THE HEVIRE ENCHANGED IN ILLANDAM THE STEEL

DOMINION NEWS.

MONTREAL, Dec. 29 .- Application has been made to Parliament by Louis Berier, of Montreal, for the incorporation of the Canadian Lloyds, an ocean marine and inland insurance company, for the purpose of permitting every vessel leaving the St. Lawrence route in autumn to be insured at a lower rate than those which have of late prevailed. Several steamships during the past season had to leave port without having any insurance, underwriters having refused to take the risk. The formation of this company will do away with this disadvantage to the port. The backbone of the syndicate is the Clergue Company, of Soult Ste. Marie, which, with Montreal capitalists, will form a new Lloyds company. The company also ask power to operate ice-breaking steamers to keep the channels clear of ice, so that ships can leave Montreal much later in the season than at present. The capital of the new company will be \$5, 000,000. The organization of the Canadian Lloyds was first snggested by discrimination by British Lloyds against the St. Lawrence route during the past two

PRETORIA, Dec. 30, 7.50 a. m.-Lyttleton reports that the outpost at Helvetia was captured yesterday morning by the Boers. About 50 were killed and wounded; 200 were taken prisoners. Lyttleton reports that he is following with a small force in the track of the enemy, Helvetia being occupied by Reeves who has been reinforced from Belfast. Helvetia was a very strong position on the Machadorp-Lydenburg railway and was held by a detachment of the Liverpool regiment. I am asking further information."

THE DRESS MODEL.

Pineapple silk, which is always a favorite summer material with the French, is this season made up into some very attractive gowns.

Large collars of fine batiste in sailor shape, with long, slender shawl points that reach to the belt in front, are added to the open jackets and waists of many of the fashionable gowns of transparent

Many of the newest insertion bands are extra wide, and some of the Lyons woven designs have unevenly curved edges, making a rather new finish for the outlines of jackets, skirts, overdresses and capes of silk or net.

New weaves in crepe de chine and chiffon are especially craped for summer mourning toilets and costumes. These materials are made up as a rule without heavy foundation slips, light weight but closely woven taffeta, jet black being Hemstitched ruflles, with or without

WORLD WIDE.

WEEKLY REPRINT OF ARTICLES FROM LEADING JOURNALS AND REVIEWS RE-FLECTING THE CURRENT THOUGHT OF BOTH HEMISPHERES.

As many of the ablest writers are now engaged in journalism, much writing of the highest quality in matter and style is fugitive, seen only by the readers of each particular newspaper, and by them often lest before it is read. Much of such writing is only of local a d very transient import, but much is of more permanent and world wide interest. It is proposed to fill the pages of the world wide with articles and extracts of this latter class, with occasional selections from notable books and scenes from striking stories An'effort will be made to select the articles each weekso that due proportion will be given to the various fields of human interest to the shifting scenes of the world's great drama, to letters and science and beautiful things

It was at first intended to put lish World Wide upon fine paper at a high cost, but recalling the long list of elegant publications which in the past have been started in Canada, only to fail, and reflecting that good taste in literature does not always imply the means to pay for costly journals. and that people of taste can be relied upon to appreciate literary excellence on the plainest sheet, It has been decided to offer World Wide at the lowest possible price, in order to give all who desire good reading an equal opportunity.

Ancient Chains.

In an interesting article on the subject of chains an English writer points to the fact that notwithstanding the frequent mention of chain in the Bible the article is comparatively new The same author says

"Some authorities give the Britons credit for originating the cable chain because Julius Cæsar is recorded as having been unable to cut the cables of the Gaul's vessels. 'as they were made of iron. This may have been a chain in the present acceptation of the term. but it is doubtful, because the first patent for chainmaking was obtained in England in 1634 by a blacksmith named Philip White. The patent was for 14 years, and in consideration of it White had to pay £5 in lawful money yearly 'at the Exchequer, Westminster, att the Feast of the Blessed Virgyn and Saint Michell the Archangell by even and enal process.

"His patent is described as follows 'A way for the wearing of shipps with iron chaynes by finding out the true heating (pre)pareing and tempering of lyron for that (pur)pose and that he hath nowe attayned to the true vse of the said chaynes and that the same wilbe for the great saveing of cordage and safety of shippers and will redound to good of our Comon Wealth.

Early French Theaters.

The French theater owes its origin to the religious exhibitions given by the pilgrims on their return from Palestine At these exhibitions the pilgrims gave an account of the Holy Land and recited their own adventures. They were afterward imitated by those who had never been to the Holy Land To these succeeded dramatic representations of subjects taken from the new text. which, being forbidden by the provost of Paris, the priests of France invited the king to be present at an exhibition to prove that they were calculated to excite religious feelings.

The building in which those plays were produced was divided into three scaffoldings-the highest represented paradise, the second the world and the lowest, which was in the form of a dragon's head represented hell. The only entrance to the two upper scaffold ings was through the dragon's head.

The actors never left the stage, even to change their dress, and the plays were so long as to require several days for their completion. At the close of each evening the audience was invited to return until the whole were finished. sometimes 40 nights.

The Power of a Cyclone.

Careful estimates of the force of a cyclone and the energy required to keep a full fledged hurricane in active operation reveal the presence of a power that makes the mightiest efforts of man appear as nothing in comparison. A force fully equal to 473,000,006

horsepower was estimated as developed in a West Indian cyclone This is about 15 times the power that is creatable by all the means within the range of man's capabilities during the same time.

Were steam, water, windmills and the strength of all men and all animals combined they could not at all approach the tremendous force exerted by this terrible storm

A Barnum Surprise.

A good story of the late George Augustus Sala and Barnum is told It was on the occasion of the last visit of the famous showman to England, when a public dinner was tendered to Mr Barnum Mr Sala presided In the reception room, where all were waiting to welcome the guest of the evening. Mr. Barnum came in beaming, and, shaking hands with the chairman, said

"This is indeed a surprise to me." "Did you hear that?" Mr. Sala whispered. "Why, he arranged for the dinner himself.
