TRURO BOY AROUND THE WORLD.

KARL CREELMAN HAS ARRIVED AT HULL ENG.

The Hull, Eng., Daily News recently says:—

Mr Karl M. Creelman, the young Nova Scotian who is making a cycling tour round the world, passed through Hull yesterday and was interviewed by a News representative. He arrived in Hull on Monday from Egypt, having worked his passage on a trading vessel.

Mr. Creelman is a sturdy young fellow of 23 years, and, questioned by our representative, said he started from his native town of Truro, Nova Scotia, on the 11th of May, 1899, his object being, as he put himself, "to have a look round and gain a bit of experience." Having commenced his journey, he struck off through New Brunswick, Quebec, Ontario, the city of Detroit, Michigan, on to Chicago, up to Lake Milwaukee, right across the State of Wisconsin to the Mississippi River, to Ohio, striking off in the direction north from Minnesota, and came across Canada over the prairies along the side of the Canadian Pacific Railway, walking the passes, and at last reached the Rocky Mountains. Here he had, to use his own words, a very lively time, having to walk 300 miles through continuous snowstorms, and waded ten streams in one afternoon, being lost and found with some regularity. Emerging from this dangerous locality, he struck off through Washington down to the borders of the Oregon State on to Puget Sound, Tacoma, along the coast to Vancouver. "And then," he continued, "I had finished with America." He then tried to get a ship on which to work his passage to China or Japan, but being unable to do so, went on board an Australian vessel, signing on as an ordinary seaman. After a three months' passage he arrived in Melbourne on the 1st of March, 1900. Here he cycled up to North Queensland, right across the vast continent, and tried again for a China vessel. Being unsuccessful, he wheeled back to Newcastle and got a ship for Ceylon. After a tour around Ceylon he shipped again to Calcutta, and cycled through the country 800 miles to Benares, and here he became a victim to malarial fever and was an invalid for three months. Having recovered, he started west for Bombay on the 18th February, 1901. Shipping again, he went on to Port Said, Egypt, and next through to Cairo and down along the river Nile to Alexandria, having to walk most of the way, the road being terribly bad. From Alexandria he worked his passage over to Hull. "And here I am," he concluded.

"But you have not finished yet?" our representative remarked.

"Oh, no," replied Mr. Creelman; "I leave Hull to-morrow for the north of Scotland, and shall come down to London, calling to see the Glasgow Exhibition and then go on to Dover and on to the Continent, I wish to go through Germany, Switzerland, Bavaria, Italy, and up again

through France, come on to Dover, cycle again through to Cardiff, ship to the south of Ireland and then go right up to the north of Ireland, come back to Liverpool and home via Halifax."

"What is my mode of living? Well, I neither smoke nor drink, live plainly, don't eat too much; and the fresh air ensures good health. I have gained two stone in weight since I commenced my tour."

"Any exciting incident en route?"

"The chief one was in Western Canada, where I was chased by a herd of wild cattle, but a couple of cowboys saved me in the nick of time for both my tires had burst on the cactus and I was riding on rocky soil on my rims. It was a narrow escape," wiping his brow, "but I never lost heart, though I thought my tour was to have an early and rough termination."

"Any others? Well, a brush or two with prairie wolves and a mis-adventure with a beastly cow in Wisconsin. I yelled at it because it was in my way; it started up, and before I noticed that it was tied to some fence, the rope becoming taut, I was precipitated about seven yards on my face.

"How many miles? Well, I have cycled up to date 11,000 miles, with 1,300 miles on foot, and 31,000 miles by sea. This is my third suit of clothes and ninth pair of boots. My bicycle is a Red Bird, Canadian make and I have used that all through, with scarcely any mishap, with the exception of punctured tires. I have worn out three sets of tires. I carry 45 lbs. on the bike—change of suit, etc.

"How do I manage to get along? I lecture here and there, and in the States I sold silver polish. I expect to reach home, after finishing my tour, in November this year."

