

A Mother's Warning.

SPEAKS OF A TROUBLE THAT AFFECTS MANY YOUNG GIRLS.

Headaches, Dizziness, Heart Palpitation, Fickle Appetite and Patter the Early Symptoms and Patter the

From the Sun, Orangeville, Ont.

Hard study at school, coupled with the lack of attention which every young girl merging into womanhood should have, is responsible not only for the many pale faces and attenuated forms met with such lamentable frequency, but is responsible also for the loss of many valuable young lives.

First there is an occasional headache, and a sallowness of complexion, from which stages, if these early symptoms are neglected, the condition gradually grows worse and worse until decline or consumption sets in and death claims another victim of parental neglect.

Dr. Williams' Pink Pills cure all diseases that have their origin either in a poor or watery condition of the blood, or shattered nerves. It is because they make rich red blood and strengthen the nerves with every dose that they cure such troubles as anaemia, consumption in its early stages, nervous headache, St. Vitus' dance, rheumatism, partial paralysis, kidney trouble, indigestion, etc.

LONDON, Jan. 20.—The revived official figures published of British dairy imports show that Canada continues easily first in cheese, sending in 1901 three times as much as the United States, which has second place.

Canada received £3,697,780 and the United States £1,274,061.

Use Times reveals how the United States lost trade by the unscrupulous methods of makers of filled cheese who removed the natural butter fat from the milk and inserted inferior, cheaper fat. Canadians acquired a grip of the trade which they are not likely to relinquish.

Denmark is easily first in butter, supplying 43 per cent of British imports. Austria second, Siberia third. Canada and American supplies are erratic, though Canada received £1,008,002, against the United States £689,164.

Yellow will dye a splendid green using Magnetic Dyes—10 cents buys package and the result is sure.

The Whole Story in a letter: Pain-Killer (FERRY DAVIS) From Capt. F. Love, Police Station No. 5, Montreal.—'We frequently use FERRY DAVIS' PAIN-KILLER for pains in the stomach, rheumatism, sciatica, toothache, headache, cramps, and all afflictions which befall men in our position. I have no hesitation in saying that PAIN-KILLER is the best remedy to have near at hand.'

"STIFFLED" HEART

Ever feel that every breath would be your last—that the thumping, stifling sensations about your heart were crushing your life out?

Dr. Agnew's Cure for the Heart is the only absolutely unfailing remedy known and prescribed by eminent physicians. Its claims of potency are not heresy or false hope to the sufferer. It is not a spirit lifter to gather you up to the high pinnacle of expectancy only to drop you into a deeper mire of disease. It gives relief in thirty minutes. A few bottles cure the worst forms of heart malady.

HAMILTON, Ont., Jan. 24.—The council of the Board of Trade has passed a resolution disapproving of the proposed transfer of the management of the Intercolonial Railway to the Canadian Pacific Railway Company, and declining to join in a memorial to the government in favor of such a transfer.

More Home Knitters Wanted

Machine weighs 17 pounds. It is more wonderful than a sewing machine, just as durable, and higher speed.

To Work at Their Homes Under the Direction of The GLASGOW WOOLLEN CO. 37 MELINDA ST., TORONTO, To Fill Large Contracts—Good Wages Easily Earned.

We want a few more workers in this locality, at once, and in order to secure your co-operation without the delay of correspondence, we herewith explain our full plan in this advertisement. The work is simple, and the Machine is easily operated, and with the Guide, requires no teacher. If you wish to join our staff of workers let us hear from you promptly with the Contract, order form, and remittance, as a guarantee, and we will send machine and outfit to begin work at once.

OUR METHOD OF DOING BUSINESS

We wish to secure the services of families to do knitting for us in their homes. Our method is the same as adopted in England. We are the introducers of this plan and the largest knitting concern in Canada. After long experience, we have been able to produce an Automatic Machine by which all kinds of knitted goods are now done by our Family Machine, thereby enabling anyone of ordinary intelligence to quickly learn to do the work from the Instruction Guide. All we require is that you use the machine according to directions, and the operation being made expressly for this purpose, and the operation so simple, it cannot possibly make a mistake in its work.

