SPRAINED BACK!

Sprains, Strains and Injuries of the Back often cause Kidney Trouble.

DOAN'S KIDNEY PILLS THE CURE.

Here is the proof:—

Mrs. S. Horning, Glasgow Street, Guelph, Ont., says: "Doan's Kidney Pills are grand. I have not been ill since taking them, which was over a year ago last winter, and can give them my warmest praise; for they restored me to health after 25 years of suffering. Twenty-five years ago I sprained my back severely, and ever since my kidneys have been in a very bad state. The doctors told me that my left kidney especially was in a very bad condition. A terrible burning pain was always present, and I suffered terribly from lumbago and pain in the small of my back, together with other painful and distressing symptoms, common in kidney complaints. I could not sleep, and suffered much from salt rheum.

"When I first commenced taking Doan's Kidney Pills I had little or no faith in them, but I thought I would try them; and it proved the best experiment I ever made. I had only taken two boxes when the pain left my back entirely. Three boxes more, or five in all, made a complete cure.

"After 25 years' suffering from kidney disease I am now healthy and strong again, and will be pleased to substantiate what I have said, should anyone wish to enquire."

Laxa-Liver Pills are the most perfect remedy known for the cure of Constipation, Dyspepsia, Biliousness and Sick Headache. They work without a gripe or pain, do not sicken or weaken or leave any bad after effects.

DEAF AND DUMB SCHOOL.

ANNUAL CLOSING EXERCISES ATTRACT AND INTEREST LARGE GATHERING OF SPECTATORS.

Published by Request. FREDERICTON, June 20.—The annual closing exercises of the Deaf and Dumb Institution took place from 3 o'clock to 5.30 o'clock yesterday afternoon and were attended by a large, representative and interested audience. Dr. Inch, superintendent of education, presided over the exercises and among the gentlemen present were observed Dean Partridge, Canon Roberts, J. D. Phinney, J. E. Risteen, J. W. Spurden, and a large number of leading and influential ladies.

The past year has been a prosperous one in the history of the school, and many visitors who were present at last year's closing exercises spoke cheerfully of the improvement noted in the pupils. There have been forty-three pupils in attendance the past year, and one death has occurred. The pupils all show the beneficial results of their training and a bright intelligent and happy throng faced the visitors at yesterday's exercises.

PRINCIPAL WOODBRIDGE'S ADDRESS.

After the opening exercises Prof. Woodbridge delivered his annual address, as follows:—

I have much pleasure in extending a hearty welcome to you all to this the 17th annual exhibit of our Institution. I trust you will find an hour spent with the deaf not so unpleasant or unprofitable as at first sight one might be led to expect.

I propose in the short time at my disposal to illustrate as far as possible our methods of teaching and subjects of study. The true results of the year's work are shown in the written exams which were held for several days during the past week and the prizes are given for the best work in each class.

The power of speech distinguishes man and places him on a higher plane from the rest of God's creatures. To see, hear and speak is a common but invaluable blessing for which we cannot be sufficiently thankful. All the business relations of life are carried on by its means. The pleasure of conversation, music, lectures, sermons are derived from it, our intellect is fed and strengthened by it and our whole happiness depends upon it.

The peculiarity of our pupils is that they are shut out from and debarred the use and exercise of this great privilege which we so freely enjoy.

This deprivation is not limited to any race or country. Deafness is found everywhere. The Caucasian, Mongolian, Ethiopian and all other races of mankind are alike subject to it. It is estimated that there are upwards of a million deaf mutes in the world to-day, some countries giving one in every 1,500 of the population. Why have we so many deaf mutes in N. B.? The question naturally arises why we have so high a percentage of the deaf in this Province. The question opens up an interesting field of enquiry, and the solution of which is rather difficult of determination.

