MARITIME PROVINCE NOTES.

ST. STEPHEN, Dec. 18.—A young woman named Rose Sands, in the employ of Martin C. one, Calais, was fatally burned this morning. While standing in front of an open fire her clothing ignited. The garments were burned off and her body terribly burned. Physicians were quickly called and everything possible done for the sufferer but death soon came to end her sufferings.

The house and farm buildings of Mrs. Hill Young, Oak Bay, were destroyed by fire to-day.

Mayor Murchie slipped on the street yesterday and was badly shaken up. This morning while assisting a horse which had fallen on the street the mayor had his back badly strained and he is now confined to the house suffering severely from lumbago.

Frank Clark, who was accidentally shot while gunning near his home about two weeks ago, is lying at the point of death. Yesterday an operation was successfully performed but the patient has been sinking gradually since.

ST. ANDREWS, N. B., Dec. 18.—Three mariners from the cruiser Curlew created consternation recently among the lobster fishermen of Back Bay who had set their traps before the close time was ended. The sailors had been left at Bliss Island in charge of the seized schooner Hattie Louise of Grand Manan, while Capt. Pratt went off on other business. They received instructions to look out for illegal lobster fishing. By a clever ruse they dropped down upon two fishermen and captured their boats. Two others escaped after a lively chase. Two hundred illegally set lobster traps were destroyed in the location. It is likely that the fishery officer of the district will receive a keel hauling for allowing fishing within his jurisdiction.

BRISTOL, Carleton county, Dec. 18.—Wm. Sayles, of Beaufort, Carleton county, died quite suddenly at his home Tuesday, under somewhat suspicious circumstances and an inquest is being held to-day by Dr. Welch and Dr. Ross, of Florenceville. Mr. Sayles was an Englishman and had lived in this county about 12 years. He had a wife and family, but they did not agree and a few years ago separated, the wife and family living on the homestead, while he lived by himself on a neighboring farm. Last fall he got another woman to keep house for him. He had been in the woods for some weeks and came home yesterday, and shortly after was taken ill with violent cramps and died in a short time. It was supposed he had been poisoned.

BRISTOL, N. B., Dec. 19.—Drs. Welch and Ross held an inquest on the body of

OVERSHOES and RUBBERS.

It has always been our aim to get the best Overshoes and Rubbers on the market, even if we had to pay a little higher price for them, and this year we pride ourselves that we are again to the front with a large stock of the best goods that can be procured and we are selling them at prices as low as that asked for poorer grades.

Get your Overshoes and Rubbers here and get the best quality at the lowest prices.

A. & R. LOGGIE

William Sayles. A post mortem examination revealed that death resulted from the rupture of a blood vessel.

Newcastle Advocate, Dec. 19: Last Friday night while skating on the river below Lynch's mill on the Nelson side of the river, Jas. McFarland and Jack McCombes broke through the thin ice. Robert McCombes, who was a little in the rear, at once rushed to the rescue and skating to the edge of the broken ice took off his overcoat and lying flat on the ice threw it out to his companions in the water and told them to hold on, but the current had carried them to the lower edge of the hole, which was quite large and they could not reach the coat. In endeavoring to back away from the hole and as the ice was very thin Robt. McCombes struck the toe of his skate in the ice, but this broke off a large piece, which tipped over with his weight and he also went in head foremost. Their cries had attracted a number of fishermen, who brought a pole and rope with them and the two McCombes were pulled out without much difficulty, but McFarland was so benumbed that he could not hold on to the rope which was thrown to him. L. Coughlan, who saw the difficulty, told him to put it in his mouth and to hold on with his teeth. This he did, but the current was so strong that the lower half of his body was carried under the ice and he could not be pulled up. By this time the onlookers saw that unless something was speedily done they would be the witnesses of a sad catastrophe, so L. Coughlan laid down on the ice, Frank Masson caught his feet and then they worked out over the thin ice to the edge of the hole, the others in the rear catching hold of Masson's feet. In this way Coughlan got quite near the struggling young man and grasped him firmly by the hair and lifting him up sang out for those in the rear to pull and soon had McFarland safe on firm ice, where he fell in a swoon and had to be carried to Coughlan's house nearby. John McCombes was also very much exhausted and had to be helped to the house where they were kindly looked after, and after an hour or two were sent to their homes.

