

MORE HOME KNITTERS WANTED

THE HOME MONEY MAKER

To Work at Their Homes Under the Direction of
THE YORKSHIRE MFG. CO.,
130 Yonge St., Toronto
To Fill Large Contracts—Good Wages Easily Earned.

We want a few more workers in this locality, at once, and in order to secure your co-operation without the delay of correspondence, we herewith explain our full plan in this advertisement. The work is simple and the Machine is easily operated, and with the Guide requires no teacher. If you wish to join our staff of Workers let us hear from you promptly with the Contract order form and remittance, as a guarantee, and we will send machine and outfit to begin work at once.

Machine weighs 17 pounds. It is more powerful than a sewing machine. Just as durable and higher speed.

OUR METHOD OF DOING BUSINESS.

We wish to secure the services of families to do knitting for us in their homes. Our method is the same as adopted in England. We are the introducers of this plan into the largest knitting concern in Canada.

After long experience we have been able to produce an Automatic Machine by which all kinds of seamless knitting is now done by our Family Machine, thereby enabling anyone of ordinary intelligence to quickly learn to do the work from the Instruction Guide. All we require is that you use the machine according to directions. The Machine being made expressly for this purpose, and the operation so simple, it cannot possibly make a mistake in its work.

The great demand now is for Bicycle Stockings, Woodmen's Socks and Motormen's Mittens, and, as we are unable to supply the demand, have taken this method of advertising for more help.

The large export trade to the Northwest Territories, British Columbia and the British Colonies furnishes an unlimited demand for our goods, and, with the combined co-operation of the many families we are employing, together with the large amount of knitting we are able to turn out, by which we secure insurance, interest on capital, etc., enable us to undersell any manufacturer of this class of goods, and we have sale for all the knitting we can have turned out.

The price we pay for finished bicycle stockings is \$10.00 per hundred, out of the rate of 10c per pair; woodmen's socks, 5c, and motormen's mittens, 12c a pair. All other work in proportion to size.

The machine can be operated by any one of a family, and at our prices any energetic family should be able to sustain themselves comfortably, and in time be a source of independent comfort.

Our plan is to send out each machine to beginners with a sock or stocking partially knitted, and remaining in the machine ready to be continued, and also enough yarn to knit one pair of sample socks or stockings, and a simple and complete Instruction Guide, showing how the work is to be done. When the samples have been finished and returned to us satisfactory, we send a quantity of yarn, which you knit and return, likewise when finished. We prepay charges on all work one way, and our workers pay return charges. The work, as we have stated, is simple and rapid, and the machine having a capacity of ten thousand stitches a minute. We have many persons now in our employ who can knit from twenty-five to thirty pairs of socks or stockings a day, and where the time of a family is devoted to the work, you can readily see that \$15.00 or \$20.00 per week can be easily earned.

We furnish our workers all the materials, yarn, etc., free, and everything that is necessary for the work. We are furnishing the machines only for the exclusive use of those desiring to take employment with us, who must, in order to become a member, send us this Contract Order Form, properly signed by them and at least one good reference, and remittance accordingly, to give us the necessary assurance that the quantities of valuable yarn we may send from time to time will not be wasted or misappropriated. Our interests are mutual and this confidence must be established if we are to succeed. We guarantee fair dealing and prompt payment for work, so do not ask us to deviate from our terms, as we cannot make a distinction with one and not another; besides, we are doing an extensive business, and must be governed by business principles.

The manufactured price of the machine is \$30 and positively will not be sold to any other than those who will agree to do knitting for us.

If at any time after you commence, you wish to discontinue, we will take back machine and refund the amount paid for same, after deducting cost of our expense, expressage, etc.

There is a large demand by the Trade for this class of work. Our workers can depend upon it year after year, and if you engage with us (whole or spare time) we will keep you supplied with work as long as you do it satisfactorily for us and return it promptly. We entrust our workers with large quantities of valuable yarn, and, as we give

references as to our honesty and integrity, we must ask you to do the same, in order that we may know with whom we are dealing.

We have, in as brief a manner as possible, endeavored to show you what our work is, and we simply say as to the machine, it is just what we represent it to be, and will positively do everything we claim for it, or refund the money. Each machine, securely packed with an outfit, is set up for work, thoroughly tested and a sock or stocking partially knitted before boxing and shipping. Should you decide to engage with us, it will be necessary to send us Cash Contract Order Form, properly signed by you and at least one good reference, together with the remittance accordingly, upon receipt of which we will forward machine and outfit ready to commence.

YORKSHIRE MFG. CO.

S. A. MARVIN, Mgr.

Our References—Express Companies, Banks, or Toronto Business Houses.

If you wish to examine the machine and see the material before undertaking the work, you can do so by sending \$2.00 as a guarantee of good faith, and to defray expense of shipping and we will send everything to your nearest express company, leaving a balance of seventeen dollars to pay the agent and 25 cents for the return charges on the money to us.

We are frequently and unnecessarily asked if one can learn to knit without a teacher. We say, Yes; it requires no teacher; any person of ordinary intelligence who can read the Instruction Guide can learn to knit at once.

ORDER FORM

\$20.00 Cash Contract Order Form.
To the Yorkshire Mfg. Co., 130 Yonge St., Toronto, Ont.

Gentlemen,—I desire to do the work as described in this advertisement, and enclose \$20.00 to pay for one Automatic Knitting Machine, together with material, instructions, and everything necessary for the work, the same to be sent to me by Express, CHARGES PREPAID.

It is understood and agreed that any time I wish to discontinue, that the Yorkshire Mfg. Co. will take back the machine and outfit and after deducting their expense, expressage, etc., refund to me the amount paid for same.

