PROVINCIAL LEGISLATURE PRO-ROGUED.

FREDERICTON, April 3.—The house met at 10.30 o'clock this morning. Mr. Purdy presented the petition of the W. C. T. U. against the abolition of beer licenses.

Hon. Mr. Tweedie said the business of the house was now finished and there remained but one thing to be done—to pass an address to His Most Gracious Majesty King Edward VII., to congratulate him on his accession to the throne and express the sympathy which we all felt with the loss which he has sustained, and which the empire has sustained in the death of Queen Victoria.

He said: "It is not necessary for me to elaborate on this theme. We all know that the reign of Queen Victoria has been marked by circumstances of greatness such as have distinguished the reign of no other monarch who ever occupied the British throne. Under her beneficent rule the boundaries of the empire have been extended, the population of the empire has been doubled, its wealth has been enormously increased and those principles of liberty which have come down to our time through many centuries have been strengthened and established more firmly than before. We hope and trust that, under the reign of King Edward VII., no backward step will be taken but that the empire will enjoy the same degree of prosperity which it has enjoyed during Victoria's reign, and that the rights of the subject will be as well protected as they have been in the past. New Brunswick has always been a loyal province. It is, in fact, a Loyalists' province. It has been closer to the mother country in its trade relations than any other portion of the empire. It is, therefore, eminently fitted that this legislature should take this opportunity of addressing the new king. I have, therefore, great pleasure in moving, seconded by the leader of the opposition, the following address to His Most Gracious Majesty King Edward VII.

To His Majesty King Edward the Seventh by the Grace of God of the United Kingdom of Great Britain and Ireland, King, Emperor of India, Defender of the Faith, etc :

Most Gracious Sovereign,—We, your majesty's dutiful and loyal subjects, in the Legislative Assembly of the province of New Brunswick, Dominion of Canada, assembled, desire to convey to your majesty our expression of satisfaction at your majesty's accession to the throne of our empire. We desire also to convey our appreciation of the irreparable loss sustained by your majesty as well as by the united citizenship of our country, in the demise of your majesty's illustrious mother, our late sovereign lady Queen Victoria, of blessed memory; and we trust that in the years that lie before you as a sovereign of the great empire of which by the providence of God you have been called upon to assume the crown, the same divine guidance may be ever present in the deliberations of your majesty as marked the long and distinguished reign of

your beloved mother.

We beg to assure your majesty that, in no portion of the empire is the attachment to the throne and to the British institutions more strongly cherished than in the province by whose legislature this expression of fealty is made; and we are convinced that the spirit and resources of our people will be ever available to assist in bearing the national burdens and performing the national obligations incident to the advancement and prestige of the empire.

Dated at the Parliament House in the city of Fredericton, in the Province of New Brunswick, Dominion of Canada, on the third day of April, A. D. 1901, and in the first year of his majesty's reign.

Mr. Hazen said that it gave him very great pleasure to second the address. He thought the passage of such an address was a fitting close to the labors of this first session of the legislative assembly of New Brunswick in the new century. There are in this legislature differences of opinion upon matters of public policy and government administration, but on one point all agree, and that is, in our unswerving loyalty to the British throne and our admiration for British institutions; and, he trusted that the time might never come when our allegiance to the throne of Great Britain will be less sincere than now or the ties which bind us to the mother country be less closely drawn. He felt that no better wish could be expressed with regard to King Edward than that which had just been uttered by the honorable leader of the government—that the reign of King Edward might be as prosperous, as happy and as successful as was that of his illustrious and beloved mother. No reign of any sovereign who ever sat upon the English throne had been marked by so great progress, so much contentment among the people and in which so much had been done to elevate mankind as the reign of the beloved Victoria. We all feel assured that the son of such a mother, with his long experience as Prince of Wales, with his knowledge of public affairs, and with his mature years, will reign as becomes so high and exalted a position and that he will have due regard for the constitution of the empire over which he rules. He has commenced his reign by a kindly act of consideration for the colonies and which shows his appreciation of the loyalty which every part of the empire feels toward the person of the sovereign. He believed that from his majesty himself had emanated the purpose to send his son and the heir to the throne

upon a tour of the British colonies. He hoped that before the present year shall have closed the government and the people of this province will have the opportunity of extending to the heir to the throne, the Duke of York and Cornwall, the hospitalities which we will all delight in extending to one for whom we all have the highest regard.