In the meantime Robt. McCombes had been taken to a fishing shanty and was being looked after. He took violently

sick from the effects of a quantity of salt water he had swallowed, but soon recovered and was sent home. The three young men are none the worse, though wiser from their cold bath.

HALIFAX, Dec. 19.—Schooner Monitor, 99 tons, has been wrecked on Pictou Island. She was engaged carrying produce from P. E. Island and Halifax and was owned by J. J. Rudolf, Lunenburg.

WOODSTOCK, Dec. 19.—Miss Mary Allen, sister of the late John T. Allen, who has been an invalid for some years past, died at her home last evening. Her half-sister, Miss Burns, who has lived with her, survives.

John Lepage, secretary of the Maritime Wrapper Co., and Minnie E., eldest daughter of Mr. H. R. Burt, were married this afternoon by Rev. Mr. Fash. They will spend Christmas with Rev. Mr. Lepage, the groom's father, at Buctouche.

57-62 The Critical Age.

Height of vigor past—nature's power slowing down, vitality less, recuperative powers less, endurance less. Stop the progress of decay, tone up the weakened nerve centres, impart vigor to the tiring brain, prepare for the crisis. A means of remarkable potency in the renewal of decreasing vigor is found in Ferrozone. It brightens up the whole being, imparts a sense of power and strength. By the use of Ferrozone, old age is pushed back twenty years. Ferrozone gives strength, vigor, endurance, vim. R. O'Leary, General Merchant, Richibucto has it. Get a box to-day.

"What is the nature of the newfangled malady which they call the 'golfing spine'?"

"That," responded Cynicus, "is easy. 'Golfing spine' is what the old man used to have after a hard day's plowing, but he called it the backache."—New York Times.

"My good man, don't you often long to be out of this place?"

"Naw, As soon as I come out they'll send me back again."—New York Journal.

NEW BRUNSWICK FARMERS' INSTITUTE SYSTEM.

LIST OF MEETINGS, SPEAKERS AND SUBJECTS, JANUARY, 1902.

The following is the list of meetings, and speakers for the northern counties:— F. C. HARE and C. HOWARD BLACK, Amherst, N. S.

Wellington, St. Marys and Dundas, Barnes' Hall, Buctouche, Jan. 18. Richibucto, Rexton Hall, Jan. 20. St. Louis and St. Ignace, Seed Co.'s Hall, St. Louis, Jan. 21. Rogersville, Jan. 22.

W. S. TOMPKINS, Grandview, York Co.; J. W. MITCHELL, Dominion Supt. of Dairying for Maritime Provinces.

Stanley, Agricultural Hall, Jan. 6. Blissfield, Moran School House, Jan. 7. Blackville, Public Hall, Jan. 8.

Derby, Public Hall, Renous Bridge, Jan. 9.

Chatham and Nelson, Temperance hall, Chatham, Jan. 10.

Addington and Eldon, Orange Hall, Flat Lands, Jan. 13.

Dalhousie, Temperance Hall, Dalhousie Junct., Jan. 14.

Durham, Jan. 15.

Beresford, St. Therise, Jan. 16.

Bathurst, Court House, Jan. 17.

New Bandon, Temperance Hall, Stonehaven Jan. 18.

Grand Anse, School House, Pockshaw, Jan. 20.

Carsquet, College Hall, Jan. 21.

F. C. HARE, Chief of Poultry Division, Department of Agriculture, Ottawa.

"Artificial Incubation and Brooding;" "The Rearing and Fattening of Chickens;" "How to Construct a satisfactory Brooder;" "Selection in Breeding so as to Produce the Most Profitable Farmers' Fowl;" "Winter Care and Feed of Poultry;" "How to obtain and how to Keep Eggs for Hatching;" "The Natural Method of Hatching and Rearing Chickens;" "How to Construct Nest Boxes and Brood Coops;" "The Method of Fattening, Killing and Packing and Shipping Chickens to England as Practiced by the Dominion Department of Agriculture."

