Bad Appetite, Indigestion

Mr. Jas. McMath, 31 Inverness Street, Stratford, Ont., states:—"My digestive organs were entirely deranged, my appetite was poor, I was run down in health and had severe attacks of dizziness and nervous headaches. The use of Dr. Chase's Nerve Food has entirely cured me, as my digestion is very much improved, the headaches have left me and my appetite is real good. I can recommend Dr. Chase's Nerve Food most heartily, knowing it to be an exceptionally good medicine."

Being slightly laxative Dr. Chase's Nerve Food regulates the action of the excretory organs and through its restorative influence on the nerves and muscles ensures the healthful and vigorous action of the respiratory and digestive systems. If you are weakened by overwork, worry or disease, this great food cure is bound to be of benefit to you. As a restorative it has never been approached. 50 cents a box, at all dealers, or Edmanston, Bates & Co., Toronto.

Dr. Chase's Nerve Food

Olden Time "Raiment."

In early Bible days richly embroidered raiment was enumerated with the gold, silver and other valuable property of a rich man. In that primitive age Dame Fashion was not the fickle goddess she is at present, and the "raiment" so frequently mentioned in the Holy Scriptures descended from father to son as a valuable part of the inheritance. Raiment was often sent, with gold and gems, as a present to dignitaries.

It took not months, but years, to ornament some of these garments, and the gold thread so lavishly used in embroidering them was real gold. Moses describes the process of making the gold thread that was used in ornamenting the tabernacle. The habit of making presents of rare needlework is still common among eastern nations who changed their customs so slowly.

On Proper Vaccination.

It should be made clear that proper vaccination is the only known method of specific value in conferring immunity from smallpox. The comparatively short duration of this immunity should be insisted upon, and a simple, intelligible description of the ordinary course of a proper vaccination should be added. It would be extremely useful, in view of the wide diffusion of anti-vaccination literature, to make the frank admission that in the days of arm to arm vaccination accidental inoculation with other diseases, although extremely unlikely, was theoretically possible, but that the modern method of glycerinated calf lymph has now destroyed even the remote possibility of such intrinsic danger.

What Intermittency Means.

Intermittency is that form of irregularity in which the pulse appears to drop a beat occasionally. In some instances it occurs regularly and two or three times per minute for several hours. Sometimes, also, it is very irregular and is noted a number of times within a few seconds and not again for a minute or more. This peculiarity generally causes much uneasiness. Yet, while it may be a very serious symptom and associated with grave and incurable disease of the heart, it often signifies merely a functional disturbance which is in nowise dangerous.

Plenty of Work For the Club.

"What does the society which you have just joined find to do?" asked Mrs. Bizzie's husband. "A great deal," was the answer. "After we get an organization established the question of other people's eligibility to membership gives us all the work we can possibly attend to."

An Energetic Retort.

"My tastes," said the extravagant son, "are inherited."

"Yes," retorted the angry father; "everything you have is inherited. You haven't gumption enough to acquire even taste by individual effort."

"Respect for those that labor under burdens." So said Napoleon as he met a porter on the Paris highways and stepped aside to give the laborer the right of way.

Woman's Weakness

A woman's reproductive organs are in the most intense and continuous sympathy with her kidneys. The slightest disorder in the kidneys brings about a corresponding disease in the reproductive organs. Dodd's Kidney Pills, by restoring the kidneys to their perfect condition, prevent and cure those fearful disorders peculiar to women. Pale young girls, worn-out mothers, suffering wives and women entering upon the Change of Life, your best friend is

Dodd's Kidney Pills

The Rheumatic Fiends.

"I have been in the business for nine years," says a drug clerk quoted by the Philadelphia Record, "and up to date I have learned of 3,697 cures for rheumatism which regularly licensed physicians know nothing about—or, at least, if they do, they don't recommend them. People come in suffering from rheumatism—and it's queer that people who suffer from rheumatism all seem to look and act alike—and present a doctor's prescription."