The great demand now is for Bicycle Stockings, Woolen Socks, and Motormen's Mittens, and as we are unable to supply the demand, have taken this method of advertising for more help. The large export trade to the North-west Territories, British Columbia, the British Colonies, furnishes an unlimited demand for our goods, and with the combined co-operation of the many families we are employing, together with the large amount of knitting we are able to turn out, enables us to undersell any manufacturers of this class of goods, and we have sale for all the knitting we can have turned out.

The price we pay for finished bicycle stockings is \$10.00 per hundred, or at the rate of 10c per pair; woollen socks, 5c, and motormen's mittens, 12c a pair. All other work in proportion to size. The machine can be operated by any one of a family, able at one price a day, and where the time of a family is devoted to the work, you can readily see that \$15.00 or \$20.00 per week can be easily earned.

We furnish our workers all the materials, yarn, etc., free, and everything that is necessary for the work. We are furnishing the machines only for the exclusive use of those desiring to take employment with us, who must in order to become a member, send us this Contract Order Form, properly filled by them, and at least one good reference, and remittance accordingly, to give us the necessary assurance that the quantities of valuable yarn we may send from time to time will not be wasted or misappropriated. Our interests are mutual, and this confidence must be established if we are to succeed. We guarantee fair dealing and prompt payment for work, so do not ask us to deviate from our terms, as we cannot make a distinction with one and not another; besides, we are doing an extensive business, and must be governed by business principles. The manufactured price of the machine is \$15, and positively will not be sold to any others than those who will agree to do knitting for us.

There is a Large Demand by the Trade for this class of work. Our workers can depend upon it for this year, and if you engage with us (whole or spare time) we will keep you supplied with work as long as you do it satisfactorily for us and return it promptly. We entrust our workers with large quantities of valuable yarn, and as we give

NO CONNECTION WITH ANY OTHER COMPANY.

ARE YOU DEAF? ANY HEAD NOISES? DEAFNESS OR HARD HEARING ARE NOW CURABLE HEAD NOISES CEASE IMMEDIATELY.

ALL CASES OF DEAFNESS OR HARD HEARING ARE NOW CURABLE by our new invention. Only those born deaf are incurable. HEAD NOISES CEASE IMMEDIATELY. F. A. WERMAN, OF BALTIMORE, SAYS: Baltimore, Md., March 30, 1901. Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.

One of the most curious perquisites in connection with English coronations is the right of one of the peers to claim the bed and bedding used by the heir apparent on the night preceding the coronation. In olden times this was a perquisite of considerable value, as the "bedding" usually consisted of richly embroidered coverlets of velvet or silk, with priceless hangings of cloth of silver and gold.

Wall Staining. In making sizing dissolve half a pound of glue in a little hot water. Then pour on nearly a gallon of boiling water, stirring carefully all the time so that it may mix well. A little of this added to ordinary whitewash prevents the white from rubbing off on dresses, etc. Brushed while hot over a wall that is to be papered, it makes the paper stick better. A wall that has been whitewashed should be brushed over with hot vinegar before papering, or the paper will not stick.

Earning a Spanking. A lady who had company to tea reproved her little son several times, speaking, however, very gently. At last, out of patience with him, she said sharply, "Jimmy, if you don't keep still I'll send you away from the table!" "Yes, that's what you always do when there's company and there are not enough cakes to go round!" was the reply of the gifted youth.

Resourceful. "There was one occasion," said the train robber who was exchanging reminiscences with his companions, "when I came pretty near letting a chance go by." "But your presence of mind saved you?" "Exactly. I had hoarded a train and discovered that I had carelessly left all my firearms behind me. But the Black Raven Ranger was not to be daunted. I took the porter's white jacket and whisk broom. It was a little slow, but I got all there was before I quit."

Equal to Any Emergency. The story is told of the late Du Maurier that when a young man in Paris he was one day waited upon in his studio by a model who later became famous for her great beauty. "What do you sit for?" asked the young artist patronizingly. The model looked round the room and elevated her nose. "Oh, sir, landscape, if necessary."

A Miraculous Survivor. Hobbs—Tubbs is the most remarkable man I know. Tubbs—In what way? Hobbs—He weighs about 150 pounds, and according to his own account, has never eaten anything and hasn't had a good night's sleep for 20 years.—Chicago Herald.