C. HOWARD BLACK, Amherst, N. S.

"Rotation of Crops;" "Clover Culture;" "Pork Production;" "Breeding and Feeding of Beef."

W. S. TOMPKINS, Grandview, York Co.

"Some Reformatations in Agriculture;" "The Maintenance of Farm Fertility;" "Clover Culture;" "Tillage;" "What the Farmer must do to Increase Profits in Dairying;" "Leaks on the Farm;" "Mistake Made in Farming;" "Cheap Foods and how to Prepare Them;" "Raising Hogs for Market;" "Then and Now;" "Care of Manure and How to Apply it."

J. W. MITCHELL, Dominion Superintendent of Dairying for Maritime Provinces.

"Some of the Essential Features of Profitable Dairying;" "Butter making on the Farm;" "Winter Dairying."

Worms affect a child's health too seriously to neglect. Sometimes they cause convulsions and death. If you suspect them to be present, give Dr. Low's Pleasant Worm Syrup, which destroys the worms without injuring the child. Price 25c.

MISPLACED CONFIDENCE.

Smith—'I've got a good joke on Short. Jones—is that so?"

Smith—Yes. He asked me to exchange checks with him for a few days. I did so, and his check turned out to be no good.

Jones—Why, according to that, the joke is on you.

Smith—Oh, no, it isn't. You see, my check was also worthless.—Chicago News.

No dye is sold in more shades or finer ones than Magnetic Dyes. Price 10 cents for any color.

MARITIME WINTER FAIR.

SPLENDID MEETINGS AND EXCELLENT ADDRESSES AFTERNOON AND EVENING.

AMHERST, N. S., Dec. 19.—This afternoon's attendance at the winter fair was exceedingly good. People jostled for standing room. Prof. Geo. E. Day gave a very interesting address on the beef carcass, illustrating his remarks by chart and carcass. He said the most desirable type was the animal with the straight top and bottom line, ribs well sprung out from the back and fall over the loin, low and not too fat about the tail, head with a well developed round; but he laid particular stress upon the back, where the most valuable cuts are found.

He was followed by Prof. Gridale, on the mutton carcass. Mr. Gridale had three carcasses of mutton cut up, one too fat, one too poor, one medium. He said the most valuable parts of the carcass was the back or middle of the body, hence breeders should look carefully to developing these parts as much as possible. Another important thing was to have the flesh of a good color. He said the wool breeds, as a rule, produced too dark a meat.

Perhaps the most interesting to everybody were the remarks of Prof. Gilbert and F. C. Hare, of Ottawa; Prof. Graham of Guelph, and Joseph Landry, of the Truro fattening station, on the rearing, fattening and plucking of poultry. Mr. Landry killed a chicken by breaking the neck and afterwards plucked it dry, at the same time explaining how to execute the work without tearing the skin.

The public meeting in the evening was held in the parish hall. The chair was occupied by President E. B. Elderkin, who, after a few introductory remarks, introduced G. C. Creelman, who spoke upon the Farmers' Institute as a factor in agricultural progress. He thought that the parents in Canada should be careful to give their boys and girls education along the lines in which they can secure positions amongst us, showing how the professions of law, medicine and school teachings were overcrowded. He offered as a remedy the idea of giving them an agricultural education. He spoke of the benefit that the Agricultural college at Guelph had been in educating their young men, and of the good work that the Farmers' Institute had done.

Thos. A. Peters, deputy commissioner of agriculture for New Brunswick, was called upon, and told how the institute work was progressing in his province.

Mr. Chipman, secretary for agriculture in Nova Scotia, who spoke on the markets for live stock in South America and the West Indies, was next introduced. After speaking of the trade Nova Scotia had done in the past, he proceeded to speak of agriculture generally.

F. W. Hodson, in his opening remarks, expressed his pleasure at being a Canadian, and briefly outlined the work that was being done in the various provinces of Canada. He said the ideas of these winter fairs was to educate the people and he thought the one that was just closing had been a great success in this way. He said as far as markets were concerned, that our home market was the best one we could have, and to increase it we must produce the first class article. He closed his remarks by heartily thanking the people for the hearty support they had given in making the fat stock show such a success.