The address passed unanimously, and Hon. Mr. Tweedie moved, seconded by Mr. Hazen, the address be engrossed, signed by the speaker and transmitted to the lieutenant governor to be forwarded through the proper channels to his majesty.

At 12 o'clock his honor the lieutenant governor came down to the house and after assenting to the bills which had been passed, prorogued the legislature.

Drugging will not cure Catarrh.

Doctors say so. Victims of snuffs, ointments and tablets tell the same story. Catarrh is a germ disease. The germs excite disease in the lungs, throat, nasal passages and bronchial tubes. Germs are hard to get at, but destroy them and you cure the disease. But how can it be done? By carrying powerful medication with the air you breathe direct to the diseased parts. You must be sure, also, that the medication will cure the disease germs. Catarrhazone is guaranteed to do this, that's why it has created such a sensation in the medical world. You simply breathe Catarrhazone; it destroys the germs—it heals—in a word it cures. Now you know everything about Catarrhazone, except what you can learn by using it. Catarrhazone never disappoints and is guaranteed to cure Catarrh. Price \$1.00; Small size 25 cents, at druggists or Polson & Co., Kingston, Ont.

"I am sensible of the honor you do me, Mr. Mitchell, in the proposal of marriage you have just made," said the young lady, with a slight curl of the lip, "but circumstances over which I have no control compel me to decline the honor."

"What are these circumstances?" demanded the young man.

"Your circumstances, Mr. Mitchell."

MARITIME PROVINCE NOTES.

Lieut. Governor McClellan's term of office will expire December 6, 1901.

Mr. Clarence Ward, secretary of the New Brunswick Historical Society, Wednesday forwarded to Lord Minto, for transmission to the king, the resolution passed by the society on the death of Queen Victoria.

Irene, wife of County Court Judge William Wilson, of Fredericton, passed away Wednesday afternoon, after a fortnight's illness of typhoid fever, leaving a bereaved husband, two daughters and one son, and a large circle of sorrowing friends. Deceased was a daughter of the late Alex. Thompson, and a sister of Mr. F. P. Thompson, of that city, Mrs. Geo. Barbour, of St. John, and Mrs. Geo. R. Davis, of Colorado, and she leaves two half-sisters, Mrs. Johnstone and Mrs. Pickard, and one half-brother, Mr. Frank Thompson, all residing in the United States.

On April 30th, 1900, a man by the name of Thomas Tait assaulted Charles London, but managed to evade capture. On the complaint of London a warrant was sworn out for Tait's arrest, but in the meantime he had left the city, and his whereabouts could not be ascertained. The warrant was kept in the police station, in readiness for serving whenever occasion offered, but Tait did not turn up. He left St. John just after committing the assault, and went to Campbellton to work. While there he received a severe injury in a mill, in consequence of which he is now lame and otherwise crippled. Tait returned to St. John a day or two ago and Wednesday night, believing that the matter in which he was concerned had long since been forgotten, applied at the central police station for shelter. But the police had better memories than Tait gave them credit for, and instead of being allowed to leave there Thursday morning, he was formally arrested under the warrant issued a year ago. It is needless to say that Tait was very much surprised at this proceeding and did not fail to express his indignation at such inhospitable treatment.—St. John Star.

Perle Atkinson, son of Mr. C. P. Atkinson, I. C. R. locomotive engineer, Moncton, is a valued member of the North West mounted police, and is stationed at Dawson city in the Yukon country. By late Dawson papers we notice that Constable Atkinson with several others offered for service in South Africa, but now we learn he is not going. Mr. Atkinson is well thought of by his officers, and is one of the best men on the force. Writing to his parents, he said the weather was very cold out there, and that one day he saw a pair of horses drop dead owing to the severe cold. Mr. Atkinson says the man who is to be hung at Dawson next month for murder, is in a frightful frame of mind, is kept in a cage and has to be constantly watched by the police to prevent him from doing away with himself. On several occasions he has tried to commit suicide by tearing open the veins in his arm with his teeth, and also by butting his head against the walls of his cell or cage. He is under sentence of death for having murdered his partner.—Newcastle Advocate.