It is known that climate is responsible for much of the deafness existing in certain countries. Norway, Switzerland, the higher regions of the Alps, the Pyrenees and other mountainous districts have twice the population of deaf mutes in the plains. The flat portions of England have fewer deaf mutes than Scotland or the hilly portions of England. It is more difficult to determine why New Brunswick, Nova Scotia, and the islands of the Atlantic seaboard should have so large a proportion as they are not particularly mountainous. It may be due to excessive cold and humidity, to water used for

drinking purposes passing over Metallic veins, but I am satisfied in my own mind that it is largely due to marriages between relations, the marriages between cousins, as this is one of the most prolific sources of deafness known.

Some of the people of New Brunswick stay in their native village all their lives. their children follow on the occupations of their fathers, neighbors marrying and intermarrying one with another becomes a source of degeneracy, and deafness with other defects becomes quite common among them. I remember one or two small settlements where the surnames of the people continually recur and could be counted on one hand.

WHAT IS BEING DONE FOR THE DEAF IN THE WORLD TO-DAY.

The deaf are with us, however. Let us glance for a moment at what is being done for this class by the different continents to-day.

One hundred and fifty years ago the answer would have been nothing, ninety years ago the same answer would have been received from this continent. At the present time

	Schools	Teachers	Pupils
Africa has	5	14	72
Asia has	5	11	128
Australia has	4	24	160
Europe has	357	2076	27852
North America (including Canada)	100	1117	10369
South America has	3	13	74
Total	474	3855	32725
Canada alone has	114	114	773

Allowing a fair estimate for schools not reported there would be an approximate total of 520 scholars, 4,000 teachers, and upwards of 33,000 pupils.

This great result vividly illustrates the extent of effort in this field of labor, the importance and magnitude of the work, and plainly shows the desire to benefit this class of our fellow creatures in spreading to all quarters of the habitable globe. When we consider, however, that there are 200,000 deaf mutes in India alone, and only one school in Bombay with 25 pupils, and one at Calcutta with 23 pupils, I think you will agree with me that the field is large and the harvest ready and only waiting for the laborer.

The education of the deaf involves responsibilities of no slight character. Difficulties present themselves at every step of their progress, and I to attain success among them considerable tact, patience and untiring perseverance are necessary. When it is remembered that a thorough mastery of the English language is rare amongst those who have been endowed with all these faculties who have been practicing and using that language all their lives, these difficulties will become more apparent. To be able to express one's thoughts in clear, forcible and grammatical language as a gift which few possess. Among deaf mutes this knowledge is extremely rare. Faultless English cannot be expected from those who have never heard nor spoken the language. A lengthened course of training does much however, to remedy this defect, and while we cannot attain perfection we can do much to make their lives happier.

The exercises consisted of an examination of the pupils in language, number, geography, articulation, and they exhibited an aptness in learning that was surprising to many, and that reflects the greatest credit upon Prof. Woodbridge, his estimable wife and their corps of assistants.

PRIZE WINNERS.

The prize winners for the year were announced as follows:—

FIRST CLASS.

1. Hattie May Northrup, Apohaqui, King's Co.
2. Beatrice Emma McLean, Chipman, Queen's Co.

SECOND CLASS.

1. Nellie H. Dixon, Hampton, King's Co.
2. Edward B. Allen, Cape Tormentine, Westmorland Co.

THIRD CLASS.

1. Achille St. Ouge, Edmundston, Madawaska.
2. Melbourne Bleakney, Gibson, York Co.

FOURTH CLASS.

1. Russel Dobson, Cape Spear, Westmorland Co.
2. Viva Wasson, Newcastle Creek, Queen's Co.

FIFTH CLASS.

1. William Olsen Trenholm, Port Elgin, Westmorland Co.
2. Helen Robinson, Siftonville, Kings Co.

ARTICULATION AND LIP READING.

FIRST CLASS.

- Hattie May Northrup, Apohaqui, Kings.

SECOND CLASS.

- Evelyn Mary Wass, Keswick, York.

THIRD CLASS.

- David Marsh, Bass River, Kent Co.

