**OPPORTUNITIES** TRADE WITH AUSTRALIA.

The fact that there are two or past record of the present governthree ships now in St. John harbor loading for Australia emphafidently expect that the people of sizes the interest our people na-Nova Scotia will give the Murray turally feel in trade with the antipodes. The advices of Mr. J. S. Larke, Canadian commercial agent in Australia to Mr. George H. Hees, chairman of the tariff committee of the Canadian Manufacturers' Association, are therefore moment to our readers. If our manufacturers are seeking markets abroad, he says, they will find that the Australian colonies are most attractive fields to explore. A perusal of his letter leads one to infer that not only the comparatively raw material of lumber which we ship, but almost anything in the way of manufactured goods can be placed very readily among the distributing facilities of the new commonwealth and the outlying islands. Certainly no one would think of exporting wool, mutton or butter to Australia, but there are thou sands of articles natural to Canada and desired among our friends on the other side of the world, which it would readily pay us to send them. Mr. Larke's abilities to supply information in regard to the markets under his cognizance, ought to be taken advantage of by Canadians anxious to extend their export trade.-Telegraph.

"A clean politician was Sir Louis Davies, the retiring min ister of marine and fisheries, and he quits parliament free from cor porate entanglements. The provincial election for the

Province of Nova Scotia took

place yesterday and as we go to

the Murray administration will be

returned to power by a large ma-

jority. The opposition is weak

and without any recognized lead-

its credit a good clean and econo-

### Origin of "Whig."

Several reasons have been assigned to account for the word "Whig," universally known to all the English speaking people. By some the work is supposed to be a contraction of a longer one, "whiggamore," which in some parts of England and Scotland, especially Scotland, signifies a drover or berder

It was in 1679 that the word first became common in the British isles, when the struggle was in progress between the peasantry and the aristocracy to have or not to have the bill nine sailors as a crew. The Captain's passed by parliament to exclude the Duke of York from the line of succession. All who were opposed to placing the duke in the line of succession were derisively called "whiggamores." or "drovers," just as the city dude of today speakers of the "grangers," the "grays," the "chin whiskers" and the "havseeders."

But Scotch tradition gives altogether a different reason for the existence of the word. It is this: During the early religious wars in Scotland the weakest of the factions used the words "We two miles below the village of Hopewell Hope In God" as a motto. The initials | Cape when she grounded on what is of these words were placed on their banners thus, "W. H. I. G.," and soon all the followers of that clan were given the title of "Whig," which was afterward attached as a party nickname.

#### BARQUENTINE WRECKED IN THE PETITCODIAC RIVER.

(St. John Telegraph.)

News reached the city. Sunday night by telephone from Hopewell Cape to The Daily Telegraph, that the barquentire Bahama, from New York to Hillsboro in ballast, had grounded in the Petitcodiac River on Saturday night, and would probably be a total loss.

The Bahama was 355 tons gross, commanded by Capt. Anderson, and carried wife and the cook's were aboard.

On Saturday morning, the Bahama left Partridge Island for Hillsboro, being consigned to the Albert Manufacturing Company, to load plaster for New York.

She had a rough trip up the bay and had considerable difficulty in entering the river owing to the heavy head winds and mountainous seas. It was not full tide and the navagation of the river was dangerous, but the barque escaped mishap until about

known as the Middle Grounds. A section of her keel was torn out by the grinding on the bottom and she heeled over and filled. The captain and crew had barely time to escape in the boats. The British success over the Boers at Fort Itala is now known to have been greater than was at first reported. Two hundred were killed and more than three hundred wounded or captured. A tew more defeats of this kind will open the eyes of the Boer leaders to the folly of continuing their guerrilla tactics.

A Mixed Wedding Party. mine was engaged to a lady in New York," writes the Rev. D. M. Steele in his article on "Some People I Have Married" in The Ladies' Home Journal. "His people are Congregationalists, but while at Yale be became a side down. It was at the time thought Unitarian. Her parents are Roman she would be a total wreck, though there Catholics, but she was a member of the Ethical Culture society at Carnegie ball. In compliance with her mother's wish he asked five different priests to marry them, but all refused. In despair he came for me. I married them, an Episcopalian, with the ritual service in a Presbyterian chapel. The Roman Catholic brother of the bride and the Congregational sister of the groom were present. #### Careful Statement.

"Was this man Dennis an entire stranger to you?" asked the cross examining counsel of a witness in an important case.

"Sorr?" said the witness, whose stupid face was crossed with wrinkles of cautious and exact in his answers. The lawyer repeated his question.

"Well, no, sorr." said the witness, with a sudden gleam of enlightenment. "He couldn't be that, for be had but the wan arrm, sorr, but he was a him befoor."-Youth's Companion.

It was thought to "Doesn't your papa ever thrash have been stolen and the police here sent out a warning to the police in other places to look for a stolen horse. Yesterday afternoon some one at King's heard something moving inside of the straw stack in the barnyard and it proved to be the miss ing horse. He had worked his way into the stack through a small opening and the straw had closed in on him. He had eaten a gap inside the stack twice the size of himself. The horse was becoming weak for want of water, but is getting all right The Review,

This notice temporarily affects Admiralty charts Nos. 2539, 352, 1651 and 2670; Bay of Fundy Pilot, 1894, page 274; and Canadian list of lights and fog signals, 1901, No. 3.

## II. Richibucto Harbor Lights Changed.

Two pole lights established by the government of Canada on the south beach at the entrance to Richibucto harbor, Strait of Northumberland, coast of New Brunswick, were pat in operation on the 1st instant

The lights are fixed white, shown from pressed lens lanterns hoisted on poles, and should be visible three miles from all points of approach.

The front line is elevated 34 feet above high water mark. The mast is 26 feet high, and stands 112 feet back from the water, at a point 2858 feet southeastwardly from the front light of the old Richibucto harbor range.

Approximate position, from Admiralty chart No. 2430

Lat. N. 46 deg. 42m. 42s. Long, W. 64 deg. 45m. 5s.

The back light is elevated 37 feet above high water mark. The mast is 37 feet high and stands 263 feet S. 1 W. from the front one.

The two lights in one, bearing S. 1 W., lead to the black can buoy in 41 fathoms that marks the southern limit of the anchorage outside the bar. They also lead between the buoys marking the channel over the bar which carries 12 feet of water, to the red can buoy which marks the sharp turn of the channel to the westward inside the bar. After passing the turning buoy the course up the shore between the north and south beaches is N. W. by W. 3 W. From this point up to the town the somewhat tortuous channel is marked by buoys.

At the same time that these range lights were established the red back light of the old Richibucto harbor range, on the same south beach, was discontinued, as the alignment now gives only 2 feet water over the bar, but the front white light is yet maintained to guide up from the turn above described.

Variation approximately 24 deg. W. This notice affects Admiralty charts Nos. 2199, 2084 and 1651; St. Lawrence pilot, Vol. 11, 1895, pege 82; and Canadian list of lights, 1901, the two new lights being entered under the numbers 529 and 530; the present No. 529 becoming No. marks opposite the two being struck out,