In the Harrisville Union church on Wednesday evening, April 3rd, says the Moncton Transcript, Miss Edna May Lockhart was united in marriage to Asa W. Magee. The church platform and pulpit were almost hidden by Easter lilies and other foliage. The ceremony was performed by Rev. J. B. Champion. The groom was supported by his brother, Fred J. Magee, and the bride was accompanied by her sister, Lydia M. Lockhart.

The death occurred Friday morning of Samuel L. Skinner, brother of A. O. Skinner. Mr. Skinner was forty-four years of age, and has for the last twelve years conducted business in Brooklyn. He came to St. John about five weeks ago, and was then seriously ill. Death occurred about five o'clock Friday morning from heart failure. Mr. Skinner leaves a wife, three brothers and five sisters. The funeral took place Saturday

from the residence of his brother, A. O. Skinner, 34 Coburg street—St. John Star.

During the past year the business conditions of Sydney have undergone a decided change. The population has increased from less than 4,000 to 15,000, or thereabouts. The value of assessable property has increased from less than \$1,000,000 to nearly \$4,000,000, and this was brought about by the establishing of the steel plant within the town limits.

A man named James Donaldson was found dead in the house of a colored family named McKenzie in Blood Alley, off Duke street, about noon Friday. Coroner Beryman viewed the body and ordered its removal to the dead house. The man was a hard drinker and had been employed around the gas house. He was fifty years old and unmarried. He had no doubt been drinking heavily.—St. John Star.

The Sun's Boston correspondent writes: The following deaths of former provincials are announced: In East Cambridge, March 25, Miss Mary Dwyer, daughter of Mrs. Catherine and the late Edward Dwyer of St. John, aged 46 years; in Roxbury, March 24, Robert Halpin, formerly at St. John; in West Medford, March 25, Mrs. Margaret Maloney, widow of the late John Maloney, of St. John, and mother of Mrs. Joseph Toke, in Somerville, March 27, Margaret O'Keefe, formerly of St. John, where interment occurred; in Milford, March 26, William Henry Britton, contractor and builder, native of Westfield, Kings county, aged 62 years; drowned in the Churchill River, near Carratunk, Me., March 25, Walter A. Mitchell, lumberman, native of New Brunswick, in this city; March 23, Mrs. J. Watson Fraser, wife of the sporting editor of the Halifax Herald, and daughter of Samuel Caldwell of Halifax, aged 30 years; in Malden, March 26, James W. Stevenson, aged 72 years, leather manufacturer, native of Denmark, N. S., where interment occurs.—St. John Sun.

Deals are so low just now that there is no demand for logs at anything like paying price. It is said that some operators, including Mr. Lynch, will not drive their logs this spring, but leave them on the landings.—Chatham World.

The steamer Lake Ontario arrived at Halifax Thursday morning with nearly seven hundred passengers; twenty were suffering from measles and sent to quarantine. A number of returning soldiers are also on board, who left Thursday afternoon for the west.

One of the most important discoveries of coal made within recent years in Cape Breton was made last week at Black Rock, Mira, twelve miles from Sydney. Prospecting has been carried on for some time on the areas bounded at the place by the Rev. John Murray, late of Shubenacadie, T. C. Harold and John McGowan, of Sydney, but not until this week was a workable seam discovered. Two or three seams were reached by boring, but these were not of sufficient thickness. The one in question is five feet in thickness and the coal has been proven to be of excellent quality. Further prospecting is being conducted with a view to ascertaining whether the seam varies in thickness. Should this seam be developed, as no doubt it will, Sydney before long will be the centre of coal mining operations of no mean importance.

