THE REVIEW Office.

Cramps and Colic

Always relieved promptly by Dr. Fowler's Ext. of Wild Strawberry.

When you are seized with an attack of Cramps or doubled up with Colic, you want a remedy you are sure will give you relief and give it quickly, too. You don't want an untried something that may help you. You want Dr. Fowler's Extract of Wild Strawberry, which every one knows will positively cure Cramps and Colic quickly. Just a dose or two and you have ease. But now a word of proof to back up these assertions, and we have it from Mr. John Hawke, Coldwater, Ont., who writes: "Dr. Fowler's Extract of Wild Strawberry is a wonderful cure for Diarrhoea, Cramps and pains in the stomach. I was a great sufferer until I gave it a trial, but now I have perfect comfort."

EXPERIMENTS WITH DAIRY COWS.

Prof. Brandt, of Germany, conducted three experiments with light and heavy dairy cows, each lasting four weeks, the second commencing seventy days after the close of the first, and the third a year after the beginning of the first. Thirty of the heaviest milkers in the herd were separated into lots of fifteen cows each according to live weight. The cows were kept under similar conditions as to feed and care during the trial, none being bred after the beginning of the experiment. The average weight of the heavy cows was 1,205 pounds, and of light cows 979 pounds. The leading conclusion from the experiments are: 1. The milk of the small cows is richer in fat than that of the larger ones. 2. Large cows eat a greater amount of feed than small cows; per thousand pounds live weight they eat less. 3. Small cows produce less milk than large cows, absolutely and relatively. 4. When in thin flesh small cows may produce more per thousand pounds large weight than large cows. 5. Large farrow cows are more persistent milkers; on the other hand small cows show a greater tendency to fatten on the same feed, with a decrease in the milk flow. 6. The loss in selling ten of the large cows amounted to five guilden per head on the average, after having been kept nearly a year, while the loss for ten small cows was twelve guilden per head.—Feeds and Feeding.

DESTROY THE CATERPILLARS.

For the past two or three years the tent caterpillar has made havoc of fruit trees, and ornamental trees as well, where it has been allowed to work its will. It is a sickening sight to see an orchard covered with the webs of these destroyers, which if left alone will strip the leaves off the trees and ruin the fruit crop for the year, and weaken, if not permanently injure the tree. A little labor and a few minutes of time will suffice to keep them in check in the average orchard if attended in the proper time. Where spraying is adopted, the usual preparations of that purpose will effectively destroy them, but where spraying is not done they may be easily destroyed, either with a gloved hand (or the bare hand, for that matter) or by the use of a coal oil torch or a swab tied to a pole and dipped in a solution of one of the prepared sheep dips or diluted carbolic acid. Where there's a will there's a way, and we trust that no reader will be found so careless and indifferent as to neglect the prompt and effectual discharge of this manifest duty to himself, his family, and his country. Look over the orchard the second time and finish any which may have escaped your notice or have enveloped later, and if any webs are seen on shade trees by the roadside or fences, dispatch them also. You will feel better and feel more happy and respectable for having done this duty.

THE BEAUTY THAT ATTRACTS MEN

Is not so much in the features as in a clear, healthy complexion, and a plump body filled with the vigor and vitality of perfect health. Pale, weak, languid women are fully restored to robust health by the use of Dr. A. W. Chase's Nerve Food, a condensed food which creates rich, pure blood and new nerve tissues. Crop reports of a most glowing character have been received from all parts of Manitoba and the territories. Grain is in healthy condition, maturing well, and promises a heavy crop. Harvesting in some sections will begin about August 15th, but not be general before the 20th. Barley harvest has commenced in a few localities. Cook's Penetrating Plasters.

BEAUTY WAS BOYCOTTED.

(Philadelphia North American.) A story is going the rounds of an American girl who has been a great success in society in Berlin. She is blonde, dashing and vivacious, and takes no pains to conceal her frank delight in the elaborate attentions of the Kaiser's officers. At a ball given by one of the crack regiments not long ago she was the centre of attraction and had to divide her dances in order to satisfy all requests. At the end of one turn, and just as she was making an exchange of partners, the long necklace which she had been twisting about one finger snapped and the beads rolled in every direction. At her exclamation of dismay a half-dozen uninformed figures sprang to collect the scattered beads, and their tormentor watched them dodging the dancers and endeavoring to pick up the trinkets with some degree of grace in high glee. As each collected lot was handed to her she insisted that there must be more still on the floor. After a while it began to dawn upon the cavaliers that the young lady was a trifling exacting. In the course of the evening they even decided that the necklace had been broken more by design than accident, and that they had been the victims of a joke, as grovelling on the floor and picking up beads was no easy matter in all the trappings of their tight and stiff uniforms. They finally decided that the fair American was hard-hearted and scheming, and as far as their particular regiment is concerned she has since been left severely alone.