Sender or head of family (if possible) must sign here:
Full name Street

P.O. County
Nearest Express Office is at

For reference I name the following person:

Be sure to use this form when sending your remittance for the machine and outfit, which you must fill in and have signed by at least one good reference in the proper place. Tear off and return to us and also state here how much time you can devote to the work; also how you wish to be paid, weekly, monthly, or as you send in the work.

Send your remittance by Express Money Order Registered Letter or Post Office Money Order, and we will promptly forward machine, outfit and simple guide for doing the work.

This is the best offer ever made for the benefit of Canadians who want to work and make money at home.

REVIEW

HER YEARS.

Years come and go, each bringing in his train
Spring fair with promise, summer glad with bloom,
Fruit bearing autumn and the winter's gloom,
But years and seasons march for her in vain.
Since still she strings her rosy of pain,
Catching from far some subtle, soft perfume,
Some scent of roses dying on a tomb,
Unfaded by spring's dew or summer's rain.

Why change the seasons when she cannot change?
For pomp of morn, high noon or setting sun
What cares she? They are powerless to estrange
Her soul from grief, who, till her day is done,
Companions her wherever she may range
And makes her new years old ere yet begun.
—From "At the Window," Lyrics and Sonnets,
by Louise Chandler Moulton.

THE ASSASSIN'S TOOL.

Varieties of the Dagger and How They Are Used by Experts.

If an Italian or a Spaniard happened to witness one of the many dagger episodes of the British stage he would neither hiss nor hoot—he would smile. For the stage dagger and the stage grip of it he would have nothing but contempt.

If the reader would know the reason of the foreigner's mirth, let him grasp a stout office rule in the same conventional fashion as the stage villain does his equally staid weapon and swing it in the overhand thrust beloved of the theatrical stabber.

He will find that he cannot hit once in a score of times a postage stamp stuck on the wall at the height of an imaginary victim's bosom. The swinging arm is practically the radius of a circle, of which circle the blade forms a part. Instead, therefore, of the point going unerringly to its mark it moves in a curve, which almost invariably will throw it clear of the point aimed at.

The expert's grip upon the dagger is a singular one, but it achieves its object. He only takes the handle of the weapon with his thumb and first three fingers; the fourth he folds into the palm of his hand. The folded "little finger," lying with its lowest section against the inside of the dagger handle, gives a slight outward thrust and corrects the tendency of the dagger point to swing in a curve. Held this way, the dagger will hit the postage stamp every time.

But the stiletto, rather than the dagger, is the ideal weapon of the assassin. Few people know what the true stiletto is like, and fewer still how it is manipulated. In the first place, it has no hilt, only a wooden handle, resembling that of the common chisel, but without the brass band. The blade—if blade it can be called—is a slender, three cornered thing, except for the rough texture, very like a file.

When the ill fated empress of Austria was stabbed, the statement crept into some newspapers that she had actually been wounded with a file. A stiletto, of course, was used, but it was probably quite unfamiliar to many of the newspaper correspondents.

The stiletto handle is held in the palm, with the thin blade pointing outward and upward. No force is needed; none indeed could be exerted in such a position. But the single terrible "poke" in the liver or the stomach is more than sufficient. It was from such a wound that President Carnot died. The stiletto is practically useless except as the tool of the assassin and as such would be made an illegal article, save in museums and similar collections.

Only one form of cutting weapon is properly held in the conventional stage fashion, and that is the terrible Spanish knife, used by the southern peasant for slicing his onions and his enemies. But this is employed in slashing crosscuts and not, as a rule, in stabbing.—London Mail.

Particular About His Shoes.

A western couple who were on a visit to New York for the first time put up at the Waldorf-Astoria during their stay in this city, and what was left of their first day in New York they largely devoted to viewing the decorations of the hotel. The myrtle room, the Astor gallery and the great ballroom were viewed by them, and the magnificence of the appointments and opulent decorations left them both breathless. They said little, however, in comment, but that awe was one of the feelings that what they had witnessed gave rise to was evidenced by the husband, who, upon retiring for the night, when he was asked by his faithful spouse if, according to his usual custom, he was not going to put his shoes outside to be blackened, emphatically replied: "Not much. If I did, they'd kill them."

Had a Hand In It.

When the Rev. Dr. J. T. Ward was president of Western Maryland college, some of the students stole the molasses cans from the kitchen and poured streams of the treacle down the whole of the banisters that led from the sky parlor to the basement. Dr. Ward got up very early the next morning, and as he went down the steps he gathered a handful of the molasses. The faculty sat in solemn session, but not an inkling could they find as to the identity of the miscreants. Suddenly the humor of the thing broke upon the dean, and he said: "Gentlemen, I say as well confess, I had a hand in it."

The Heads Ate the Tails.

An investigator of matters zoological said: "I saw stated in a natural history volume that if a worm should be divided the anterior part would grow a tail and the posterior part would grow a head. I took 12 worms and divided them, placing the divided parts of each worm in a separate glass. In less than a month I had 22 worms, losing only two tail parts. The head parts had grown tails, and the tail parts had grown heads. Then I divided two worms into halves and put the four parts into a glass, into which I placed earth, but no food, and the head parts ate the tail parts."

How He Made It.

"I see you are building a new house, Mr. Bung."
"Yes, you are right."
"Made the money out of whisky, I suppose?"
"No."
"Why, you are a distiller, are you not?"
"Oh, yes. But the money I'm putting into this house was made out of the water I put into the whisky. Every farthing was made out of the water, sir."

Labor is noble, but of two ancestors people generally brag more of the one who enjoyed life on money he did not have to earn.

A husband waiting for his wife at a bargain sale is about the cheapest thing in sight.—Chicago News.
