

RAILROADS.

INTERCOLONIAL RAILWAY

On and after Sunday, Oct. 20th, 1901 trains will run daily (Sunday excepted) as follows:—

LEAVE KENT JUNCTION. Express for Moncton and St. John...11.32 Express for Newcastle and Campbellton...13.05

Vestibule Sleeping and Dining Cars on Through Express trains between Montreal and the Maritime Provinces.

All trains are run by Eastern Standard Time. Twenty-four Hour Notation.

D. POTTINGER, General Manager.

Railway Office, Moncton, N. B. 16th Oct., 1901

KENT NORTHERN RAILWAY.

TIME TABLE.

Table with 3 columns: Time, Station, and Time. Rows include 9.30 Dept. Richibucto, Arr. 14.50; 9.45 Rexton, 14.35; 10.00 Mill Creek, 14.15; 10.15 Grumble Road, 14.00; 10.20 Molus River, 13.55; 10.40 McMinn's Mills, 13.35; 11.00 Arr. Kent Junction, Dept. 13.15

Trains are run by Eastern Standard time.

Trains run daily, Sunday excepted. Connect with I. C. R. accommodation trains north and south.

WILMOT BROWN, General Manager and Lessee, Richibucto, June 10th, 1901

MONCTON AND BUCTOUCHE RAILWAY.

1901 SUMMER TIME TABLE, 1901

On and after Monday, June 10th, 1901, trains on this railway will run as follows:

Small table with 3 columns: Time, Station, and Time. Rows include 7.50 10.00 Arr. Moncton, Dep. 15.15 19.00; 8.00 7.50 Dep. Buctouche, Arr. 17.15 19.50

(Eastern Standard Time)

Train from Buctouche connects at Humphrey's with I. C. R. train for Halifax, and at Moncton with the C. P. R. train for St. John, Montreal and United States points, leaving at 14.05 and I. C. R. train for Campbellton leaving at 10.25.

Train for Buctouche connects at Humphrey's with I. C. R. day express from Halifax, and at Moncton with all I. C. R. trains from east and north arriving not later than 15.00.

HIDDEN USES OF TREES.

They Are Liberating Oxygen and Moisture Day and Night.

Utilitarians consider the trunk the important part of the tree. The trunk is a wise makeshift of nature which towers aloft and tries to lift the vital organs of the tree—the leaves—out of harm's way and into purer air and brighter sunshine.

Beneath the ground the strong roots and rootlets have hundreds of eager, thirsty mouths which take nourishment from the earth. Water and mineral matter are carried upward by the process of capillary attraction to the leaves in the crown and the branches for digestion and assimilation.

Every leaf on a tree is unceasingly industrious day and night. Examine the hidden leaf, or, in fact, any leaf will do—the truth applies to all—and notice how its surface is spread to catch the sunshine. The underside of the leaf has a different appearance. The tissue is tender and a network of breathing pores.

A section placed under the objective of the microscope reveals tiny cells filled with a greenish liquid called chlorophyll, which plays an important part in the domestic economy of the tree. When undigested food from the ground has been carried to the leaves, the chlorophyll seizes it, and under the influence of sunlight changes it to nourishment.

Digested food materials are carried from the leaves to all parts of the tree and aid in its growth. Leaves, as the lungs, are necessary in the process of breathing. Like animals, the tree needs oxygen and breathes much after the manner of a human being.

Not only is the life giving air taken into the lungs or leaves, but it is inhaled through tiny openings in the bark, just as men and animals transpire through the skin.

These tiny breathing holes are called lenticels, and may be seen plainly on the bark of cherry and many other kinds of trees. As the tree drinks water, it sweats and exhales water vapor along with the oxygen cast off from the carbon dioxide.

Tons and tons of moisture are evaporated from wooded areas. This is another beneficial act. Water vapor in the atmosphere is essential to agriculture. Trees transpire through cracks and fissures in the bark, where the lenticels are hidden from sight.

