

## RAILROADS.

## INTERCOLONIAL RAILWAY.

On and after Monday, Oct. 16th, 1899 trains will run daily (Sunday excepted) as follows:—

LEAVE KENT JUNCTION.

Accommodation for Moncton and St. John.....11.35  
Accommodation for Newcastle and Campbellton.....13.05

Vestibule Sleeping and Dining Cars on Through Express trains between Montreal and the Maritime Provinces.

All trains are run by Eastern Standard Time. Twenty-four Hour Notation.

D. POTTINGER,  
General Manager.

Railway Office, Moncton, N. B. 15th June 1900.

## KENT NORTHERN RAILWAY.

## TIME TABLE.

9.30	Dept. Richibucto, Arr.	15.00
9.45	Kingston,	14.45
9.58	Mill Creek,	14.33
10.15	Grumble Road,	14.04
10.21	Molus River,	13.59
10.45	McMinn's Mills,	13.45
11.00	Arr. Kent Junction, Dept.	13.25

Trains are run by Eastern Standard time.

Trains run daily, Sunday excepted. Connect with I. C. R. accommodation trains north and south.

WILMOT BROWN.

General Manager and Lessee.  
Richibucto, June 18th, 1900.

## MONCTON AND BUCTOUCHE RAILWAY.

1900 SUMMER TIME TABLE. 1900  
On and after Wednesday, June 20th, 1900, trains on this railway will run as follows:

\* 7.50 | 9.45 Arr. Moncton. Dept. 15.00 | 18.15  
6.00 | 7.45 Dep. Buctouche. Arr. 17.00 | 20.05

(Eastern Standard Time)

Train from Buctouche connects at Humphrey's with I. C. R. train for Halifax, and at Moncton with the C. P. R. train for St. John, Montreal and United States points, leaving at 14.05 and I. C. R. train for Campbellton leaving at 10.40.

Train from Buctouche connects at Humphrey's with I. C. R. day express from Halifax, and at Moncton with all I. C. R. trains from east and north arriving not later than 14.40.

Until Sept. 17th, excursion return tickets at one single first class fare will be issued from all stations on Saturday good to return on following Monday.

Trains run daily (Sunday excepted.)

\* Mondays only.

† Tues., Wed., Thur., Friday and Saturday.

‡ Mon., Wed., Thur., and Friday.

§ Saturdays only.

## TWO BOYS DROWNED AT PORT ELGIN.

PORT ELGIN, West. Co., Sept. 1.—A very sad accident occurred about 4 o'clock yesterday afternoon just outside of the railway bridge, resulting in the drowning of two boys, viz.: Oscar Lowther, eldest son of Rufus Lowther, who was in his sixteenth year, and Tupper Hayward, third son of Silas Hayward, about twelve years of age. There were three boys in the boat at the time of the accident: Oscar Lowther, Tupper Hayward and his brother, Elmer Hayward, and by some accident the boat was upset, throwing the boys in the water. William Fagen, a boy of about 16 years of age, who was on the shore and seeing there was danger of the boys being drowned, swam out to the boat and collected the oars of the boat and took one to Elmer Hayward, who managed to keep himself up until another boat arrived and picked him up; but before he could reach the other boys they went down for the last time. The bodies were both found. The first—Tupper Hayward—was found about twenty minutes after the accident. Drs. Carter and Black arrived soon after the first was found and worked with the body for nearly an hour, but all efforts failed. Much sympathy is felt for the parents of the deceased.

## WITHOUT SLEEP

The vitality of the body is soon exhausted. Sleeplessness is one of the symptoms of starved nerves. It is a warning of the approach of nervous prostration or paralysis. Don't be tempted to use narcotics or opiates. Dr. Chase's Nerve Food will gradually build up and reconstruct the wasted nerve cells and positively cure all nervous diseases. It is nature's greatest restorative, recommended by your druggist.

## SMITH'S CORNER.

SEPT. 1st.—As we have not seen any notes from this vicinity for some time, we begin to fear Nobody's Girl must have found a partner and consequently taken her departure.

Nut picking is the order of the day.

Our school has reopened under the management of Mr. M. P. MacEachern, of Chipman.

Quite a number of our young people spent an enjoyable afternoon and evening at Bass River on Tuesday at a picnic given by Miss May Ward.

Miss Bell Leet, accompanied by her sister, Mrs. D. Buah, and daughter, Miss Ruby, of Augusta, Maine, are visiting their parents, Mr. and Mrs. John Leet.