FASHIONS FOR NEXT WINTER.

(Harper's Bazar.) It is a little early as yet to speak definitely of the styles for next winter, but there have been one or two gowns sent over in advance to show what is to be tried upon the public. One in black satin is a superb costume, but rather on the lines of one that was brought over some few years ago that did not make a success. It is of black satin, tight fitting at the back. The front has darts and is tight-fitting until directly in front, where it hangs straight from the shoulder to the hem, and then opens to show an under petticoat and tight-fitting waist. The petticoat and waist are of pink satin, completely covered with rows of white lace. Down the fronts of the black satin gown—the outside gown—there is an embroidery done by hand in shaded pink roses, the fronts being lined with pink satin. There is a collar quite high at the back, with the roses going around it, and the elbow sleeves are finished with a band of the roses and deep ruffles of white lace, to match that on the petticoat. There is nothing particularly new about the shape of the gown, the novelty being in the embroidery, which is most exquisitely done by hand. Hand embroidery on costumes was sent last winter. It has been used in Paris this summer, and may or may not be fashionable over here next year. It will never be generally worn, for it is most expensive when it is done with the care that is exhibited in the gown just described.

SOCIABLE.

Some of the sentimental considerations that may influence an elector are suggested in this anecdote from a new book, "Irish Life and Character." A political candidate, on paying a second visit to the house of a doubtful voter of the present class, was very pleased, but somewhat surprised on hearing from the elector that he would support him. "Glad to hear it," said the candidate, "I thought you were against me." "Sure, I wasn't first," rejoined the peasant. "When the other day ye called here, and stood by that pigsty, and talked for half an hour, ye didn't budge me an inch. "But after ye had gone away, sor, I got to thi-kin' how ye'd reached yer hand over the rail and scratched the pig's back till he laid down with the pleasure of it, made my mind thin that whin a man was so sociable as that wid a poor fellow crathure, I wasn't the boby to vote agin him."

QUICK AS THOUGHT.

The maddening toothache stops when Nerviline—that wonderful nerve pain cure—is applied to the tooth. Nerviline is the only positive, never-failing remedy for toothache and all nerve pains. Be advised and try it. The solitary eater is always tempted to take too large mouthfuls and swallow them too quickly and either eat too much or too little. Eating is only one part of feeding and without digestion is not only useless, but injurious. Those who eat in company have to devote a certain amount of time to talking and attend to each other's wants. This makes the period between the mouthfuls longer and gives more time for digestion. Then again, conversation at meal times usually takes a cheerful turn, and the tone of both body and mind is raised, the heart and nervous system act better, the flow of digestive juices is stimulated, and a larger amount of actual nourishment is obtained from a smaller quantity of food.

CHILDREN CRY FOR CASTORIA.

Advertisement for Pain-Killer. Text: 'ALWAYS KEEP ON HAND Pain-Killer THERE IS NO KIND OF PAIN OR AGUE, INTERNAL OR EXTERNAL, THAT PAIN-KILLER WILL NOT RELIEVE. LOOK OUT FOR IMITATIONS AND SUBSTITUTES. THE GENUINE BOTTLE BEARS THE NAME, PERRY DAVIS & SON.'

GRAHAM BREAD.

CORA GIBSON. First make a batter stiff Of water and wheat flour, Together with a cup of yeast, Take care it does not sour. Add to this when light Of svrup half a cup, A teaspoonful of salt, And beat the mixture up, A tablespoon of butter, And also one of lard, Are next mixed with your batter, Then beat it very hard. Now add a spoon of soda, Dissolved first you understand, Then mix so stiff with graham flour That it will almost stand. Now let it rise again, Be careful to keep warm, And when very nice and light The loaves then you may form. When light put in an oven hot And if you bake with care, Your bread will be most excellent, No matter who you are. Gavesville, Wis.

FUNERAL OF MR. W. VANWART.