This is especially true in old trees. From time to time scientists have computed the leaf area of trees, and the results have been astonishing. An ordinary linden leaf has a surface of ten square inches.

Multiply this by the number of leaves on a branch and calculate the leafage area of the tree. This entire surface is liberating oxygen and water vapor day and night.

Tons and tons of moisture are evaporated from wooded areas. This is another beneficial act. Water vapor in the atmosphere is essential to agriculture.

B.B.B. Makes Blood Pure.

If the blood is pure the whole body will be healthy.

If the blood is impure the whole system becomes corrupted with its impurities.

Burdock Blood Bitters transforms impure and watery blood into rich pure blood and builds up the health.

Disease germs cannot lurk in the system when B.B.B. is used.

Miss Effie McDonald, Liseomb Mills, Guy Co., N.S., writes: "I have found B.B.B. an excellent remedy for purifying the blood and curing sick headache. I had tried many remedies, but none of them did me much good. B.B.B. has made me so well that I feel like a new woman and I am constantly recommending it to my friends."

DOMINION NEWS.

MONTREAL, Oct. 31.—William Cameron Hutchinson, office manager for McKenna, Thompson & Co., wholesale clothing manufacturer, has been missing from his home and office for three weeks and his family and friends are much alarmed about his strange disappearance.

Within a few days leading Canadian banks and local industrial companies will pay out to their shareholders quarterly and half yearly dividends to the extent of over \$2,000,000. Most of the bank dividends are payable on Nov. 16.

Miss Mary Ann Freeman, aged 42, dressmaker, was struck and instantly killed by an electric car at eleven o'clock to-day. Miss Freeman, not noticing the approaching car, attempted to cross Craig street at the corner of Beaudry, when she was struck. Her body was badly mutilated.

KINGSTON, Ont., Oct. 31.—All Saints' church was broken into last night by thieves who stole a brass cross valued at \$25 which was fastened to the altar. They also took a surplice and cassock belonging to the rector, Rev. Stearne Tighe. A silver chalice and plates were also carried away.

ALEXANDRIA, Ont., Oct. 31.—Noticing the shutters remained closed all morning on the store and house, a constable on breaking into the residence of Alex. J. McDonald, storekeeper, this morning found him dead in bed, his wife lying unconscious on the floor, and coal gas penetrating the whole building.

ST. JOHN'S, Nfld., Oct. 31.—Three schooners were driven ashore on Labrador coast last week during a gale. One was laden with the families of fishermen returning from a summer sojourn on the coast.

In all three cases the crews were saved. Two other vessels, one carrying a Catholic priest, who had been making a sacerdotal visitation, were driven seaward and have been missing for ten days. The steamer Glencoe went in search of them, but without result. Twelve lives are involved and it is feared that all have perished.

TORONTO, Oct. 31.—James Henry Lewis has been indicted at the criminal assizes on the charge of manslaughter. Lewis, who is a Christian Scientist, called in a faith healer of that doctrine instead of a regular physician when his child fell ill of diphtheria. The crown alleges the child's death was due to the lack of proper medical aid.

Why a fire should be started under such circumstances remains a mystery. Dr. McMullin has strong hopes of the recovery of Mrs. McDonald.

A "HERO'S" TONIC

For soldier or civilian South American Nervine proves itself the greatest of system toners, nerve healers and blood cleansers.

A battle-scarred veteran just home from the war in South Africa, who was all run down and weak, the aftermath of that dread yeldt fever, says: "I found South American Nervine a remarkable medicine and heartily recommend it to everybody in need of a good tonic. It's a grand remedy for all 'run down' people. One bottle gives great relief. A few bottles never fail to cure."

THE GREAT DISMAL SWAMP.

A Region Strange and Interesting, Weird and Solitary.

The Great Dismal swamp is a region strange and interesting, weird and solitary. It occupies a billowy plain some 40 miles in length by 25 miles in breadth along the Atlantic seaboard, extending from Suffolk, Va., in a southerly direction, well into the bounds of North Carolina.