Warts are Unsightly

That is the reason that no one is clamouring for a few more warts—make them fashionable and a remedy to grow warts would quickly be made a financial success. Yes, Putnam's Corn and Wart Extractor removes them, works quickly and without pain—any druggist will tell you more about this remedy.

A STUDENT.

First Beggar—Why didn't you tackle that lady? She might have given you something!

Second Beggar—I let her go because I understand my business better than you. I never ask a woman for anything when she is alone; but when two women are together you can get money from both, because each one is afraid the other will think her stingy if she refuses. This profession has to be studied just like any other if you expect to make a success of it—see?—New York World.

Children Cry for
CASTORIA.

CONSTIPATION

Permanently Cured and all its Ill Effects Removed by
Burdock Blood Bitters.

If you've suffered from constipation for years, tried all the remedies you ever heard of or read of, without getting more than the relief the one dose of the medicine afforded—if you've been subject to all the miseries associated with constipation, such as sick headache, nausea, biliousness, pimples, eruptions, blood humors, blotches, piles, etc., wouldn't you consider it a blessing to be cured of your constipation so that it would stay cured?

Burdock Blood Bitters can cure you—cure so that the cure will be permanent. It has done so in thousands of cases during the past twenty years.

Just one statement to prove what we say is right.

Mrs. G. Gasby, Portage La Prairie, Man., writes: "For over two years I was troubled with sick headache and constipation. I tried many different pills and patent medicines, but they only gave me slight, temporary relief.

"A lady friend of mine induced me to try Burdock Blood Bitters, and sent me half a bottle of it to start with. I derived so much benefit from that that I continued to use it, and took in all three bottles, which completely cured me.

"That was ten months ago, and as my health has been splendid ever since I have only my kind friend to thank who advised me to take B.B.B."

THE WORLD OVER.

LONDON, May 16.—King Edward, who was born on November 9th, 1841, has decided that his birthday be celebrated on May 24th each year, thus continuing the holiday by all public departments on Queen Victoria's birthday and giving an impetus to the colonial movement to observe the date as Empire Day.

NEW YORK, May 17.—The body of a man found late last night in Ninth avenue has been identified at Rev. Dr. Edward S. Phillips, of St. Gabriels Church, Hazleton, Pa., who recently had a conference with J. Pierpont Morgan in reference to threatened strike in the iron and coal regions of Pennsylvania. Kirk Stanley, a message operator in whose room the body was found, is under arrest, as a suspicious person. A great air of mystery surrounds the case. Decomposition had advanced so far when the body was discovered that the coroner's examination was not sufficient to reveal the cause of death, and an autopsy be held.

HUNTINGTON, W. Va., May 17.—A severe earthquake was felt here about 2 a. m.

ZANESVILLE, Ohio, May 17.—A slight shock of earthquake was felt here at 1 a. m.

FRONTON, Ohio, May 17.—An earthquake shock was felt here about 1 a. m. It passed directly west to east. A succession of violent undulations, almost merged, lasting thirty seconds. Many residents were aroused, and not a few were nauseated by the rocking motion of the earth.

WELLSTON, Ohio, May 17.—A most pronounced earthquake was felt here at 3 a. m. to-day. The first disturbances of sufficient force to awaken many persons. It was followed by two hard confusion tremors of the earth that displaced furniture in many houses.

NEW YORK, May 17.—Detective Timothy J. Desmond, of Brooklyn, to-day was found guilty of manslaughter in the first degree with a recommendation to mercy, for the fatal shooting of James McMullen in the latter's home at Bath Beach on Dec. 16th last. On the morning of the shooting Desmond was on his way home which was located opposite to the home of the McMullens. Reaching the McMullen gateway he found McMullen seated on the front stoop apparently asleep. He awakened him and accused him of being there wrongfully. There was a fight and during this McMullen was killed. Desmond's defence was that the shooting was accidental.

FRANKFORD-ON-THE-MAIN, May 17.—Princess Frederick Charles of Hesse gave birth to twin sons Tuesday morning.