"The first thing they want to know is how much it's going to cost. I look over the prescription and tell them, and then they invariably rear up on their hind legs and howl. They tell me about the virtues of something that cured Uncle Henry—goat's milk, drunk at 3 o'clock every morning; a raw onion carried in the left hand hip pocket, a horsechestnut carried in the vest pocket, magnetic rings—oh, all sorts of things that I've made notes of. It has become so that I am discouraged over the chances of filling a prescription for a rheumatic patient."

A Difficult Feat.

In the old days of western Pennsylvania, when the people had little money to pay for teachers and could spare their boys but little time from the work of the field, school "kept" almost incessantly during the few weeks when it was in session, with no Saturday holidays and very brief recesses. At one little schoolhouse among the mountains an old fashioned Irish schoolmaster was once employed who kept his boys grinding steadily at their tasks, but gave them permission to nibble from their lunch baskets sometimes as they worked.

One day, while the master was instructing a class in the rule of three, he noticed that one of the pupils was paying more attention to a piece of apple pie than to the lesson. "Arrah, there!" said the master. "Jack Bales, be listenin' to the lesson, will ye?" "I'm listening, sir," said the boy. "Listenin', is it?" exclaimed the master. "Then it's listenin' wid one ear ye are an' attin' poi wid the other!"

A Singular Marriage Custom.

The Kurds have a very curious and somewhat dangerous marriage custom, which one would think would be more honored in the breach than in the observance. The husband, surrounded by a bodyguard of twenty or thirty young men, carries his wife home on his back in a scarlet cloth and is desperately assaulted the whole way by a number of girls.

Sticks and stones are hurled at the bridegroom, who, in the coming home with his bride, can hardly be considered a very happy man, for the irate amazons often inflict on him marks which he carries to the grave. It may be that among the lady pursuers are some of the bridegroom's former "flames," who turn the mock attack into downright earnest to avenge slighted love.

An Excited Vision.

"Baptizing days" are great events among the negroes of the south. On one occasion the old black preacher took two candidates, one a middle aged, sedate, quiet man, the other a young, excitable fellow, well out in the stream, where the water was waist deep. He put the older one down first, who came up, folded his arms and looked dignified and pious.

The younger one, after being put under, came up greatly excited and shouting: "Glory! Glory! I seed de Lord! I seed him in de water—right down dar at de bottom!"

The older one, patting him on the shoulder, said: "Hush, honey; hush. Dat warn't de Lord. I seed it. It was nothin' but a terrapin."

How Lincoln Felt.

In 1862, says a writer in the Kansas City Journal, Colonel Alexander of Topeka, who was an intimate friend of President Lincoln, visited him at Washington and found him in a greatly depressed state of mind.

"This being president isn't all it is cracked up to be, is it, Mr. Lincoln?" inquired Colonel Alexander.

"No," said Lincoln, his eyes twinkling momentarily. "I feel sometimes like the Irishman who, after being ridden on a rail, said, 'Begorry, if it wasn't for the honor av the thing, I'd rather walk!'"

An Ancient River.

In Long Island sound, not far from the north shore of the island, is clearly defined the channel of an ancient river. As shown by the United States coast survey, it is a gorge, having a depth of about sixty feet below the general floor of the sound on either side of it. The gorge or channel was cut into the bedrock of gneiss, the erosion of which is exceedingly slow.

A Nice Friend.

Markley—You're a nice friend to have. Why didn't you lend Borrowings the \$5 he wanted?

Kraft—Why should I?

Markley—To save me. You must have realized that he knew if he didn't get it from you he would from me. You've practically robbed me of that "iver."

To Relieve the Monotony.

"You ought to have a change of scene," said the physician. "But, my dear sir," protested the patient, "I am a traveling man by profession."

"Well, that's the point. Stay home awhile and see something besides a hotel room and stations."

A man needs exercise as well as a schoolboy, but take it moderately. Some of the gnarled and knotted frames of early age are the rheumatic bodies of overworked acrobats.—Schoolmaster.

A Filipino Mania.