A party of our young people spent a very sociable time at Mrs. Lawson's, Wednesday evening.

People have awakened to the fact that our river is abundant with clams in which precious pearls are found.

A picnic and basket social will be held in the grove at Smith's Corner, on Tuesday, Sept. 11th. Dancing and other amusements will be indulged in. Ladies are requested to bring baskets. All are cordially invited.

## SUNFLOWER.

THE GRANGER CONDITION POWDER is a genuine Tonic and blood cleanser. They cure Stomach, Worms, swelled legs, horse ail, cough, and purify the blood.

To keep in good health, keep the system regular. Use Wheeler's Botanic Bitters.

We advise you strongly to keep Kendrick's Liniment in the house.

Ask for KENDRICK'S LINIMENT.

C. P. R. train and conductors, who are demanding an increase of pay, will resume their conference with General Manager McNeill in a day or two.

Archibald Campbell, M. P., will contest West York, Ont., in the Liberal interest against N. Clark Wallace, and N. W. Rowe, a young Toronto lawyer will oppose W. F. Maclean, M. P. who only had a majority of three last election.

Miss Hattie Nolan, the very handsome and accomplished daughter of ex-elderman J. C. Nolan formerly a provision merchant in Quebec, was struck and instantly killed by a train on the line of the Milwaukee and St. B. Railway, Chicago.

## TAKING THE REINS.

The 2-year-old Helen Bertram, by Margrave, has paced a half in 1:09, last quarter in 33 seconds, over the Terre Haute track.

A promising young Futurity candidate at the Louisville track is the 2-year-old filly by Alta Vista, out of Oriana, 2:18 1/4, by Indian Hill.

Dick Mahon says Tommy Britton, 2:08, steps a quarter in 29 1/4 seconds with no more apparent effort than if he took a minute to cover the distance.

John Kelly has worked the pacer Sidney Pointer, 2:14 1/4, a mile in 2:15 1/4, with the last quarter in 29 1/4 seconds. Sidney Pointer is a son of Star Pointer, 1:59 1/4.

The stallion Anteros, now 18 years old, was driven over a Missouri track recently a quarter in 36 seconds, and on a heavy track, to sulkyette, he showed three halves in 1:25, 1:20 and 1:18.

Who is it, 2:10 1/2, will be raced again this season and is said to be going better than ever. When Peter the Great beat him at the Empire City (New York) track last year, he was separately timed in 2:08 and 2:08 1/4.

Jim Ramey, the Missouri trainer, has one trotter and four pacers in his string by John R. Gentry. Three of them are big fellows, standing 16.2 hands. The heaviest weighs 1,250 pounds and the smallest 1,175 pounds.

L. Reiff won a selling plate at Newmarket the other day on Goon and the Stud Produce Stake on Volodyoski. Tod Sloane won the Soham Plates on Wild Irishman, and Rigby won the high-weight handicap on Pheon.

The race for the Prix Fort Poirier, of 2,000 francs, at 1,000 meters, was run at Compeigne, France, the other day and was won by a short neck by Baron Leonardo's Neptune II. Cash Sloane, the American jockey, had the winning mount.

## FROM CURRENT FICTION.

The most thankless task in the world is explaining a joke to a person who has not seen it.—"Woman and Artist."

"Speaking sharp seldom does much good," sapiently remarked Mrs. Bateman, "except to them as speaks."—The Farringdons.

In the dissolution of sentimental partnerships it is seldom that both partners can withdraw their funds at precisely the same time.—"The Touchstone."

The world of commerce and speculation is as aloof from the scholar and the recluse as the rings of Saturn or the sun of Aldebaran.—"The Waters of Edara."

What woman can withstand the fascination of a lover's faith that she is an angel? If a man is fool enough to believe it, why deceive him?—"Unleavened Bread."

Slight but chronic dyspepsia, the deprecations of neuralgia, are apt to impart to our countenances a more touching melancholy than do the woes of love.—"The Garden of Eden."

A profound knowledge of human nature enunciated the decree, "Thou shalt not covet thy neighbor's house," and relegated the neighbor's wife to a back seat among the servants and live stock.—"Diana Tempest."

## BEE BUZZES.

Young queens always excel older ones in laying eggs.

Never allow a swarm of bees to remain long after settling.

Keep the brood as near the center of the hive as possible.