This is the second time Princess Frederick Charles of Hesse has become the mother of twin sons. She is the youngest sister of the German Emperor and only twenty-nine years old. Her mother is the Dowager Empress Frederick, the eldest daughter of Queen Victoria of England.

She was married on January 25, 1893, to Prince Frederick Charles of Hesse, who was born in 1869. On November 23 of the same year she bore him his heir, Prince Frederick William, and on October 24, 1894, she bore Prince Maximilian. It was on November 6, 1896, that Prince Philip and Prince Wolfgang Maurice were born to her.

The father of these two pairs of twins is the younger brother of the Landgrave of Hesse, Prince Alexander Frederick whose heir presumptive he is, the Landgrave being thirty eight years old and unmarried.

The Princess's eldest brother, the Ger-

man Emperor, has been married twenty years and has seven children.

Her eldest sister, Princess Charlotte wife of Hereditary Prince Bernhard of Saxe Meiningen has one daughter after twenty-three years of marriage.

Her second brother, Prince Henry of Prussia has three sons after thirteen years of marriage.

Her second sister, Princess Victoria, wife of Prince Adolph of Schaumburg-Lippe has been married eleven years and has no children.

Her third sister, Princess Sophie was married in 1899, to the Duke of Sparta heir to the throne of Greece, and has one son and two daughters.

SAN FRANCISCO, Cal., May 17.—The life of Mrs. McKinley was still in the balance at an early hour to-day and the attending physician could give no more assuring information than that her condition was unchanged. There had been some improvement during the hours before midnight and the anxious watchers were filled with hope, though fearful of a relapse. The patient's vitality was at its lowest ebb during the early morning and not until the critical time should pass could the physicians offer any word of cheer. Should there be no sinking spell to-day and the slight gain of strength noted last night be maintained it was considered possible that there might be a gradual return to health.

However, the doctors would not express anything stronger than a hope that Mrs. McKinley might recover sufficiently to admit of her removal to her home, and did not declare with any confidence. At intervals Mrs. McKinley has been conscious and has recognized her husband, who has remained almost constantly at her side. He is bowed with sorrow and his careworn expression is noticeable to all who see him during his brief walks in Lafayette park opposite his temporary home.

LATER.

SAN FRANCISCO, Cal., May 17.—8 45 a. m.—Mrs. McKinley's condition is so much improved that her physicians will not have another consultation until 8 p. m.

ALBANY, May 18.—President Sheehan, of the Albany union of striking car employees of the United Trancion Co. is authority for the statement that the Troy union has accepted the propositions made by the Albany union and agreed to by the United Trancion Co., and the lines in all the five cities will be running by 12 o'clock with the old men on.

Later—The strike has been officially declared off.

MUNCIE, Ind., May 18.—Ten young men organized a club to restrict "going with girls." The following rule is adopted:

"Each member of this club will be allowed to go with the same girl but once within a period of two months, or six times a year. He may have as many girls as he chooses, but during the two months must go with a new one each time he desires girl company. No member will be allowed to marry within two years after he is initiated."

Now it is the girls' turn. They talk of a boycott. When a member of the club comes around to make his bi-monthly call he will meet a cold reception.

WILLIAMSON, W. Va., May 18.—The trial of the young lawyer, S. D. Stokes, for the murder of the Rev. J. J. Woolh, was ended, when the jury brought in a verdict of not guilty.

The tragedy was remarkable. Woolh was a Presbyterian preacher of great force, and in a sermon last winter violently denounced some of the people of the town for dancing. Stokes took offense at the sermon, but the next Sunday the remarks were repeated.

The following evening Stokes and Woolh met at the door of Woolh's house. Hot words passed. Mrs. La Noive, the minister's housekeeper, to whom Stokes was talking and who was the only witness, says Woolh slapped Stokes in the face and shot him in the hip. Then Stokes drew his pistol and fired twice, killing Woolh instantly.

Stokes is popular and a prominent politician. He has been out on bail all the time.