The Filipinos have such a mania for cockfights that they even go to church Sunday morning with their birds under their arms, so as to lose no time in getting to the pit.

Coconut Wood.

The hardest wood in the world is not ebony, but cocus, which is much used for making flutes and other similar instruments.

Babylon.

The river Euphrates flowed through the city of Babylon, and on each side of its banks the walls of the city were carried up to a height as great as at any other point, so that even during a siege the city was as fearfully defended on the river as on the land side.

The Thumb Seal.

In olden times it was the pressure of the thumb upon the wax of a document's seal that made the deed a valid and binding instrument, and in verba contracts the thumb rained the bargain.

Coal Was Known 300 B. C.

The first record we have of coal is about 300 years before the Christian era. Coal was used as fuel in England as early as 852, and in 1234 the first charter to dig for it was granted by Henry III. to the inhabitants of Newcastle-on-Tyne.

Church Bells.

The city of Nola, in Campania, was the first where church bells were used. This was about the year 400 A. D.

What Cheese Lacks.

Starch and sugar are two elements lacking in cheese which must be supplied by vegetables or such foods as give the required amount of these elements to make up the requisite bulk of general nourishment.

A New Zealand Geyser.

In Rotomahana, New Zealand, there is an immense geyser which covers an area of an acre in extent and constantly throws columns of water to vast heights, some of them ascending 300 feet, with clouds of steam which go much higher.

The Steam Engine.

The original idea of the steam engine is commonly said to have been suggested by the Marquis of Worcester in his "Century of Inventions," 1603.

The Puma Winds.

The puma winds of the table lands of Peru, South America, are dry and parching, nothing similar being known outside of Africa or Persia. When they prevail, it is necessary to constantly wear a mask to protect the face.

Eggsells.

Housekeepers must remember that good eggs always have dull looking shells.

Smyrna.

Smyrna is the smartest looking town in Turkey so far as trade is concerned. It does a bigger business than Constantinople. It is the headquarters of the wool and of the rug and carpet trade.

A Powerful Explosive.

The most wonderful and the most powerful explosive known is said to be chloride of nitrogen. It is believed to be the only substance that will explode on coming in contact with a bright beam of light, whether the beam be from an electric light or the sun.

A Naval Prejudice.

There is a prejudice in the navy against giving a woman's name to a war vessel of any type. It is believed to be unlucky.

The Giant Ferregus.

The giant Ferregus, slain by Orlando, the nephew of Charlemagne, was twenty-eight feet high and so heavy that no horse could be found that was strong enough to bear him.

Horseflesh.

Russian physicians assert that horseflesh is more nutritious than beef.

To Clean Brass.

When cleaning brass, better results are obtained if the discolored articles are treated to an application of a salt and vinegar solution before the usual brass polish is used.

British Fisheries.

Fish to the value of £10,000,000 is landed in the United Kingdom annually. This unknown harvest of the sea is gathered by some 74,000 fishermen.

Pungent Cresses.

Pungent cresses are of two varieties. The water cress grows freely in wet places and is one of our most common and popular salad greens. It belongs to the mustard family. The cultivated cress is larger and more tender than the wild. The garden variety is known as pepper grass.

The Butternut Tree.

The butternut is a tree that likes best a rocky, uneven soil and in whose shade neither shrub nor herb will thrive. The bark is used as a dyestuff for woolsens.

Voices Reversed.

Among birds that have the power of imitation the parrot is the best, but as a matter of fact its voice is decidedly inferior to that of the mynah, a species of starling. Curiously enough, the male bird speaks in a high, clear tone, like that of a child, while the female has a gruff voice.

Swiss Exports.

Switzerland is, population considered, the greatest exporting country in the world, not even England being excepted, and its exports are almost exclusively manufactured articles.

GATHERING OPIUM.

How the Petals and Juice of the Poppy Plant Are Procured.