Bees require close attention during swarming time to avoid loss.

Roofs of hives of whatever kind should have a coat of paint every fall, as leaky roofs are very damaging.

The quantity of surplus honey—either comb or extracted—depends very largely upon the management given now and during the next month.

One of the most frequent causes of robbing comes from the carelessness of the beekeeper in allowing honey to lie around where the bees can get at it.

Keep all colonies confined in the brood chamber until they get strong. If this period comes at the time of the honey harvest, the bees will be in condition to receive the section boxes.

Keep down an oversupply of drones. The best way to do this is to remove the drone comb. If the combs are all built on foundations, there will hardly be an oversupply of drones.—St. Louis Republic.

## CHINA.

China's "open door" is very like a dragon's mouth.—New York World.

The Chinese are to blame for all these wars anyway. They invented gunpowder.—Baltimore American.

The Chinese do not care anything about telegraph censors. They just cut the wires.

Very likely the powers in the east will continue to act in concert until the time comes for dividing up the spoils.—Boston Globe.

With China it does not seem to be of so much importance whether she is in a state of war or in a state of anarchy or whether she will be a state at all or not.—Syracuse Post-Standard.

China has let slip the dogs of war against western civilization and staked the existence of the empire on the result. We are witnessing the opening of the great Chinese tragedy.—Newark Advertiser.

It may be significant that the foreign troops in China have encountered their severest opposition in the district where is stationed the Tien-tsin army corps, the best paid and best organized corps in China.

## THE CYNIC.

The best tree in a yard is always in the poorest location.

If a man is willing to work, idle people say he is a crank.

Every man's backbone is stiff enough as regards the other fellow's duty.

You have made a fair success of your domestic affairs if you are on speaking terms with all your kin.

If a man is sensible enough to refuse to take sides in a dispute, he is too sensible to make a satisfactory friend.

A woman can whip her own children without consulting the neighbors, but she should ask their permission when a stepchild needs a licking.

A girl child will believe longer than a boy child that eating the crusts will make the hair curl, and this credulity is characteristic as she grows older.—Archibald Globe.

## IS BABY CUTTING TEETH?

Watch him carefully.—On the first indication of Diarrhoea give Dr. Fowler's Extract of Wild Strawberry.

As you love your child, mother, and wish to save his life, give him Dr. Fowler's Extract of Wild Strawberry.

There is no other remedy so safe to give to children and none so effective.

Mrs. Chas. Smith, Shoal Lake, Man., says: "I think Dr. Fowler's Extract of Wild Strawberry is the best medicine that was ever made for diarrhoea, dysentery and summer complaint. It is the best thing to give children when they are teething. I have always used it in our own family and it has never yet failed."

## IF MOTHER WOULD ONLY LISTEN.

If mother would only listen to me, dears, She would freshen the faded gown, She would sometimes take an hour's rest, And sometimes a trip to town.

And it shouldn't be all for the children. The fun and the cheer and the play, With the patient droop on the tired mouth, And the "Mother has had her day!"

True, mother has had her day, dears. When you were babies three, And she stepped about the farm and the house

As busy as ever a bee. When she rocked you all to sleep, dears, And sent you all to school, And wore herself out and did without, And lived by the golden rule.

And so your time has come, dears, Her hair is growing white, And her eyes are gaining the far-away look,

That peers beyond the night. One of these days in the morning Mother will not be here; She will fade away into silence, The mother so true and dear.

Then what will you do in the daylight, And what in the gloaming dim; And father, tired, lonesome, then, Pray, what will you do for him? If you want to keep your mother, You must let her rest to-day; Must give her a share in the frolic, And draw her into the play.

And if mother would listen to me, dears, She'd buy her a gown of silk, With buttons of royal velvet, And ruffles as white as milk. And she'd let you do the trotting, While she sat still in her chair; That mother should have it hard all through,

It strikes me isn't fair. —Margaret E. Sangster in the Interior.

## ONE WAY TO TEST MANURES.

In discussing the question of manures, the Dominion analyst in his last bulletin makes the following pertinent remarks:

It is nearly fifty years since Stockhardt, at that time professor in the agricultural school of Tharandt, Saxony, said that a farmer who bought guano, bonemeal or other artificial fertilizer, and at the same time neglected to make proper use of the manure of the cattle on his own farm,

must be regarded as an agricultural spendthrift. Every intelligent farmer in Canada will in these modern days agree with the old German professor, and maintain that the treasury of the farm is the dung-heap, and that leaks and emanations from it of valuable fertilizing constituents must lead to financial embarrassment and possibly ruin.

