Dr. William Roberts in his interesting lectures on the digestive ferments writes: "Our practice in regard to the oyster is quite exceptional and furnishes a striking example of the general correctness of the popular judgment on most the only animal substance which we eat habitually and by preference in the raw or uncooked state, and it is interesting to know that there is a sound The T. this preference. "The fawn colored mass which constitutes the dainty of the oyster is its liver, and this is little less than a heap of glycogen. Associated with the glycogen, but withheld from actual contact with it during life, is its appropriate digestive ferment, the hepatic diasbodies together, and the glycogen is at once digested without other belp by its own diastase.

"The oyster in the uncooked state or merely warmed is. in fact, self digest ive. But the advantage of this provision is wholly lost by cooking, for the heat immediately destroys the associated ferment, and a cooked oyster has Feb. 3rd, 1901. to be digested, like any other food, by the eater's own digestive powers."

Newell, who had the rare distinction of being governor of two states-New Jersey and Washingtontold in Success of his romantic experiences as a congressman in 1849, when he originated the life saving service by offering a resolution in the house of representatives to appropriate money to save lives imperiled by the sea. Fellow members of congress at that session were John Quincy Adams and

Abraham Lincoln. Mr. Newell said: "Various objections were made to my motion, the strongest of which was that the scheme was impracticable. I laid the matter before a great many senators and members, speaking to them in person. Ex-President John Quincy Adams occupied a seat just behind mine and after the reading of the resolution clerk leaned forward and said to me, 'I would like to see that resolution.' I sent for it and handed it to him. He read it over carefully and, handing it to me, said, with a smile: 'It is good. I hope it will prevail.' Abraham Lincoln also read it and said: Newell, that is a good measure. I will belp you. I am something of a life saver myself, for I invented a scow that righted itself on the Mississippi sand bars."
