MANHOOD.

He stands the test where souls are tried, And truest honor find, Who conquers, manfully, the pride That rules in feeble minds; Who sees not rest in life's career Nor yet beyond the grave; Whose heaven is duty's noblest sphere— Nor that which idlers crave.

He covets not the landlord's place, Nor vainly strives to span The Master's mind, but asks for grace To do the best he can. His peace nor torpor of the soul, But harmony within— Renouncing self to reach the goal And triumph over sin.

Once on the plough his hand he lays, His eye ne'er backward turns; Fortune he seeks in virtue's ways, Ill bought success he spurns, Looking his fellow in the face He sees God's image there; What'er may help to lift the race His hand is quick to share.

Meekly he takes life's daily tasks As part of heaven's great plan; This good—sought else denied—he asks To be a manly man. Angels attend on such an one, And stars their courses move To light his pathway to the throne And garnish it with love.

IN THE LEGISLATURE.

OPENED TO DAY WITH MUCH DISPLAY—LARGE CROWD IN ATTENDANCE.

FREDERICTON, Feb. 15.—The second session of the present legislature was opened to-day by His Honor Governor McClellan. The usual ceremonies attended the opening, which were witnessed by a large number of spectators which filled the galleries and all the available space on the floor of the House. There have been but two changes in the representation in the House during the past year. The resignation of Charles L. Smith of Carleton county resulted in the election of Mr. J. K. Fleming a supporter of the opposition. Mr. Venoit of Gloucester also resigned and in his stead Mr. John Young was elected as a supporter of the government.

A guard of honor received the governor and his staff as he passed into the legislative building a salute was fired from two big guns. Arriving at the chamber of the House of Assembly the governor was met by Hon. G. F. Hill, speaker, who escorted his honor to the throne from which the following speech was made.

Mr. Speaker and Gentlemen of the Legislative Assembly:— In welcoming you to the discharge of your legislative duties I am pleased to be able to congratulate you upon this year of progress and advancement which we have enjoyed since you last met. The satisfactory results which have attended the labors of our people engaged in all branches of industry, and the expansion of trade, unprecedented in the history of our country, afford ground for profound thankfulness and give confidence that the causes which have contributed to this period of prosperity are solidly based. The unhappy circumstance of the conflict in which our Empire is engaged in South Africa, while deeply deplored by all, has demonstrated in a manner most marked and significant the essential unity of the Empire and the fervent loyalty of the entire citizenship of Canada. In the eagerness displayed by our young men volunteering for active service and in the disappointment of those compelled to remain at home can be read the strongest and most complete proofs of the ever-growing and deepening attachment of Canada to the Motherland and the awakening of our people to the fullest and highest appreciation of the duties of enlarged patriotism and of their unselfish

GREAT CUT IN PRICES!

A complete clearing out of the balance of our winter goods.

As we do not believe in carrying over goods from one year to another we have decided to clear out what winter goods we have left at prices that have never been equalled and cannot be beaten. We will endeavor to give you some idea of the immense bargains we are offering by quoting a few prices.

MEN'S HEAVY ULSTERS.			
Regular Price, \$5.75		Now Selling for \$4.50	
" " 6.75		" " 4.90	
" " 8.00		" " 5.75

Also a good line of knitted and flannel shirts ranging from 50c. upwards; also Men's Caps, Gloves, etc., etc. You can see from the above that we have made quite a reduction in prices, but you ought to see the goods to realize what bargains we are giving.

A. & R. LOGGIE.

devotion thereto. While the Provincial Legislatures are excluded from any jurisdiction or authority over the marshalling and management of our soldiery, yet the presence amongst us of those who are bearing the burden of anxiety incident to the presence of loved relatives in the face of the enemy makes it incumbent upon us to see that such burden is not aggravated by the financial loss occasioned them by the absence of our provincial volunteers, and to that end you will be asked to concur in a grant in aid of the Provincial fund which the liberality and loyalty of our citizens have already raised, and your assent will also be asked to a measure legalizing the grants made by the municipal bodies towards that laudable and patriotic object.

The subject of Technical Education, involving instruction in agriculture, horticulture, mining and the mechanical arts, has during the recess engaged the attention of my Government. The desirability of a school with this object had led to a conference with representatives of the Governments of Nova Scotia and Prince Edward Island as to the feasibility of joint action by the Maritime Provinces. The importance of affording facilities to the youth of our country to secure the practical training which such an institution is designed to supply cannot be too strongly emphasized. With the keen competition existing in all branches of industry under our modern civilization it is essential that our young people should possess the highest possible qualifications if we would continue to make the progress we hope for in development of the extensive resources of our Province. I have every confidence that your best intelligence will be exercised in the consideration of the measure that will be submitted to make possible the establishment of such an institution.