Its deep shades, great stretches of brake and its solitude make it a region of interest. To the naturalist and sportsman it has much to offer. In its silent fastnesses the black bear finds a home admirably adapted to his protection and in every way favorable to his increase.

Here amid the dense growth of underbrush and timber he may live in comparative safety, and there is perhaps no locality in the whole eastern United States of like extent which can offer a larger bear population than this great morass. The white tailed deer is also an abundant denizen of the swamp, frequenting the elevated parts.

In addition to the deer and bears, there is a big game feature of a rather unusual nature. The swamp abounds in wild cows. These animals, of a brown color and somewhat smaller than the ordinary cow, having for many years been under the peculiar conditions of the swamp, until they are almost completely specialized, are extremely wild.

Lake Drummond, some ten miles from Suffolk, Va., is the only great body of water in the swamp. It is a beautiful sheet of water, of an oval contour and fringed with a heavy growth of timber, mostly cypress, white cedar and black gum. Its water is of a dark color owing to the decaying vegetation of the surrounding country, but is suitable to drink, and possesses the quality of remaining pure longer than most other water.

For this reason it is often carried to sea by sailors on long voyages.

The characteristic mammalian fauna is of a semitropical nature as regards the smaller forms, while there are many tropical plants. Of birds there are not many kinds, prothonotary, hooded and Swainson's warblers and the Maryland yellowthroat being the principal smaller forms.

The trees, some of which are primeval, are large and beautiful, while there is a luxuriant growth of ferns and aquatic plants. Cane grows in profusion.

CULINARY CAPERS.

A round of broiled Hamburg steak with a crisp slice of delicate bacon on top is delicious.

Stock intended for clear soup must be skimmed as it boils and as long as the scum continues to rise.

A layer of sliced onions placed on the top of a roast of beef and allowed to cook there will give a delicious flavor to the meat, while their distinctive flavor will not be noticeable.

Mincod or stewed potatoes or any preparation of that sort should never be stirred with an iron spoon, as it is in many kitchens. A plated silver fork kept for the purpose or a wooden spool fork is much better.

Cream vegetable soups should be accompanied with squares of toasted bread; oyster and clam soups with pickles and crackers. Croutons should be served with purees; with gumbo boiled rice is the accompaniment.

Cauliflower should be placed head down in cold, salted water for 10 or 15 minutes before cooking, to draw out insects. In boiling, slightly salted water should be used, and the head should be placed downward in the kettle.

Plea For Single Beds.

Two in a bed is the usual custom of sleeping, in the United States at least, and also in Canada and England; but in Germany and France single beds are the rule. The latter plan is more healthful and comfortable. It is gradually coming into use in this country.

Single beds involve more linen, more work in making beds and more washing, but I never knew a family to return to the old plan after once giving single beds a fair trial. Especially in summer is the single bed to be preferred, or even sleeping on the floor, to two in a bed.

Many families declare they never knew what comfort was during the summer nights until they adopted the single beds. I might add a word of protest against allowing babies or young children to sleep with old people. The latter certainly draw upon the vitality of the former.

This is probably true as between any bedfellows one of whom is sickly or less strong than the other. Consumption and other diseases have often been communicated from one bedfellow to another.

An Antidote to Poison Ivy.

In addition to the aids of the druggists' lotions, nature is said to have provided a most efficient remedy for poison ivy poisoning in the shape of the widely spread flower known as "spotted touchmenot, or Impatiens fulva. It is also called the "jewel weed" and is abundant in the water courses during June and July, when the Rhus toxicodendron and the Rhus venenata are most poisonous.

The color of the flower of "spotted touchmenot" is a deep orange, and the spots are of a reddish brown. The leaf forms a sack not much unlike the moccasin flower, and it ends in a curved spur. The seed pods burst if slightly touched and scatter the seeds all around. To this peculiar property the plant owes its common name.

It is also called "noli me tangere" and "n'y touchez pas." The remedy is applied by expressing the juices of the plant and applying it to the skin which has been poisoned.

