"In the fall of 1899 I was troubled
with a severe pain in the back. I
could scarcely get up out of a chair
and it gave me great pain to move
about. I took one box of Doan's
Kidney Pills and was completely
cured. I have not been troubled
with it since."

TRAIN HELD UP.

ROBBERS ATTACK THE GREAT NORTHERN
RAILWAY.

St. Paul, Minn., July 4.—A despatch
from Havre, Montana, gives an account of
a hold-up on the Great Northern Railway
on Wednesday night, and the names of
the persons shot by the robbers. The in-
jured:

Gertrude M. Smith, of Tomah, Wis., a
passenger who leaped from a window, re-
ceived a bullet through right arm, but
was not seriously hurt.

Mr. Douglas, of Clancy, Mont., travel-
ling auditor for the Montana division of
the Great Northern; shot through left
arm near shoulder.

Brakeman Whiteside, of Havre, Mont.;
shot through right arm near shoulder
shattering bone; seriously injured.

As the Great Northern Flyer, train No.
3, was leaving Malta, Conductor Smith
noticed what he supposed to be a tramp
on the front end of the mail car next to
the engine. He tried to drive him off
after the train started, but the man pulled
a revolver and said he had better go back
or he would shoot. The conductor re-
turned to the coaches.

The robbers, three in number, stopped
the train later, and commenced firing,
with the result stated above. They then
blew up the express car and started south
for the little Rockies. The amount taken
is not yet known here.

Upon receipt of the news, a reward of
\$5,000 in gold for the apprehension of the
robbers was at once posted by the Great
Northern officials. The large amount of
the reward offered is taken as evidence
that the booty was heavy, but the exact
amount taken has not been given out.
News of the robbery and the reward was
wired to all the principal points on the
line and the police and detective force in
all the important points in the Western
territory were notified.

The Universal Cry—Wanted, a Man.

Never did the world call more loudly
for young men with force, energy and
purpose, young men trained to do some
one thing, than today. Though hun-
dreds of thousands are out of employ-
ment, yet never before was it so hard
to get a good employee for almost any
position as today. Everywhere people
are asking where to find a good serv-
ant, a polite and efficient clerk, an honest
cashier, a good stenographer who
can spell and punctuate and is gener-
ally well informed. Managers and super-
intendents of great institutions every-
where are hunting for good people to
fill all sorts of positions. They tell us
that it is almost impossible to find effi-
cient help for any department.

There are hundreds of applicants for
every vacant place, but they either
show signs of dissipation, are rude or
gruff in manner, are slouchy or slip-
shod in dress, are afraid of hard work,
lack education or training or have some
fatal defects which bar them out. Even
if they are given positions very few are
able to hold them, and so this great ar-
my of tramps about from store to store,
from office to factory, wondering why
others succeed when they fail, why others
get the positions when they are de-
nied.

The head of one large commercial es-
tablishment says that the blunders and
mistakes of its employees cost \$25,000 a
year to correct, notwithstanding his
utmost vigilance.—Success.

Food of Prehistoric Man.

Upon examining some skulls dating
back from the stone age Mr. Charters
White, M. R. C. S., noted that several
of the teeth, although quite free from
caries, were thickly coated with tartar.
It occurred to him that it would be
possible by a rough analysis to identify
any particles of food that might be im-
bedded in this natural concrete and so
reveal the character of the aliment
partaken of by prehistoric man. Dis-
solving the tartar in a weak acid, a
residue was left which, under the mi-
croscope, was found to consist of corn-
husk particles, hairs from the outside
of the husks, spirals of starch, the point
of a fish tooth, a conglomeration of oval
cells probably of fruit, the barbellets of
down and portions of wool.

In addition to this varied list were
some round red bodies the origin of
which defied detection and many sandy
particles, some relating to quartz and
some to flint. These mineral fragments
were very likely attributable to the
rough stones used in grinding the corn
and would account for the erosion of the
masticating surfaces, which in
many cases was strongly marked. This
inquiry into the food of men who lived
not less than 4,000 years ago is a mat-
ter of great archaeological interest.

Poor Opera Glasses.

"Cheap opera glasses are an abomi-
nation," said an eye specialist recently.
"There is no doubt about this. I have
made a special study of the matter.
Lots of eyes are nearly ruined by them.
I find this particularly true of young
girls who go a great deal to the theater
and who seem to think they must have
opera glasses. To their way of think-
ing an opera glass is an opera glass,
and that's all there is to it. So they
buy cheap ones and then wonder why
they have such headaches."