The great interest aroused by the progress already made towards the mineral development of the Province as a result of the stimulus of recent legislation is a matter of sincere congratulation and encourages the hope that the vast extent and value of our mineral resources will bring to the people in this Province the wealth designed by nature for the enjoyment of our people in placing these valuable mineral deposits within our borders.

The advancements in agricultural methods and conditions throughout the Province during the past year has been unparalleled in our history as a people, and my Government is stimulated by the success thus won to even greater effort than has heretofore characterized their admin-

istration of affairs in this direction. The agricultural meetings so frequently held throughout the country districts during the seasons that have gone, will, so far as possible, be increased in number and efficiency. In this movement not the least important agency has been the series of successful Agricultural Exhibitions in prominent centres of the Province, and I am pleased to be able to congratulate you on the success of the Provincial Exhibition held in the city of St. John and of the large Exhibitions held in Gloucester, Westmorland, King's and Carleton counties. Strong evidences of our progress and development characterised all these gatherings, while the large attendance evinced a wide spread interest on the part of all sections of our population.

Supplementary to the efforts persistently put forth by my Government to develop the various natural resources and industries of the Province, steps have been taken to familiarize the people of Great Britain and of other countries with the desirability of New Brunswick as a home for intending settlers. In order more practically to effect this purpose it has been deemed advisable to seek, through the agency of illustrative lectures to set forth the natural advantages of this Province as a field for immigrants, and to furnish to the people of the old country distinctive information as to the natural resources. The industrial and social environments, the fertility of the soil and climate, conditions obtaining in this particular province of the Confederation as well as to the facilities with which homesteads can be here acquired, and I have confidence that the methods adopted will be productive of substantial good.

The claims of the Province against the Dominion government arising out of the Eastern Extension Railway matter have by an agreement between the two governments been referred to three competent and disinterested parties mutually chosen for final settlement and adjustment; their award to be made and handed in on or before the first day of June next.

The unsatisfactory state of the law governing the solemnization of marriage in the Province renders it necessary that some adequate remedy should be applied by the legislature. A measure to that end will be submitted for your consideration.

The necessity of a revision and consolidation of the Statutes of the Province has for some time been manifest and will doubtless induce your favorable consideration to such measures as will be submitted having in view the accomplishment of so desirable a work.

We must all deeply regret the outbreak of an epidemic of smallpox in some of the northern and eastern counties of our province. Active measures were promptly taken under the direction of my government, having in view the stamping out of the disease where established and the prevention of its further spread. The results thus far achieved warrant the hope that the measures taken will prove efficient.

I have directed the accounts of the income and expenditure for the past fiscal year, as well as a statement of the receipts and expenditures of the current fiscal year up to the opening of the present session, to be laid before you.

Estimates of the probable income and expenditure for the current year will be submitted to you and I think you will find the estimates of expenditure have been prepared with a due regard to economy and the requirements incident to the growth of our Province and the expansion of its public service.

Bills will be introduced to provide for the establishment and maintenance of Public Parks, to amend the law relating to municipalities, to consolidate and amend the laws relating to the office of Coroner, and to consolidate the Common Schools Act and amend the laws relating to other important subjects, and I trust that your deliberation will, under Divine guidance, be conducted with a wise regard for the public weal.

The address in reply to the speech was moved by Mr. Todd, of Charlotte, and seconded by Mr. Fish, of Northumberland.

WANTED RELIABLE MEN Good house men in every locality, local or traveling, to introduce and advertise our goods (backing up show-cards on fence, along public roads and all conspicuous places, in a systematic manner. Salary of commission \$60 per month and expense \$2.00 per day. Write at once for full particulars. THE EMPIRE MEDICINE CO., London, Ont.

HOUSE OF COMMONS.

OTTAWA, Feb. 15.—Mr. Isaac introduced a bill to incorporate the Alaska Yukon Railway Co., Mr. McInnes a bill respecting the Kaslo, Ladou and Duncan Railway and a bill regarding the Brandon and Northwestern Railway Co., and also a bill to impose restriction on immigration; Mr. Campbell a bill to amend the trade mark and design act, so as to legalize the trade union label; Mr. Britton a bill to amend the Dominion elections act by providing for voting by the use of a machine instead of by ballot; also a bill to amend the criminal code; Mr. Davin a bill to amend the land titles act in the direction of reducing the cost of preparing titles.