In consequence there was great difficulty in getting a jury. Only one man was found without a fixed opinion when the entire panel was exhausted.

Stokes was put on the stand and told a clear story of the shooting. The widow of the dead minister was present during the recital.

SUDDENLY ATTACKED.

Children are often attacked suddenly by painful and dangerous Colic, Cramps, Diarrhea, Dysentery, Cholera Morbus, Cholera Infantum, etc. Dr. Fowler's Extract of Wild Strawberry is a prompt and sure cure which should always be kept in the house.

NO WONDER SHE WAS ANGRY.

"The thief thoroughly ransacked the house," said a Hutchinson paper, "but failed to find anything of value." And the next day the lady came furiously into the office and told the editor that she had as many things of value in her house as anybody—so there, now!—Kansas City Journal.

\$5,000 Reward!
IF NOT TRUE.

An advertisement may induce a person to try an article a **FIRST** time. But an advertisement won't induce a person to use that article a **SECOND** time unless it gives satisfaction.

Sunlight Soap

has a sale larger than the combined sales of any other three soaps.

An advertisement may induce people to try **SUNLIGHT SOAP** once.

But it is **quantity and quality alone**, that makes people use **SUNLIGHT SOAP** continuously and always.

FACTORIES MAY COME TO CANADA.

LONDON, May 17.—Numerous American factory promoters have arrived in London to urge British manufacturers to transfer their plants to Canada. They state that Canada is developing so rapidly that thousands of Americans are emigrating thither from the United States. Lord Strathcona, Canadian High Commissioner in London, said in a recent interview:

"Unprecedented numbers of Yankees are crossing the border to cast their lot with us Canadians. We welcome them most cordially, for they bring the very qualities we need—brains, vigor and grit. Many of them hail from the Far West, where they have already experienced conflicts with nature.

"Canada's undeveloped forests, farming lands, and mineral fields hold out to these frontiersmen not only the prospect of profit, but also of a life that meets the requirements of their adventurous natures.

"I am glad that some of these energetic and ingenious Americans, who have done so much to stud the plains of the United States with prosperous cities, are turning their attention to the development of Canada. Several of them, I understand, have come to London, to encourage the investment of British capital in North America. We welcome their efforts and also extend a cordial invitation to monied Americans to pre-empt the great industrial opportunities of Canada, if they can.

"Our country does not shudder at the name of Morgan, or at the word 'trust.' We fear no combinations of capital. On the contrary, we welcome enterprise, and money, whencesoever they come.

"We are loyal Canadians and Britishers, but we believe in competition, and do not shrink from the law of the survival of the fittest. America's onslaught on Atlantic shipping gives us no sleepless nights. Here again we expect friendly rivalry to promote a lively and healthy condition of commerce."

THREE ST JOHN MEN CRUSHED TO DEATH.

ST. JOHN, May 18.—The collapse of the large chimney of E. D. Jewett & Co.'s saw mill at Millidgeville yesterday was the cause of the loss of three young lives, the bread-winners of three families, and necessitates the recording of one of the saddest tragedies in the industrial history of St. John. Those whose battered bodies were recovered from the vast heap of debris after the accident, were W. J. Price of this city, aged 32, leaving a wife and two children; Geo. McClusky, of Millidgeville, the support of an invalid father and mother, and Charles Wilson, aged 21, of the same place, the bread-winner for his mother and six sisters. Robert Logan, Nesbet and Henry Codner, employes of the mill, who were assisting in the work on the chimney, escaped death as by a miracle with only a few superficial cuts and bruises.

The accident occurred about half-past three in the afternoon, and the report, more or less garbled, rapidly spread over the town. The evening papers issued extra editions with fragmentary reports and many excited citizens flocked toward the scene of the fatality by every available method of transportation. Drs. W. F. Roberts, D. E. Berryman and William Christie, jr., who were summoned, were hurriedly on the spot and did what they could to minister to the injuries. While driving out with E. L. Jewett, who was in the city at the time, Dr. Berryman was thrown from the carriage on Main street and severely bruised.
