The Way of the World.

"So you went into the stock market yesterday and made several thousand dollars!" said the young man's uncle.

"Yes, sir."

"That shows how one may, with proper pluck and promptness; succeed if he will only take advantage of his opportunities."

"But I lost that and several thousand more today."

"Young man, how often have I told you that such transactions are merely gambling, and that you are bound to come to grief sooner or later if you dabble in them?"

The Forehanded Man.

"There is no feeling of satisfaction so solid," said Mr. Staybolt, "as that which arises from having a little something laid by. Life isn't full of lee shores by any means. As a rule it's pleasant sailing, but you may find yourself on a lee shore once in awhile, and though you may be able to work off all right without it, it's a great satisfaction to have an anchor that you can put overboard in case you need it and one that you know will hold."—New York Sun.

Both Failed.

"This makes the tenth morning, ma'am, that I have tried to collect this milk bill."

"I've tried more mornings than that, sir, to collect a little cream from your milk, and I have never had any better success than you're going to have this time. Don't stop on the cat when you go out, please."

A TERRIBLE TIME!

A Port Hope Lady Undergoes a trying experience, from which she is at last freed by the use of Milburn's Heart and Nerve Pills.

Mr. F. J. ARMSTRONG, one of Port Hope's best known citizens, speaks as follows:—"My wife has had a terrible time with her heart for the last fifteen months."

"The pains were intense, and she had a smothering feeling together with shortness of breath, weakness and general debility. Medicine seemed to do her no good, and we had about given up trying when she started to take Milburn's Heart and Nerve Pills. They have toned her up wonderfully."

"She is stronger to-day than she has been for months, thanks to Milburn's Heart and Nerve Pills. I am sure there can be no better remedy from their remarkable effects in Mrs. Armstrong's case."

Laxa-Liver Pills cure Constipation, Sick Headache and Dyspepsia.

Maud—I firmly believe that we should love our enemies.

Jack—In that case I declare war upon you at once.—Brooklyn Life.

How carefully your wife does watch your health.

Yes; she knows that if I get up a big bill she won't get a summer trip.

"There is something peculiar about that old ducky's family."

"What is it?"

"He has seven boys, and not one of them is named George Washington."

"G's book is one of the greatest successes of the year."

"You don't say so. What's its title?"

"How to Be Happy Though Married."

Novice—Does learning the bicycle require any particular application?"

Old Hand—No, not that I know of. Arnie is about as good as anything.—Richmond Dispatch.

Mrs. Leopard (in the jungle)—I believe we will yet be able to escape from those miserable hunters.

Mr. Leopard—I don't know dear; I think we are spotted.—Philadelphia Record.

A little 4 year-old miss was overheard talking to her favorite doll that had accidentally lost an arm, thereby exposing the sawdust. "Oh, you dear, good, obedient dolly; I know I told you to chew your food fine, but I had no idea you would chew it as fine as that."

"There's the smartest little woman that ever took hold of this servant girl problem," said the old gentleman, pointing with pride to his only daughter.

"How's she going at it?"

"Gettin' up a popular song to idealize dishwashing."

"Papa! little Johnny began."

"Now what do you want?" asked his suffering father, with emphasis on the "now."

"Will my hair fall off when its ripe like yours?"

When the flat ruler had ceased falling on Johnny his thirst for knowledge had disappeared.

Policeman: "Come down out of that young man."

Reporter: "But I'm a reporter, and want to get a description of the fire."

Policeman: "Get out wid you. You can't stay there. You kin find out all about the fire from the paper marnin'."

AN INTERESTING CASE

Mr. W. G. Phall, proprietor Rodaga Hotel, 36 Wellington Street East Toronto, says:—"While living in Chicago I was in a terrible shape with itching and bleeding piles. I tried several of the best physicians and was burnt and tortured in various ways by their treatments to no avail, besides spending a mint of money to no purpose. Since coming to Toronto I learned of Dr. Chase's Ointment, I used but one box and have not been troubled with piles in any shape or form since."

Rev. Dr. Potts received from Ald John Hailan, Toronto, a subscription of \$500 toward the Methodist 20th century fund.

BRIGHT'S DISEASE

is the deadliest and most painful malady to which mankind is subject. Dodd's Kidney Pills will cure any case of Bright's Disease. They have never failed in one single case. They are the only remedy that ever has cured it, and they are the only remedy that can. There are imitations of Dodd's Kidney Pills—pill box and name—but imitations are dangerous. The original and only genuine cure for Bright's Disease is

DODD'S KIDNEY PILLS

Dodd's Kidney Pills are fifty cents a box at all druggists.

FACTS WORTH CONSIDERING.

Paine's Celery Compound

Is Your Only Hope If You Would.

Banish Sickness and Disease.

At this time we simply give a few facts in connection with the use of Paine's Celery Compound that should prove interesting to all who are looking for new health and vigorous strength.

Paine's Celery Compound encourages and strengthens the kidneys, and enables them to cleanse the blood of waste and poisonous matters that are the direct cause of drowsiness, melancholia, depression of spirits, wasting sicknesses, blood diseases, headaches and that general "run down" condition that opens the door to organic diseases of the heart, kidneys and stomach.

Paine's Celery Compound makes the blood a bright red color, increases its volume in the arteries, and quickens its circulation, enabling a nerve-tired person to sleep eight or nine