In reply to Mr. Taylor, Sir Richard Cartwright said that he was not exactly sure how many of the pamphlets "Political Pointers No. 1," containing the speech of the Minister of Trade and Commerce, were circulated in Canada, and he was inclined to believe that although not nearly so many had been issued as ought to be, there was some hundreds of thousands of them. They were sent through the mails free of postage. He was not sure whether they were franked with his initials but was inclined to think that some of them were franked with his initials and some of them with the initials of other ministers. Any envelopes that were furnished were paid for by the parties who got them. Civil servants did not address the envelopes. "As regards the general subject," said Sir Richard, "I have been at some pains to ascertain what were the precedents established in the year 1896. I find that in the department over which I have at present the honor to preside, Miss Bertha Marks was employed by the department two months, from December, 1895, to March, 1896, during which time she was employed exclusively in addressing envelopes for this campaign literature. I find that a present member of the staff entered the department in April, 1896, and until the elections in June her time was wholly taken up in addressing envelopes. I find that both the present messengers during that period sealed many thousand envelopes and franked them with the frank of the late Mr. Ives. There is one item in the auditor general's report, 'Envelopes, 42,775, price \$59.30,' where I have every reason to believe were used for the purpose of distributing campaign literature."

Sir Charles Tupper, on the orders of the day, asked the Premier if the order in council suspending operation of the coasting law had yet been rescinded?

Sir Wilfrid Laurier—No necessity existed for rescinding the order; it was only for the present season and the general act still stands. The order in council had no effect at this moment.

Mr. Dobell took up the motion of Mr. Bennett in regard to the transport of grain by a combined rail and water route, and the debate was continued by Dr.

Reid, Mr. Casey, Mr. Osler and Mr. McMullen. Mr. Haggart moved the adjournment of the debate and the House adjourned.

AT NIGHT.

Before retiring take a Laxa-Liver Pill. It will work while you sleep without a gripe or pain, curing Constipation, Bilioussness and Headache, and make you feel better in the morning.

COAL BRANCH CUTTINGS.

Feb. 15.—What is the new century bringing us? Has the clerk of the weather taken a fancy to the new born infant and resolved to make his advent the signal for the reversion of the time table, regulating the weather? Or has the fierce fighting in the Transvaal affected the temperature and pulsation of even inorganic nature? Whatever is the reason it is quite evident that the oldest inhabitant is rarely beset to remember anything at all like this year. To-day has far more of April than of February. Even bears seem surprised at the continuance of such warmth and come out to see what is the reason. Ever since Mr. John Dunn last fall shot the great bear that weighed 625 pounds, a sharp eye is kept on any trace of brain. An effectual attempt was made by a couple of young hunters to follow the tracks of a rather small sized bear, which led to a rather bare-faced attempt to capture a young and pretty deer (dear).

The river banks still show the traces of the fearful storm of a fortnight ago. The ice is still piled from two to fifteen feet high on the banks. The bridge at Irving is being now taken back to its old position and appears to have sustained very little damage. The want of a bridge at the mine is very much felt. Not only will it save a large portion of the country some four to seven miles in travel but it will avoid some very high and steep hills.

Frank Carlyle who came to assist in working Mount Carlyle coal mine was the recipient of a very handsome present and a very flattering address on the occasion of a turkey supper given him by the young men of Shediac before coming here.

Mr. John Ward, a miner of long experience is now putting in the levels at Mt. Carlyle. He says he has never seen the quality of coal excelled, and that the roof is one of the best and driest he has ever seen. The output of this mine at present is one ton of coal per day for each man employed. When Mr. Woods gets the levels properly connected he expects to see each man mine an average from one and a half to two and a half tons of coal per day.

A visit to the lumber mill of J. D. Irving, of Buctouche, who has placed a fine rotary mill on a fine tract of hard wood timber some ten miles from Coal Branch station formed a most interesting episode in country life. The mill is located in the middle of a most beautiful grove of hard wood and is of some 40 ft. It is fitted up in the most approved manner and cuts from 14 to 20 M. of hard wood per day. Mr. John Potts looks after the machinery and Wm. Potts sees that a strict account is kept of all the lumber cut and sold. Pierre Le Roy sees to the hauling of the logs and Taylor Coates, E. Baistrach and R. Beers with E. Gesner attend to getting the stuff away. Mr. McLean has a contract of hauling the planks from the meadow to the station and Howard and Beers have the smaller stuff. In all, Mr. Irving gives employment to 76 men and 16 team of horses. Among the horses hauling are some teams of uncommon excellence. Mr. Irving's team driven by Mr. Beers, that of Taylor Coates and John Beers are remarkable for the big loads they get away with, from three to four tons is quite a common load for these fine horses. Mr. Irving has somewhat of a novelty to show in the way of a fine fire engine. Finding the rates of insurance too high he proposes to protect himself and mill by a fire engine. It looks as if it was meant by the maker to do work.

