and other forms, for sale at

THE REVIEW Office.

INTENSIVE FARMING.

As soon as we learn in this country that fewer acres better cultivated are better than many acres carelessly cultivated, the greater will be the profits of farming. The greater extent and original cheapness of our farming lands have been a detriment to us agriculturally. Thousands got their farms at \$1.25 an acre, and even less, added to the original claim as rapidly as possible, and engaged in farming "all out doors." Almost necessarily such farming is loosely done. When there are but few acres under cultivation, they must be made to produce what we need, and they can be with less expenditure of time and effort. The English farmer compels his few acres to yield as much as our many acres do because his system is more perfect. The farms of the future will be smaller. The time will come—after we are gone—when herds will not rove over great fields, but will be soiled; when the wheat and corn crops will be made to more than double the present average yield, and when farming will be less irksome because its operation will be more contracted in every respect. If these things will be profitable and desirable then, why should they not be profitable and desirable now.

WHAT SUNFLOWERS ARE GOOD FOR.

Somebody who claims to speak from practical knowledge has made out the following list of valuable products that can be extracted from the sunflower. 1. Oil from the seed. 2. The seed cake. This is the residue left from the seed after the oil is extracted. It could be used as a food for cattle; also the heads and seed, if chopped up together, can be used as ensilage. 3. The seed alone is an excellent food for poultry. 4. A yellow dye is made from the blossom. 5. The flower produces very fine honey and wax. In England one or two farmers made nearly \$200 a year from honey alone. 6. The fiber from the stalks. By treating it like flax, fine, silky fiber can be obtained in large quantities. The Chinese use it to a great extent in their silk fabrics. 7. Potash from the stalks. 8. The stalks are used as fuel.

KEEPING BOYS ON THE FARM.

The question has often been asked how to get boys interested in agriculture and keep them on the farm. One of the surest plans would be to give each boy, as soon as he reaches the age of ten years, a piece of ground for his own; a small farm, so situated as to be added to as the boy gets older, and let him employ his leisure hours working upon it according to his own ideas. There he might set fruit or nut trees, clear fertile spots for vegetables, dig and hoe, cut and prune; and thus gain health and strength of limb, a knowledge and taste for work, and start the nucleus of a pleasant home to shelter him in after years. Many a boy might thus be lured into usefulness and a love of his native soil, who otherwise would grow up to hate farming and be led to wander away from kindred and native country.—Colman's Rural World.

Now that the flies are again causing so much annoyance to cattle, it may be well to state again the means adopted at the Agriculture College at Guelph for the purpose of preventing annoyance from this cause. The practice there is to mix four tablespoonfuls of crude carbolic acid with one gallon of seal oil and apply the mixture to the cows with a cloth. One gallon will serve thirty cows, and the cost is in the neighborhood of 50c. The material can be obtained anywhere, and the party using it can mix it for himself.

The difference between a long and short yarn is very well illustrated by the difference of one's feelings in holding a skein for one's grandmother and one for one's sweetheart.

Substance Shadow

DODD'S KIDNEY PILLS

CURE FOR ALL KIDNEY

RHEUMATISM
BRIGHT'S DISEASE
DIABETES

If you want a horse worth \$100, you'd be silly to pay \$100 for his photo only. If you need DODD'S KIDNEY PILLS you'd be silly to buy an imitation.

DODD'S ARE SOLD IN BOXES LIKE THIS. TAKE ONLY

D-O-D-D'S

MEN OF MARK.

John Y. Stone of Glenwood, Ia., has an apple orchard of 800 acres bearing 133,000 trees.

Sir Henry Hawkins, the great English criminal judge, has taken the title of Lord Brampton.

Dr. Nansen is building himself a handsome house, and it is believed that he has decided not to go on any more expeditions. Joseph H. Choate says he owes his success as a lawyer to the fact that he never neglected a case, no matter how unimportant it was.

Rev. Newell Dwight Hillis, who at 39 is the successor of Lyman Abbott in Beecher's pulpit, was at one time a church janitor at the salary of \$1.50 a week.

Paderevski daily goes through a regular set of gymnastics for the purpose of strengthening his arms and hands. He employs for this an apparatus which he designed himself and of which he carefully guards the secret.