This statement may be positively made without in the slightest degree detracting from the merits of artificial fertilizers, for when properly selected and applied, their value becomes abundantly evident. The question as to whether their use is remunerative has been frequently discussed and depends to a large extent on the care employed in their selection. Supposing that the intelligent farmer has considered composition, cost, etc., to the best of his ability, made his selection and applied the fertilizer, he may still be in doubt as regards the result unless he takes steps to make a manure trial with it. As regards the best way of doing this, Hellriegel has related his experience. He recognizes how difficult it is for practical agriculturists, fully occupied with their regular work, and engaged in meeting all the difficulties caused by workmen, weather and market rates, to carry out regularly planned manure experiments. He therefore describes a method which experience, in his estimation, has justified, and recommends it for the purpose of ascertaining whether any application of lime, marl, dung or fertilizers had already produced the improvement which from the point of view of cost had been expected. This plan is to pass over, at one or several places, properly selected, a few square yards of the field without applying the dung or fertilizer. In this way unmanured plots, which do not require to be measured with great exactitude, but merely paced, and do not need to be har-

vested separately, are left in the manure field, by means of which any improvement in the latter may be marked and valued.

This plan exacts that it should be possible to see a distinct difference between the unmanured spots and the manured field, not only as regards the height and density of the resulting crop, but also in reference to the fullness of the ears and the development of the grains. In the event of such a distinct difference being invisible, the manure is justly discredited as unfit for its intended purpose. It would seem advisable to recommend this plan to farmers who use fertilizers, because some of them may manure the whole field, and fail to see any improvement on account of being unable to make comparisons, and perhaps condemn the fertilizer unjustly. The simplicity of the plan above described, and its applicability everywhere and every year, would appear to condemn it to the practical agriculturist. At the same time it is necessary to remark that there are instances on record of fertilizers having been applied and remaining utterly without effect owing to some defect in the soil. Such defects have often been cured by a previous application of marl or lime, which not only produced good effects themselves, but improved also the action of the fertilizers afterwards applied.

## BLACKLEG IN CATTLE.

Blackleg in cattle also goes under the names of symptomatic anthrax and black quarter. The disease was for many years confounded with anthrax, and it was only found after careful research that it differed in a great many ways from that disease. Especially in its contagious nature is the distinction marked, for of animals other than cattle only sheep and goats are susceptible and these slightly. The symptoms of the disease are familiar to all stockmen. These are lameness in a front or hind leg, accompanied by the development of a tumor on that limb. This tumor is filled with gas, and upon pressure a peculiar crackling sound is produced. The meat which this tumor effects is black, and the tumor itself contains a dark fluid.

Blackleg is caused by the introduction into the system of a germ known as the blackleg bacillus. The usual manner of infection is through a wound of the skin or muscle membrane. The germs do not pass out with the excretions, hence the disease is not communicable from animal to animal. But if a blackleg carcass be skinned and the blood and juices be allowed to enter the soil or if such a carcass be allowed to decompose without being buried, the germs form spores, or "go to seed" and in this form may live in the soil for many years, ready to begin life anew as soon as conditions are favorable. Thus the pasture may be a constant source of infection. To prevent this the carcass must be burned immediately, or buried at least six feet under the ground.

There have been many treatments advocated from this disease. The most common are rowelling and the use of setons. They are alike utterly worthless.

Within the last five years there has been introduced a vaccine prepared from the dried meat of the muscles of the animal that has succumbed to the disease. This is the only method at command at present for combating the disease if the animal is exposed to infection.

## CASTORIA

For Infants and Children.

The famous signature of J. H. P. is on every wrapper.

## SMOKED THEM HIMSELF.

Edison is fond of smoking, but he becomes so absorbed in work that he even forgets that he has a cigar in his mouth. When he had an office in Fifth avenue, New York, the desk in which he kept a box of cigars was always open, and, as the boys came and went at all hours, his cigars disappeared with mysterious rapidity. Finally, he asked a friend who was in the tobacco business if he could not do something to discourage this disappearance. "Why, yes," said the friend, "I'll make up some cigars for you. I'll put Hoffman House labels on the outside, and fill them with horse-hair and hard rubber." "Well," said Mr. Edison, in relating the story, "that fellow went to California and didn't return for three months. I forgot about him in the meantime, but when he got back I said to him: 'Look here, I thought you were going to fix me up some fake cigars.' 'Why, I did,' he said in surprise. 'You did? When?' 'Why, don't you remember—a flat box with a green label; the cigars in bundle form, tied with yellow ribbon?' 'Do you know,' said Edison, innocently, 'I smoked them all myself!'—Newark News.