H. J. Logan, M. P., moved with a very eloquent speech, a vote of thanks to Mr. Hodson and his associates from the west, for their presence and the instruction they had given on this occasion. His motion was seconded by Hon. T. R. Black and carried unanimously. Prof. Day with a few appropriate remarks, accepted the vote received.

The same enthusiasm that characterized the former meetings continued to show itself to the last, and the visitors on dispersing declared themselves as thoroughly

satisfied with the results of the winter fair and much pleased with the hospitality of the people of Amherst.

Catarrh is a Germ Disease.

Science, armed with the microscope, has established it a fact, and the conclusion renders obsolete the practice of treating Asthma, Catarrh and Bronchitis by stomach dragging, sprays snuffs, &c. Such treatments are an utter failure because they cannot penetrate the delicate air cells of the lungs, or permeate the air passages of the nose and bronchial tubes where the germs of Catarrh have their stronghold. Catarrhozone is the only certain remedy. It is inhaled by the mouth and after spreading through all the respiratory organs is exhaled through the nostrils. Catarrhozone kills the germs, heals the inflamed tissues, clears the head and throat in two minutes, and cures in a few hours. Nothing is so effective, pleasant and simple as Catarrhozone. Two months treatment \$1.00. Small size, 25c. At R. O'Leary's General Store, Richibucto, or N. C. Polson & Co., Kingston, Ont.

HIS SPHERE OF EXCELLENCE.

"Was your son Josiar a leader of any of his classes?"

"I reckon," answered Farmer Corns-sel. "I have been told that a good many of the young men who 'tended Josiar's school b'longed to the leisure class, an' from what I have seen of Josiar durin' harvest time I should guess that he'd be right up eclus to the top."—Washington Star.

THE INVENTORS WORK.

For the benefit of our readers, we publish a list of Canadian patents recently procured through the agency of Messrs. Marion & Marion, Patent Attorneys, Montreal, Can., and Washington, U. S.

Information regarding any of these patents will be supplied free of charge by applying to the firm above mentioned.

73,019—James Stewart, Ompah, Ont., Wheelbarrow.

73,765—Robt. P. Norton, St. Thomas, Nth. Dak., U. S. A., Shoe lacing.

73,766—Joseph Laurin, Maisonneuve, P. Q., Shoe.

73,835—Frenee Nap, Sely, Montreal, P. Q., Sewing machine.

73,850—Messrs. Chassault & Guellette, Montreal, P. Q., Glove.

73,873—Joseph Labreene, Terrebonne, P. Q., Apparatus for drying sand.

73,887—Wm. Beaton, Killislyth, Ont., Tally register.

73,892—Wm. S. Quigley, Spryckay, Halifax, N. S., Pastry cutter.

Write Messrs. Marion & Marion, Patent Attorneys, Montreal, P. Q., for a copy of their "Inventor's Help."

PITTSBURG, Dec. 9.—By an explosion of gas in the Soho furnace of Jones and Langhlan, near Brady street, this city, at 6 o'clock this morning ten men were burned to death and probably twenty others more or less injured. The damage is \$20,000. The explosion occurred in one big blast furnace. The men were at work at the top of the furnace over 120 feet from the ground. They were employed as fillers and were just getting ready to quit work, being members of the night crew, when the gas, which had accumulated in the furnace, exploded and tons of molten metal, cinders and slag were thrown over the unfortunate men.

When the dead were removed the injured were then looked after. In all parts of the yard beneath the furnace injured were found. How many injured there are, is not known at this time. The injured were taken to the Mercy and other hospitals.

British Troop Oil Liniment is without exception the most effective remedy for Cuts, Wounds, Ulcers, Open Sores, Rheumatism, Bites, Stings of Insects, etc. A large bottle 25 cents.

ROYALTY DRINK

RED ROSE TEA!

The Tea used by the Duke and Duchess of Cornwall and York during their stay in St. John was RED ROSE—the gold label. All grades of Red Rose have the same distinguishing characteristics, and whether it is the gold label or any other, it is good Tea—better than other Teas at the same price. Are you drinking Red Rose Tea?