It is a sort of garden cultivation, the poppy plants being grown in little squares or beds intersected by tiny water channels for irrigation wherever this is possible. The growth of the plants is carefully tended, and at length the time comes when they burst out into flower, and the fields look like a sheet of silver as the white petals of the flowers glisten in the morning dew.

These beautiful petals are the first produce of the crop, for the women and children of the cultivators' families come forth and pick them off one by one and carefully dry them, so that they may serve afterward as the covering of the manufactured cakes of opium. Then the poppies, with their bare capsule heads, remain standing in the open field until it is considered that they are ripe for lancing. The cultivators then come forth in the evening, and, with an implement not unlike the knives of a cupping instrument, they scarify the capsule on its sides with deep incisions, so that the juice may exude.

In the early morning the cultivators reappear with a scraping knife and their earthenware pots, and they scrape off the exuded juice and collect it in their pots. And this is crude opium.

A Historian's Reward.

On April 5, 1605, John Stow, tailor and historian, died. His minute and painstaking survey can never be overlooked by any one who wishes to know London of the sixteenth century. It contains a wealth of fact and detail and has, moreover, been described as the most picturesque of narratives. At the age of eighty years he was given by James I. as a reward for his many and useful books and chronicles—a license to beg!

"We have been pleased to grant," runs the license, "our Letters Patent under our great Seal of England thereby authorizing him to collect among our loving subjects their voluntary contributions and kind gratuities." When the license had been extended so as to avail for two years, it yielded from a single London parish the magnificent sum of seven and sixpence.

John Stow's monument is a pleasing work in terra cotta on the wall of St. Andrew's undershelf. The fire of London that destroyed so much spared the effigy of London's chronicler, so that the posterity for which he labored might photograph it.—London News.

What Can a Woman Do For a Man?

In Times of Suffering and Critical Illness She Can Honestly Recommend PAIN'S CELERY COMPOUND AS A SAYER OF LIFE AND A BANISHER OF DISEASE.

Woman's power for good in the home can never be truly estimated. In times of suffering and danger, her judgment and experience are invaluable, her smiles, words of cheer and comfort help to dispel gloom and sadness. The faithful, discerning wife has a full knowledge of the value of Paine's Celery Compound as a banisher of disease; she has had a personal experience with it; she noted its wonderful effects and cures; she has faith in its virtues, and recommends it with full confidence. Mr. J. H. Brown, Port Perry, Ont., says:

"I was troubled with kidney complaint; the doctors called it, an enlargement of the neck of the bladder. Be that as it may, I suffered the most intense pain. I applied to my physician for relief with but little encouragement; he thought the only way for me to obtain relief was to submit to an operation. I went home very much discouraged, and was prevailed on by my wife to try Paine's Celery Compound. I did, but with very little faith in it, purchase one bottle, but the results were marvellous, as I received immediate relief after taking it. The pain is all gone, and my skin, instead of being dry and harsh, it used to be, is as soft as velvet; in fact, I feel like a new man, and never felt better in my life than I do at present."

Faasy Negro—Hello, dere, Miss Smif, indignat Negress—Doan yo' flag me dat sudden, man. I ain't never seen yo' in all mah life befo', an' ef yo' do it agin', a lot o' people oll be walkin' slow behind' yo'-to-morrer.

HOW IS YOUR MOWER?

It doesn't pay to use an old worn out one. It doesn't pay to buy an inferior new one. It pays to buy the best. The best is the McCormick Vertical Lift. With it you can raise your cut-bar perpendicular in a moment without getting off your seat and in doing so you throw your mower out of gear automatically. No other mower possesses this feature, no other mower has so strong, simple and serviceable a foot-lift. No other mower has a draft-rod pulling so directly from the inside shoe. No other mower has so strong a frame. No other mower has such perfect gears. No other mower is so easily handled by man and team. No other mower runs in the same class. McCormick Harvesting Machines have been manufactured for seventy one years, and to day more than two millions of them are in use in every corner of the world. I have McCormick Mower Rakes, Reapers and Binders and the price is right. Examine them closely and compare with others. Call and see my stock of repairs.

GEO. N. CLARK