FREDERICTON, Aug. 4.—The funeral of the late Wesley Vanwart took place at 4 o'clock yesterday afternoon. A prominent insurance man is authority for the statement that Mr. Vanwart had in force at the time of his death \$98,600 life insurance, of which \$60,000 is payable to Mrs. Vanwart. The Sun life has \$35,000 or \$40,000 of the total amount. The funeral was one of the largest seen in the city for years, and was a fitting testimony to the general esteem in which he was held. After an impressive service at the house by Rev. F. C. Hartley, of the F. B. church, and Rev. G. M. Campbell, of the Methodist church, the funeral procession was formed and escorted the remains to their last resting place, in Forest Hill cemetery. First came the clergymen, preceding the hearse, which was followed by the mourners, the barristers' society, the city council, representatives of the Tourist Association, the school trustees, the Boating and Bicycling Club and the general public. The floral tributes were very handsome. Besides those from private friends and relatives there were tokens from Hiram Lodge, F. & A. M., Boating and Bicycling Club, Fredericton Tourist Association, Merchants' Bank of Halifax, Victoria Lodge, I. O. O. F., city council, Royal Arcanum, and the board of school trustees. The pall bearers were Messrs. F. A. Edgecombe, Matthew Tennant, James S. Neill, L. C. McNutt, F. I. Morrison and George Y. Dibblee. The Barristers' Society, at a meeting this morning, and the Boating and Bicycling Club, at a meeting last evening, passed resolutions in connection with the death of Mr. Vanwart.

U. S. PATENT OFFICE STATISTICS.

From the recent report of the U. S. Commissioner of Patents, it appears there were received in the last fiscal year 35,352 applications for mechanical patents, 2,292 applications for designs, 91 applications for reissues, 1,610 Caveats, 1,861 applications for Trade Marks, 612 applications for labels, and 112 applications for prints. There were 23,550 patents granted, including reissues and designs; 1,406 trade marks, 372 labels, and 76 prints were registered. The number of patents that expired was 16,670. The number of allowed applications which were by operation of law forfeited for non-payment of the final fees was 4,021. The total receipts of the Office were \$1,209,554.83, the total expenditures were \$1,148,668.48, and the surplus of receipts over expenditures, being the amount turned into the Treasury, was \$60,886.35.

CURRENT WORK.

On the 27th of June, 1899, every Examiner had his new work within one month of date of filing and his amended work within fifteen days of date. This is the first time since December, 1899, when the present form of weekly reports was adapted, that such a report has or could have been made. (This information is received through Messrs. Marien & Marion, Patent Solicitors, Montreal.)

THE FEMININE OBSERVER.

(Philadelphia Times.) What women say, men do. Much doing is not so important as well doing. It is not what we earn, but what we save that makes us rich. The theory of charity is always right, the practice is often wrong. He who can suppress a moment's anger may prevent a day of sorrow. Troubles spring from idleness and grievous toils from needless cares. A woman never minds a made-over dress so long as it is made over silk. The man whose losses would make desperate, good luck would make equally so. The meanest type of man is he who takes advantage of the widows and orphans. We all do so much better in life, as on wheels, if there is someone to set the pace for us. The man who can get drunk and not make a fool of himself is a hero in his particular line. I have not met many heroes of this sort. Assert your own freedom if you will, but assert it modestly and quietly, respecting others as you would wish to be respected yourself. There are no real virtues which are inconsistent with each other, and it is only our own deficiencies in some special direction that could make it appear so. He who has learned to think generously of the man who differs from him in creed and politics has only to listen to hear the foothold of angels, who recognize the fellowship of kindred hearts. The greatest and strongest natures are ever the calmest. A fiery restlessness is the symbol of frailties not yet outgrown. The repose of power is its richest phase and its clearest testimony.

ST. JOHN EXHIBITION NOTES.

The arrangements with the Intercolonial Railway for the carriage of exhibits are that the freight charges on exhibits, not sent by express, must be prepaid to St. John, and soon after their arrival will be shunted to the exhibition grounds. All exhibits will be billed back free to starting point if accompanied by an Exhibition certificate and in the hands of the original owners. A special concession is made to shippers of exhibits from points within the Province of New Brunswick more than 100 miles from St. John by which it is arranged that when the exhibits are returned unsold to the starting point, the Intercolonial Railway will refund to such shippers the freight charges paid in excess of the 100 miles rate. This practically means that no New Brunswicks exhibits at Intercolonial points are considered to be more than 100 miles from St. John. The Branch lines connecting with the I. C. R. will return exhibits free, if unsold, as will the various steamship lines running to St. John.

HIGH LIGHTS.

When we say that silence is golden, we mean other people's silence. More men would marry if they knew that lots of pretty girls' hats cost only sixty-five cents. There is too much patient waiting done in this world. Walk up and take what you want. There is no world for women; in town she's afraid of mice and in the country she's afraid of snakes. Wise mothers keep their children obedient by never asking them to do anything they don't want to do. When a woman loves a man she puts him in a shrine which is so much too big for him that he tumbles out. By putting off till tomorrow what we don't want to do today we get a chance to put it off until the next day, too. It is easy to enjoy hot weather if you only remember that every scorching day brings you nearer to the blizzards of next winter.—Chicago Record.