His Pass. A ticket collector on a railway got leave to go and get married and was given a pass over the line. On the way back he showed to the new collector his marriage certificate by mistake for his pass.

He studied it carefully, and then said, "Eh, mon, you've got a ticket for a lang, wearisome journey, but no on the Caledonian railway."

The Prescription. Doctor—There's nothing serious the matter with Michael. Mrs. Muldoon. I think a little soap and water will do him as much good as anything.

Mrs. Muldoon—Yis, doctor, an will O! give it 'im befoor or after his males? —Glasgow Times.

ADDITIONAL EVIDENCE.

The Greatest Case in the History of Modern Medicine is Completed by Another Sworn Statement.

THE OTTAWA FREE PRESS SUSTAINED.

A Prominent Ottawa Man Confirms Under Oath Every Statement Made by this Paper in the Original Story Published Nearly Seven Years Ago.

(From the Ottawa Free Press.)

Some seven years ago the Free Press published a graphic account of a remarkable case here in Ottawa.

A man named George H. Kent had been cured of Bright's Disease after the doctors had given him up to die, and the Free Press reporter, after a most thorough investigation, published the whole story in detail, giving credit to Dodd's Kidney Pills for the most miraculous cure.

The following sworn statement was given by Mr. Kent in order to substantiate the almost incredible statement made by the paper in its account of the case. (Sworn Statement, Feb. 16th, 1895)

I, George Henry Kent, resident at 114 Cambridge Street, Ottawa, and employed as a printer in the British American Bank Note Printing Company, in the said City of Ottawa, do solemnly declare that I consider it a duty to myself and to my fellowmen generally to make a declaration as to the efficiency of Dodd's Kidney Pills.

I that I found them in my terrible case of Bright's Disease, from which I suffered for almost one year, of the greatest medical value. I can say confidently and assure anyone interested, or a sufferer, that I positively owe my life and present excellent health to the results brought about by their use.

I was taken sick and confined to my bed on December 28th, 1893, and was successfully treated for La Grippe, then Pleurisy, followed by Kidney Troubles, and latterly Bright's Disease. I lost the use of all my limbs; my entire body became swollen to a terrible size, and my skin became as hard as and similar to leather, the pores all having closed up, and I suffered the most agonizing pain. I was subject to periodical spells of utter prostration and insensibility, to a state of absolute coma. I was also a victim of dangerous convulsions in which my facial expression and other muscles would become severely contorted and tense.

My regular physician attended to me, and, though medical consultations were held over my case by two city doctors, nothing could be done. My case grew gradually worse and latterly I was given up as hopeless. My wife, friends, and neighbors were certain from what they saw and were told by the visiting doctors that I would die in a very short time.

My wife was casually reading a newspaper about this time, and saw a description of a similar case, in which a patient gave testimony of the relief and cure that had been effected on him by Dodd's Kidney Pills. I started to take them right away, and from the first pill I discovered a change for the better. After the first box I was wonderfully improved, and at the end of the fourth I was sure I was to get well again. I continued taking them until the seventeenth box, and I can now positively declare that I am perfectly cured and able to do a day's work with any of my comrades in the shop, and Dodd's Kidney Pills undoubtedly cured me, because from starting to take them I took no other medicine whatever.

AND I make this solemn declaration, conscientiously believing the same to be true, and by virtue of the ACT RESPECTING EXTRA JUDICIAL OATHS.

Declared before me at the City of Ottawa, in the County of Carleton, this 16th day of February, 1895.

G. H. KENT. (Sgd.) CHAS. A. BLANCHE, A Commissioner, etc.

The Free Press in the article published in 1895 stated most positively that Dodd's Kidney Pills and nothing else were entitled to the credit of having saved the dying man's life, and this was most emphatically endorsed by Mr. Kent in his sworn statement. The Free Press also said without qualification that the cure of Mr. Kent was an absolute and permanent one. And while Mr. Kent could not make a sworn statement as to the future, he stated that he felt he was permanently cured.