FOURTH CLASS.

- Purdy Clinton T. Rogers, Indian Mountain, Westmorland.

SPECIAL PRIZES.

Several special prizes, donated by Mr. J. C. Risteen, were awarded as follows: Freehand and Water Color Drawing—Evelyn Mary Wass, Keswick, York. Needlework and Painting—Della Maud Green, St. John.

GOOD CONDUCT.

1. Irene Mary Trenholm, Port Elgin.
2. Monty Trenholm, Port Elgin.

MAP DRAWING.

Howard Breen, Moss Glen, Kings Co.

The presentations of the prizes were made by Canon Roberts, Mr. Spurden, Mrs. Kingdom and Miss Jewett. The pupils were addressed by Dr. Inch.

VALEDICTORIAN'S ADDRESS.

Miss Hattie May Northrop was valedictorian and read the following address, prepared by herself:—

Once again we have come to the close of another year. This year has been a very successful one with us, both in our studies and regarding our health. But we regret the loss of one of our class mates. He passed away during the winter, after a very short illness. He is in a better land and we ought to be thankful that he is relieved of all his sufferings. Although we miss him yet we all hope to meet him again when we are called to meet our Maker. We have worked diligently, and now look forward to our holidays and our well earned rest with much pleasure. We have enjoyed this year at school exceedingly, for we have had very many happy times through the kindness of Prof. and Mrs. Woodbridge.

I am very thankful for the knowledge I have gained here, and I think the deaf of this province should rejoice in having a school where they can be educated. It makes us happy to see so many kind faces here this afternoon, and I trust you all have enjoyed your visit to the deaf. And now farewell, professor, teachers, classmates and friends.

At the conclusion of the exercises the visitors spent some time in examining and admiring the specimens of drawing and painting exhibited in the school room, and many of the ladies were particularly interested in the art needle and fancy work shown in a room set apart for that purpose. Miss Corcoran devotes one afternoon each week to instructing the young ladies of the school in fancy work, and the specimens exhibited were highly creditable to the pupils and to their instructors.

The pupils will be leaving for their homes on July first and the school will re-open on first of September.

A JURY OF WOMEN.

Who have tested the merits of Dr. A. W. Chase's Kidney-Liver Pills return the verdict that for backache and kidney disorders there is no preparation in any way equal to this great discovery of Dr. A. W. Chase, America's greatest physician. This great kidney cure is sold by all dealers at 25 cents a box, and has proved most effectual as a remedy for the many ills to which women are subject.

PATENT REPORTS.

Below will be found a complete list of patents recently granted to Canadian Inventor, through the agency of Messrs. Marion & Marion, Patent Attorneys, Montreal, and Washington, D. C.

CANADA.

- 63,176—Victor Berford, Tara, Ont.—Desks & Seats.
- 63,196—Cliff, Cliff & Wardlaw, Dundas, Ont. Automatic Water Supply device for acetylene gas generator.
- 63,281—W. R. Caldwell, Amherstburg, Ont. Rag Sewing Needles.
- 63,239—Mrs. Annie S. Miles, Oromocto, N. B. Fly Escape.
- 53,277—Isaac Ochse, Hespeler, Ont. Acetylene Generators.

UNITED STATES.

- 625,867—Paul Lair, Motbiniero, P. Q. Engine.
- 625,942—Paul R. Trethewey, Muskoka Falls, Ont. Boat propelling mechanism.
- 626,477—Odilin Archambault, St. Hyacinthe, P. Q. Acetylene Gas Generators.
- 626,485—David Irene Bruneau, Kingsley Falls, P. Q. Attachments for stoves.
- 626,710—Charles Magnuson, St. John, N. B. Envelopes.

If you want to be healthy during the warm weather see that your bowels move regularly every day. If they don't take Laxa-Liver Pills the natural laxative, that never gripes, purge or sicken.

Smallpox is spreading in South Boston. Several new cases have been reported.