James Bryant, a sea captain who died in New York a few days ago, was the man who commanded the vessel in which "Boss" Tweed escaped to Cuba from New York. He was handsomely rewarded for the risk he took and kept the secret for many years.

Dr. Christomanos, who taught the late Empress Elizabeth of Austria Greek and lately published a book purporting to be her diary and sayings, has resigned his position as lecturer on modern Greek at the Vienna university, it is believed, through pressure from the court.

Thomas J. Lee of Missouri, whom President McKinley has nominated to be professor of mathematics in the navy, first came into prominence through his discoveries regarding celestial heat, which have practically changed the whole nebular hypothesis of Herschel and Laplace.

Since his arrival in Washington Ali Ferrough Bey, the Turkish minister, has adopted as his workday costume a bicycle suit of dark gray cloth. This he wears almost constantly. He is young, good looking and athletic, and his favorite attire sets off his figure to great advantage.

General Sylvanus C. Boynton, a well known lawyer of New York city, who is over 70 years old, has just finished a term of six months' imprisonment for refusing to pay a \$10,000 judgment in favor of a relative which he considered unjust. By his staying in jail the judgment was vacated.

Magistrate Wentworth of New York city recently declared from the bench that suicide is not a crime. The statement was made when he discharged a 16-year-old boy who had attempted self destruction. "When a man is through with life," said the magistrate, "let him shuffle it off. That's what I intend to do."

A Zurich publisher of revolutionary German books, J. Schabdelitz, is dead. He brought out Count Armin's famous pamphlet, "Pro Nihil," and likewise the works of Herwegh, Gogge, Scherr, Voss, Bahr, Holz, Schlaf and Pfau. He was noted for the rudeness of the postal cards he wrote in rejecting manuscripts.

The foreigners to whom congress will this year extend the privilege of admission to the West Point Military academy are Luis Yglesias of Costa Rica and Andres Ponte-Ruogo of Venezuela. Ricardo Yglesias, brother of Luis, and Albert Valencia Montoya of Columbia, will be admitted to the naval academy at Annapolis.

ORCHARD AND GARDEN.

Black knot is the worst enemy of plum trees.

Stone fruits usually require very little pruning.

A low headed tree gives less purchase to the wind.

An open headed tree grows the fairest and finest fruit.

By staking newly set trees a straighter growth is secured.

The quince is greatly benefited by heavy manuring, especially if applied early.

It is never advisable to set young peach trees in the same spot where the old ones have died.

Salt will kill weeds to a certain extent, but it will kill other plants. Do not use too much of it.

When setting out trees, never put manure of any kind in the hole made to receive the roots of the tree.

Peach trees should never stand in grass unless the growth is naturally rich and they are heavily manured.

As soon as the condition of the ground will admit, fill all vacancies in the raspberry and blackberry rows.

All fruit trees should be trained low. The lower limbs should not be higher than is necessary to cultivate under them.

HOOSIER SUPERSTITIONS.

If the cat washes her face, it will soon rain.

If a hen crows, bad luck is coming. Sell the hen to a peddler.

If you find a pipe of tobacco, don't bring it home, or some one will die.

If you sweep dirt out of the house, you sweep out your luck. Burn the dirt.

Don't turn back when once started on a journey, or bad luck will follow you.

If you give away a cat or one goes away, don't let it come back, or a cow or horse will die.

If you turn a chair around on one leg or if you turn a loaf upside down, there will be a quarrel in the house.

If you don't put a horseshoe—one that has been worn by a 2-year-old filly—in the churn, the witches will take the butter.

Don't put your left stocking or shoe on first when dressing in the morning, or you will put your foot in it some way during the day.

If a chair falls as you rise from it, you will not marry within a year. If the housewife sweeps under your feet, you will not marry within seven years.—Indianapolis News.

HOUSEHOLD HINTS.

Eggs may be preserved for a month by boiling them one minute or steeping them for a time in sweet oil.

A doctor has said, "Mold and decaying vegetables in the cellar weave shrouds for the upper rooms." That is a good thing to remember and act upon as spring advances.

Paint and putty can be taken off glass by wetting the glass several times with a strong solution of soda. Wet the glass often with it till the spots soften and can be washed off and then polish with alcohol.

A bottle of gilding, cost 10 cents, is a handy thing to have in the house. The chains of the hanging lamp, the slightly defaced picture frames or any article that is gilded may be refurbished at slight cost and trouble.