"I have... figuring on time," remarked an erratic citizen yesterday, "and I have reached some rather interesting conclusions. I wanted to find out how much time man consumed in keeping tab on time, and I found that, if the whole world is considered in the computation, years would be crowded into a second of time.

"To illustrate what I mean, take a city where 100,000 watches are wound up every day. Now, it takes probably an average of 15 seconds to wind a watch. It would take, then, 1,500,000 seconds to wind 100,000 watches. This would mean 25,000 minutes or 530 hours and 10 minutes, or 25 days and 16 hours. I suppose there are in the city of New Orleans 100,000 watches and clocks to be wound up every day, so that nearly a month is spent in the city every day in winding watches and clocks.

"One man in a year's time would consume 5,475 seconds in winding his watch if he is prompt about it and is willing to give 15 seconds every day to this useful article. This would mean several hours during every year if he kept up the practice. Allowing 35 years as the average life, a man would spend 191,525 seconds, or 3,190 minutes and 41 seconds, or 530 hours and 10 minutes, or 22 days and 20 hours, in winding his watch."

What She Saw. It was at the Normal school that this happened, and the class laughed. It was a laugh on the teacher, too, but he didn't get angry, although it did break into the serious contemplation of serious studies with which he was trying to interest the students.

It was in the study of psychology, and they were discussing what ideas first entered the human mind when certain words were spoken or written—whether the mind thought of one certain object designated by the word or the whole general class which is embodied in that word. To experiment on this mental phenomenon in order to bring it more clearly to the attention of the students the professor said he would write a word on the board and then let one of them tell instantly what impression was made upon her mind.

He called upon one of the pupils to be ready to think quickly and tell exactly what her first thought was after she saw the word which he was about to write. He stood close to the board, so that the word was hidden by his shoulders until he turned. He wrote the word "pig," and all of the class saw it except the girl who was standing ready to make reply. When he turned, he didn't get out of her way, and she couldn't see the word. In reply to his sharp, quick question, "Now, what do you see?" she replied naively, "I see you." And the class laughed.

Advice in His Answers. The Rev. John McNeill was holding a revival service at Cardiff, Wales, and announced that he would answer any question about the Bible. At once a note was sent up to him reading as follows:

"Dear Mr. McNeill—If you are seeking to help young men, kindly tell me who was Cain's wife." That seemed a poser, and the audience waited with intense interest, tempered with amusement, to see how the good man would extricate himself. After a pause he said: "I love young men, especially young inquirers for light, and I would give this young man a word of advice. It is this: Don't lose your soul's salvation looking after other people's wives."

The Inventor of the Flooding Mill. About the year 70 B. C. Mithridates, King of Cappadocia, one of the most ingenious and able princes of the time, invented the first mill driven by water. This triumph of his skill and ingenuity he caused to be erected in the immediate vicinity of the royal palace. In the course of time the Cappadocian bakers became celebrated and were in great demand throughout all parts of the world as then known.

These mills were usually placed upon boats on the river, being so elevated and contrived as to be easily driven by the water, and the millers were thus enabled to move from place to place, distributing the meal to their customers.

A Professional Blunder. "I am satisfied now that I have made a professional blunder in your case," the physician said, noting the symptoms of his patient. "A blunder, doctor? Don't I seem to be improving fast enough?" "You are improving too fast. Your malady had begun to interest me exceedingly, and I wanted to see what it would develop into if allowed to run, but I stupidly gave you a prescription that has knocked it entirely out of your system."

Not Correlative. Mrs. Housekeep—Do you really mean to say you are looking for work? Harvard Hasbeen—No, lady; that's neither what I said nor what I meant to say. I said I was looking for employment.

Settled. Two ladies contended for precedence in the court of Charles V. They appealed to the monarch, who, like Solomon, awarded, "Let the eldest go first." Such a dispute was never known afterward.

In the fourteenth century the slaughter of women and children after a town or castle had been taken by storm was one of the most common occurrences of war.

The rooster makes two-thirds of the noise, but the hen does all the work.—Chicago News.

QUEEN HOTEL, FREDERICTON, N. B. First-class Livery Stables in connection.