Notwithstanding this there were many who could not believe that a man with one foot in the grave as Mr. Kent was could get a lasting cure.

It occurred to the Free Press the other day that it would be interesting to enquire now, after the lapse of nearly seven years, as to how Mr. Kent was feeling.

He had removed to 408 Gilmour Street and at that address a Free Press reporter found him.

After reminding Mr. Kent of the article and his affidavit the newspaper man asked him point blank:—

"Have you lost any time from your regular work since you were cured of Bright's Disease by Dodd's Kidney Pills in 1895?"

"Not a minute," answered Mr. Kent promptly.

"Have you since had the slightest symptoms of your old kidney trouble or anything like it?"

"Not the slightest," he said.

"You are sure that Dodd's Kidney Pills and nothing else saved your life and restored you to your present good health?"

"Absolutely sure. Why, my wife and I are so grateful to Dodd's Kidney Pills that we have christened our little girl, born in December of 1896, by the name of 'Dodd's.' This shows you better than anything I can tell you to what we attribute my recovery. I owe my life to Dodd's Kidney Pills."

"Would you be willing in order to confirm our story published in 1895 to make another sworn statement?" asked the scribe.

"If it would do you any good I have no objections," answered Mr. Kent. "The Free Press was certainly well within the truth in every statement they published about my case."

Mr. Kent, at the request of the Free Press, has given the following sworn statement:—

SWORN STATEMENT, Oct. 3, 1901.

I, GEORGE HENRY KENT, resident at 408 Gilmour Street, in the City of Ottawa, and employed as a printer at the American Bank Note Company in the said City of Ottawa, do solemnly declare:—

1. That on February 16th, 1895, I, George Henry Kent, then resident at 114 Cambridge Street, Ottawa, did appear before Charles A. Blanchet, Commissioner, etc., and before him on that date did make a solemn declaration regarding my recovery from Bright's Disease by the use of Dodd's Kidney Pills and setting forth the facts of my case and its cure.

2. That in the declaration I set forth that I believe that I was absolutely and permanently cured by Dodd's Kidney Pills after the doctors had given me up to die.

3. That I am now absolutely certain that Dodd's Kidney Pills and nothing else saved my life and I hereby unhesitatingly reaffirm every statement made in my declaration before Mr. Blanchet on February 16th, 1895.

4. That I have never since that date had the slightest symptom of the return of the Bright's Disease or any Kidney Trouble, having enjoyed unremittent good health and having worked steadily and without interruption full time at my regular employment as a printer every working day from the day Dodd's Kidney Pills sent me back to work to the date of this declaration.

4. That in evidence of our gratitude to Dodd's Kidney Pills for having saved my life, my wife and I have christened a little daughter born to us in December of 1896 by the name of "Dodd's."

6. That I have recommended Dodd's Kidney Pills to many people in this city and elsewhere, who having heard of my wonderful escape from death by their use have called on me or written to me enquiring about them; and having followed many of these cases closely, I know of no case where they have been used according to directions that has not been cured, and I know positively of my own personal knowledge of several extreme cases where Dodd's Kidney Pills have affected satisfactory and permanent cures.

And I make this solemn declaration, conscientiously believing it to be true and knowing that it is of the same force and effect as if made under oath and by virtue of "The Canada Evidence Act, 1893."

Declared before me at the City of Ottawa, in the County of Carleton, this 3rd day of October, 1901.

(Sgd.) A. W. FRASER, A Notary Public in and for Ontario.

Nothing could be more convincing than this plain declaration made by Mr. Kent, and the Free Press is pleased to be able to present such a complete and emphatic confirmation of our article of 1895.

The Kent case must therefore go on record as the most wonderful cure ever heard of in this city or province. Every detail of which has been carefully substantiated by sworn evidence.

To Dodd's Kidney Pills is due all the credit for having rescued and restored this dying man and that after all hope had been abandoned and the cold waters of the river of death were lapping his feet.

Children Cry for

CASTORIA.