Now it is to such men as Mr. Irving that our country must look for developments. We find on all sides of us men who watch closely for a dollar but who will not make any attempt to envelop anything in their own country. The result is seen in the wonderful way that Buctouche is being pushed forward by two active men. We want to see some one on the Richibucto river develop a similar enterprise.

An effort is being made to open a settlement of McCallums Ridge. A gentleman well posted on such matters says it will be the best and most beautiful in Kent if not in the Province.

Thos. Burns, of Kingston, is buying a quantity of lumber on the Coal Branch

river, and James M. Kennedy is buying logs for J. D. Irving in Adamsville.

Politics is quiet. It is, however, easily seen that James Barnes, M. P. P., of Buctouche, will make a lively race for any one if he chooses to run. Kent has always been and even now is strongly personal in politics and the course of Mr. Barnes in so closely studying the wants of his people has given the impression that he is a worker. At present, however, no one is sure of his being a candidate in any form.

Frank Carlyle is called home by the dangerous illness of his uncle, D. S. Harper, formerly of Harper and Webster, Shediac.

Mr. James Beers is recovering from the effects of the accident he met in very good style.

C. C. C.

DR. A. W. CHASE'S 25c. CATARRH CURE...
Is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Croup, Whooping Cough, Hay Fever, Blowing Nose, etc.

WHY WOMEN HAVE RED NOSES.

The prevalence of scarlet noses among women at this season is caused by wearing veils. The discoloration is most pronounced in these points where the veil is most intimately applied to the face. The effect is due partly to the mechanical action of the sharp and rough texture upon a sensitive skin, and to the influence of the watery vapor that collects within its meshes and prevents evaporation. Blood is thus driven from the tip of the nose to adjacent parts, whose blood vessels in consequence become enlarged and conspicuous. The condition is aggravated if the use of the veil is persisted in on passing from a cold to a warm atmosphere. The alterations tend to become permanent the longer the veil is worn without airing the longer its injurious action is maintained by compression, the colder the season, and the greater the exposure. Sometimes cheeks are also affected similarly.

CASTORIA

For Infants and Children

The small signature of *Chas. H. Fletcher* is on every wrapper.

RECORDS AT THE PATENT OFFICE.

INVENTOR'S NAME OFTEN RELATED TO THE SUBJECT OF THEIR INVENTIONS.

According to an article in the Post a veteran clerk in the Patent Office shows by a ten years' collection of memoranda slips strange coincidences occurring between the names of inventors and their own inventions. From a bundle of several thousand records giving the names of patentees and their patents, he shows that a heavy per cent. of the patents granted in his office during the past ten years were significantly related to the name of the originator. This singular coincidence is amusingly illustrated by papers on record at the Department.

The fact that Messrs. Fairweather, Blizard, Thunderbolt and Lein took out patents for improvements to weather devices first called this comical feature to the mind of the record collector. Mr. Snow was next in line to the weather man, and in 1880 he was notified that the Snow sleigh could be placed on the market. The summer of the same year brought forth a thought from a Mr. Cutter to improve the runner of Mr. Snow's sleigh, and a patent for a sleigh runner was granted him. A patent was then applied for by A. Break for a break shoe now sold by numerous shoe dealers. This grant was hardly cold when Mr. Buck was given the desired papers for his buckle, and Mr. P. Jack patented a new boot-jack. Mr. Cutter having successfully sold his sleigh improvement device, reappeared at the Patent Office with an ice cutting machine. Mr. G. P. Gunn invented a breech-loading gun, and a Mr. Candy invented candy tablets. Communication of Messrs. Marion & Marion, Patent Attorneys, Montreal, who will send the Inventor's Help to any address upon request.

Mark T. Pace, while working on the roof of a building in Trenton, last Monday afternoon fell off the roof, the staging giving way, striking the projection of the building adjoining. He broke several ribs and a splint entered his heart killing him instantly. Mr. Pace was about 64 years of age, and leaves a widow and family.—New Glasgow Chronicle.