"Unless the very best lenses are used
I should advise everybody to taboo op-
era glasses. The farther from the stage
one is the better and more perfect the
glasses should be. Exactly the reverse
of this is actually the case, for the peo-
ple who sit in the rear seats or in the
balcony are usually the ones who have
the poorest glasses. A performance
viewed with the naked eye is much
more satisfactory, to my way of think-
ing. An opera glass gives but a limited
view, and only the one object on
which it is focused is visible. I don't
see why people use even the best of
them."

The Minister Won.

A minister was one day walking
along a road, and, to his astonishment,
he saw a crowd of boys sitting in front
of a ring with a small dog in the cen-
ter. When he came up to them, he put
the following question: "What are you
doing to the dog?"

One little boy said, "Whoever tells
the biggest lie wins it."

"Oh," said the minister, "I am sur-
prised at you little boys, for when I
was like you I never told a lie."

There was silence for awhile until
one of the boys shouted, "Hand him up
the dog!"—London Leader.

Over In Sweden.

"Over in Sweden the suburban rail-
way lines have to provide a freight
car for intoxicated persons."

"I don't suppose they label it that
way, do they?"

"I don't know. Probably they brand
it either 'Spirits in packages' or else
'Hardware.'"

"Hardware?"

"Yes. Skates."

Dickens' Supremacy.

"So this, then, is your husband's new
library. Mrs. Muchbrox? Ah, I see he
has Dickens and Thackeray side by
side. Which do you consider the great-
er of the two?"

"Oh, my, Dickens! Joshua paid \$2.40
more for them Dickens than he had
to give for Thackeray's books right at
the same shop."

The pain produced by a hornet's
sting is caused by a poison injected in-
to the wound, and so instantaneous is
its effect as to cause the attack of this
insect to resemble a violent blow in the
face.

THE COMMONEST OF
ALL TROUBLES.

**Dodd's Kidney Pills are
used more for Back-
ache than for any
other Kidney Af-
fection.**

Bright's Disease not so Frequent of
late Years—Dodd's Kidney Pills Un-
doubtedly the Cause—Diabetes also
far less Prevalent.

MATANE, Que., July 8.—(Special)—
Not only in this neighborhood but
throughout the Province of Quebec there
is a marked decrease noticeable in the
number of cases of Bright's Disease, re-
ported. This fact is undoubtedly due to
the wide use of Dodd's Kidney Pills in
the earlier stages of Kidney Disease.

Bright's Disease at one time was the
cause of a large proportion of the deaths
in this province. It was considered in-
curable and until Dodd's Kidney Pills
were introduced it was incurable. Not
so, however, now. Dodd's Kidney Pills
have almost wiped the disease out. Nor
is Diabetes heard of now to any great ex-
tent.

The most common form by which Kid-
ney Disease manifests itself is Backache,
and here Dodd's Kidney Pills are doing
their most active work. They are recog-
nized as the surest and quickest cure for
Backache ever invented. They work on
the sound principle of going to the root
of the trouble—the Kidneys—wherein
they differ from all other backache medi-
cines except imitations of Dodd's Kidney
Pills. They do more than merely re-
lieve. They positively and permanently
cure, as thousands of people are ready to
testify.

O. Dionne, a well-known resident of
Matane, says, "Dodd's Kidney Pills have
made a grand success in curing me of
Backache and I recommend everybody to
keep them in the house. They are a
wonder as a remedy for Backache and
Disease of the Kidneys."

EASING THE CHEST.

It is the cold on the chest that scares
people and makes them sick and sore.
The cough that accompanies the chest cold
is racking. When the cold is a hard one
and the cough correspondingly severe,
every coughing spell strains the whole
system. We feel sure that if we could
only stop coughing for a day or so we
could get over the cold, but we try every-
thing we know of or can hear of in the
shape of medicine. We take big doses of
quinine until the head buzzes and roars;
we try to sweat it out; we take big draughts
of whiskey, but the thing that has its grip
on the chest hangs on, and won't be shaken
loose.

If the irritation that makes us cough
could be stopped, we would get better
promptly, and it is because Adamson's
Botanic Cough Balsam is so soothing and
healing to the inflamed throat that it is so
efficient a remedy for coughs and colds.
This really great medicine is a very simple
preparation, made of extracts of barks
and gums of trees, and it never deceives.
It heals the throat and the desire to cough
is gone. When the cough goes the work
of cure is almost complete. All druggists
sell Adamson's Balsam, 25 cents. Try
this famous Balsam for your sore chest
and you will find prompt relief.

A CHARACTER TO SUSTAIN.

Bunker—Why don't you take a short
cut to work?

Casey (with pick and shovel)—Shure,
there is no short cut except across the
Country club's grounds.

Bunker—Well, we wouldn't mind that.
Casey—Faith, Oi would thin. D'ye
think Oi want to be took for a goluf
player?