HIS NEW BROTHER.

Yes, I've got a little brother, Never asked for him from mother,

But I s'pose they went and bought him; For last week the doctor brought him;

Ain't it queer?

When I heard the news from Molly,

Way, I thought at first 'twas jolly;

'Cause you see

I just 'magine I could get him,

And our dear mamma would let him.

Play with me.

But when once I had looked at him

I cried out, 'Oh dear! Is that him?

Just that mite?

They said, 'Yes, and you may kiss him!'

Well, I'm sure I'd never miss him,

He's a fright!

He's so small, it's just amazing,

And you'd think that he was blazing,

He's so red;

And his nose is like a berry,

And he's bald as Uncle Jerry

On his head.

He's no kind of good whatever,

And he cries as if he'd never,

Never stop;

Won't sit up—you can't arrange him,

Oh, why doesn't father change him

At the shop?

Now we've got to dress and feed him,

And we really don't need him,

Little frog!

And I cannot think why father

Should have brought him when I'd rather

Have a dog!

A FREE TRANSLATION.

A certain family built a seaside cottage and painted Sans Souci on the gate. Soon afterward a tall, lank young fellow stopped in passing and scrutinized the name carefully.

The people in the house wondered what could be the trouble, but when he repeated the examination the next day and the next they wondered still more. Finally he went by when one of the children was working in the garden.

"Hello," said the youth.

"Hello!"

"Nice place you've got here!"

"Yes, we think so."

"What do you call it?"

"Sans Souci."

"Well, what does that mean?"

"Oh, 'without care.'"

"Well," said the youth after some deliberation, "I'm blest if I can see how you make that out. I've studied French some myself, with the grammar and the dictionary, and I can't translate it to make any sense. Now, there's sans—that's without; sou—that's a part of a cent; ci—that means here."

"Oh, well, your translation isn't so far off!" said the son of the house. "Not a cent here!"

Stiff Limbs and Joints.

Miss A. Edwards, Fordwich, Ont., writes: "Last fall my little sister eight years old, was laid up with stiff limbs and joints, even her fingers and toes were stiff and she suffered greatly. After using Hagyard's Yellow Oil for a time she got perfectly well and is going to school again."

SHE RAN FROM THE STORM.

Here is a story of two rival mothers with two rival babies. They sat opposite each other in a trolley car the other day. One baby was a sweet little tot, and the other was exceedingly plain looking. The pretty little one received much attention, as pretty children invariably do, while the plain little fellow was so totally ignored that his mother grew fairly pale with anger and envy. A lady sitting by felt so sorry for her that she paid the little one some attention, which so encouraged the mother that she became quite another being, and broke out as follows:

"Shure, beauty isn't everything in a child, ma'am. My Patsy ain't no picture child, but if he grows up good and honest and hard working that's better than good looks, which is the ruin of many."

Then she glanced over at the opposition baby and added meaningly: "There's been plenty of robbers and murderers that was good lookin'!"

The lady with the kindly intentions saw the gathering storm in the other mother's eyes and hastily left the car.

Cramps and Colic

Always relieved promptly by

Dr. Fowler's Ext. of Wild Strawberry.

When you are seized with an attack of Cramps or doubled up with Colic, you want a remedy you are sure will give you relief and give it quickly, too.

You don't want an untried something that may help you. You want Dr. Fowler's Extract of Wild Strawberry, which every one knows will positively cure Cramps and Colic quickly. Just a dose or two and you have ease.

But now a word of proof to back up these assertions, and we have it from Mr. John Hawke, Coldwater, Ont., who writes:

"Dr. Fowler's Extract of Wild Strawberry is a wonderful cure for Diarrhoea, Cramps

and pains in the stomach. I was a great sufferer until I gave it a trial, but now I have perfect comfort."

Dr. Fowler's Ext. of Wild Strawberry

ARE YOU BILIOUS?

A sluggish liver fails to filter the bile from the blood, and when the poisonous matter goes through the body in the circulation, the whole system is tainted and diseased. This is called biliousness and can be completely cured by Dr. A. W. Chase's Kidney-Liver Pills, which act directly on the liver, making it healthy and active. One pill a dose, 25 cents a box. The cheapest medicine in the world.