Hagyard's Yellow Oil is a good remedy for man or beast. It reduces swelling, allays inflammation, takes out pain, and cures cuts, burns, bruises, sprains, quinsy, sore throat, etc. Price 25c.

Bernier & Co., dry goods merchants, of Montreal, have assigned on demand of the Canadian Underwear Co.

## DANGEROUS EXTREMES.

THE SEASON WHEN  
**Paine's Celery Compound.**  
SHOULD BE USED.

Nothing Like it for  
Health-Building.

A sudden jump from torrid heat to weather of a changeable character!

The change is a serious one for the ailing, weary, sleepless, despondent, irritable and for those whose nerve energy is almost exhausted. The quickly varying temperatures experienced during this month, add to the sufferings and burdens of men and women whose systems are deranged or broken down.

Long years of triumphs and successes have established the fact that Paine's Celery Compound is the infallible cure for the fearful ills that result from an impaired nervous system and impure blood.

Paine's Celery Compound makes nerve fibre and nerve force; it purifies and enriches the blood; it regulates digestion; it promotes sleep and gives to the entire system a fullness of health and strength that makes life a pleasure.

Our best people are users and friends of Paine's Celery Compound and recommend it to their friends; it is prescribed daily by some of our best physicians.

## AN INFANT MUSICAL WONDER.

BOY UNDER FOUR YEARS AMazes PSYCHOLOGISTS IN PARIS.

Before the congress of psychology, now holding a meeting at the Paris exhibition, Prof. Charles Riebet recently presented a musical phenomenon of the first rank—a little boy three and one-half years old, Pepito Rodriguez Ariold, still dressed in petticoats, who can give points to the most experienced musicians of the day.

When he was only two and one-half years old his mother, an excellent musician, one day heard somebody playing the piano which she had just left. She had been executing a piece of classical music and had gone to an adjoining room, when suddenly the instrument began to repeat the air and accompaniment. Her surprise became still greater when she discovered that it was her baby, little Pepito, who was playing from memory the notes he had heard a few minutes before.

From that time the mother's decrepit old piano became the daily companion of the youngster. He played before the members of the congress a number of improvisations, and it is difficult to conceive anything more astonishing. The little hand cannot possibly stretch over more than five notes, yet he can strike an octave by a stress of dexterous movements.

Although he has never taken a lesson in harmony or composition, he can render with the utmost fidelity an unfamiliar tune, developing it and finding variations in it.

When he had finished playing before the members of the congress, Pepito turned toward them and burst out laughing, just as though he had played some amusing trick. He is a bright, healthy child, and the prospects are that he will one day be a composer of genius.

MOTHERS DO NOT FAIL TO SEE that you obtain the original and genuine McLean's Vegetable Worm Syrup—safe, pleasant and effectual at all times.

Use the Granger Condition Powder for a genuine tonic and blood cleanser for Horses and Cattle.

Kendrick's Liniment is always satisfactory, never disappointing.

Use KENDRICK'S LINIMENT.

## FOR MUSIC STUDENTS.

The London Musical Herald offered a prize and certificate for the best act of twelve "don'ts" for pianists. Many papers were submitted, and they presented graphically the vigors of all sorts and conditions of pupils, veritable musical microcosms. The prize winner, Miss Janet Lawson, sent the following:

Don't thump.  
Don't begin to play until you are ready.  
Don't count to your playing, but play to your counting.  
Don't jerk your hand when you put your thumb under.  
Don't play one hand after the hand.  
Don't play with your arms.  
Don't keep the pedal down all the time.

Don't gallop over any easy part, and then stumble over the more difficult.  
Don't neglect posture when practicing.  
Don't nod your head when you play an emphatic note.

Don't pass over a difficult bar until it is mastered.  
Don't be late for your lesson.

## Headache All Gone.

Mrs. Melbourne Parker, Torbrook, N. S., writes: "I have used Milburn's Sterling Headache Powders, and after taking one or two felt better at once, and was able to get up and go on with my work." Price 10c. and 25c., all dealers.