The coroner's jury in the case of Weatherbee, the man found under a car at Moncton on Wednesday night brought in a verdict to the effect that the deceased came to his death by being run over while attempting to get either on or off the train, and that no blame attached to the I. C. R. or any person. The colored youth, Dickson who came from St. John on Wednesday was able to show that he had nothing to do with the case.

A company has been formed in Digby to construct an artificial bathing pond, affording about 30,000 square feet of swimming surface and capable of being refilled daily. The same company will also provide golf links for the town of Digby. Lands will be leased for this purpose at the south end of the town. Another company is being formed to erect a steam laundry.—Yarmouth Herald.

DOMINION EXPERIMENTAL FARMS.

UNIFORM CO-OPERATIVE DAIRY HERD TEST RECORD

The attention of Canadian farmers interested in the development of Canada's greatest industrial factor, the Dairy Herd, is drawn to the following letter, recently sent out to a few farmers in each province of the Dominion:—

"Central Experimental Farm, Ottawa.

Dear Sir,

Your name has been handed to me as that of a farmer who is particularly interested in the production of milk. It is a well known fact that the great majority of dairy herds if we may judge by cash returns alone, are losing investments. It is, however, certain that this need not be the case if sufficient care and intelligence are exercised in selecting and feeding the cows intended for milk producers. So, in order to be able to work more effectively toward improvement along this line, I am desirous of securing some exact information as to the methods of feeding followed in different parts of Canada. I should, therefore, be much indebted to you if you would write me briefly upon the following points:—

- 1—Kind and quantity of roughage ration fed to your milking cows in winter.
- 2—Kind and quantity of grain fed your milking cows in (a) Summer, (b) Winter.
- 3—Quantity of milk yielded per cow yearly.
- 4—Do you use pure-bred bull? What breed?
- 5—What use do you make of by-products (whey, &c.) if you have any?

Would you care to carry on a simple dairy herd test during 1901 in conjunction with dairymen in different parts of Canada and us here? The only expense would be a spring balance for weighing the milk. We would furnish you with blanks each month for keeping the records. If Canadian dairymen are to raise the average yield of their herds and makes a profit it must be by first finding out what their individual cows are doing. If the cow is not paying her keep and leaving a good profit for the dairyman, either the cow is no good or the dairyman is not feeding her properly. If you are really interested in the dairy business and care to go into a co-operative test as mentioned above I should be pleased to send you further particulars re the same. In any case, I should like to hear from you on the aforementioned points.

Yours very truly,
J. H. GRISDALE,
Agriculturist."

The replies elicited by this letter were of such a character as to indicate the advisability of making the matter more public. With such an end in view, the foregoing is given for publication.

It is hoped that many of our dairy farmers may see the importance and necessity of keeping such records as are suggested, and that they may think it advisable to join in this Co-operative Dairy Herd Record or Test.

Any farmer interested may obtain full particulars by addressing:—"THE AGRICULTURIST EXPERIMENTAL FARM OTTAWA." All letters so addressed are carried POST FREE.

Strength and Endurance

Are factors of the greatest success.

No person can do full justice to himself without them.

In no season of the year are they more easily exhausted than in the spring.

We need not discuss the reason for this here. It's enough to say there is one, and that Hood's Sarsaparilla gives strength and endurance, as thousands annually testify.

A certain Benedict was in the habit of troubling his father-in-law with complaints about his wife's behavior.

"Really, this is too bad," cried the irascible old gentleman one day, on hearing of some of his daughter's delinquencies. "If I hear any more complaints I will disinherit her."

There were no more.

HAWKER'S TOLU OF WILD CHERRY BALSAM.

The Surest Cough and Cold Cure.

Price 25 and 50 Cents Per Bottle.

ALL DRUGGISTS SELL IT.

BE SURE AND GET IT.

Geo. Phillips I. C. R. ticket agent, says: I was completely cured of influenza cold by Hawker's Tolu.

H. A. McKeown, M. P. P., says: I have used Hawker's Tolu for the last 8 years. It is the best cough cure.

Thomas McAavity says: I have used Hawker's Tolu in my family for over 8 years and find it an excellent remedy for coughs and colds.