ALBERT MENIER, THE FRENCH CHOCOLATE MANUFACTURER, WHO DIED IN PARIS ON SUNDAY WAS A BROTHER OF HENRI MENIER, THE OWNER OF ANTI-COISI.

Life and Health Fully Protected in August.

Paine's Celery Compound Makes Sick People well.

If you are still enduring the tortures and agonies of disease in this almost unbearably hot weather, your position is one of extreme danger. The enervating effects of the heated term, that test even the strength and endurance of the robust and healthy, must bring you to the very brink of the grave, unless you take the care and precaution that thousands are now exercising. At this time your safety and life depend upon the use of Paine's Celery Compound, a medicine that is giving new life and vigor to the weakly, nervous and broken down, and that is rescuing from death rheumatic sufferers and those afflicted with blood diseases and liver and kidney complaints. The testimonials sent in weekly by happy and grateful people saved from suffering and disease are the strongest proofs of the marvellous health-giving virtues of the great medicine. A trial of one bottle in this season of danger will convince the sick that there is life and health in each drop of Paine's Celery Compound.

QUEEN'S COUNSEL.

The following notice appears in this week's issue of the Royal Gazette: His Honor the Lieutenant-Governor has been pleased to appoint the following persons, namely: Samuel Thompson, Stephen B. Appleby, George G. Gilbert, John Kerr, Robert Hutchinson, Mont McDonald, George F. Gregory, Jas. G. Stevens, jr., Silas Alward, John Willett, The Hon A G Blair, Mel McMonagle, I. Allen Jack, William B. Wallace, Daniel Jordan, James A. Belyea, Ang H Hanington, T. Carleton Allen, Alfred A Stockton, Jos. Howe Dickson, James D Phinney, Hugh H McLean, Hon L. J. Tweedie, Miles B Dixon, Hon Wm Pugsley, William B Chaddler, Allan O Earle, Harvey Atkinson, Wesley Vanwart, W Watson Allen, Richard F Quigley, Amos A Wilson, Hon H R Emmerson, Charles H Masters, Hon A S White, Richard A Lawlor, John McAllister, Edwin H McAlpine, Hon A D Richard, Narcisse A Landry, Henry A Powell, Arthur I Trueman, Geo V McInerney, Allan A Davidson, Lemuel A Currey, Daniel Mullin, J Douglas Hazen, R S LeBert Tweedie, Lewis J Almon, Jeremiah H Barry, Charles J Sayre, George W Allen, G Sydney Smith, Warren C Winslow, Charles E. Knapp, John L Carleton, Lewis A Mills, Mariner G Teed, A Byron Winslow, Leonard Allison, E C Fairweather, M N Cockburn, Thomas Mileage, William H Chapman

to be of Her Majesty's Counsel Learned in the Law to hold office during pleasure, and to confer upon the persons so appointed, from the date of their appointment, rank and precedence in all courts in the Province next after the following persons, that is to say,—

First: Our attorney general for the said province of New Brunswick.

Second: Our solicitor general for the said province of New Brunswick.

Third: Those members of the Bar of the province of New Brunswick who have hitherto been appointed by us as Our Counsel Learned in the Law, under the great seal of our province of New Brunswick.

Fourth: Those members of such Bar, if any, who may lawfully be entitled to rank and precedence over.

L. J. TWEEDIE, Provincial Secretary's Office, Fredericton, 28th July, 1899.

BRIEF NOTES OF INTEREST.

There are 240 turpentine distilleries in Florida. Chicago is about to spend \$10,000,000 on street improvement. Maize, next to rice, is one of the most important products of the Philippines. The lifeboats round the British coast during the last year rescued 682 people. American trade with Australia in leather goods had quadrupled in five years. Between the ticks of a watch a ray of light could move eight times round the earth. Whistling is said to be regarded as a violation of the Divine law by Icelanders. British women are said to average two inches more in height than Americans. The Archbishop of Canterbury is paid \$10,000 a year more than President McKinley's salary. For a white man to marry a colored woman is contrary to the law of every southern state. J. P. Bryant, of Bardwell, Ky., is said to be the owner of the largest strawberry patch in the world. It covers 1,700 acres. According to the Washington Times, the Rev Sam Jones' income for several years has been between \$25,000 and \$25,000. In 1898 lightning caused a loss of 267 lives in the United States and damaged or destroyed property to the value of \$1,441,880.
